c. Subparagraph (3) is amended by deleting the frequencies 394 kc, 400 kc, and 410 kc.

d. Subparagraph (4) is deleted.

16. Section 8.322 (a) is amended by changing the phrase "365 to 515 kc" to read "405 to 535 kc."

17. Section 8.323 is amended as follows:

a. Paragraph (a) is amended by changing the phrase "365 and 515 kc" to read "405 and 535 kc."

b. Paragraph (b) is amended by changing the phrase "100 to 160 kc" in each of two places therein to read "90 to 160 kc."

18. Section 8.324 (b) is amended by revising this paragraph to read as follows:

(b) Ship and aircraft stations using telegraph and working on frequencies within the band 415 to 490 kc shall use whenever practicable, an authorized working frequency of which 425, 448, 454, or 480 kc is the assigned frequency. The frequency 448 kc may be used in Region 2 only.

19. Section 8.324 (f) is amended as follows:

a. In subparagraph (1) change the phrase "110 to 184 kc" to read "110 to 150 kc."

b. In subparagraph (2) change the phrase "385 to 485 kc" to read "415 to 490 kc."

20. Section 8.327 (a) (2) is amended by changing the phrase "365–515 kc" to read "405–535 kc."

21. Section 8.330 is amended as follows:

a. In subparagraph (a) (1) change the phrase "100 to 515 kc" to read "90 to 535 kc."

b. In paragraph (b) change the phrase "100 to 515 kc" to read "90 to 535 kc."

22. Section 8.403 is amended by modifying the first sentence to read as follows: "Provided * * *, that equipment may be operated (outside the territorial waters of a foreign country) on such radio-channels within the band 285–325 kc (285–315 Mc only in Region 1) as may be expressly authorized in each case by the Commission under authority of the ship station license, with A1 or A2 emission and a maximum plate input power of 30 watts, provided that interference shall not be caused by such operation to any maritime radionavigation service."

23. Sections 14.11, 14.12 and 14.13 are deleted.

24. A new § 14.10 is added to read as follows:

§ 14.10 *Frequencies for communication from non-Government to Government and between non-Government stations.* The following frequency is allocated for communication from non-Government to Government stations, and between non-Government stations using A1 emission, maximum authorized transmitter power 650 watts:

149.60 kc

a. Section 14.38 (a) is amended to read as follows:

"(a) *Calling and working.* 416 and 438 kc, A1, A2 emission, maximum authorized transmitter power 265 watts.

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

ESCAMBIA COUNTY COOPERATIVE, INC.

DEPOSTING OF STOCKYARD

It has been ascertained that the Escambia County Cooperative, Inc., Brewton, Alabama, originally posted on April 30, 1941, as being subject to the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 181 et seq.), no longer comes within the definition of a stockyard under said act for the reason that it no longer meets the area requirements. Therefore, notice is given to the owner of such stockyard and to the public that such stockyard is no longer subject to the provisions of said act.

Notice of public rule making has not preceded promulgation of the foregoing rule since it is found that the giving of such notice would prevent the due and timely administration of the Packers and Stockyards Act and would, therefore, be impractical. There is no legal warrant or justification for not deposting promptly a stockyard which no longer meets the area requirements of the act and is, therefore, no longer a stockyard within the definition contained in said act.

The foregoing rule is in the nature of a rule granting an exemption or relieving a restriction and, therefore, may be made effective in less than 30 days after publication thereof in the FEDERAL REGISTER. This notice shall become effective upon publication in the FEDERAL REGISTER.

(42 Stat. 159, as amended and supplemented; 7 U. S. C. 181 et seq.)

Done at Washington, D. C., this 22d day of July 1952.

H. E. REED,
Director, Livestock Branch, Production and Marketing Administration.

DEPARTMENT OF COMMERCE

Federal Maritime Board

SNOW TRANSPORTATION COMPANY; INCREASED RATES

NOTICE OF HEARING

This case involves increased rates of Snow Transportation Company on traffic between ship's landing and Bethel, Alaska, between Akiak and ship's landing, Alaska, and between Akiak and Bethel, Alaska. Protests were received by the Board from the Governor of Alaska and the Bethel Chamber of Commerce, alleging that the proposed increases were unjustified. On May 28, 1952, the Board ordered that the proposed increased rates be suspended pending a hearing as to their lawfulness.

Notice is hereby given that a public hearing on the lawfulness of the said proposed increased rates will be held before Examiner F. J. Horan in the Bethel schoolhouse, Bethel, Alaska, on August 11, 1952, at 10 o'clock a. m.

All persons desiring to intervene in this proceeding are requested to notify the Board immediately, and should file petitions of intervention in accordance with the rules of procedure.

Dated: July 23, 1952.

By order of the Federal Maritime Board.

[SEAL] R. L. MCDONALD,
Assistant Secretary.

DEPARTMENT OF LABOR

Division of Public Contracts

TEXTILE INDUSTRY

NOTICE OF HEARING ON PROPOSED AMENDMENT WITH RESPECT TO PREVAILING MINIMUM WAGE

The Secretary of Labor, in a minimum wage determination issued pursuant to the provisions of the Walsh-Healey Public Contracts Act (act of June 30, 1936, 49 Stat. 2036; 41 U. S. C. secs. 35–45) and made effective November 16, 1948 (13 F. R. 6083), determined the minimum wage for persons employed in the Textile Industry in the performance of contracts with agencies of the United States Government subject to the act to be not less than 87 cents an hour. This determination also authorized employment of learners or beginners at rates not less than 80 cents an hour for a learning period not longer than 240 hours. This determination is currently in effect as editorially revised and published in the FEDERAL REGISTER on July 20, 1950 (15 F. R. 4654).

The Textile Workers Union of America, CIO, has submitted a petition to the Administrator, dated January 23, 1952, for the establishment of a minimum wage of $1.135 with a wage escalator provision of one cent quarterly adjustment for each 1.32 rise in the Consumer's Price Index (Old Series) beginning with February 15, 1951, and urging retention of the currently effective definition of the industry.

The United Textile Workers Union, AFL, has submitted a petition to the Administrator, dated March 4, 1952, for determination of a minimum wage of $1.13 with an escalator clause and the other fringe benefits of vacations with pay and holiday and shift premiums as provided in its collective bargaining agreements.

The currently effective industry definition (15 F. R. 4634; 41 CFR 202.43) reads as follows:

(a) *Definition.* For the purpose of this determination the term "textile industry" means:

(1) The manufacturing or processing of yarn or thread and all processes preparatory thereto, and the manufacturing, bleaching, dyeing, printing and other finishing of woven fabrics (other than carpets and rugs containing any wool) from cotton, flax, jute, other vegetable fiber, silk, grass, or any synthetic fiber, or from mixtures of these fibers; or from such mixtures of these fibers with wool or animal fiber (other than silk) as are specified in subparagraphs (7) and (8) of this paragraph; except the chemical manufacturing of synthetic fiber and such related processing of yarn as is conducted in establishments manufacturing synthetic fiber;

(2) The manufacturing of batting, wadding, or filling and the processing of waste from the fibers enumerated in subparagraph (1) of this paragraph;

(3) The manufacturing, bleaching, dyeing, or other finishing of pile fabrics or cords (except carpets and rugs containing any wool) from any fiber or yarn;

(4) The processing of any textile fabric, included in this definition of this industry, into any of the following products: Bags, bandages and surgical gauze, bath mats and related articles, bedspreads, blankets, diapers, dishcloths, scrubbing cloths and washcloths, sheets and pillow cases, tablecloths, lunch-cloths, napkins, towels, window curtains, shoe laces and similar laces;

(5) The manufacturing or finishing of braid, net or lace from any fiber or yarn;

(6) The manufacturing of cordage, rope or twine from any fiber or yarn including the manufacturing of paper yarn and twine;

(7) The manufacturing or processing of yarn (except carpet yarn containing any carpet wool) or thread by systems other than the woolen system from mix-

tures of wool or animal fiber (other than silk) with any of the fibers designated in subparagraph (1) of this paragraph, containing not more than 45 percent by weight of wool or animal fiber (other than silk);

(8) The manufacturing, bleaching dyeing, printing or other finishing of woven fabrics (other than carpets and rugs) from mixtures of wool or animal fiber (other than silk) containing not more than 25 percent by weight of wool or animal fiber (other than silk), with any of the fibers designated in subparagraph (1) of this paragraph, with a margin of tolerance of 2 percent to meet the exigencies of manufacture;

(9) The manufacturing, dyeing, finishing or processing of rugs, or carpets from grass, paper, or from any yarn or fiber except yarn containing any wool but not including the manufacturing by hand of such products.

Now, therefore, notice is hereby given: That a public hearing will be held on Thursday, September 4, 1952, at 10:00 a. m. in Room 1214 of the Department of Labor, Constitution Avenue and Fourteenth Street Northwest, Washington, D. C., before the Administrator of the Wage and Hour and Public Contracts Divisions, or a representative designated to preside in his place, at which hearing all interested persons may appear and submit data, views and argument (1) as to what are the prevailing minimum wages in the Textile Industry; (2) as to whether there should be included in any amended determination for this industry provision for employment of learners, beginners and/or apprentices at subminimum rates, and if so, in what occupations, at what subminimum rates and with what limitations, if any, as to length of period and number or proportion of such subminimum rate employees; and (3) as to the propriety of the present definition of this industry.

There will be available for distribution to interested parties upon request to the Wage and Hour and Public Contracts Divisions, United States Department of Labor, Washington, D. C., wage data released by the Bureau of Labor Statistics in addition to a number of special tabulations prepared by that Bureau at the request of the Administrator of the Wage and Hour and Public Contracts Divisions. Such wage data as are provided by interested parties sufficiently in advance of the hearing to permit general distribution thereof will also be made available.

Persons intending to appear are requested to notify the Administrator of their intention in advance of the hearing. Written statements in lieu of personal appearance may be filed by mail at any time prior to the date of the hearing, or may be filed with the presiding officer at the hearing. An original and four copies of any such statement should be filed.

Persons who wish to appear should be prepared to testify with respect to the adequacy and accuracy of the wage data prepared by the Bureau of Labor Statistics and any data submitted by the petitioners or others, and also to present specific factual information in support or in derogation of the adequacy and accuracy of such data, including information as to changes in the wage structure of the industry since the time of the BLS survey, in March of 1952.

The following information is particularly invited with respect to the subject matter of the testimony or statements of each witness: (1) The number of workers covered in the presentation; (2) the number and location of establishments; (3) minimum wages paid at the end of a probationary or learner period, the number of workers receiving such wages, and the occupations in which these employees are found; (4) the entrance rate for learners, beginners or probationary workers, the length of such learning or probationary period, and the number of workers paid such entrance rates; and (5) the product or products made by the establishments included.

To the extent possible, data should be submitted in such a manner as to permit evaluation thereof on a plant by plant basis.

In the discretion of the Presiding Officer, a period of not to exceed 30 days from the close of the hearing may be allowed for the filing of comment on the evidence and statements introduced into the record of the hearing. In the event such supplemental statements are received an original and four copies of each such statement should be filed.

Signed at Washington, D. C., this 23d day of July 1952.

WM. R. McCOMB,
Administrator, Wage and Hour and Public Contracts Division.

Wage and Hour and Public Contracts Divisions

EMPLOYMENT OF HANDICAPPED CLIENTS BY SHELTERED WORKSHOPS

ISSUANCE OF SPECIAL CERTIFICATES

Notice is hereby given that special certificates authorizing the employment of handicapped clients at hourly wage rates lower than the minimum wage rates applicable under section 6 of the Fair Labor Standards Act of 1938, as amended, and section 1 (b) of the Walsh-Healey Public Contracts Act, as amended, have been issued to the sheltered workshops hereinafter mentioned, under section 14 of the Fair Labor Standards Act of 1938, as amended (sec. 14, 52 Stat. 1068; 29 U. S. C. 214; as amended 63 Stat. 910), and Part 525 of the regulations issued thereunder, as amended (29 CFR Part 525), and under sections 4 and 6 of the Walsh-Healey Public Contracts Act (secs. 4, 6, 49 Stat. 2038; 41 U. S. C. 38, 40) and Article 1102 of the regulations issued pursuant thereto (41 CFR 201.1102).

The names and addresses of the sheltered workshops to which certificates were issued, wage rates, and the effective and expiration dates of the certificates are as follows:

Community Workshops of Rhode Island, Inc., 79–83 North Main Street, Providence 3, R. I.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 10 cents per hour for an evaluation period of 140 hours and a training period of 140 hours, and 20 cents per hour thereafter, whichever is higher. Certificate is effective July 1, 1952, and expires June 30, 1953.

The Sheltered Workshop of the Boston Tuberculosis Association, 35 Tyler Street, Boston, Mass.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 25 cents per hour, whichever is higher. Certificate is effective July 1, 1952, and expires June 30, 1953.

The New York Association for the Blind, Industrial Division, 36–20 Northern Boulevard, Long Island City 1, New York; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 50 cents per hour, whichever is higher. Certificate is effective July 1, 1952, and expires June 30, 1953.

Central Association for the Blind, Inc., 301 Court Street, Utica 4, N. Y.; at a wage rate of not less than the piece rate paid nonhandicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than the applicable hourly rate during the periods hereinafter specified, whichever is higher: 10 cents per hour for an evaluation period of 320 hours for the Sewing Room, and an evaluation period of 240 hours for the Rug Weaving Department, followed by 40 cents per hour for the entire shop with the exception of the Mat Weaving and Hand Sewing Departments including homeworkers; and 10 cents per hour for the Mat Weaving and Hand Sewing Departments including homeworkers. Certificate is effective July 7, 1952, and expires June 30, 1953.

Goodwill Industries of Philadelphia, Inc., 1705 West Alleghany Avenue, Philadelphia 32, Pennsylvania; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 20 cents per hour for an evaluation period of 40 hours and a training period of 80 hours, and 45 cents per hour thereafter, whichever is higher. Certificate is effective July 1, 1952, and expires June 30, 1953.

Charlotte Workshop for the Blind, 1702 North Brevard Street, Charlotte, N. C.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 10 cents per hour for an evaluation period of 80 hours and a training period of 80 hours, and 55 cents per hour thereafter, whichever is higher. Certificate is effective July 1, 1952, and expires June 30, 1953.

Lions Club Workshop for the Blind, 104 South Maple Street, Durham, N. C.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 10 cents per hour for an evaluation period of 80 hours and a training period of 80 hours, and 50 cents per hour thereafter, whichever is higher. Certificate is effective July 1, 1952, and expires June 30, 1953.

Guilford Industries for the Blind, 920 West Lee Street, Greensboro, N. C.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 10 cents per hour for an evaluation period of 80 hours and a training period of 80 hours, and 50 cents per hour thereafter, whichever is higher. Certificate is effective July 1, 1952, and expires June 30, 1953.

Jewish Home for Aged, 11501 Petoskey Avenue, Detroit 4, Mich.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 5 cents per hour for an evaluation period of 40 hours and a training period of 40 hours, and 8 cents per hour thereafter, whichever is higher. Certificate is effective June 5, 1952, and expires October 31, 1952.

The Goodwill Industries of Zanesville, 108 Main Street, Zanesville, Ohio; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 10 cents per hour for a training period of 40 hours, and 40 cents thereafter, whichever is higher. Certificate is effective July 1, 1952, and expires June 30, 1953.

Christ Mission Goodwill Industries, 330 East Boardman Street, Youngstown, Ohio; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 15 cents per hour for a training period of 40 hours, and 30 cents thereafter, whichever is higher. Certificate is effective July 1, 1952, and expires June 30, 1953.

Bethel Goodwill Industries, 621 Norton Drive, Ashtabula, Ohio; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than the applicable hourly rates during the periods hereinafter specified, whichever is higher: Salvage Workshop, 15 cents per hour for a training period of 40 hours and 40 cents thereafter; Sewing Department, 15 cents per hour for an evaluation period of 40 hours and a training period of 80 hours, and 40 cents thereafter. Certificate is effective July 2, 1952, and expires June 30, 1953.

Lincoln Goodwill Industries, Inc., 1822 N Street, Lincoln, Nebr.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 40 cents per hour for an evaluation period of 40 hours and a training period of 40 hours, and 45 cents thereafter, whichever is higher. Certificate is effective June 30, 1952, and expires May 31, 1953.

Pueblo Goodwill Industries, 130 South Union, Pueblo, Colo.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 60 cents per hour, whichever is higher. Certificate is effective May 29, 1952, and expires December 31, 1952.

Iowa Society for Crippled Children and Adults, Inc., 2917 Grand Avenue, Des Moines 12, Iowa; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 10 cents per hour for an evaluation period of 80 hours and a training period of 120 hours, and 25 cents per hour thereafter, whichever is higher. Certificate is effective June 1, 1952, and expires May 31, 1953.

The Rehabilitation Institute, 3600 Troost, Kansas City 3, Mo.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 5 cents per hour for an evaluation period of 120 hours and a training period of 80 hours, and 15 cents thereafter, whichever is higher. Certificate is effective June 30, 1952, and expires May 31, 1953.

The Lighthouse for the Blind (formerly Industrial Aid for the Blind), 2315–21 Locust Street, St. Louis 3, Mo.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than the applicable hourly rates during the periods hereinafter specified, whichever is higher: Entire Shop, 25 cents per hour during an evaluation period of 160 hours, and 32 cents thereafter, and the following rates and training periods applicable to the Divisions listed: Broom Division and Sewing Division, 25 cents per hour during a training period of 160 hours in each such Division, and 32 cents thereafter; Mat Division, Mop Division, and Rug Division, 25 cents per hour during a training period of 80 hours in each such Division, and 32 cents thereafter. Certificate is effective June 11, 1952, and expires November 30, 1952.

Goodwill Industries of Arizona, 910 East Sherman St., Phoenix, Ariz.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 50 cents per hour for an evaluation period of 160 hours, and 70 cents thereafter, whichever is higher. Certificate is effective June 21, 1952, and expires June 20, 1953.

The Volunteers of America, West 28 Main Avenue, Spokane 1, Wash.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 46 cents per hour for an evaluation period of 160 hours and 65 cents per hour thereafter, whichever is higher. Certificate is effective July 15, 1952, and expires January 24, 1953.

Goodwill Industries of Orange County, California, 417 West Fourth Street, Santa Ana, Calif.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 50 cents per hour for an evaluation period of 160 hours, and 65 cents thereafter, whichever is higher. Certificate is effective July 25, 1952, and expires January 24, 1953.

Seattle Goodwill Industries, 1400 Lane Street, Seattle 44, Wash.; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 50 cents per hour for an evaluation period of 160 hours, and 60 cents thereafter, whichever is higher. Certificate is effective July 24, 1952, and expires July 23, 1953.

The employment of handicapped clients in the above-mentioned sheltered workshops under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 525 of the regulations, as amended. These certificates have been issued on the applicants' representations that they are sheltered workshops as defined in the regulations and that special services are provided their handicapped clients. A sheltered workshop is defined as, "A charitable organization or institution conducted not for profit, but for the purpose of carrying out a recognized program of rehabilitation for individuals whose earning capacity is impaired by age or physical or mental deficiency or injury, and to provide such individuals with remunerative employment or other occupational rehabilitating activity of an educational or therapeutic nature."

These certificates may be canceled in the manner provided by the regulations, as amended. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within 15 days after publication of this notice in the FEDERAL REGISTER.

Signed at Washington, D. C., this 15th day of July 1952.

JACOB I. BELLOW,
Acting Assistant Administrator.

CIVIL AERONAUTICS BOARD

[Serial No. SR-364-A]

SPECIAL CIVIL AIR REGULATION

OPERATION BY TRANSOCEAN AIR LINES OF CERTAIN AIRCRAFT IN TRUST TERRITORY OF PACIFIC ISLANDS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 18th day of July 1952.

Special Civil Air Regulation SR–364 presently provides authorization to Transocean Air Lines for certification and operation of four PBY–5A aircraft between various islands in the Trust Territory of the Pacific Islands and the island of Guam. Such operations have been conducted pursuant to a certain contract between Transocean Air Lines and the Department of the Navy, which contract was subsequently assigned by the Department of the Navy to the Department of the Interior. The aforementioned contract expires on July 30, 1952, and Transocean Air Lines and the Department of the Interior have agreed to enter into a new or extended contract covering the same operations with the same aircraft.

Paragraph 1 (c) of Special Regulation SR–364 predicates the amendment of Transocean's air carrier operating certificate on the terms of the contract between Transocean and the Department of the Navy. Since operations under the proposed new contract between Transocean Air Lines and the Department of the Interior would technically not be authorized by Special Regulation SR–364, the Board considers that paragraph 1 (c) should be amended to provide authorization for identical operations under any such contract or extension thereof entered into between Transocean Air Lines and the Department of the Interior.

Because Transocean Air Lines is the only carrier affected by this amendment and has requested the relief herein granted and because this amendment is minor in nature, notice and public procedure hereon are unnecessary, and since it relieves the said carrier from restriction, the Board finds that good cause exists to make this regulation effective immediately.

In consideration of the foregoing the Civil Aeronautics Board hereby amends paragraph 1 (c) of Special Civil Air Regulation SR–364 effective immediately, as follows:

By substituting a comma for the period at the end of paragraph 1 (c) and by adding the following language: "or pursuant to any contract or extension thereof subsequently entered into between Transocean Air Lines and the Department of the Interior but only with respect to the points specified in section 1."

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 604, 52 Stat. 1007, 1010; 49 U. S. C. 551, 554)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

COAST STATIONS CURRENTLY AUTHORIZED TO OPERATE ON DESIGNATED FREQUENCIES IN THE BAND 14–150 Kc, 150–200 Kc AND 200–535 Kc

ORDER TO SHOW CAUSE WITH RESPECT TO MODIFICATION OF LICENSES

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 10th day of July 1952;

The Commission having under consideration the matter of modifying as of August 15, 1952, November 1, 1952, and December 1, 1952, respectively, the licenses of coast stations now operating on frequencies in the band 14–150 kc, in the band 200–535 kc, and in the band 150–200 kc by authorizing their operation on frequencies other than those now authorized in order to permit the United States to put into effect the Atlantic City (1947) Table of Frequency Allocations in these bands;

It appearing, that the agreement concluded at the Extraordinary Administrative Radio Conference (Geneva, 1951) to which the United States is a signatory requires the implementation of the bands 14–150 kc by August 15, 1952, the band 200–535 kc by November 1, 1952, and the band 150–200 kc by December 1, 1952, and that such implementation will require that the licenses of coast stations now operating on certain frequencies be modified to specify frequencies which are in accordance with the agreement; and

It further appearing, that the Commission has this date issued a Notice of Proposed Rule Making [1] which, among other matters, proposes to modify its rules so as to make unavailable to coast stations certain currently assignable frequencies in the bands 14–150 kc, 150–200 kc and 200–535 kc and simultaneously proposes to make available to coast stations certain other frequencies which are allocated for the use of such stations under the agreement;

It is ordered, That pursuant to the provisions of section 312 (b) of the Communications Act of 1934, as amended, the licensees of coast stations authorized to operate on a frequency or frequencies within the bands 14–150 kc, 150–200 kc and 200–535 kc are directed to show cause, on or before July 28, 1952, why the licenses of said coast stations should not be modified as of August 15, 1952, November 1, 1952, and December 1, 1952, respectively, so as to delete the authority to operate on the frequencies designated in the Appendix A set forth below and to substitute therefor authority to operate on the frequencies and at the locations and with power and emission shown in the Appendix B set forth below, in the event that the Commission has finalized its proposal to amend its rules as described in the preceding paragraph, and in the event no applications are filed with the Commission which are mutually exclusive with any of the modified assignments proposed in Appendix B.

Released: July 14, 1952.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

WABX, INC., AND HARRISBURG BROADCASTERS, INC.

ORDER DESIGNATING APPLICATION FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of WABX, Inc., Harrisburg, Pennsylvania, Docket No. 8619, File No. BPCT-201; Harrisburg Broadcasters, Inc., Harrisburg, Pennsylvania, Docket No. 10281, File No. BPCT-986; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 11th day of July 1952.

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 71 in Harrisburg, Pennsylvania; and

It appearing, that the above-entitled applications are mutually exclusive in that only one of the applications may be granted for operation on Channel 71 in Harrisburg, Pennsylvania;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding at a time and place to be designated by subsequent order of the Commission upon the following issues:

1. To determine the legal, technical, financial and other qualifications of the applicants to construct and operate the proposed stations.

2. To determine the type and character of the program services proposed to be rendered and whether they would meet the needs of the communities and areas within the Grade A and Grade B field intensity contours.

3. To determine whether the construction and operation of the proposed stations would be in compliance with the Commission's rules and regulations governing television broadcast stations.

4. To determine whether the installation and operation of the stations proposed by WABX, Inc., and Harrisburg Broadcasters, Inc., in the above-entitled applications would constitute a hazard to air navigation.

5. To determine on a comparative basis which, if either, of the above-entitled applications should be granted.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

AMERICAN-REPUBLICAN, INC., AND WATR, INC.

ORDER DESIGNATING APPLICATION FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of American-Republican, Incorporated, Waterbury, Connecticut, Docket No. 8624, File No. BPCT-204; WATR, Inc., Waterbury, Connecticut, Docket No. 10277, File No. BPCT-965; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 11th day of July 1952:

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 53 in Waterbury, Connecticut; and

It appearing that the above-entitled applications are mutually exclusive in that only one of the applications may be granted for operation on Channel 53 in Waterbury, Connecticut;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding at a time and place to be designated by subsequent order of the Commission upon the following issues:

1. To determine the legal, technical, financial and other qualifications of the applicants to construct and operate the proposed stations.

2. To determine the type and character of the program services proposed to be rendered and whether they would meet the needs of the communities and areas within the Grade A and Grade B field intensity contours.

3. To determine whether the construction and operation of the proposed stations would be in compliance with the Commission's rules and regulations governing television broadcast stations.

4. To determine whether the installation and operation of the stations proposed by American-Republican, Incorporated, and WATR, Inc., in the above-entitled applications, would constitute a hazard to air navigation.

5. To determine on a comparative basis which, if either, of the above-entitled applications should be granted.

[Docket Nos. 8716, 9503, 9504]

GREENWICH BROADCASTING CORP. ET AL.

ORDER SCHEDULING HEARING

In re applications of Greenwich Broadcasting Corporation, Greenwich, Connecticut, Docket No. 8716, File No. BP-6315, for construction permit; World Wide Broadcasting Corporation, Scituate, Massachusetts, Docket No. 9503, File Nos. BRIB-23, BRIB-12, BRIB-16, BRIB-26, BRIB-24, for renewal of licenses of Stations WRUL (1), (2), (3), (4), and (5); World Wide Broadcasting Corporation, WRUL (4), Docket No. 9504, File No. BPIB-63, for construction permit.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 16th day of July 1952;

The Commission having under consideration a petition filed by Greenwich Broadcasting Corporation on May 20, 1952, requesting separate consideration of its application for a new standard broadcast station at Greenwich, Connecticut; and

It appearing, that on November 16, 1949, this application was designated for consolidated hearing with the above-entitled applications of World Wide Broadcasting Corporation on the following issues:

1. To determine, in the light of the evidence adduced under the issues set forth in the Commission's order of this date concerning the World Wide Broadcasting Corporation, the legal, technical, financial, and other qualifications of the Greenwich Broadcasting Corporation, its officers, directors, and stockholders to construct and operate the station it proposes.

2. To determine whether the proposed operation of the Greenwich Broadcasting Corporation would involve objectionable interference with stations WHOM, Jersey City, N. J.; WNLC, New London, Conn. and WBUD, Morrisville, Pa. or with any other existing broadcast stations and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other broadcast service to such areas and populations.

3. To determine whether the operation of the proposed station would involve objectionable interference with the services proposed in any other pending applications for broadcast facilities and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other broadcast services to such areas and populations.

4. To determine whether the installation and operation of the proposed station would be in compliance with the Commission's rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations.

5. To determine, in the light of the evidence adduced under the foregoing issues, whether the public interest, convenience, or necessity would be served by a grant of the subject application; and

It further appearing, that this action was taken in part because Walter S. Lemmon, an officer, director and principal stockholder of World Wide Broadcasting Corporation was also an officer, director and principal stockholder of Greenwich Broadcasting Corporation, and that the Commission on November 16, 1949, also designated for hearing applications of World Wide Broadcasting Corporation for renewal of license of stations WRUL (1), (2), (3), (4) and (5) and for a construction permit for station WRUL (4), on grounds relating to the qualifications of the applicant corporation; and

It further appearing, that on August 1, 1950, World Wide Broadcasting Corporation filed a petition for reconsideration and grant, which has not been decided, and

It further appearing, that the hearing on the application of Greenwich Broadcasting Corporation has been continued without date, and

It further appearing, that, it would be in the public interest to commence the hearing on the application of Greenwich Broadcasting Corporation on those issues which have no connection with the qualifications of World Wide Broadcasting Corporation pending determination of the World Wide Broadcasting Corporation petition for reconsideration and grant;

It is ordered, That the application of Greenwich Broadcasting Corporation is scheduled for hearing with respect to issues 2, 3 and 4 above-listed to be held in Washington, D. C., on August 19, 1952; and

It is further ordered, That no initial decision be prepared in this matter until further order of the Commission.

Released: July 21, 1952.

HAWLEY BROADCASTING CO. AND EASTERN RADIO CORP.

ORDER DESIGNATING APPLICATION FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Hawley Broadcasting Company, Reading, Pennsylvania, Docket No. 8734, File No. BPCT-239; Eastern Radio Corporation, Reading, Pennsylvania, Docket No. 8735, File No. BPCT-268; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 11th day of July 1952;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 61 in Reading, Pennsylvania;

It appearing, that the above-entitled applications are mutually exclusive in that only one of the applications may be granted for operation on Channel 61 in Reading, Pennsylvania; and

It further appearing, that pursuant to Part 17 of the Commission's rules and regulations, the transmitter site and antenna system specified by Eastern Radio Corporation would not constitute a hazard to air navigation provided the obstruction marking is in accordance with certain designated specifications;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding at a time and place to be designated by subsequent order of the Commission upon the following issues:

1. To determine the legal, technical, financial and other qualifications of the applicants to construct and operate the proposed stations.

2. To determine the type and character of the program services proposed to be rendered and whether they would meet the needs of the communities and areas within the Grade A and Grade B field intensity contours.

3. To determine whether the construction and operation of the proposed stations would be in compliance with the Commission's rules and regulations governing television broadcast stations.

4. To determine whether the installation and operation of the station proposed by Hawley Broadcasting Company in the above-entitled application would constitute a hazard to air navigation.

5. To determine on a comparative basis which, if either, of the above-entitled applications should be granted.

MCCLATCHY BROADCASTING CO. AND SACRAMENTO TELECASTERS, INC.

ORDER DESIGNATING APPLICATION FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of McClatchy Broadcasting Company, Sacramento, California, Docket No. 9013, File No. BPCT-450; Sacramento Telecasters, Inc., Sacramento, California, Docket No. 10298, File No. BPCT-976; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 11th day of July 1952.

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 10 in Sacramento, California; and

It appearing that the above-entitled applications are mutually exclusive in that only one of the applications may be granted for operation on Channel 10 in Sacramento, California;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding at a time and place to be designated by subsequent order of the Commission upon the following issues:

1. To determine the legal, technical, financial and other qualifications of the applicants to construct and operate the proposed stations.

2. To determine the type and character of the program services proposed to be rendered and whether they would meet the needs of the communities and areas within the Grade A and Grade B field intensity contours.

3. To determine whether the construction and operation of the proposed stations would be in compliance with the Commission's rules and regulations governing television broadcast stations.

4. To determine whether the installation and operation of any of the stations proposed in the above-entitled applications would constitute a hazard to air navigation.

5. To determine on a comparative basis which, if any, of the above-entitled applications should be granted.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket Nos. 9041, 10240]

ALADDIN RADIO AND TELEVISION, INC., AND DENVER TELEVISION CO.

ORDER DESIGNATING APPLICATION FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Aladdin Radio and Television, Inc., Denver, Colorado, Docket No. 9041, File No. BPCT-426; Denver Television Company, Denver, Colorado, Docket No. 10240, File No. BPCT-951; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 11th day of July 1952;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 7 in Denver, Colorado; and

It appearing that the above-entitled applications are mutually exclusive in that only one of the applications may be granted for operation on Channel 7 in Denver, Colorado;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding at a time and place to be designated by subsequent order of the Commission upon the following issues:

1. To determine the legal, technical, financial and other qualifications of the applicants to construct and operate the proposed stations.

2. To determine the type and character of the program services proposed to be rendered and whether they would meet the needs of the communities and areas within the Grade A and Grade B field intensity contours.

3. To determine whether the construction and operation of the proposed stations would be in compliance with the Commission's rules and regulations governing television broadcast stations.

4. To determine whether the installation and operation of either of the stations proposed in the above-entitled applications would constitute a hazard to air navigation.

5. To determine on a comparative basis which, if either, of the above-entitled applications should be granted.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket Nos. 9895, 10234, 10235]

JOHN C. POMEROY ET AL.

ORDER DESIGNATING APPLICATION FOR CONSOLIDATED HEARING ON STATED ISSUES

In re application of John C. Pomeroy, Pontiac, Michigan, Docket No. 9895, File No. BP-7811; William R. Reed, Pontiac, Michigan, Docket No. 10234, File No. BP-8510; for construction permits; Southern Michigan Broadcasters (WSTR) Sturgis, Michigan, Docket No. 10235, File No. BML-1489; for modification of license.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 10th day of July 1952;

The Commission having under consideration the above-entitled applications of John C. Pomeroy and William R. Reed, each requesting the use of 1460 kc. with 500 w power, daytime only, at Pontiac, Michigan, and the application of Southern Michigan Broadcasters for modification of license to increase daytime power from 500 w to 1 kw on the frequency 1460 kc at Station WSTR, Sturgis, Michigan.

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the said applications are designated for hearing in a consolidated proceeding at a time and place to be specified by subsequent order, upon the following issues:

1. To determine the legal, technical, financial and other qualifications of the applicants and the technical, financial and other qualifications of the corporate applicant, its officers, directors and stockholders to operate the proposed stations.

2. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed stations and WSTR as proposed, and the availability of other primary service to such areas and populations.

3. To determine the type and character of program services proposed to be rendered and whether they would meet the requirements of the populations and areas proposed to be served.

4. To determine whether the operation of the proposed stations and WSTR as proposed would involve objectionable interference with any existing broadcast stations, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations.

5. To determine whether the operation of the proposed stations would involve objectionable interference, each with the other, or with the services proposed in any other pending applications for broadcast facilities, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations.

6. To determine whether the installation and operation of the proposed stations and WSTR as proposed would be in compliance with the Commission's rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations.

7. To determine the overlap, if any, which would exist between the service areas of Station WSTR as proposed and of Station WTVH, Coldwater, Michigan, the nature and extent thereof, and whether such overlap, if any, is in contravention of § 3.35 of the Commission's rules.

8. To determine on a comparative basis which, if any, of the applications in this consolidated proceeding should be granted.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[F. R. Doc. 52-8182; Filed, July 25, 1952; 8:48 a. m.]

[Docket No. 9964]

AZALEA BROADCASTING CO.

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of Charles W. Holt, Clarence H. Dossett, Dave A. Matison, Jr., and Bernard Reed Green, d/b as Azalea Broadcasting Company, Mobile, Alabama, Docket No. 9964, File No. BP-7830.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 10th day of July 1952;

The Commission having under consideration the above-entitled application requesting a construction permit for a new standard broadcast station to operate on 1340 kc, with 250 w power, unlimited time, at Mobile, Alabama.

It appearing, that the simultaneous operation of the proposals of Azalea Broadcasting Company and WSMB, Incorporated (File No. BP-7971; Docket 9965) would be expected to result in a certain measure of mutual interference but that the extent of such interference would be of a relatively low order and not in contravention of the Standards of Good Engineering Practice; and

It further appearing, that Azalea Broadcasting Company and WSMB, Incorporated, have agreed to accept whatever interference may ensue from the grant of both said applications and simultaneous operation pursuant thereto; and

It further appearing, that Azalea Broadcasting Company is legally, technically, financially and otherwise qualified to construct and operate its proposed station; but that the operation of such proposed station may not comply with the Commission's rules and Standards of Good Engineering Practice, with particular reference to coverage of the Mobile metropolitan district at night:

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the said application is designated for hearing at a time and place to be specified by subsequent order, upon the following issues:

1. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed station, and the availability of other primary service to such areas and populations.

2. To determine whether the operation of the proposed station would involve objectionable interference with any existing stations, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations.

3. To determine whether the operation of the proposed station would involve objectionable interference with the services proposed in any other pending applications for broadcast facilities, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations.

4. To determine whether the installation and operation of the proposed station would be in compliance with the Commission's rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations with particular reference to the nighttime coverage of the Mobile, Alabama metropolitan district.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket No. 10222]

KTRM, INC.

ORDER SCHEDULING HEARING

In re application of KTRM, Incorporated, Beaumont, Texas, Docket No. 10222, File No. BMP-5835; for modification of construction permit.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 16th day of July 1952;

The Commission having under consideration the above-entitled application, which was designated for hearing on June 19, 1952; and

It appearing, that no date was previously scheduled by the Commission in this proceeding;

It is ordered, That the hearing in the above-entitled proceeding be held at 10:00 a. m., August 6, 1952, in Washington, D. C.

Released: July 21, 1952.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket No. 10233]

SOUTHLAND BROADCASTING CO. (WATM)

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of Tom C. Miniard and Grady L. Ingram, d/b as Southland Broadcasting Company (WATM) Atmore, Alabama, Docket No. 10233, File No. BP-8113; for construction permit.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 10th day of July 1952.

The Commission having under consideration the above-entitled application to increase power of Station WATM which operates on the frequency 1580 kc, daytime only, at Atmore, Alabama, from 250 w to 1 kw; and

It appearing, that the applicant is legally, technically, financially and otherwise qualified to operate Station WATM, as proposed; but that the application may involve interference with one or more existing stations;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the said application is designated for hearing at a time and place to be specified by subsequent order, upon the following issues:

1. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed station, and the availability of other primary service to such areas and populations.

2. To determine whether the operation of the proposed station would involve objectionable interference with Station WPMP, Pascagoula, Mississippi, or with any other existing broadcast stations, and if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations.

3. To determine whether the operation of the proposed station would involve objectionable interference with the services proposed in any other pending applications for broadcast facilities, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations.

4. To determine whether the installation and operation of the proposed stations would be in compliance with the Commission rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations.

It is further ordered, That Crest Broadcasting Company, Inc., licensee of Station WPMP, Pascagoula, Mississippi, is made a party to this proceeding.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket No. 10236]

WFTW, INC.

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of WFTW, Inc., Ft. Walton, Florida, Docket No. 10236, File No. BP-8197; for construction permit.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 10th day of July 1952;

The Commission having under consideration the above-entitled application for construction permit to construct a new standard broadcast station to operate on 1490 kc, with 250 w power, unlimited time, at Ft. Walton, Florida; a

petition from Manatee Broadcasting Company, Inc. (WDHL) requesting that the application be designated for hearing and an answer thereto from the applicant.

It appearing, that the applicant is legally and technically qualified to construct and operate the proposed station but that it has not made a satisfactory showing of its financial ability to do so and also that the proposed operation may involve interference with Station WDHL which has protested a grant and made a showing of such probable interference, which showing has not been refuted by the applicant in accordance with the Standards of Good Engineering Practice;

It is ordered, That the petition of Manatee Broadcasting Company, Inc. is granted; and

It is further ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, and § 1.385 (c) of the Commission's rules, the said application is designated for hearing at a time and place to be specified by subsequent order, upon the following issues:

1. To determine the financial and other qualifications of the corporate applicant, its officers, directors and stockholders to operate the proposed station.

2. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed station, and the availability of other primary service to such areas and populations.

3. To determine whether the operation of the proposed station would involve objectionable interference with Station WDHL, Bradenton, Florida, or with any other existing broadcast stations, and, if so, the nature and extent thereof, the areas and populations affected thereby and the availability of other primary service to such areas and populations.

4. To determine whether the operation of the proposed station would involve objectionable interference with the services proposed in any other pending applications for broadcast facilities, and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other primary service to such areas and populations.

5. To determine whether the installation and operation of the proposed station would be in compliance with the Commission's rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations.

6. To determine the overlap, if any, which would exist between the service areas of the proposed station and of Station WBSR, Pensacola, Florida, the nature and extent thereof, and whether such overlap, if any, is in contravention of § 3.35 of the Commission's rules.

It is further ordered, That, Trail Broadcasting Corporation, licensee of Station WDHL, Bradenton, Florida, is made a party to this proceeding.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

ORDER DESIGNATING APPLICATION FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of E. V. Yingling, W. L. Hartman, Virgil S. Browne, Jr., George P. Hollingbery, and John D. Montgomery, d/b as Sunflower Television Company, Wichita, Kansas, Docket No. 10258, File No. BPCT-677; the Radio Station KFH Company, Wichita, Kansas, Docket No. 10259, File No. BPCT-698; Taylor Radio & Television Corporation, Wichita, Kansas, Docket No. 10260, File No. BPCT-946; Wichita Television Corporation, Inc., Wichita, Kansas, Docket No. 10261, File No. BPCT-961; Mid-Continent Television, Incorporated, Wichita, Kansas, Docket No. 10262, File No. BPCT-964; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 11th day of July 1952,

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 3 in Wichita, Kansas; and

It appearing that the above-entitled applications are mutually exclusive in that only one of the applications may be granted for operation on Channel 3 in Wichita, Kansas;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding at a time and place to be designated by subsequent order of the Commission upon the following issues:

1. To determine the legal, technical, financial and other qualifications of the applicants to construct and operate the proposed stations.

2. To determine the type and character of the program services proposed to be rendered and whether they would meet the needs of the communities and areas within the Grade A and Grade B field intensity contours.

3. To determine whether the construction and operation of the proposed stations would be in compliance with the Commission's rules and regulations governing television broadcast stations.

4. To determine whether the installation and operation of either of the stations proposed in the above-entitled applications would constitute a hazard to air navigation.

5. To determine on a comparative basis which, if any, of the above-entitled applications should be granted.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

[Docket Nos. 10256, 10257]

CITY OF ST. PETERSBURG, FLA., AND EMPIRE COIL CO., INC.

ORDER DESIGNATING APPLICATION FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of City of St. Petersburg, Florida, St. Petersburg, Florida, Docket No. 10256, File No. BPCT 665; Empire Coil Company, Inc., Tampa, Florida, Docket No. 10257, File No. BPCT 926; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 11th day of July 1952.

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 38 in Tampa-St. Petersburg, Florida; and

It appearing that the above-entitled applications are mutually exclusive in that only one of the applications may be granted for operation on Channel 38 in Tampa-St. Petersburg, Florida;

It is ordered, That, pursuant to section 309 (a) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding at a time and place to be designated by subsequent order of the Commission upon the following issues:

1. To determine the legal, technical, financial and other qualifications of the applicants to construct and operate the proposed stations.

2. To determine the type and character of the program services proposed to be rendered and whether they would meet the needs of the communities and areas within the Grade A and Grade B field intensity contours.

3. To determine whether the construction and operation of the proposed stations would be in compliance with the Commission's rules and regulations governing television broadcast stations.

4. To determine whether the installation and operation of any of the stations proposed in the above-entitled applications would constitute a hazard to air navigation.

5. To determine on a comparative basis which, if any, of the above-entitled applications should be granted.

[Docket Nos. 10272, 10273]

BRUSH-MOORE NEWSPAPERS, INC., AND STARK BROADCASTING CORP.

ORDER DESIGNATING APPLICATION FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of the Brush-Moore Newspapers, Inc., Canton, Ohio, Docket No. 10272, File No. BPCT-264; Stark Broadcasting Corporation, Canton, Ohio, Docket No. 10273, File No. BPCT-949; for

construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 11th day of July 1952.

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 29 in Canton, Ohio; and

It appearing, that the above-entitled applications are mutually exclusive in that only one of the applications may be granted for operation on Channel 29 in Canton, Ohio; and

It further appearing, that pursuant to Part 17 of the Commission's rules and regulations, the transmitter site and antenna system specified by the Brush-Moore Newspapers, Inc. does not require a special aeronautical study and would not constitute a hazard to air navigation provided the obstruction marking is in accordance with specifications B–6–17 of the rules.

It is ordered, That pursuant to section 309 (a) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding at a time and place to be designated by subsequent order of the Commission upon the following issues:

1. To determine the legal, technical, financial and other qualifications of the applicants to construct and operate the proposed stations.

2. To determine the type and character of the program services proposed to be rendered and whether they would meet the needs of the communities and areas within the Grade A and Grade B field intensity contours.

3. To determine whether the construction and operation of the proposed stations would be in compliance with the Commission's rules and regulations governing television broadcast stations.

4. To determine whether the installation and operation of the station proposed by Stark Broadcasting Corporation in the above-entitled application would constitute a hazard to air navigation.

5. To determine on a comparative basis which, if either, of the above-entitled applications should be granted.

FEDERAL POWER COMMISSION

[Docket No. G-1976]

PANHANDLE EASTERN PIPE LINE CO.

ORDER FIXING DATE OF HEARING

JULY 18, 1952.

On June 13, 1952, Panhandle Eastern Pipe Line Company (Applicant), a Delaware corporation having its principal place of business at Kansas City, Missouri, filed an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain natural-gas transmission facilities, subject to the jurisdiction of the Commission, as described in the application on file with the Commission and open to public inspection.

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, Applicant having requested that its application be heard under the shortened procedure provided by the aforesaid rule for noncontested proceedings, and no appropriate request to be heard, protest or petition raising an issue of substance having been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on June 27, 1952 (17 F. R. 5780).

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on August 7, 1952, at 9:30 a. m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by such application: *Provided, however*, That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: July 22, 1952.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

OFFICE OF DEFENSE MOBILIZATION

[CDHA 64]

FINDING AND DETERMINATION OF CRITICAL DEFENSE HOUSING AREAS UNDER THE DEFENSE HOUSING AND COMMUNITY FACILITIES AND SERVICES ACT OF 1951 (PUB. LAW 139, 82D CONG.)

JULY 24, 1952.

Upon a review of the construction of new defense plants and installations, and the reactivation or expansion of operations of existing defense plants and installations, and the in-migration of defense workers or military personnel to carry out activities at such plants or installations, and the availability of housing and community facilities and services for such defense workers and military personnel in each of the areas set forth below, I find that all of the conditions set forth in section 101 (b) of the Defense Housing and Community Facilities and Services Act of 1951 (Pub. Law 139, 82d Cong., 1st Sess.) exist.

Accordingly, pursuant to section 101 of the Defense Housing and Community Facilities and Services Act of 1951 and by virtue of the authority vested in me by paragraph number 1 of Executive Order 10296 of October 2, 1951, I hereby determine that each of said areas is a critical defense housing area.

Honolulu, Territory of Hawaii, Area. (The area consists of the Island of Oahu, Territory of Hawaii.)

JOHN R. STEELMAN,
Acting Director of Defense Mobilization.

JULY 22, 1952.

In the matter of General Public Utilities Corporation, Associated Electric Company, Pennsylvania Electric Company, File No. 70-2894.

General Public Utilities Corporation ("GPU"), a registered holding company, Associated Electric Company ("Aelec"), subsidiary of GPU and also a registered holding company, and Pennsylvania Electric Company ("Penelec"), subsidiary of Aelec and an operating utility company, having filed a joint application-declaration and an amendment thereto pursuant to sections 6 (a), 6 (b), 7, 9 (a), 10 and 12 of the Public Utility Holding Company Act of 1935 ("the act") and Rules U-23, U-45, and U-50 promulgated thereunder, with respect to the following transactions:

GPU proposes to make cash capital contributions to Aelec in the aggregate amount of $5,000,000. Penelec proposes to issue and sell to Aelec, and Aelec proposes to purchase from Penelec (utilizing for this purpose the cash contributions from GPU aforesaid) an aggregate of 250,000 additional shares of Common Stock ("Additional Common Stock") of Penelec for a purchase price equal to the par value thereof, namely, $20 per share, or an aggregate of $5,000,000.

Having obtained the consent of the holders of a majority of the shares of its outstanding Preferred Stock, Penelec proposes to increase the number of shares of its authorized Preferred Stock from 300,000 to 370,000 shares of the par value of $100 per share.

Penelec proposes publicly to invite bids for the purchase from it of $9,500,000 principal amount of additional First Mortgage Bonds ("New Bonds") and 45,000 additional shares of Cumulative Preferred Stock, par value $100 per share ("New Preferred Stock"), the price to Penelec to be specified in such bids and to be not less than 100 percent nor more than 102¾ percent of the principal amount or par value.

Penelec proposes to utilize the net proceeds of the New Bonds, New Preferred Stock, and Additional Common Stock, estimated at not less than $19,000,000, as follows:

(1) $7,000,000 will be used partially to reimburse Penelec's treasury for construction expenditures therefrom during the period June 30, 1951–April 30, 1952. Out of its treasury funds Penelec will pay its bank loans maturing in September 1952 in the aggregate principal amount of $2,875,000.

(2) The balance of approximately $12,000,000 will be used to meet a part of Penelec's construction expenditures subsequent to April 30, 1952, or partially to reimburse its treasury for such expenditures, or to repay bank loans incurred subsequent to April 30, 1952 (including $3,625,000 borrowed in May and June 1952), the proceeds of which have been or will be applied to such purposes.

Penelec estimates that approximately $19,000,000 will be required during the eight months ending December 31, 1952, in furthering its general construction program.

Penelec estimates that its expenses in the issuance and sale of said securities will aggregate $92,560, including (in addition to statutory taxes, filing, recording and listing fees, printing and engraving, fees and disbursements of indenture trustee, transfer agent and registrar, and miscellaneous expenses) legal and accounting fees and expenses in the amount of $23,000.

Such application-declaration having been duly filed, and notice of its filing having been duly given as prescribed by Rule U-23, and the Commission not having received a request for hearing with respect thereto nor having ordered such a hearing; and

It appearing to the Commission that the issue and sale of said securities by Penelec are solely for the purpose of financing the business of said company; that such issue and sale have been expressly authorized by the Pennsylvania Public Utility Commission, the regulatory commission of the State in which said company is organized and doing business; and

It further appearing that the proposed capital contribution by GPU to Aelec, and the acquisition by Aelec of the Additional Common Stock of Penelec will serve the public interest by tending toward the economical and efficient development of the public-utility system; and

The Commission finding with respect to said application-declaration as amended that the applicable provisions of the act and rules thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and in the interest of investors and consumers that the said application-declaration as amended be granted and permitted to become effective forthwith, subject to the terms and conditions hereinafter stated:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that the said application-declaration as amended be and the same hereby is granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24 and to the following further terms and conditions:

1. That the proposed issuance and sale of the New Preferred Stock and New Bonds shall not be consummated until the results of competitive bidding and the public offering price of said securities shall have been made a matter of record in this proceeding and a further order shall have been entered by this Commission in the light of the record so completed, which order shall contain such further terms and conditions, if any, as may then be deemed appropriate, jurisdiction being reserved for the imposition thereof.

2. Jurisdiction is also reserved with respect to the payment of all fees for legal and accounting services.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File No. 70-2899]

GRANITE STATE ELECTRIC CO. AND SUBURBAN GAS AND ELECTRIC CO.

NOTICE OF FILING REGARDING PROPOSED NOTE ISSUES

JULY 22, 1952.

Notice is hereby given that a declaration has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935, by Granite State Electric Company ("Granite") and Suburban Gas and Electric Company ("Suburban"), public-utility subsidiary companies of New England Electric System, a registered holding company. Granite and Suburban have designated sections 6 (a) and 7 of the Act and Rules U-23 and U-42 (b) (2) thereunder as applicable to the proposed transactions, which are summarized as follows:

The declaration states that Granite presently has outstanding a 3 percent, six months unsecured promissory note payable November 15, 1952, to the First National Bank of Boston in the amount of $350,000, and proposes to issue, from time to time, but not later than September 30, 1952, to said bank, additional unsecured six months promissory notes in the amount of $100,000. Granite will use the entire proceeds from the notes it proposes to issue for construction purposes. Suburban presently has outstanding 3 percent six months unsecured promissory notes payable to the First National Bank of Boston in the aggregate principal amount of $1,450,000 and proposes to issue to said bank, from time to time but not later than September 30, 1952, additional unsecured six months promissory notes in the amount of $475,000. Suburban will use $375,000 of the proceeds derived from the proposed issuance of additional promissory notes to pay an equal amount of its notes maturing September 25, 1952 and will use the remaining proceeds for construction purposes.

The proposed additional unsecured promissory notes are to bear interest at the prime rate of interest at the time of issuance and, it is stated, that said interest rate at the present time is 3 percent. In the event that said interest rate is in excess of 3¼ percent at the time of issuance of any of the proposed additional promissory notes, the issuing company will file an amendment to this declaration setting forth therein the terms of the note or notes and the rate of interest at least five days prior to the issuance of said note or notes. Granite and Suburban request that this amendment become effective at the end of such period unless the Commission notifies it to the contrary within said period.

The declaration states that the exact nature and timing of permanent financing by Granite and Suburban of its note indebtedness is not presently determinable. However, the declaration further states that the proceeds of any permanent financing will be applied in reduction of, or in total payment of, unsecured promissory notes then outstanding, and the amount of authorized but unissued notes, if any, will be reduced by the amount, if any, by which such permanent financing exceeds the notes at the time outstanding.

The declaration states that incidental services in connection with the proposed note issues will be performed at cost, by New England Power Service Company, an affiliated service company, such cost being estimated not to exceed $500 for Granite and $400 for Suburban, an aggregate of $900.

The declaration further states that the Public Utilities Commission of New Hampshire has exempted the issuance of the proposed notes by Granite and that no other State commission or Federal commission, other than this Commission, has jurisdiction over any of the transactions proposed in the declaration.

Granite and Suburban request that the Commission's Order herein become effective forthwith upon issuance.

Notice is further given that any interested person may, not later than August 4, 1952, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reason or reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the declaration, as filed or as amended, may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions

as provided in Rules U-20 and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-2901]

NARRAGANSETT ELECTRIC CO.

NOTICE REGARDING FILING OF PROPOSED NOTE ISSUES

JULY 22, 1952.

Notice is hereby given that a declaration has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935, by the Narragansett Electric Company ("Narragansett"), a public-utility subsidiary company of New England Electric System, a registered holding company. Narragansett has designated sections 6 (a) and 7 of the act and rules U-23 and U-42 (b) (2) thereunder as applicable to the proposed transactions, which are summarized as follows:

The declaration indicates that Narragansett contemplates that it will have outstanding at July 31, 1952, $3,600,000 principal amount of unsecured six months promissory notes payable to banks. Narragansett proposes to issue to banks, from time to time but not later than September 30, 1952, additional unsecured six months promissory notes in an aggregate principal amount not in excess of $3,100,000. Narragansett further proposes that the principal amount of all of its unsecured promissory notes outstanding at any one time prior to September 30, 1952 will not exceed $5,500,000.

Each of the proposed notes will bear interest at the prime rate of interest at the time of the issuance thereof. It is stated that said interest rate for such notes at the present time is 3 percent per annum. In the event that such interest rate is in excess of 3¼ percent per annum at the time any of said additional promissory notes are to be issued, Narragansett will file an amendment to its declaration setting forth therein the name of the bank or banks, the terms of the note or notes and the rate of interest at least five days prior to the issuance of said note or notes. Narragansett requests that such amendment become effective at the end of such period unless the Commission notifies it to the contrary within said period.

Narragansett will use $1,200,000 of the proceeds derived from the proposed issuance of additional promissory notes to pay an equal principal amount of outstanding promissory notes maturing September 30, 1952, and will use the remainder of such proceeds for other corporate purposes. The declaration indicates that Narragansett estimates that it will have construction expenditures in August and September of this year in the aggregate amount of $2,553,500. Narragansett proposes that the proceeds of any permanent financing will be applied in reduction of, or in total payment of, promissory notes then outstanding, and the amount of authorized but unissued notes, if any, will be reduced by the amount, if any, by which such permanent financing exceeds the notes at the time outstanding.

The declaration states that incidental services in connection with the proposed note issues will be performed, at cost, by New England Power Service Company, an affiliated service company, such cost being estimated not to exceed $900. The declaration further states that no State commission or Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Narragansett requests that the Commission's Order herein become effective forthwith upon issuance.

Notice is further given that any interested person may, not later than August 4, 1952, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reason or reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the declaration, as filed or as amended, may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 and U-100 thereof.

By the Commission.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27242]

SOLUTION, CHLORINATED PHENOL PETROLEUM FROM ST. LOUIS, MO., TO SOUTHERN TERRIRORY

APPLICATION FOR RELIEF

JULY 23, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1062.

Commodities involved: Solution, chlorinated phenol petroleum (wood preservative liquid) not exceeding 5 percent chlorinated phenol by weight, carloads.

From: St. Louis, Mo.

To: Points in southern territory.

Grounds for relief: Competition with rail carriers, circuity, grouping, and to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1062, Supp. 53.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[4th Sec. Application 27243]

LIQUID CAUSTIC SODA FROM ALABAMA TO ILLINOIS

APPLICATION FOR RELIEF

JULY 23, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1172.

Commodities involved: Liquid caustic soda, in tank-car loads.

From: Huntsville and Redstone Arsenal, Ala.

To: Chicago, Joliet, and Lockport, Ill., and intermediate points in Illinois.

Grounds for relief: Competition with rail carriers, circuity, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1172, Supp. 111.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 27244]

CINDERS, CLAY, OR SHALE FROM ALEXANDRIA AND ERWINVILLE, LA., TO COLUMBUS, MISS.

APPLICATION FOR RELIEF

JULY 23, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to his tariff I. C. C. No. 3736.

Commodities involved: Cinders, clay, or shale, carloads.

From: Alexandria and Erwinville, La.

To: Columbus, Miss.

Grounds for relief: Circuitous routes and to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3736, Supp. 197.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

VOLUME 17 NUMBER 147

Washington, Tuesday, July 29, 1952

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10377

PROVIDING FOR THE COMPOSITION OF THE WAGE STABILIZATION BOARD

By virtue of the authority vested in me by the Defense Production Act of 1950, as amended (50 U. S. C. App. 2061 et seq.), and as President of the United States, it is hereby ordered as follows:

SECTION 1. Executive Orders No. 10233 of April 21, 1951 (16 F. R. 3503), and No. 10301 of November 2, 1951 (16 F. R. 11257), are hereby revoked.

SEC. 2. Part IV of Executive Order No. 10161 of September 9, 1950 (15 F. R. 6105), as amended, is hereby further amended by revoking sections 403 to 410, inclusive, and by inserting after section 402 thereof the following new section 403:

"SEC. 403 (a). The Wage Stabilization Board created by section 403 (b) of the Defense Production Act of 1950, as amended, shall be composed of eighteen (18) members, who shall be appointed by the President by and with the advice and consent of the Senate. The said Board shall be composed in equal numbers of members representative of the general public, members representative of labor, and members representative of business and industry. A Chairman and a Vice Chairman of the Board shall be designated by the President from among the members representative of the general public.

"(b). In performing any of its functions, the Wage Stabilization Board shall be under the supervision and direction of the Economic Stabilization Administrator."

SEC. 3. To the extent that provisions of prior Executive orders or proclamations, or parts thereof, are in conflict with this order, the latter shall control, and any such prior provisions are amended accordingly.

SEC. 4. This order shall become effective on July 30, 1952.

HARRY S. TRUMAN

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended June 19, 1937.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

REVISED BOOKS

TITLE 32
of the
Code of Federal Regulations

Title 32, containing the regulations of the Department of Defense and other related agencies, has been completely revised. Originally a single book, Title 32 is being reissued as two books as follows:

Parts 1–699 ($5.00)
Part 700 to end (to be announced)

These books contain the full text of regulations in effect on December 31, 1951

Order from
Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Plum Order 21]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION OF SHIPMENTS; TERMINATION OF PLUM ORDERS 5 THROUGH 20

§ 936.444 *Plum Order 21*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found:

(i) That the limitation of shipments of plums in accordance with the provisions of the plum orders specified in paragraph (b) (1) of this section will not, after the effective time hereof, tend to effectuate the declared policy of the act; and

(ii) That the limitation of shipments of late varieties of plums, as set forth in paragraph (b) (2) of this section pursuant to the provisions of § 936.41 of the amended marketing agreement and order will tend to effectuate such orderly marketing of such plums as will be in the public interest, and the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that: the level of prices of late varieties of plums

is such that regulation of the shipment of such plums, in accordance with the provisions of the plum orders specified in paragraph (b) (1) of this section, may not be continued after the effective time hereof; the termination of such plum orders would permit the unrestricted shipment of late varieties of plums, and such unrestricted shipment would not be conducive to the orderly marketing of such plums in the public interest and would not tend to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) The following plum orders shall be terminated at the effective time of subparagraph (2) of this paragraph:

Plum Order 5, as amended (7 CFR 936.427; 17 F. R. 5635, 6401); Plum Order 6 (7 CFR 936.428; 17 F. R. 5636); Plum Order 7, as amended (7 CFR 936.429; 17 F. R. 5636, 6402); Plum Order 8, as amended (7 CFR 936.430; 17 F. R. 5637, 6402); Plum Order 9 (7 CFR 936.431; 17 F. R. 5638); Plum Order 10, as amended (7 CFR 936.432; 17 F. R. 5638, 6402); Plum Order 11 (7 CFR 936.433; 17 F. R. 5805); Plum Order 12, as amended (7 CFR 936.434; 17 F. R. 5806, 6403); Plum Order 13 (7 CFR 936.436; 17 F. R. 6403); Plum Order 14 (7 CFR 936.437; 17 F. R. 6404); Plum Order 15 (7 CFR 936.438; 17 F. R. 6405); Plum Order 16 (7 CFR 936.439; 17 F. R. 6406); Plum Order 17 (7 CFR 936.440; 17 F. R. 6406); Plum Order 18 (7 CFR 936.441; 17 F. R. 6407); Plum Order 19 (7 CFR 936.442; 17 F. R. 6408); Plum Order 20 (7 CFR 936.443; 17 F. R. 6409).

(2) During the period beginning at 12:01 a. m., P. s. t., July 30, 1952, and ending at 12:01 a. m., P. s. t., November 1, 1952, no shipper shall ship any package or container of late varieties of plums unless such plums meet the following minimum standards of quality and maturity applicable to the particular variety:

(i) Wickson, Burbank, Gaviota, Becky Smith, and Sharkey varieties of plums, unless such plums grade at least U. S. No. 1, with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade, and are of a size not smaller than a size that will pack a 4 x 5 standard pack in a standard basket (such 4 x 5 standard pack being more specifically defined in subparagraph (4) of this paragraph).

(ii) Grand Duke, Eldorado, Duarte, Diamond, and Emily varieties of plums, unless such plums grade at least U. S. No. 1, with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade, and are of a size not smaller than a size that will pack a 5 x 5 standard pack in a standard basket (such 5 x 5 standard pack being more specifically defined in subparagraph (5) of this paragraph).

(iii) President, Giant, and Late Duarte varieties of plums, unless such plums grade at least U. S. No. 1, with a total tolerance of fifteen (15) percent for defects not considered serious damage in addition to the tolerances permitted for such grade, and are of a size not smaller than a size that will pack a 5 x 5 standard pack in a standard basket (such 5 x 5 standard pack being more specifically defined in subparagraph (5) of this paragraph).

(iv) Sugar variety of plums, unless such plums grade at least U. S. No. 1, with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade, and are of a size not smaller than a size that will pack a 5 x 6 standard pack in a standard basket (such 5 x 6 standard pack being more specifically defined in subparagraph (6) of this paragraph).

(v) Late Tragedy variety of plums, unless such plums grade at least U. S. No. 1, with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade: *Provided*, That, gum spots which do not cause serious damage shall not be considered a grade defect with respect to such grade; and are of a size not smaller than a size that will pack a 6 x 6 standard pack in a standard basket (such 6 x 6 standard pack being more specifically defined in subparagraph (7) of this paragraph).

(vi) Ace variety of plums, unless such plums grade at least U. S. No. 1, with a total tolerance of fifteen (15) percent for defects not considered serious damage in addition to the tolerances permitted for such grade, and are of a size not smaller than a size that will pack a 4 x 5 standard pack in a standard basket (such 4 x 5 standard pack being more specifically defined in subparagraph (4) of this paragraph).

(vii) Kelsey variety of plums, unless such plums grade at least U. S. No. 1, with a total tolerance of twenty-five (25) percent for defects not considered serious damage in addition to the tolerances permitted for such grade, and are of a size not smaller than a size that will pack a 4 x 5 standard pack in a standard basket (such 4 x 5 standard pack being more specifically defined in subparagraph (4) of this paragraph).

(viii) Late Santa Rosa variety of plums, unless such plums grade at least U. S. No. 1, with a total tolerance of twenty-five (25) percent for defects not considered serious damage in addition to the tolerances permitted for such grade, and are of a size not smaller than a size that will pack a 5 x 5 standard pack in a standard basket (such 5 x 5 standard pack being more specifically defined in subparagraph (5) of this paragraph).

(ix) Tragedy variety of plums, unless such plums grade at least U. S. No. 1, with a total tolerance of twenty-five (25) percent for defects not considered serious damage in addition to the tolerances permitted for such grade, and are of a size not smaller than a size that will pack a 6 x 6 standard pack in a standard basket (such 6 x 6 standard pack being more specifically defined in subparagraps (7) of this paragraph).

(x) Amador, Apex, California Blue, Earliana, Gros Hungarian, Satsuma, Improved Satsuma, Shiro, Splendor and Standard varieties of plums, unless such plums grade at least U. S. No. 1, with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade.

(3) During the period set forth in subparagraph (2) of this paragraph, each shipper shall, prior to making each such shipment of plums, have the plums inspected by a duly authorized representative of the Federal-State Inspection Service, heretofore designated by the Plum Commodity Committee and hereby approved: *Provided*, That, in case the following conditions exist in connection with any such shipment;

(i) A written request for inspection is made to the Federal-State Inspection Service not later than 5:00 p. m., of the day before the fruit will be available for inspection;

(ii) The shipper designates in such request the date and hours when the fruit will be available for inspection; and

(iii) The Federal-State Inspection Service furnishes the shipper with a signed statement that it is not practicable, under such conditions, for the Federal-State Inspection Service to make the inspection within the necessary time; the shipper, by submitting, or causing to be submitted, promptly such signed statement to the Plum Commodity Committee, may make the particular shipment without inspection; but such shipper shall comply with all grade and size regulations applicable to such shipment.

(4) As used in this section, the aforesaid 4 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1\frac{11}{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{9}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measures less than $1^{7}/_{16}$ inches in diameter.

(5) As used in this section, the aforesaid 5 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{9}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{7}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{5}/_{16}$ inches in diameter.

(6) As used in this section, the aforesaid 5 x 6 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{7}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{5}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1^{3}/_{16}$ inches in diameter.

(7) As used in this section, the aforesaid 6 x 6 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the plums contained in such pack measure not less than $1^{5}/_{16}$ inches in diameter; (ii) at least ninety-five (95) percent, by count, of the plums contained in such pack measure not less than $1^{3}/_{16}$ inches in diameter; and (iii) no plums contained in such pack measure less than $1\frac{1}{16}$ inches in diameter.

(8) Nothing contained herein shall be construed (i) as affecting or waiving any right, duty, obligation, or liability which has arisen or which, prior to the effective time of the provisions hereof, may arise in connection with any provision of the said plum orders hereby terminated, or (ii) as releasing or extinguishing any violation of any provision of the said plum orders hereby terminated which has occurred or which, prior to the effective time of the provisions hereof, may occur.

(9) Terms used in this section shall have the same meaning as when used in the amended marketing agreement and order; the terms "U. S. No. 1," "standard pack," "serious damage," and "diameter" shall have the same meaning as set forth in the revised United States Standards for plums and prunes (fresh), 7 CFR 51.360; and the term "standard basket" shall have the same meaning as set forth in paragraph numbered 1 of section 828.1 of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 25th day of July 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Regs., Serial No. SR-384]

PART 40—AIR CARRIER OPERATING CERTIFICATION

PART 61—SCHEDULED AIR CARRIER RULES

SPECIAL CIVIL AIR REGULATION; ISSUANCE OF LOCAL AREA AIR CARRIER OPERATING CERTIFICATES FOR AIRCRAFT UNDER 12,500 POUNDS TAKE-OFF WEIGHT

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 21st day of July 1952.

Special Civil Air Regulation SR-366 authorizes the Administrator to issue temporary air carrier operating certificates of one-year duration, called Air Carrier Operating Certificates for Local Areas, to scheduled air carriers holding temporary certificates of public convenience and necessity. These operating certificates authorized the use of aircraft under 12,500 pounds maximum certificated take-off weight in accordance with such certification and operating standards as may be established by the Administrator. At the time the Board adopted SR-366, it was intended that appropriate standards for such carriers would be developed prior to August 1, 1952. However, during this interim period, the four carriers originally certificated to conduct this type of operation have either converted to DC-3 type aircraft or are awaiting Board action on petitions for renewal. If such petitions are granted, utilization of larger aircraft is contemplated whereby their operations would be conducted under the provisions of Parts 40 and 61 of the Civil Air Regulations. It is therefore considered advisable to curtail further efforts in the development of standards for local area operations pending Board action on the certificates of these carriers. Until such action is completed, it will be necessary to extend the authority granted in SR-366 in order for these carriers to continue operations. Therefore, although this regulation is being extended for one year, its termination is conditioned upon the expiration of the economic operating authority of those local area carriers now operating under SR-366 should they not be renewed or should they be significantly changed.

Interested persons have been afforded an opportunity to participate in the making of this regulation, and due consideration has been given to all relevant matter presented. Since this regulation imposes no additional burden on any person, it may be made effective on less than 30 days' notice.

In consideration of the foregoing the Civil Acronautics Board hereby makes and promulgates a Special Civil Air Regulation effective August 1, 1952, to read as follows:

The Administrator is hereby authorized to issue temporary air carrier operating certificates of one-year duration to scheduled air carriers holding temporary certificates of public convenience and necessity, authorizing the use of aircraft under 12,500 pounds maximum certificated take-off weight, in accordance with such certification and operating standards as may be established by the Administrator and to extend for a like period the duration of certificates heretofore issued or extended under the authority of Special Civil Air Regulation SR-366: *Provided*, That all such certificates so issued or extended shall expire at such earlier date as may be directed in any general rule issued by the Board regulating this subject matter.

This regulation shall terminate on August 1, 1953, or upon the expiration of or major change to the economic operating authority of those local area carriers now operating under SR-366, whichever shall first occur, unless sooner superseded or rescinded.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 604, 52 Stat. 1007, 1010; 49 U. S. C. 551, 554)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[Supplement 6]

PART 50—AIRMAN AGENCY CERTIFICATES

COMMERCIAL FLYING CURRICULUM AND INSTRUMENT FLYING SCHOOL

This supplement (1) eliminates from § 50.12–4 paragraph (e), the provision that flying schools must furnish parachutes, (2) adds to § 50.13–1 (a) a provision terminating primary flying schools' use of curriculums which were approved by the Administrator and were in effect prior to August 1, 1951,[1] (3) alters in § 50.13–4 (a) (4) the commercial flying school curriculum requirements regarding cross country flights,[2] (4) eliminates from § 50.13–7 (a) (6) the alternate requirement that each person giving or employed to give ground school instruction in an instrument flying school must possess a valid instrument rating,[2] and (5) eliminates from § 50.26–1 paragraph (b) regarding air agency activity reports.

1. Section 50.12–4 *Required flight equipment (CAA interpretations which apply to § 50.12 (d))* is amended by deleting paragraph (e) *Parachutes.*

2. Section 50.13–1 *Primary flying school curriculums; airplanes; land and sea; 35 hours flying time (CAA rules which apply to § 50.13 (a) (1))*, paragraph (a) *Airplanes—land* is amended by adding a final paragraph to read as follows:

A primary flying school may utilize the curriculum approved by the Administrator in effect prior to August 1, 1951, for those students enrolled prior to that time and who will be graduated by August 31, 1952.

3. Section 50.13–4 (a) (4) is amended to read:

§ 50.13–4 *Commercial flying curriculum; airplane; land and sea (CAA rules which apply to § 50.13 (b))*—(a) *Airplane—land.* * * *

(4) A minimum of 5 hours dual and 20 hours solo cross-country flying shall be given. During the course of instruction, at least one solo cross-country flight shall be made to a point not less than 350 miles distant from the point of departure. During such flight, at least 3 full-stop landings at different points along the route shall be made. In the course of the student's training, his flight record shall indicate one flight wherein all radio aids to air navigation that are available, have been utilized and shall include the preparation and use of a predetermined flight plan.

4. Section 50.13–7 (a) (6) is amended to read:

§ 50.13–7 *Instrument flying school (CAA rules which apply to § 50.13 (c))*—(a) *Ground school curriculum.* * * *

(6) *Instrument flight procedures.* At least 10 classroom hours of instruction, to be given in phase with or before actual flight training, to include:

Technique of instrument flight.
Beam and bracketing procedures.
Let-down procedures.
Air Traffic Control procedures.
Flight plans.

Each person giving, or employed to give, ground school instruction in an instrument flying school shall be certificated as required by § 50.10 (c).

[1] See notice of proposed rule making published on March 27, 1952, in 17 F. R. 2685.
[2] See notice of proposed rule making published on October 9, 1951, in 16 F. R. 10200.

5. Section 50.26–1 *Quality of instruction (CAA policies which apply to § 50.26)* is revised by deleting paragraph (b) *Air agency activity report.*

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply secs. 601, 602, 607, 52 Stat. 1007, 1008, 1011, as amended; 49 U. S. C. 551, 552, 557)

These rules, policies, and interpretations shall become effective August 31, 1952.

[SEAL] F. B. LEE,
Acting Administrator of Civil Aeronautics.

Subchapter B—Economic Regulations

[Regs., Serial No. ER–173]

PART 297—INTERNATIONAL AIR FREIGHT FORWARDERS

APPLICATION

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 22d day of July 1952.

Section 297.17 (i) of Part 297 of the Economic Regulations pertaining to international air freight forwarders contains the requirement that applicants for letters of registration as international air freight forwarders submit as part of their application a statement indicating whether the applicant is or has been a surface forwarder and, if so, the names of the surface carriers with which he dealt in the fiscal year ended June 30, 1949. The application must also contain a statement of the number of shipments generated and the tonnage delivered to the respective types of carriers (rail, water and air), each in the aggregate, during the fiscal year ended June 30, 1949. Experience with these provisions has demonstrated that no useful purpose is served by requiring the submission of names of the surface carriers with which the applicant has dealt, particularly since without such a requirement § 297.17 (i) would still require a breakdown of the volume of operations by types of carriers and thereby provide information which is sufficiently detailed for the Board's purposes. The Board also believes that it is no longer necessary to require a statement of the number of shipments generated, inasmuch as the statement of tonnage delivered to the respective types of carriers provides sufficient information upon which the Board may consider the volume of operations conducted with each type of carrier in relation to other data furnished by the applicant in its application.

It will be noted that, under the present provisions of § 297.17 (i), the second of the two statements mentioned above covers a period which, with the passage of time since original adoption of the provision, has become considerably out of date. The required data on volume of operations is used by the Board as an indication of capability on the part of the applicant to provide service and is considered principally in conjunction with the financial statements required by § 297.17 (h). The latter financial statements must cover the period of the year ended as of a date not more than six (6) months prior to the filing of the application. It is therefore believed that data on volume of operations would be more useful to the Board if obtained for a corresponding period.

In light of the foregoing, the Board considers it advisable to amend § 297.17 (i) in three respects:

1. By eliminating the requirement that the names of all surface carriers utilized be supplied as part of the statement,

2. By eliminating the requirement for a statement of the number of shipments generated, and

3. By requiring that data on tonnage delivered to respective carriers (rail, water, and air) be supplied for a current period rather than for the fiscal year ended June 30, 1949.

These changes would not expand the scope of Part 297 but would, on the contrary, lessen the amount of information required, thus easing to a considerable extent the present requirements for applications. They would not affect existing international air freight forwarders but would only have the effect of simplifying the application requirements for future applicants. Accordingly, the Board has determined that notice and public procedure thereon would be unnecessary.

On the basis of the considerations set forth above, Part 297 of the Economic Regulations (14 CFR, Chapter I) is hereby amended as follows, effective August 26, 1952:

By striking paragraph (i) of § 297.17 *Application*, and substituting therefor a new paragraph (i) reading as follows:

(i) a statement of specific points in foreign countries and in United States territories and possessions to be served; a list and location of foreign branch offices, agents, affiliates, or other representatives presently under contract; a list and location of branch offices and agents in the United States, its territories and possessions; a statement whether the applicant is or has been a customs house broker and, if so, the districts in which such authority is or has been held; a statement whether the applicant is or has been an International Air Transport Association agent and, if so, the carriers with whom affiliated and the amount of commissions received from each during the year ended as of a date not exceeding six (6) months prior to the filing of the application; a statement whether the applicant is or has been a surface forwarder; and a statement showing the aggregate tonnage delivered to each type of carrier (rail, water, and air) during the year ended as of a date not exceeding six (6) months prior to the filing of the application.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interprets or applies secs. 1, 416, 52 Stat. 977, 1004; 49 U. S. C. 401, 496)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[F. R. Doc. 52–8287; Filed, July 28, 1952; 8:51 a. m.]

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 73]

PART 600—DESIGNATION OF CIVIL AIRWAYS

ALTERATION

The civil airway alteration appearing hereinafter has been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee and is adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest, and therefore is not required.

Part 600 is amended as follows:

1. Section 600.297 is added to read:

§ 600.297 *Red civil airway No. 97 (United States-Canadian Border near Lakehead, Ontario, Canada, to United States-Canadian Border near Sault Ste. Marie, Mich.).* That airspace over United States territory from the Lakehead, Ontario, Canada, radio range station via the Sault Ste. Marie, Mich., radio range station to the Wiarton, Ontario, Canada, radio range station.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 302, 52 Stat. 985, as amended; 49 U. S. C. 452)

This amendment shall become effective 0001, e. s. t., August 1, 1952.

[SEAL] F. B. LEE,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52–8263; Filed, July 28, 1952; 8:45 a. m.]

[Amdt. 78]

PART 601—DESIGNATION OF CONTROL AREAS, CONTROL ZONES, AND REPORTING POINTS

ALTERATIONS

The control area and reporting point alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest, and therefore is not required.

Part 601 is amended as follows:

1. Section 601.297 is added to read:

§ 601.297 *Red civil airway No. 97 control areas (United States-Canadian Border near Lakehead, Ontario, Canada, to United States-Canadian Border near Sault Ste. Marie, Mich.).* All of Red civil airway No. 97.

2. Section 601.4297 is added to read:

§ 601.4297 *Red civil airway No. 97 (United States-Canadian Border near Lakehead, Ontario, Canada, to United States-Canadian Border near Sault Ste. Marie, Mich.).* No reporting point designation.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective 0001, e. s. t., August 1, 1952.

[SEAL] F. B. LEE,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52–8264; Filed, July 28, 1952; 8:45 a. m.]

[Amdt. 33]

PART 608—DANGER AREAS

ALTERATION

The danger area alteration appearing hereinafter has been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and is adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is not required.

Part 608 is amended as follows:

In § 608.29, a Boston, Massachusetts, temporary area is added to read:

Name and location (chart)	Description by geographical coordinates	Designated altitudes	Time of designation	Using agency
BOSTON (Boston and New York Charts).	An area 15 miles either side of a line between points at lat. 41° 33'00" N, long. 70°03'00" W and lat. 42°30'00" N, long. 70°17'00" W.	20,000 feet to unlimited.	Hours of darkness, July 30, 1952, through Aug. 6, 1952.	Eastern Air Defense Command.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on July 30, 1952.

[SEAL] F. B. LEE,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52–8262; Filed, July 28, 1952; 8:45 a. m.]

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 5031]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

ZONITE PRODUCTS CORP. AND ERWIN, WASEY & CO., INC.

Subpart—*Advertising falsely or misleading:* § 3.25 *Competitors and their products;* § 3.170 *Qualities or properties of product or service;* § 3.205 *Scientific or other relevant facts.* Subpart—*Disparaging competitors and their products—Competitors' products:* § 3.1020 *Results.* In connection with the offering for sale, sale or distribution of the cosmetic preparation, Forhan's Toothpaste, or any other preparation of substantial similar composition or possessing substantially similar properties, whether sold under the same name or any other name, disseminating, etc., any advertisments by means of the United States mails, or in commerce, or by any means to induce, etc., directly or indirectly, the purchase in commerce, etc., of said preparation, which advertisements represent, directly or by implication, (a) that massaging the gums with said preparation is of any value in making gums firmer or in the prevention of gingivitis or pyorrhea; (b) that massaging the gums or brushing the teeth with said preparation is of any value in the treatment of gingivitis; (c) that brushing the teeth with said preparation is of any value in the prevention of gingivitis or pyorrhea other than to the extent that locally caused gingivitis may be prevented by keeping the teeth clean; or, (d) that the results obtained by the use of competing tooth pastes are inferior; prohibited.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Zonite Products Corporation et al., New York, N. Y., Docket 5031, April 23, 1952]

In the Matter of Zonite Products Corporation a Corporation, and Erwin, Wasey & Company, Inc., a Corporation

Pursuant to the provisions of the Federal Trade Commission Act, the Federal Trade Commission on August 18, 1943, issued and subsequently served its complaint in this proceeding upon the respondents, Zonite Products Corporation and Erwin, Wasey & Company, Inc., charging said respondents with the use of unfair and deceptive acts and practices in commerce in violation of the provisions of that act. After the filing of respondents' answers, testimony and other evidence in support of and in opposition to the allegations of the complaint were introduced before a hearing examiner of the Commission, theretofore duly designated by it, and such testimony and other evidence were duly recorded and filed in the office of the Commission. Thereafter, this proceeding regularly came on for final hearing before the Commission upon the aforesaid complaint, the respondents' answers thereto, testimony and other evidence, the recommended decision of the hearing examiner and exceptions thereto by counsel for respondents, and briefs and oral argument of counsel; and the Commission, having duly considered the matter and having entered its order disposing of the exceptions to the recommended decision of the hearing examiner and being now fully advised in the premises, finds that this proceeding is in the interest of the public and makes this its findings as to the facts[1] and its conclusion[1] drawn therefrom.

[1] Filed as part of the original document.

This proceeding having been heard by the Federal Trade Commission upon the complaint of the Commission, respondents' answers thereto, testimony and other evidence in support of and in opposition to the allegations of the complaint introduced before a hearing examiner of the Commission, theretofore duly designated by it, the hearing examiner's recommended decision and exception thereto by counsel for respondents, and briefs and oral argument of counsel; and the Commission having made its findings as to the facts and its conclusion that the respondents have violated the provisions of the Federal Trade Commission Act:

It is ordered, That the respondents, Zonite Products Corporation and Erwin, Wasey & Company, Inc., and their respective officers, agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution of the cosmetic preparation, Forhan's Toothpaste, or any other preparation of substantially similar composition or possessing substantially similar properties, whether sold under the same name or under any other name, do forthwith cease and desist from:

1. Disseminating, or causing to be disseminated, any advertisement, by means of the United States mails, or by any means in commerce, as "commerce" is defined in the Federal Trade Commission Act, which advertisement represents, directly or by implication:

(a) That massaging the gums with said preparation is of any value in making gums firmer or in the prevention of gingivitis or pyorrhea;

(b) That massaging the gums or brushing the teeth with said preparation is of any value in the treatment of gingivitis;

(c) That brushing the teeth with said preparation is of any value in the prevention of gingivitis or pyorrhea other than to the extent that locally caused gingivitis may be prevented by keeping the teeth clean;

(d) That the results obtained by the use of competing tooth pastes are inferior.

2. Disseminating, or causing to be disseminated, any advertisement, by any means, for the purpose of inducing, or which is likely to induce, directly or indirectly, the purchase of said preparation in commerce, as "commerce" is defined in the Federal Trade Commission Act, which advertisement contains any of the representations prohibited in paragraph 1 hereof.

It is further ordered, That the respondents shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: April 23, 1952.

By the Commission.

[SEAL] D. C. DANIEL,
Secretary.

[F. R. Doc. 52–8279; Filed, July 28, 1952; 8:48 a. m.]

TITLE 15—COMMERCE AND FOREIGN TRADE

Chapter III—Bureau of Foreign and Domestic Commerce, Deparment of Commerce

Subchapter C—Office of International Trade

[6th Gen. Rev. of Export Regs., Amdt. 4 [1]]

PART 373—LICENSING POLICIES AND RELATED SPECIAL PROVISIONS

PART 382—DENIAL OR SUSPENSION OF EXPORT PRIVILEGES

PART 398—PRIORITY RATINGS AND SUPPLY ASSISTANCE ASSIGNED BY OIT

MISCELLANEOUS AMENDMENTS

1. Section 373.24 *Statement of past participation in exports for certain commodities* is amended in the following particulars: Paragraph (b) *Commodities requiring statement of past participation*, subparagraph (6) *Copper sulfate (Schedule B No. 820100)* is hereby deleted.

2. Section 373.36 *Special provisions for human blood plasma* is amended in the following particulars: The first unnumbered paragraph is amended to read as follows:

Human blood plasma, Schedule B No. 812100, will be licensed for export in accordance with the following special provisions:

3. Section 382.51 *Table of compliance orders currently in effect denying export privileges*, paragraph (b) *Table of compliance orders* is amended in the following particulars:

a. The following entries are added:

Name and address	Effective date order	Expiration date order	Export privileges affected	Federal Register citation
Continental Pharma, 1477 Sherbrooke St. W., Montreal 25, Canada, and 405 Lexington Ave., New York, N. Y.	6-20-52	6-20-54	General and validated licenses, all commodities, any destination; also exports to Canada.	17 F. R. 5738, 6-26-52

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter F—Personnel

PART 571—RECRUITING AND ENLISTMENTS

RECRUITING FOR REGULAR ARMY

Sections 571.1 to 571.5 are rescinded and the following substituted therefor:

Sec.
571.1 General.
571.2 Qualifications for enlistment.
571.3 Periods and grades.
571.4 Choice of assignment.
571.5 Transportation of accepted applicants.

AUTHORITY: §§ 571.1 to 571.5 issued under sec. 6, 39 Stat. 169, as amended; 10 U. S. C. 42.

SOURCE: SR 615-105-1, June 6, 1952.

§ 571.1 *General*—(a) *Purpose.* Sections 571.1 to 571.5 establish the qualification for enlistment of men and women in the Regular Army. Enlistment will be accomplished in numbers authorized on a monthly basis by the Secretary of the Army.

(b) *Definitions.* The following definitions apply:

(1) "Enlistment" unless otherwise specified, includes reenlistment of Regular Army personnel, enlistment of former Army of the United States personnel, and original enlistment of personnel without prior Army service.

(2) When instructions are applicable only to men, the word "men" or "male" is used; when instructions are applicable only to women, the word "women" or "female" is used; when instructions are applicable to both men and women, the term "persons," "applicants," "individuals," or "personnel" is used.

§ 571.2 *Qualifications for enlistment*—(a) *Age*—(1) *Male.* The age requirements for enlistment of males are:

(i) Seventeen to thirty-four years, inclusive, except as provided below.

(ii) Thirty-five years and over but less than fifty-five years of age for those men who have had a minimum of 3 years' prior active service in the Army, Army Air Corps, Navy, Marine Corps, Air Force, or Coast Guard (at least 3 months of which must have been Army or Army Air Corps service), provided their age, at the time of enlistment, is not greater than 35 plus the length of their prior active Federal service in completed years of honorable service. The original enlistment of a former member of the Navy, Marine Corps, Air Force, or Coast Guard without prior Army or Army Air Corps active Federal service, who is 35 years of age or older, is prohibited by law and is not subject to waiver.

(iii) For every applicant for enlistment from civilian life who states he is under 21 years of age, or who claims a greater age but whose personal appearance indicates he may be under 21, the recruiting officer will verify age by requiring the applicant to present a birth certificate or a statement from the State Registrar of Vital Statistics, or other similar State official. When the age of an applicant cannot be verified by a birth certificate, and the State Registrar of Vital Statistics or other similar State, municipal, or Government official states that there is "no record" of birth of the individual, action will be taken to obtain one of the following types of substantiating data regarding age in the following sequence:

(*a*) Baptismal record or certified copy.

(*b*) Sworn statement of one or both parents or legal guardian supported by:

(*1*) Notarized copy of the school record from the first school attended, showing date of birth or age at attendance, or

(*2*) Certificate from the physician in attendance at birth.

(*3*) All documents submitted by applicants should be originals. If copies are submitted, they will be notarized.

(iv) An applicant who is 17 years of age but has not reached his eighteenth birthday will be required to furnish written consent of his parents or guardian. If he has neither parents nor guardian, a statement to that effect will be included under item 41, "Remarks," of the Enlistment Record (DD Form 4). DD Form 373 (Consent Declaration of Parent or Legal Guardian) will be used. The consent declaration will:

(*a*) Be signed by both parents, but the consent of one parent may be accepted if the other is absent for an extended period of time. A DD Form 373 is required prior to extension of enlistment or reenlistment of these individuals. Enlistment, reenlistment, or extension of enlistment is not authorized if either parent objects.

(*b*) Omit any reference to allotments of pay, special training, or service in any particular branch of service, or at a certain post or locality.

(*c*) Contain the following statement under "Remarks":

The parents and/or guardian have been advised and understand that the enlistee can be assigned to any area or station of service, in the United States or overseas, or any type of duty, including combat, authorized by current law and regulations, immediately upon completion of required period of basic training.

(*d*) Be notarized or the signing of the consent declaration by the person authorized to sign shall be witnessed by a commissioned, warrant, or noncommissioned recruiting officer.

(*e*) Be signed in duplicate and fastened securely to the original and duplicate copy of the enlistment record.

(v) Men last separated from the Regular Army with an honorable or general discharge and commissioned officers or warrant officers relieved from active duty in the Army under honorable conditions may be enlisted in the Regular Army within 90 days after date of such discharge or relief from active duty, without regard to the maximum age restrictions prescribed above.

(2) *Female.* The age requirements for enlistment of females are:

(i) Eighteen to thirty-four years, inclusive, except as provided below. An applicant between the ages of 18 and 21 will be required to furnish written consent of her parents or guardian on the form prescribed in subparagraph (1) (iv) of this paragraph. This provision is applicable to original enlistment, reenlistment, and extension of enlistment.

(ii) Thirty-five years and over but less than fifty-five years of age for those women who have had a minimum of 3 years' prior active service in the Army, Army Air Corps, Navy, Marine Corps, Air Force, or Coast Guard (at least 3 months of which must have been Army or Army Air Corps service), provided their age, at the time of enlistment, is not greater than 35 plus the length of their prior active Federal service in completed years of honorable service in any of the Armed Services after September 1, 1943. The original enlistment of a former member of the Navy, Marine Corps, Air Force, or Coast Guard without prior Army or Army Air Corps active Federal service, who is 35 years of age or older, is prohibited by law, and is not subject to waiver.

(iii) Age of all female applicants will be verified as prescribed in subparagraph (1) (iii) of this paragraph for male applicants under 21 years of age.

(iv) Women last separated from the Regular Army with an honorable discharge and female commissioned officers or warrant officers relieved from active duty in the Army under honorable conditions may be enlisted in the Regular Army within 90 days after date of such discharge or relief from active duty, without regard to the maximum age restrictions prescribed in this subparagraph.

(b) *Citizenship.* Applicants who are otherwise qualified may be enlisted if they are:

(1) Citizens of the United States.

(2) Aliens who can present written evidence that they have made legal declaration of their intention to become citizens of the United States. Only those declarant citizens who can present the triplicate copy of declaration of intention (United States Department of Justice; Immigration and Naturalization Service Form N-315), duly authenticated by a Federal district court, are eligible for enlistment under this authority. Title 18, U. S. Code, section 1426 (h), prohibits the reproduction of a declara-

tion of intention to become a citizen, or certificate of naturalization. Under no circumstances will these forms be reproduced.

(c) *Educational requirements for female applicants*—(1) *Nonprior service.* Female applicants without prior military service (including those whose only service has been in the WAAC) must possess a certificate of graduation from high school or must present substantiating data that they have successfully completed the high school level General Educational Development (GED) test. (This test will not be administered by recruiting personnel, but applicants desiring information about the GED test will be advised to communicate with the appropriate State Department of Education for information concerning the test.)

(2) *Prior service.* Female applicants with prior military service must have completed a minimum of 2 years of high school.

(d) *Physical standards*—(1) *General.* Applicants for enlistment must meet fully the physical standards for acceptance as prescribed in AR 40-115 (Army regulations pertaining to physical standards and physical profiling for enlistment and induction).

(2) *Individuals discharged by reason of physical disability.* Applicants for enlistment who were last separated by reason of physical disability will not be accepted for enlistment without prior approval from The Adjutant General, even though they currently meet the physical standards prescribed. Requests for waivers of physical disability will be accomplished by complete reports of physical examination on Standard Form 88 (Report of Medical Examination), medical history on Standard Form 89 (Report of Medical History), and will include a detailed description and current evaluation of the physical defect responsible for the individual's discharge. Requests for waivers will be forwarded as indicated in paragraph (h) of this section.

(e) *Police clearance, all applicants.* Prior to enlistment of applicants, except those who enlist within 90 days from date of discharge from any of the Armed Forces, recruiting installations will communicate with the police in each town where such applicant has resided for a period of 6 months or more in the previous 3 year period. When reply from police is not received within 21 days, applicant may be enlisted provided the individual is the type desired by the Army and every effort has been made to check character through local sources.

(f) *Enlistment of persons with dependents.* (1) Male applicants from civilian life with dependents, including those who do not reenlist without a break in service but who do reenlist within 90 days after date of discharge, are authorized to enlist only if entitled to enlistment in grade E-4 or higher, or if promised grade E-4 upon completion of reception processing and training. In especially meritorious cases of men with long periods of honorable service (normally 6 years or more) who do not meet these requirements, waivers may be granted by major commanders.

(2) Married female applicants without prior service will not be enlisted. No waivers will be granted.

(3) Female applicants who have children under 18 years of age will not be enlisted. A woman who has any legal or other responsibility for the custody, control, care, maintenance, or support of any child or children, including stepchildren or foster children under 18 years of age, will not be enlisted. No waivers will be granted. Women who have surrendered all rights to custody and control of natural children through formal adoption or final divorce proceedings may be accepted for enlistment.

(g) *Enlistment restrictions for persons last discharged below grades E-3 and E-2.* (1) Applicants from civilian life, including those who do not reenlist without a break in service but who do reenlist within 90 days after date of discharge, who were discharged on or after 1 May 1949 from any of the Armed Forces (Army, Navy, Marine Corps, Air Force, and Coast Guard), are eligible for enlistment only if discharged in the following grades:

(i) Individuals with 24 months or more of prior active service in their current or last enlistment are eligible to enlist only if discharged in grade E-3 or higher.

(ii) Individuals with less than 24 months but more than 4 months of prior active service in their current or last enlistment are eligible to enlist only if discharged in grade E-2 or higher.

(2) In especially meritorious cases of individuals with long periods of honorable service (normally 6 years or more) in the Army, who do not meet the requirements prescribed in subparagraph (1) of this paragraph, waivers may be granted by major commanders.

(h) *Classes ineligible for enlistment.* The personnel listed in the following classifications are ineligible for enlistment unless the disqualification is waived as indicated. The disqualifications for which authority to grant waivers is not listed below will be waived only by The Adjutant General. Such waiver requests will be forwarded to The Adjutant General, Department of the Army, Washington 25, D. C., Attention: AGSE-W, except for applicants with prior service in the Army or Air Force who have been discharged 4 months or more, when requests for waiver will be forwarded through Chief, Demobilized Personnel Records Branch, AGO, St. Louis 20, Missouri, for attachment of 201 files and other records and transmitted to The Adjutant General, Washington 25, D. C., Attention: AGSE-W. Requests for waivers will be forwarded only in those cases which, as a result of complete investigation, the recruiting officer determines to be especially meritorious. Waivers granted will be valid for a period of 60 days from date of issuance unless otherwise indicated, after expiration of which period a new request for waiver must be initiated.

(1) *Over age.* (i) Waivers will not be requested for nonprior-service applicants who are over age.

(ii) For prior-service applicants who are over age, the commanding officer of each recruiting district and commanders of major oversea commands are authorized to grant waivers to otherwise qualified and desirable applicants who have had a minimum of 3 years' prior active service in the Army, Army Air Corps, Navy, Marine Corps, Air Force, or Coast Guard (at least 3 months of which must have been Army or Army Air Corps service), provided their ages does not exceed 37 plus the number of years of such prior active service.

(iii) Commanders of recruiting districts and major oversea commands will not grant waivers to applicants who are 55 years of age or older.

(2) *Aliens.* Aliens, except applicants who have made legal declaration of their intent to become United States citizens (paragraph (b) (2) of this section). No waivers will be granted.

(3) *Mentally substandard applicants.* Applicants from civilian life who fail to meet the prescribed mental standards. No waivers will be granted.

(4) *Illiterates.* Persons who are illiterate in the English language. No waivers will be granted. (Applicants must be able to read, write, and understand English sufficiently to insure that they can satisfactorily absorb the required training.)

(5) *Physically substandard applicants.* Applicants who fail to meet the prescribed physical standards or who were separated from last period of active service in any of the Armed Forces by reason of physical disability (paragraph (d) of this section).

(6) *Applicants having time lost*—(i) *Male.* Male applicants who have had prior active service in the Army, Army Air Corps, Navy, Marine Corps, Air Force, or Coast Guard and whose total time lost under Article of War 107, Manual for Courts-Martial, 1949, or section 6 (a), appendix 2b, Manual for Courts-Martial, 1951 (or time lost under similar circumstances in the Navy, Marine Corps, Air Force, or Coast Guard), was 60 days or more during their last enlistment or period of active service. Authority to grant waivers for applicants is as follows:

(*a*) *Recruiting district commander.* Applicants from civilian life in the continental United States who have lost in excess of 59 days but not more than 89 days during their last enlistment or period of active service.

(*b*) *Company, battery, or similar unit commanders.* Applicants from within the service who have lost in excess of 59 days but not more than 89 days during their last enlistment or period of active service and who reenlist the day following date of discharge.

(*c*) *Commanders of major oversea commands.* Applicants in oversea commands, other than those specified in subdivision (*b*) of this subparagraph who have lost in excess of 59 days during their last enlistment or period of active service.

(*d*) *The Adjutant General.* All applicants other than those listed in subdivision (*a*), (*b*), or (c) of this subparagraph. Requests for waivers for men currently serving will be submitted through division or comparable commands not earlier than 60 days nor later than 30 days prior to expiration of cur-

rent enlistment and will include data as to number and periods of absences from duty, trials by courts-martial, and recommendation of immediate commanding officer with reasons therefor.

(ii) *Female.* (*a*) Female applicants from civilian life who have had prior military service in the Navy, Marine Corps, Air Force, or Coast Guard and who have lost any time under Article of War 107, Manual for Courts-Martial, 1949, or section 6 (a), appendix 2b, Manual for Courts-Martial, 1951 (or have lost time under similar circumstances in the Navy, Marine Corps, Air Force, or Coast Guard) during their last period of active service. No waivers granted.

(*b*) Requests for waivers may be forwarded to The Adjutant General, Attention: AGSE-W, for applicants who have had prior military service in the Army, or Army Air Corps, who did not reenlist the day following separation and whose total time lost under Article of War 107, Manual for Courts-Martial, 1949, or section 6 (a), appendix 2b, Manual for Courts-Martial, 1951, is five days or less.

(*c*) Enlisted women of the Army who reenlist on the day following discharge may be granted a waiver by major commanders for not more than 5 days time lost under Article of War 107, Manual for Courts-Martial, 1949, or section 6 (a), appendix 2 b, Manual for Courts-Martial, 1951.

(7) *Persons convicted of felonies.* Requests for waiver will not be forwarded for this category of applicants. For prior-service personnel, only felonies committed subsequent to the date of separation from last period of honorable active military service are considered disqualifying, and no waivers will be granted.

(8) *Applicants with records of other offenses*—(i) *Conviction or imprisonment for other than a felony.* The Adjutant General may authorize enlistment of especially desirable men who have been tried, convicted, and/or imprisoned under the sentence of a civil court for other than a felony and men who have had frequent difficulty with law enforcement agencies or who have criminal tendencies, a history of antisocial behavior, or who are of questionable moral character, and who have been unconditionally released from civil court for a minimum period of 6 months. An investigation will be made by qualified personnel (preferably commissioned officer) and a report, including letters from at least three reputable citizens who are acquainted with the individual, will be submitted through channels to The Adjutant General, Washington 25, D. C., Attention: AGSE-W. The report of investigation will include information concerning the applicant's current character and habits, date unconditionally released from civil control, a statement that the offense for which convicted was not a felony, his reputation in the community in which he resides, and a record of his employment since his release from the control of civil authorities, as well as the recommendation of the investigating officer. For prior-service men, only those offenses committed subsequent to the date of separation from the last period of honorable active military service are considered disqualifying. Such waivers will not be granted to applicants for WAC service.

(ii) *Juvenile delinquency and minor traffic violations.* Waivers also may be granted in meritorious cases of male applicants, in which juvenile delinquency or imprisonment for minor traffic violations are involved. Waivers of offenses involving juvenile delinquency or minor traffic violations may be granted by the commanding generals of major commands, if, as a result of an investigation, conducted by qualified personnel (preferably commissioned officers), it is determined that the applicant will be an asset to the service. The investigation will include letters from at least three reputable citizens who are acquainted with the individual, information concerning the applicant's current character and habits, his reputation in the community in which he resides, and a record of his employment since his release from the control of civil authorities, as well as the recommendations of the investigating officer. Only those applicants whose cases are individually determined to be especially meritorious and who have served the period of parole or probation decreed by the court plus a minimum period of 6 months as law-abiding members of a civil community will be accepted. A record of ajudication of conduct by a juvenile court in the State of Ohio under the statute of that State or by a juvenile court of any State having a similar law is not a bar to enlistment. However, recruiting officers will scrutinize carefully the juvenile court record of an applicant for enlistment to determine whether he is of good character and otherwise eligible for enlistment and will submit to higher authority any case in which doubt arises as to the effect of a particular statute. Such waivers will not be granted to applicants for WAC service.

(iii) *Contracts.* Major commanders will not enter into a contract, implied or otherwise, to effect the enlistment of an individual whose actions have brought such individual into the probative custody of a court and whose subsequent conduct has not been of such worthy caliber as to have caused the court having jurisdiction to release such individual from the unexpired period of probation prior to the time of application for enlistment.

(9) *Applicants with criminal charges.* Persons who have criminal charges filed and pending against them alleging a violation of State, Federal, or Territorial statute but as an alternative to further prosecution, indictment, trial, or incarceration for such violation are granted a release from the charge by a court on the condition that they will apply and are accepted for enlistment in Regular Army. No waivers will be granted.

(10) *Parolees.* Persons under parole, probation, or suspended sentence from any civil court. No waivers will be granted.

(11) *Insane.* Insane or intoxicated persons. No waivers will be granted.

(12) *Applicants having venereal disease.* Persons who have an active or chronic venereal disease. No waivers will be granted.

(13) *Claim of prior honorable service.* Persons who apply for enlistment from civilian life and who claim prior honorable service in the Armed Forces, but who are unable to produce their discharge certificate or other written evidence of last active service will not be enlisted until verification of such service is received.

(14) *Application for retirement.* Persons who have pending an application for retirement. No waivers will be granted.

(15) *Retired personnel.* Persons who are in a retired status from the Regular Army, whether retired for disability or length of service. No waivers will be granted.

(16) *Persons receiving disability pension or compension.* Persons receiving disability pension or compensation from the Veterans' Administration, unless such pension or compensation is waived by the individual at time of enlistment.

(17) *Persons receiving retired or retainer pay.* Persons receiving retired or retainer pay from the Navy, Marine Corps, Air Force, or Coast Guard. No waivers will be granted.

(18) *Persons discharged with severance pay.* Any applicant with prior service in any of the Armed Forces whose last discharge or report of separation shows that severance pay was received. No waivers will be granted.

(19) *Selective Service registrants.* (i) Selective Service registrants who have received orders from their local boards to report for reinduction physical and mental examinations or to report for induction. No waivers will be granted.

(ii) As an exception to subdivision (i) of this subparagraph, registrants who have been ordered to report for preinduction processing, whose local boards subsequently reclassify them into a class other than available for military service and whose orders to report for preinduction processing are thereby administratively canceled may enlist provided otherwise qualified.

(iii) As a further exception to subdivision (ii) of this subparagraph, registrants who have received orders from their local boards to report for preinduction physical and mental examinations and who are satisfactorily pursuing a full-time course of instruction at a high school, college, university, or similar institution of learning, may enlist in the service of their choice if otherwise qualified, unless they have been issued an order to report for induction. Registrants reclassified into class 1-A-P cannot be enlisted in the service of their choice unless their classification is changed by their local boards.

(iv) Applications for Army Officer Candidate School may be accepted and processed from those registrants referred to in subdivisions (ii) and (iii) of this subparagraph who are eligible to enlist.

(20) *Disloyal or subversive applicants.* Applicants who admit participation or whose available records show that they have at any time engaged in disloyal or subversive activities. No waivers will be granted.

(21) *Loyalty certificates.* Applicants who refuse to sign the Loyalty Certificate for Personnel of the Armed Forces (DD Forms 98 and 98a). No waivers will be granted.

(i) *Enlistment and reenlistment of insular personnel*—(1) *Caribbean area.* (i) English-speaking male and female applicants who are qualified under this part may be enlisted or reenlisted in the Regular Army by the Commanding General, United States, Caribbean, in the same manner as though they were residing in the continental United States.

(ii) Spanish-speaking male applicants are authorized to enlist for service in units of the Regular Army in the Caribbean command as governed by special instructions from the Department of the Army. Applicants will be informed prior to enlistment that no guarantee can be made that they will remain assigned to such unit for any specified period of time.

(2) *Territory of Hawaii.* Male and female applicants who are qualified under the provisions of this part may be enlisted or reenlisted by the Commanding General, United States Army, Pacific, in the same manner as though they were residing in the continental United States.

§ 571.3 *Periods and grades*—(a) *Periods of enlistment.* (1) Enlistments are authorized for 3, 4, 5, or 6 years at the option of the individual enlisting. In addition, male applicants as prescribed in subparagraph (3) of this paragraph and female applicants may enlist for a 2-year period.

(2) Reenlistments are authorized for 3, 4, 5, or 6 years except as prescribed in subparagraph (4) of this paragraph at the option of the individual reenlisting.

(3) Enlistments are authorized for 24 months for Selective Service registrants classified in 1–A, available for military service, notwithstanding their dependency status, who are between the ages of 18 years and 6 months and 26 years, and who have not heretofore served for more than 1 year in the Armed Forces prior to June 24, 1948, or more than 90 days between December 7, 1941, and September 2, 1945, or 3 years or more at any time. All enlistments under this option will be made for Regular Army Unassigned. Enlistees will incur the following service obligations:

(i) They will be required to complete 24 consecutive months' active service, unless sooner released, transferred, or discharged.

(ii) Thereafter, if qualified, they will be transferred to a Reserve component of the Army and required to serve therein for a period which, when added to the time served in their enlistment, will equal a total of 8 years, unless sooner discharged on grounds of personal hardship, in accordance with regulations and standards prescribed by the Secretary of Defense.

(4) In addition to the options authorized in subparagraph (2) of this paragraph, the reenlistment of individuals who were discharged from the Regular Army and who reenlist in permanent grade E–7, E–6, or E–5 within 90 days after date of last discharge are authorized to reenlist in the Regular Army for an unspecified period of time on a career basis. Regular Army enlisted persons serving in permanent grade E–7, E–6, or E–5 who have less than 1 year remaining in their current enlistment may be discharged for the convenience of the Government for the purpose of reenlisting for an unspecified period of time, provided enlistment is accomplished the day following discharge. Discharge prior to expiration of term of service (ETS) for the purpose of reenlisting for an unspecified period of time is not mandatory, and responsible commanders will approve such discharges only when it is determined that such action will serve the best interest of the Army. An individual whose last period of active Federal service in the Army was in the status of a commissioned officer or warrant officer is eligible for enlistment under this subparagraph, provided such individual was serving on Federal active duty in grade E–7, E–6, or E–5 immediately prior to entry on active duty as a commissioned officer or warrant officer; such commissioned or warrant officer service has been continuous since entry thereon; and enlistment is accomplished in grade E–7, E–6, or E–5 within 90 days from date of relief from active duty. The following are special conditions governing reenlistment for an unspecified period of time:

(i) Reenlistments will be accomplished only in "Regular Army Unassigned," or "WAC Unassigned."

(ii) Period of reenlistment continues until the individual is discharged under current discharge regulations, resigns, or retires. Reduction to a grade below grade E-5 will not terminate such a reenlistment.

(b) *Grades.* Individuals will be enlisted in the Regular Army in grades commensurate with their training and experience as specifically authorized in applicable Army regulations.

§ 571.4 *Choice of assignment*—(a) *Males.* Men who enlist or reenlist in the Regular Army for 3, 4, 5, or 6 years are authorized certain initial assignment choices which are published in separate directives from time to time by the Department of the Army. Men who enlist in the Regular Army for any period less than 3 years and those who reenlist in the Regular Army for an unspecified period of time will not be given a choice of assignment, and will be enlisted for Regular Army Unassigned.

(b) *Females.* Women who enlist or reenlist in the Regular Army will be enlisted for WAC Unassigned only, with no choice of initial assignment.

§ 571.5 *Transportation of accepted applicants.* (a) Transportation and subsistence will be furnished to applicants only when they have been tentatively accepted for enlistment, or when recalled for enlistment after their names are reached on the waiting list.

(b) Return transportation and subsistence from recruiting main stations to point of initial acceptance will be furnished in accordance with existing regulations to rejected applicants and those acceptable applicants who cannot be enlisted at the time. Return transportation will not be furnished an applicant for enlistment who is rejected because of disqualification concealed by him at time of acceptance as an applicant.

(c) Government transportation and meals or meal tickets will not be furnished from recruiting stations to recruiting main station or other place of physical examination for applicants who have been discharged from last active service by reason of physical disability. Such applicants desiring enlistment will be informed that they must defray their own expenses in connection with travel for physical examination.

[SEAL] WM. E. BERGIN,
Major General, U. S. Army,
The Adjutant General.

[F. R. Doc. 52-8280; Filed, July 28, 1952, 8:49 a. m.]

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter II—Economic Stabilization Agency

[General Order 17]

GO 17—EXEMPTION OF SMALL-BUSINESS ENTERPRISES

Sec.
1. Purpose.
2. Definitions.
3. General exemption of small-business enterprises.
4. Exclusions from the general exemption.
5. Fluctuating work staff.
6. Exemption inapplicable because of improper acts of employer.
7. Effect of loss of exemption resulting from changed conditions.
8. Modification of exclusions from stabilization exemption.
9. Effect on other orders.

AUTHORITY: Sections 1 to 9 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, Stat. 803, as amended; 50 U. S. C. App. Sup. 2101–2110, sec. 402 (e), IX, 66 Stat. 299, P. L. 429, 82d Cong., E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, Sup., as amended.

SECTION 1. *Purpose.* (a) This order is hereby issued pursuant to the Defense Production Act of 1950, as amended, and E. O. 10161, as amended (Pub. Laws 96 and 429, 82d Cong.).

(b) Section 109 (c) of the Defense Production Act Amendments of 1952 added the following exemption from stabilization control to section 402 (a) of the Defense Production Act of 1950, as amended, herein referred to as the act:

(ix) Wages, salaries, or other compensation of persons employed in small-business enterprises as defined in this paragraph: Provided, however, That the President may from time to time exclude from this exemption such enterprises on the basis of industries, types of business, occupations, or areas, if their exemption would be unstabilizing with respect to wages, salaries, or other compensation, prices, or manpower, or would otherwise be contrary to the purposes of this Act. A small-business enterprise, for the purpose of this paragraph, is any enterprise in which a total of eight or less persons are employed in all its establishments, branches, units or affiliates. This paragraph shall become effective thirty days after its enactment • • •

(c) This order is issued to implement the authority granted to exclude certain enterprises from this exemption and to effectuate the purposes and policies set forth in Title IV of the Act. Experience or future developments may make it necessary to add to or remove certain of the exclusions from the general exemption.

(d) In the formulation of this regulation, due consideration has been given to the standards and procedures set forth in Title IV and Title VII of the Defense Production Act, as amended; there has been consultation with labor and industry representatives, and consideration has been given to their recommendations.

SEC. 2. *Definitions.* As used in this order:

(a) The term "small-business enterprise" shall mean any enterprise in which a total of eight (8) or less persons are employed in all its establishments, branches, units, or affiliates.

(b) The term "new plant" means a plant, enterprise, or other employment unit, which on January 25, 1951, had not commenced the production of the materials or services for which it is established or converted.

SEC. 3. *General exemption of small-business enterprises.* Except as provided in section 4, but subject to change from time to time, wages, salaries, or other compensation of persons employed in small-business enterprises are exempted from stabilization regulations and orders issued pursuant to Title IV of the act.

SEC. 4. *Exclusions from the general exemption.* The general exclusion from stabilization regulation applicable to small-business enterprises generally shall not apply to the following enterprises in which exemption would be contrary to the purposes of the act:

(a) Enterprises in which the compensation of one or more of the employees is established on an industry, association, area, or other similar basis, as contained in a master contract or identical contracts, or which follows compensation terms established in such contracts.

(b) Enterprises in the building and construction industry.

(c) Enterprises in local and over-the-road (for hire and contract) trucking operations.

(d) Enterprises employing tool and die (including die, sinking) or pattern makers.

(e) Enterprises in the automotive repair industry.

(f) Enterprises engaged in logging operations or the operation of sawmills or planing mills.

(g) All enterprises in the Territory of Alaska.

(h) New plants in which it is planned or reasonably foreseeable that in excess of eight (8) persons will be employed.

(i) Enterprises (other than banks, building and loan associations and savings institutions) which derive more than 25 percent of their business income from dividends, interest, rents or royalties.

SEC. 5. *Fluctuating work staff.* In addition to the general exemption of small-business enterprises contained in section 3, any enterprise, other than those enumerated in section 4, in which a total of eight (8) or less persons are employed in all its establishments, branches, units, or affiliates as of July 29, 1952, shall be exempted from wage and salary stabilization: *Provided, however,* That if and when total employment in such an enterprise exceeds fifteen (15) persons, this section shall no longer be applicable to such enterprise.

SEC. 6. *Exemption inapplicable because of improper acts of employer.* If an employer divides a business enterprise into separate enterprises in order to claim an exemption under this order, or if he utilizes any other improper device for such purpose, the exemption shall not apply.

SEC. 7. *Effect of loss of exemption resulting from changed conditions.* Whenever the provision for exemption from wage and salary regulation contained in this order are no longer applicable, adjustments in wages, salaries or other compensation shall be subject to applicable wage and salary stabilization regulations and orders.

SEC. 8. *Modification of exclusions from stabilization exemption.* Exclusion of enterprises from the general exemption from stabilization regulation are subject to change from time to time, and all constituent organizations of the Economic Stabilization Agency are authorized to give further study and review of this aspect of stabilization regulation and to make such recommendations to the Economic Stabilization Administrator as they deem will best effectuate the purposes and policies of the act.

SEC. 9. *Effect on other orders.* Any orders or parts of orders, the provisions of which are inconsistent with the provisions of this order, are hereby superseded or amended accordingly.

ROGER L. PUTNAM,
Administrator.

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 7, Amdt. 2 to Supplementary Regulation 4]

CPR 7—RETAIL CEILING PRICES FOR CERTAIN CONSUMER ARTICLES

SR 4—UNIFORM CEILING PRICES FOR BRANDED ARTICLES

EXTENSION OF TERMINAL DATES OF SPECIAL ORDERS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161 and Economic Stabilization Agency General Order No. 2, this amendment to Supplementary Regulation 4 to Ceiling Price Regulation 7 is issued.

STATEMENT OF CONSIDERATIONS

Supplementary Regulation 4 to Ceiling Price Regulation 7 authorizes the establishment of uniform retail and wholesale ceiling prices for certain branded articles and as originally issued, provided that orders issued under Section 43 of Ceiling Price Regulation 7 be revoked upon the effective date of an authorization under SR 4 or on June 30, 1952, whichever was earlier. Amendment 1 to SR 4 of CPR 7 issued and effective on May 26, 1952 extended the automatic revocation date of the Section 43 orders to a series of dates between August 1, 1952 and November 1, 1952, dependent on the order numbers. At the time of the issuance of that amendment, it appeared that applicants were having difficulty in preparing their applications under SR 4 in time to avoid a hiatus between the date the Section 43 order would be automatically revoked and the effective date of the SR 4 authorizations. It now appears that many applicants continue to experience serious difficulties and delays in the preparation of their SR 4 applications.

In many instances if the automatic revocation dates are not extended, hiatuses will occur. Accordingly, the dates set up by this amendment have been fixed to give applicants ample time to prepare their applications.

This amendment fixes the final date for revocation of orders issued under Section 43 of Ceiling Price Regulation 7 as follows:

Special Orders No. 1 through 205 will be revoked September 1, 1952.

Special Orders No. 206 through 599 will be revoked October 15, 1952.

Special Orders No. 600 and following will be revoked November 15, 1952.

In view of the remedial nature of this amendment, special circumstances have rendered consultation with industry representatives, including trade association representatives, impracticable.

AMENDATORY PROVISION

Supplementary Regulation 4 to Ceiling Price Regulation 7 is amended in the following respect:

Section 10 (a) is amended to read as follows:

(a) *Expiration of orders.* Each special order issued to a manufacturer or wholesaler and in effect under Section 43 of Ceiling Price Regulation 7 (including orders amended as provided in paragraph (c) of this section) shall continue in effect but shall expire and be deemed revoked on the date uniform ceiling prices for any of his articles covered by that order are authorized under this supplementary regulation or on the following applicable date, whichever is earlier:

For orders numbered:	*Expiration date is:*
1 through 205	Sept. 1, 1952
206 through 599	Oct. 15, 1952
600 and following	Nov. 15, 1952

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment shall become effective on the 28th day of July 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 28, 1952.

[F. R. Doc. 52-8365; Filed, July 28, 1952; 4:00 p. m.]

[GOR 8, Interpretation 1]

GOR 8—Paper, Paperboard, Converted Paper and Paperboard Products, Allied Products and Services

Int. 1—Exemption of repairing and rebinding services in connection with exempted commodities (section 1 (a) (2))

Amendment 1 to General Overriding Regulation 8, enumerates the classes of paper commodities exempt from price control because of editorial comment, expression of ideas or the dissemination of information. The language also exempts the rates or charges for certain services related to such commodities, including "binding."

The term "binding" includes the services of repairing and rebinding any of the commodities exempted by Amendment 1 to GOR 8.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Supp. 2154)

Herbert N. Maletz,
Chief Counsel,
Office of Price Stabilization.

[Ceiling Price Regulation 22, Amdt. 51]

CPR 22—Manufacturers' General Ceiling Price Regulation

Export sales and sales for export

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Amendment 51 to Ceiling Price Regulation 22 is hereby issued.

Statement of considerations

This Amendment to Ceiling Price Regulation 22 is designed to call to the attention of sellers, who are subject to Ceiling Price Regulation 22 for their domestic sales, that they are subject to Ceiling Price Regulation 61 (Exports) for their export sales and sales for export.

Section 35 of Ceiling Price Regulation 22, which was issued on April 25, 1951, provided that sales in the export market by sellers subject to Ceiling Price Regulation 22 were governed by the provisions of Ceiling Price Regulation 22. On August 6, 1951, Ceiling Price Regulation 61 became effective. Its provisions, as set forth in Section 2 of CPR 61, superseded those provisions of CPR 22 that applied to sales in the export market. Consequently, the export ceiling prices of commodities, covered by CPR 22 for their domestic sales, were to be determined under CPR 61.

The purpose of this Amendment to Ceiling Price Regulation 22 is to change section 35 so that it states expressly that sellers who determine their domestic prices under CPR 22 are subject to the provisions of CPR 61 for their export price.

In view of the clarifying nature of this amendment, special circumstances have rendered consultation with industry representatives, including trade association representatives, impracticable.

Amendatory provisions

Section 35 of Ceiling Price Regulation 22 is amended to read as follows:

Sec. 35. *Export sales and sales for export.* Ceiling Price Regulation 61, issued on July 30, and effective on August 6, 1951, supersedes Ceiling Price Regulation 22 for export sales and sales for export. Therefore, your ceiling prices for export sales and sales for export are determined under Ceiling Price Regulation 61.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This Amendment 51 to Ceiling Price Regulation 22 is effective August 1, 1952.

Ellis Arnall,
Director of Price Stabilization.

July 28, 1952.

[F. R. Doc. 52-8366; Filed, July 28, 1952; 4:00 p. m.]

[Ceiling Price Regulation 30, Amdt. 35]

CPR 30—Machinery and Related Manufactured Goods

Export sales and sales for export

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Amendment 35 to Ceiling Price Regulation 30 is hereby issued.

Statement of considerations

This Amendment to Ceiling Price Regulation 30 is designed to call to the attention of sellers, who are subject to Ceiling Price Regulation 30 for their domestic sales, that they are subject to Ceiling Price Regulation 61 (Exports) for their export sales and sales for export.

Section 33 of Ceiling Price Regulation 30, which was issued on May 4, 1951, provided that sales in the export market by sellers subject to Ceiling Price Regulation 30 were governed by the provisions of Ceiling Price Regulation 30. On August 6, 1951, Ceiling Price Regulation 61 became effective. Its provisions, as set forth in section 2 of CPR 61, superseded those provisions of CPR 30 that applied to sales in the export market. Consequently, the export ceiling prices of commodities, covered by CPR 30 for their domestic sales, were to be determined under CPR 61.

The purpose of this Amendment to Ceiling Price Regulation 30 is to change section 33 so that it states expressly that sellers who determine their domestic price under CPR 30 are subject to the provisions of CPR 61 for their export price.

In view of the clarifying nature of this amendment, special circumstances have rendered consultation with industry representatives, including trade association representatives, impracticable.

Amendatory provisions

Section 33 of Ceiling Price Regulation 30 is amended to read as follows:

Sec. 33. *Export sales and sales for export.* Ceiling Price Regulation 61, issued on July 30, and effective on August 6, 1951, supersedes Ceiling Price Regulation 30 for export sales and sales for export. Therefore, your ceiling prices for export sales and sales for export are determined under Ceiling Price Regulation 61.

(Sec. 704, Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This Amendment 35 to Ceiling Price Regulation 30 is effective August 1, 1952.

Ellis Arnall,
Director of Price Stabilization.

July 28, 1952.

[F. R. Doc. 52-8367; Filed, July 28, 1952; 4:00 p. m.]

[Ceiling Price Regulation 98, Interpretation 1]

CPR 98—Resellers of Iron and Steel Products

Int. 1—Pricing of blanks, punchings or similar residue of industrial fabrication (section 31)

The Office of Price Stabilization has been asked whether ceiling prices of waste products such as blanks, punchings or similiar residue of industrial fabrication of prime quality industrial steel products should be determined under section 31 of Ceiling Price Regulation 98. (The inquiry does not relate to leftover items resulting from such warehousing operations as cutting, shearing, flame-cutting or burning to size or shape.)

Ceiling prices for such residue should be established under either Ceiling Price Regulation 5 or the General Ceiling Price Regulation according to the use for which purchased by the consumer.

If the use to which it is to be put is one of those described in section 28 (c) of Ceiling Price Regulation 5, the residual product should be considered steel scrap and be priced under Ceiling Price Regulation 5.

If it is purchased to be used for further fabrication, which has been the common case, it should be priced under the GCPR.

Section 31 of Ceiling Price Regulation 98, as amended, is intended to apply only to re-usable industrial steel products. It does not cover residue of industrial fabrication of prime quality industrial steel products.

(Sec. 704, 64 Stat. 816 as amended; 50 U. S. C. App. Sup. 2154)

Herbert N. Maletz,
Chief Counsel,
Office of Price Stabilization.

July 28, 1952.

[F. R. Doc. 52-8363; Filed, July 28, 1952; 11:22 a. m.]

[General Ceiling Price Regulation, Supplementary Regulation 41, Revision 1, Amdt. 1]

GCPR, SR 41—Adjustment of Ceiling Prices for Brown Iron Ore Produced in the Southeastern States

Brown iron ore producers in Texas and Missouri

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this amendment to S. R. 41, Revision 1 to the General Ceiling Price Regulation is hereby issued.

Statement of considerations

This amendment grants brown iron ore producers in Texas and Missouri the same increase in the ceiling price for their ore permitted to other producers under Supplementary Regulation 41, Revision 1, to the General Ceiling Price Regulation.

Since the issuance of Revision 1 to SR 41 on November 5, 1951, the Office of Price Stabilization has been advised that there are brown iron ore producers in Texas and Missouri who sell their products to cement mills. The ore is used in meeting Government contract specifications, for quick setting cement. As was the case with the producers previously covered by this supplementary regulation, Texas and Missouri producers have shown the need to be included under the regulation.

The same considerations which supported the issuance of SR 41 and the subsequent Revision 1, apply as well to this amendment.

In view of the nature of this amendment, special circumstances have rendered consultation with industry representatives, including trade association representatives, impracticable.

Amendatory provisions

Supplementary Regulation 41, Revision 1, is amended in the following respects:

1. Section 1 is amended to read:

Section 1. *What this revised supplementary regulation does.* This revised supplementary regulation increases the ceiling prices established by the General Ceiling Price Regulation for brown iron ore produced in the southeastern states, Texas and Missouri. It supersedes Supplementary Regulation 41 to the General Ceiling Price Regulation issued and effective July 17, 1951, extending the relief granted Georgia producers therein to all producers of brown iron ore in the southeastern states, Texas and Missouri.

"Southeastern states" include Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee and Virginia.

2. Section 2 is amended to read:

Sec. 2. *Adjustment in ceiling prices.* If you are a seller of brown iron ore in the southeastern states, Texas or Missouri, your ceiling price is the ceiling price determined in accordance with the General Ceiling Price Regulation plus $0.02 per long dry unit.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment to the General Ceiling Price Regulation shall become effective August 1, 1952.

Ellis Arnall,
Director of Price Stabilization.

July 28, 1952.

Chapter IV—Salary and Wage Stabilization, Economic Stabilization Agency

Subchapter A—Salary Stabilization Board

[Interpretation 12]

Int. 12—Exclusion From Salary Stabilization of Professional Engineers Employed in a Professional Capacity

Correction

In F. R. Doc. 52-7411, appearing at page 5989 of the issue for Thursday, July 3, 1952, the following change should be made:

In the second line of the first paragraph, "section 402 (c)" should read "section 402 (e)".

[Interpretation 14]

Int. 14—Exclusion From Salary Stabilization of Professional Architects Employed in a Professional Capacity

This interpretation defines the scope of paragraph (ii) of section 402 (e) of the Defense Production Act of 1950, as amended by the Defense Production Act Amendments of 1952, with regard to the exclusion from stabilization of the salaries and other compensation "• • • paid to professional architects employed in a professional capacity by an architect or firm of architects engaged in the practice of his or their profession: • • •"

1. *Definition of professional architect.* A person is qualified as a professional architect if he is licensed or registered to practice as such in any state, territory, or possession of the United States or in the District of Columbia. Candidates for registration as professional architects are not professional architects.

2. *Persons who are not professional architects.* Unless licensed to practice as professional architects, architectural designers, renderers, draftsmen, landscape architects, interior decorators, project managers, or other personnel who work in close association with professional architects, are not professional architects.

3. *Employed in a professional capacity.* (a) The statutory exclusion from salary stabilization extends to a professional architect only if he is employed in a professional capacity. A person is so employed if he performs architectural work of a professional character within the meaning of the Regulations, Part 541, issued by the Administrator of the Wage and Hour and Public Contracts Divisions pursuant to section 13 (a) (1) of the Fair Labor Standards Act of 1938, as amended (29 CFR, 1950 Supp.).

(b) A person, qualified as a professional architect, may actually be employed in a position which does not involve the duties or responsibilities of a professional architect. Such a person is not regarded as being employed in a professional capacity, even though he may be employed by a professional architect or a firm of professional architects.

For example, professional architects are sometimes employed by a firm of architects in an administrative capacity (such as an office manager). To the extent that the professional activities of such architects do not meet the standards of the Regulations, Part 541, they are not exempt from salary stabilization.

4. *Employed by an architect or firm of architects.* For the statutory exemption to apply, the employing architect or architects must be self-employed and must practice either in their own name or as partners of a firm of architects.

The employing architect or firm of architects must be engaged in professional architectural work, as distinguished from non-architectural work. The architect himself, not a client of the architect, must be the employer.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Issued by the Office of Salary Stabilization, July 22, 1952.

Joseph D. Cooper,
Executive Director.

[F. R. Doc. 52-8357; Filed, July 28, 1952; 10:09 a. m.]

[Interpretation 15]

Int. 15—Exclusion From Salary Stabilization of Certified Public Accountants Employed in a Professional Capacity

This interpretation defines the scope of paragraph (ii) of section 402 (e) of the Defense Production Act of 1950, as amended by the Defense Production Act Amendments of 1952, with regard to the exclusion from stabilization of the salaries and other compensation "• • • paid to certified public accountants licensed to practice as such employed in a professional capacity by a certified public accountant or firm of certified public accountants engaged in the practice of his or their profession."

1. *Certified public accountants licensed to practice as such.* To be exempt, an accountant must have a certificate to practice public accountancy in the jurisdition where he is employed in a professional capacity. A certified public accountant employed in a jurisdiction in which he is not certified is not covered by the exemption.

2. *Employed in a professional capacity.* The exemption extends to a certified public accountant only if he is employed in a professional capacity. A certified public accountant is employed in a professional capacity if he performs work which requires application of his accounting knowledge and exercise of discretion or judgment, and which is predominantly intellectual and varied in

character. He must be actually and actively engaged in the public practice of accounting and at least half of his time must be spent in professional accounting work.

Certified public accountants are sometimes employed by accounting firms as office managers or secretaries. Their functions in such capacities are clerical or administrative, and professional work as a certified public accountant is not their primary duty. To the extent that non-professional activities predominate, such certified public accountants are not exempt from salary stabilization.

Certified public accountants may be employed in a dual capacity, such as being associated with a firm of certified public accountants and acting as officer or controller of a business corporation at the same time. In such instances, the salary received for services as such corporate employee remains subject to salary stabilization. To be exempt, a certified public accountant must be employed and paid by a certified public accountant or firm of certified public accountants engaged in the practice of his or their profession; certified public accountants in the employ of any other employer are not exempted by the statute.

3. *A certified public accountant or firm of certified public accountants engaged in the practice of his or their profession.* For the statutory exemption to apply, the employing certified public accountant or certified public accountants must be self-employed and must practice either in their own name or as partners or members of a firm.

The employing certified public accountant or firm of certified public accountants must be engaged in the professional public practice of accounting, actually and actively, and on a fee basis, and not in non-professional work, such as the management of publications serving the accounting profession or of professional associations. The certified public accountant himself, not a client of the certified public accountant, must be the employer.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Issued by the Office of Salary Stabilization, July 23, 1952.

JOSEPH D. COOPER,
Executive Director.

[F. R. Doc. 52-8358; Filed, July 28, 1952; 10:10 a. m.]

Subchapter B—Wage Stabilization Board

ORDER ADOPTING PRIOR WAGE REGULATIONS

Sec.
1. Purpose.
2. Legal basis and authority.
3. Adoption of prior wage regulations.
4. Continuation in effect of certain other actions.
5. Affect on other orders.
6. Effective date.

SECTION 1. *Purpose.* (a) The purpose of this order is to promulgate regulations governing the payment of wages, salaries, and other compensation for persons under the jurisdiction of the Wage Stabilization Board after the 29th day of July 1952, in view of the provisions of section 403 (b) of the Defense Production Act, as amended (section 112, Pub. Law 429, 82d Cong.).

SEC. 2. *Legal basis and authority.* (a) This order is promulgated under the authority vested in the Economic Stabilization Administrator by the Defense Production Act of 1950, as amended (Pub. Law 774, 81st Cong., Pub. Laws 96 and 429, 82d Cong.), and Executive Order 10161, as amended.

SEC. 3. *Adoption of prior wage regulations.* (a) The General Wage Stabilization Regulation, the General Wage Procedural Regulation, all General Wage Regulations, and all Resolutions of the Wage Stabilization Board heretofore published in the FEDERAL REGISTER, as well as all amendments or revisions thereof, existing on the 29th day of July 1952, are hereby adopted and promulgated as the General Wage Regulations of the Economic Stabilization Administrator until his further order, except for the following which are hereby revoked:

(b) Enumeration of prior wage regulations revoked: (1) Subsections (b), (c) and (d) of section 1, and also sections 2, 3, 4, and 5 of General Wage Regulation 11. (Agricultural Labor)

(2) Resolution 79 (Disputes)

(3) Resolution 84 (Disputes)

SEC. 4. *Continuation in effect of certain other actions.* (a) All interpretations of General Wage Regulations, resolutions, other than those included in section 3 (a), rules, decisions, rulings, directives and other actions taken by the Wage Stabilization Board which existed under authority of Executive Order No. 10161, as amended, and Executive Order No. 10233, implementing its General Wage Stabilization Regulation, General Wage Regulations and Resolutions, shall remain in effect, except as they are inconsistent herewith or with the Defense Production Act of 1950, as amended, or are hereafter amended, revoked or terminated under proper authority.

SEC. 5. *Effect on other orders.* (a) Nothing contained herein shall be construed to limit the functions of the Wage Stabilization Board described in General Order No. 16.[1]

SEC. 6. *Effective date.* (a) This order becomes immediately effective at the close of the 29th day of July 1952, commencing with the 30th day of July 1952.

ROGER L. PUTNAM,
Economic Stabilization Administrator.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 857]

CALIFORNIA

PARTIAL REVOCATION OF EXECUTIVE ORDER NO. 6361 OF OCTOBER 25, 1933, WITHDRAWING PUBLIC LANDS FOR CLASSIFICATION

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910 (36 Stat. 847; 43 U. S. C. 141), and pursuant to Executive Order No. 10355 of May 26, 1952 (17 F. R. 4831), it is ordered as follows:

Executive Order No. 6361 of October 25, 1933, withdrawing certain public lands in California for classification and pending determination as to the advisability of including such lands in a national monument, is hereby revoked so far as it affects the following-described land:

SAN BERNARDINO MERIDIAN

T. 2 S., R. 4 E.,
Sec. 32, NW¼.

The area described contains 160 acres.

This revocation is made in furtherance of an exchange under section 8 of the act of June 28, 1934, as amended by section 3 of the act of June 26, 1936 (48 Stat. 1272, 49 Stat. 1976; 43 U. S. C. 315g), by which the offered lands will benefit a Federal land program. This restoration is, therefore, not subject to the provisions contained in the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended, granting preference rights to veterans of World War II and others.

MASTIN G. WHITE,
Acting Secretary of the Interior.

JULY 23, 1952.

[F. R. Doc. 52-8266; Filed, July 28, 1952; 8:46 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[7 CFR Part 963]

[Docket Nos. AO-233, AO-233-RO1]

HANDLING OF MILK IN STARK COUNTY, OHIO, MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S .C. 601 et seq.), hereinafter referred to as the "act," and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to a proposed marketing agreement and a proposed order regulating the handling of milk in the Stark County, Ohio, marketing area. Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 20th day after publication of this decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. The hearing on the record of which the proposed marketing agreement and order were formulated was conducted at Canton, Ohio, on September 17–21, 1951, and on February 11–12, 1952, pursuant to notices thereof which were issued on August 29, 1951 (16 F. R. 8909) and on January 14, 1952 (17 F. R. 580).

The material issues of record related to:

1. Whether the handling of milk in the market is in the current of interstate commerce or directly burdens, obstructs or affects interstate commerce in milk or its products;

2. Whether marketing conditions justify the issuance of a marketing agreement or order; and

3. If an order is issued what its provisions should be with respect to:

(a) The scope of regulation;

(b) The classification of milk;

(c) The level of class prices and the method of determining such prices;

(d) The method to be used in distributing proceeds to producers; and

(e) Administrative provisions.

Findings and conclusions. The following findings and conclusions on the material issues are based upon evidence in the record.

Nature of commerce. The handling of milk produced for sale within the Stark County, Ohio, marketing area and the products thereof is in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce in milk or milk products.

The production area for the Stark County marketing area overlaps the production areas for the Pittsburgh, Pennsylvania, the Wheeling, West Virginia, and the Cleveland, Ohio, markets to the extent that in the overlapping areas the farms on which milk is produced for the Stark County market are interspersed with farms supplying Pittsburgh, Wheeling and Cleveland. Some shifting of dairy farmers between the Stark County market and these other markets occurs from time to time. The handling of milk in the Cleveland, Ohio, marketing area is regulated by an order issued by the Secretary of Agriculture. Milk for the Stark County marketing area is therefore purchased in direct competition with milk for other markets in which the handling of milk is in the current of interstate commerce.

Milk manufacturing plants at which cheese and condensed milk products and other milk products are manufactured are scattered throughout the production area for the Stark County marketing area. Farms on which milk is produced for the Stark County market are interspersed quite generally with farms supplying milk to these manufacturing plants. At times dairy farmers supplying milk to these manufacturing plants become producers of milk for fluid consumption in the Stark County marketing area. Thus milk for the Stark County marketing area is purchased in direct competition with milk for these manufacturing plants. Some of the products manufactured at these plants actually move in interstate commerce. All of these manufactured products, whether or not they actually move in interstate commerce, are sold in direct competition with similar products that are in interstate commerce, and thus directly burden, obstruct, or affect interstate commerce in such products. Large quantities of the reserve supply of milk for the Stark County market move to these manufacturing plants where such milk is intermingled with other milk at these plants and is manufactured into milk products which move in interstate commerce or directly burden, obstruct, or affect interstate commerce in such products.

Large quantities of milk products which either move in interstate commerce or directly burden, obstruct, or affect interstate commerce in such products are consumed in the Stark County marketing area.

It is concluded that the handling of milk produced for sale within the Stark County, Ohio, marketing area and the products thereof is in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce in milk or milk products.

Market conditions. The issuance of an order to regulate the handling of milk in the Stark County, Ohio, marketing area, with terms and conditions hereinafter concluded to be appropriate, will tend to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended.

A large proportion of the milk produced for the Stark County, Ohio, marketing area is marketed by a cooperative association which service as marketing agent for its members. Milk sold by this cooperative association to milk distributors is priced according to its use so that all milk distributors who obtain their supplies through the cooperative association pay the same price for milk similarly used. Returns for all milk sold in this manner are pooled and a uniform price which is paid to all members of the cooperative association is determined.

A smaller but significant proportion of the milk produced for the Stark County, Ohio, marketing area is sold by the producers directly to the milk distributor. Since the individual producer who serves as his own selling agent usually has little bargaining power, the terms of these sales are often established to a considerable extent by the milk distributor purchasing the milk. Prices paid for milk sold by these individual producers are usually based on the uniform price received by members of the cooperative association without regard to the use of such milk. If a milk distributor who buys his milk in this manner uses a larger proportion of his milk in higher classes than the milk distributors who purchase their milk through the cooperative association, he is buying his milk at some competitive advantage, and unless this advantage is dissipated at some other stage in his operation, he is in a position to increase his sales of Class I milk at the expense of sales by distributors who purchase from the cooperative. The more he captures sales from other distributors the greater his ability to continue this price reduction. This phenomenon is a potential source of market disorder and instability. This potentiality has materialized to some extent in certain portions of the marketing area. To counteract the competitive disadvantage which milk distributors obtaining supplies through the cooperative association have experienced from the so-called "flat price" buyers, the cooperative has sold milk to its own distributors at reduced prices for sale in areas where the effects of "flat price" buying were especially prevalent.

There is some indication that the proportion of the total market requirements which is purchased through the cooperative association is declining. As this proportion declines the incentive for handlers purchasing milk through the cooperative association to seek supplies directly from producers is likely to increase.

The present arrangements for verification of the utilization of milk are inadequate for the most successful operation of a use classification plan of selling milk. Milk sold to milk distributors through the cooperative association is subject to verification only if it is used in certain products. No utilization can be completely verified except through the balancing of total receipts and total utilization as revealed by audit. A marketing order will provide for thorough verification of all receipts and utilization of milk.

Producers and coperative associations can do much toward balancing market supply with market requirements if current, complete, and accurate market-wide information is available. Such information has not been available, but would be publicly available pursuant to the marketing order proposed herein.

A check weighing and testing service for all producers to assure them that they are paid the full value for the amount and quality of milk which they sell is provided for in the proposed order. This service is currently being rendered by the cooperative association for its members but no such service is generally available for producers who are not members of the cooperative association.

Undoubtedly the prices prevailing in the Cleveland market where the handling of milk is regulated by a marketing order have some influence on prices in the Stark County market; however, this influence has not been great enough to prevent a decline in the last few years in prices received by producers supplying the Stark County market in relation to prices received by producers supplying the Cleveland market. This decline in prices has affected the regular market supply to the extent that this supply which has usually been adequate had to be supplemented in the past fall and winter with milk from outside sources.

These existing conditions contribute or tend to contribute to disorder and instability in the marketing of milk produced for sale in the Stark County, Ohio, marketing area, and the issuance of an order regulating the handling of milk in this area, with terms and conditions hereinafter concluded to be appropriate, will tend to correct such conditions and will thus tend to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended.

Scope of regulation. The regulations contained in an order regulating the handling of milk in the Stark County, Ohio, marketing area should be applicable to all "handlers" who operate "routes" in the "marketing area." The regulations should be somewhat different depending upon whether a handler operates a "pool plant" or a "nonpool plant," and whether a handler's supplies of milk are "producer milk" or "other source milk." "Producer-handlers" should be exempt from certain of the regulations. The returns for all milk subject to the order should be distributed among all "producers."

Handlers. All persons who sell or distribute any Class I milk (as hereinafter defined) in the marketing area should be handlers. Since the regulations contained in an order are applicable only to handlers, the regulations cannot be applied completely and uniformly unless they apply to all persons engaged in selling or distributing milk. Failure to apply the regulations completely and uniformly could place some persons engaged in milk handling at a competitive advantage or disadvantage in relation to others. The regulations should be applicable to those persons who sell or distribute Class I milk because Class I milk comprises those products which to a large extent must be made from locally approved milk and for which the prices herein concluded to be appropriate are intended to maintain an adequate supply of milk. A person who is a handler under a Stark County marketing order should be a handler only with respect to the milk received at a milk handling plant (hereinafter referred to as a "plant") from which milk is sold or distributed in the marketing area and with respect to milk which is usually received at such a plant from producers (as hereinafter defined) but which such handler causes to be diverted temporarily from producers' farms to a nonpool plant as hereinafter defined. Such diversions may be made from time to time when supplies at a plant are seasonally heavy or when short term surpluses develop at the plant.

A cooperative association should be a handler with respect to milk which is usually delivered to a pool plant (as hereinafter defined) but which the cooperative association causes to be diverted from the farms of producers to a nonpool plant for short periods of time. The cooperative association in the market is permitted by its contract with its members to make such diversions of milk. Since such diversions would be made at the instance of the cooperative association, such association should be a handler with respect to such milk and should perform the functions required in the order to be performed by a handler with respect to such milk.

Route. Any sale or delivery of Class I milk by a handler to any person other than a handler should be considered as a route. This would include sales from a plant or a store operated by a handler or deliveries to homes or to stores or other establishments operated by a person other than a handler. It would also include sales to persons (sometimes referred to as "brokers" or "jobbers" or "peddlers") who do not operate a plant but purchase packaged milk or other products from a handler and deliver such milk or other products to other persons.

Marketing area. The Stark County, Ohio, marketing area should include all of the territory within (a) Stark County with the exceptions of Paris and Sugar Creek Townships. Sections 6 and 7 of Lake Township, and Section 3 of Jackson Township;

(b) Smith Township in Mahoning County with the exception of Great Lot 35; (c) Knox Township in Columbiana County, and (d) Sections 1, 2, 3, 10, 11 and 12 in Sugar Creek Township of Wayne County.

Located within Stark County are three major cities—Alliance, Canton, and Massillon. Milk for these three cities is obtained from the same general supply area. Milk distributors who distribute a large portion of the milk in these cities purchase their milk supplies through the present pooling arrangement. Milk distributors located in Canton sell some milk in Massillon and milk distributors located in Massillon sell some milk in Canton. Canton milk distributors sometimes transfer milk in bulk to Alliance milk distributors. The health regulations of the three cities are similar to the extent that producers qualified to produce milk under the regulations of one city can usually qualify under the regulation of either of the other two cities without any change in production methods or equipment. From time to time producers delivering milk to a milk distributor in one of the cities shift to a milk distributor in another of the cities.

Canton, which is much larger than either Alliance or Massillon, has a population of about 117,000. Thickly populated suburban areas surround Canton. The population of metropolitan Canton is about 140,000 to 145,000. Alliance and Massillon are also surrounded by thickly populated suburban areas.

Not all plants from which milk is distributed in the cities are located within the city limits. Milk distributors distributing milk in the cities also distribute milk extensively in the suburban areas where they compete with a number of dairy stores from which no milk is distributed in the cities; however, some of these dairy stores are located near enough to the boundaries of the cities so that consumers residing within the boundaries of the cities can easily purchase milk from the stores. Milk producers who from time to time are disqualified by the appropriate health authority to deliver milk to a milk distributor in one of the cities often become a part of the milk supply for one of these dairy stores. On the basis of these market conditions it is concluded that all three of the cities should be included in the marketing area and that the marketing area should extend beyond the boundaries of the cities.

Proposals were made to include in the marketing area all of Stark County, the southern portions of Franklin and Green Townships in Summit County, the southern portions of Suffield and Randolph Townships in Portage County, all of Smith Township in Mahoning County, Knox and West Townships in Columbiana County, the part of the village of Minerva which is in Carroll County, and all of Sugar Creek Township in Wayne County. This area includes substantially all of the territory in which milk is distributed by milk dealers who purchase their milk supplies through the present pooling arrangement.

The southern portions of Franklin and Green Townships in Summit County and Suffield and Randolph Townships in Portage County are mostly rural territory. A few villages are located therein. A substantial portion of the milk sold in this territory is distributed by milk dealers primarily associated with the Akron market. These Akron dealers also sell a substantial portion of the milk sold in the village of Uniontown, which

is located in Sections 6 and 7 of Lake Township in Stark County. It is therefore concluded that the southern portions of Franklin and Green Township in Summit County and Suffield and Randolph Townships in Portage County, and Sections 6 and 7 Lake Township in Stark County should not be a part of the marketing area.

Located in Section 3 of Jackson Township in Stark County is the plant of one milk distributor. The milk distribution from this plant comprises only deliveries to schools in Green Township of Summit County and sales from a plant store. The deliveries to schools in Green Township represent a considerable portion of this milk distributor's business. Since it is concluded above that Green Township should not be a part of the marketing area, this milk distributor with a considerable proportion of his business in Green Township should not be regulated by an order. Exclusion of Section 3 from the marketing area will exempt this milk distributor from regulation under the order as long as he makes no sales or deliveries of milk within the marketing area. Exemption of this milk distributor from regulation should not have any discernibly adverse effect on the competitive relationship of other milk distributors who are subject to the regulation of an order. If this milk distributor should extend his sales or deliveries into any portion of the marketing area then he would become subject to regulation by the order. It is therefore concluded that Section 3 of Jackson Township in Stark County should not be included in the marketing area.

The eastern boundary of Alliance coincides with a portion of the western boundary of Smith Township in Mahoning County. Part of the suburban area surrounding Alliance is located in Smith Township. One milk distributor whose plant is located at Beloit, which is in Smith Township, has about two-thirds of his sales in Alliance. Two milk distributors whose plants are located in Alliance have distribution routes extending into Smith Township and into Knox Township in Columbiana County. The routes of these three milk distributors are intermingled.

Located in Great Lot 35 of Smith Township is one milk handling plant. This plant is primarily engaged in supplying milk to the Pittsburgh, Pennsylvania, market. A small portion of the milk received at this plant is packaged and is distributed through a plant store. Exclusion of Great Lot 35 from the marketing area will exempt the operator of this plant from regulation under the order as long as he makes no sales or deliveries of milk within the marketing area. Inclusion of the operator of this plant under the regulation of an order for the Stark County marketing area would present administrative problems of regulating under an order a plant whose milk supply is primarily associated with another market. Exemption of the operator of this plant from regulation under an order should not have any perceptibly adverse effect upon the competitive relationship of milk distributors who are subject to the order. If the operator of this plant should extend his sales or deliveries of milk into any part of the marketing area, he would then become subject to the order.

It is concluded that Smith Township of Mahoning County, with the exception of Great Lot 35, and Knox Township of Columbiana County should be included in the marketing area.

Paris and Sugar Creek Townships of Stark County should not be included in the marketing area. Located in each of these townships is a plant at which most of the milk received is manufactured into milk products. Milk is not distributed from either of these plants into any part of the marketing area herein concluded to be appropriate. Some milk is distributed in Sugar Creek Township by milk distributors who are located outside of any of the territory proposed for inclusion in the marketing area and whose primary business is outside of any of that territory.

West Township of Columbiana County and the portion of the village of Minerva which is in Carroll County should not be a part of the marketing area. A milk distributor whose plant is located within this territory makes no sales or deliveries of milk in the marketing area herein proposed.

The marketing area should include Sections 1, 2, 3, 10, 11 and 12 in Sugar Creek Township of Wayne County. This includes the village of Dalton and the territory lying between Dalton and the Stark County boundary. Dalton is served by Massillon milk distributors and by at least two other milk distributors located outside the proposed marketing area. The Massillon distributors deliver somewhat over half of the milk sold in Dalton. They also distribute milk in the territory between Massillon and Dalton. One of the distributors who is located outside the proposed marketing area and who sells milk in Dalton also sells substantial quantities of milk in other parts of Sugar Creek Township. He is the only milk distributor who sells milk in certain parts of the township. It is concluded that all of Sugar Creek Township of Wayne County with the exceptions of Sections 1, 2, 3, 10, 11, and 12 should be excluded from the marketing area.

Pool plant, nonpool plant, producer milk, and other source milk. All milk distribution plants located within the marketing area, except those which may have a very small volume of distribution, are engaged to a considerable extent in distributing milk within the marketing area. All such plants should be pool plants. Any plant which is located outside of the marketing area and from which 10 percent or more of its total disposition of Class I milk is in the marketing area should also be a pool plant, except any plant which may have a very small volume of distribution in the marketing area. A plant with this proportion of its Class I disposition in the marketing area is engaged to a considerable extent in distributing milk within the marketing area and the handler operating such plant should be subject to the regulations imposed by the order on operators of pool plants.

Any plant located either within or outside the marketing area should not be a pool plant if the total disposition of Class I milk on a route in the marketing area from such plant is less than 18,000 pounds per month. This limitation is necessary and desirable to prevent any plant which is primarily engaged in manufacturing milk products from being subject to the order.

In computing the total disposition of Class I milk which is in the marketing area, any Class I milk disposed of on a route which is partially within the marketing area should all be considered as having been disposed of within the marketing area. The administrative problems involved in attempting to divide a route into disposition within and outside the marketing area and to verify such division are such as to make such division not feasible.

Any plant which is not a pool plant should be a nonpool plant.

Since the period to be used for classification and pricing is a calendar month, the status of a plant as either a pool plant or a nonpool plant should be determined on a monthly basis.

Producer milk should include all milk received by a handler at a pool plant from dairy farmers. Other source milk should comprise all milk and milk products received by a handler from any source other than producers or pool plants. Pursuant to these two definitions milk received by a handler from a pool plant would be neither producer milk nor other source milk.

Since it is the primary purpose of the order herein proposed to regulate the handling of milk only within the marketing area, it is desirable to limit its applicability to such handling of milk to the extent that it is administratively feasible to do so and at the same time have complete and uniform regulation of all milk handling within the marketing area. To carry out this purpose it is appropriate to impose one type of regulation on handlers operating pool plants and another type on handlers operating nonpool plants.

Handlers operating pool plants should be required to report to the market administrator the receipts of all milk and milk products at his plant and all disposition of milk and milk products from such plant. All milk and milk products received at a pool plant should be classified in the classes hereinafter established and all producer milk received at a pool plant should be paid for by the handler operating the pool plant at class prices hereinafter established. Handlers operating pool plants should also submit to the market administrator a producer pay-roll showing receipts of milk for each producer and the amount paid each producer.

Complete and uniform regulation of all milk handling in the marketing area can be assured by applying the regulations here proposed for pool plants to nonpool plants also; however, since a nonpool plant may have a large proportion of its total distribution of milk outside the marketing area in areas where no regulations such as those imposed by this order are applicable, an operator of a nonpool plant might be placed at a

considerable competitive disadvantage if he were subject to the pricing and payment provisions of an order while his major competitors were not subject to such regulation. On the other hand failure to prescribe any regulations for a nonpool plant could result in unregulated milk being sold in the marketing area at lower prices than regulated handlers could sell milk. It is this same type of disorderly marketing conditions which is sought to be corrected by this order. Regulations to be imposed against handlers operating nonpool plants should comprise only such regulations as are necessary to remove any competitive advantage with respect to Class I milk in the marketing area which such handlers might enjoy in relation to handlers operating pool plants. Handlers operating nonpool plants should make a payment on all Class I milk disposed of on routes extending into the marketing area in an amount sufficient to insure that the net cost of their milk supplies including these payments is no less than the Class I price. In order for the market administrator to be able to verify adequately the volume of Class I milk which a handler operating a nonpool plant distributes on routes extending into the marketing area, the handler should be required to report total receipts and disposition of milk and milk products at his nonpool plant and to permit verification by the market administrator of such receipts and disposition.

Provision should be made so that a handler operating a nonpool plant can avoid the payments described above by obtaining supplies of milk from a pool plant to meet his sales in the marketing area.

Payments similar to those described above to be made on Class I milk disposed of from nonpool plants on routes extending into the marketing area should also be made on any other source milk at a pool plant which is classified as Class I milk. Failure to require such payments would mean incomplete regulation and could have a similar result to failure to regulate nonpool plants operating routes in the marketing area. It is not administratively feasible to regulate other source milk received at a pool plant to the same extent that producer milk is regulated. Both handlers and producers proposed that such payments be required only if the receipts of other source milk in relation to receipt of producer milk exceed prescribed limits. Such limitation on these payments could result in handlers regularly relying on supplies of other source milk up to the prescribed limit, and thereby to the extent allowed producer milk would be displaced in Class I by other source milk, which may be available (as described hereinafter) at a less than the Class I price. This would be deleterious to the ends sought by this regulation. The prices established by this order should be high enough to assure an adequate supply of producer milk for the market. However, with other source milk available at less than the Class I price, handlers would tend to substitute such milk in place of producer milk. In order to assure complete regulation, discourage replacement of producer milk with other source milk, and eliminate any competitive advantage which might otherwise accrue to handlers using other source milk, payments sufficient to insure that the minimum price of other source milk will be uniform with the Class I price should be made on all other source milk received at a pool plant and classified as Class I milk.

Other source milk may be obtained from plants subject to another order or from plants not subject to any order, and these plants not subject to any order may primarily be either fluid milk plants or manufacturing plants. Nonpool plants may obtain other source milk directly from dairy farmers. The health regulations applicable to plants in the marketing area which do not hold permits from health authorities of Alliance, Canton, or Massillon are such that a handler could probably use a small portion of high quality manufacturing milk in his fluid operation. Alliance, Canton, and Massillon health authorities have in times of extreme milk shortages permitted handlers to obtain supplemental supplies from primarily manufacturing plants. The possibility that a handler may obtain supplies of manufacturing milk without the approval of the proper health authorities is always present.

There are several milk manufacturing plants in or near Stark County which are possible sources of other source milk. Some are near enough that little if any transportation cost would be involved in obtaining milk from them. A cooperative association in the market operates one such plant. In view of these conditions handlers at times may obtain other source milk which is similar in quality to manufacturing milk.

The prices paid to dairy farmers for milk by operators of manufacturing plants in Ohio and by other fluid milk dealers for surplus milk have been approximately equal to the price which would have resulted in recent years from the Class II pricing provisions herein proposed. Hence other source milk may be available to handlers in the marketing area as Class I milk for which only a price comparable to the Class II price was paid. It is concluded that a payment on all Class I other source milk at a pool plant and on all Class I other source milk distributed on routes extending into the marketing area from a nonpool plant is necessary to insure that no unregulated other source milk is available for sale as Class I milk in the marketing area for which the minimum prices to dairy farmers producing such milk was less than the price applicable to Class I producer milk regulated by this order. The amount of such payment on other source milk obtained from a plant subject to another milk marketing order should be any amount by which the value of such milk at the price at which such milk was required to be paid pursuant to the other order is less than the value of such milk at the Class I price prescribed in this order. The amount of such payment on all other source milk other than that subject to another order should be the difference between the value of such milk at the Class I price and the value of such milk at the Class II price. Payments in these amounts are necessary to assure that handlers distributing Class I other source milk in the marketing area have minimum prices for their milk supplies uniform with handlers using producer milk.

It is recognized that all handlers who handle other source milk which would be subject to the payments herein described may not obtain supplies of other source milk at or near the Class II price at all times. However, in view of the conclusion that other source milk may be available at about that price, its use computing the payment is appropriate. Even if using the actual cost of other source milk could be justified economically, it is not administratively feasible to attempt to determine the actual costs to each handler of each different lot of other source milk which he purchases as a basis for computing the amount of payment.

It is appropriate to impose these payments against the person who is engaged in distributing milk in the marketing area. To require the payments to be made by the operator of a nonpool plant from which the handler distributing milk in the marketing area obtains other source milk would require the extension of regulation to include additional handlers. Furthermore, the operator of a nonpool plant whose only connection with the Stark County market is to sell other source milk to a handler will have no direct control over the handling of the milk after the handler takes title to it, and the manner in which milk is handled in the handlers plant can affect the amount of payment on other source milk.

Payments made by handlers on other source milk should become a part of the producer-settlement fund (hereinafter described) and be distributed among all producers supplying the market. The term "producer" as hereinafter defined includes those dairy farmers who regularly supply milk for the marketing area. Any other source milk used for this purpose would likely displace producer milk.

Producer-handler. Persons who are engaged in producing milk and distributing only milk of their own production should be subject to the order only to the extent that they be required to submit reports to the market administrator as he may require them and to maintain and make available to the market administrator accounts, records, and facilities so that the market administrator may verify that such persons are producer-handlers. The classification provisions of the proposed order provide that any milk, skim milk, or cream transferred from a pool plant to a producer-handler will be Class I. Since producer-handlers dispose of most of their milk in the higher value outlets and will not be required to share (pool) these high value outlets with producers, any supplemental supplies of milk which they obtain from pool plants will likely be used in these high value outlets and should be classified as Class I milk. Pursuant to the proposed order any milk which a pool plant receives from a producer-handler would be other source milk and would therefore be allocated to the lowest class

of utilization at the pool plant after the allocation of shrinkage, products received and disposed of in like form, and frozen cream. If any milk received at a pool plant from a producer-handler is allocated to Class I milk, then such milk would be subject to the payments described above on Class I other source milk by the handler operating the pool plant.

Producer. All dairy farmers who deliver milk directly to a pool plant should be producers; any dairy farmers who have been regularly delivering milk to a pool plant, but whose milk is diverted from the farm to a nonpool plant by either a cooperative association or the handler operating the pool plant to which they regularly delivered should also be producers. Such diversions, which are sometimes made when seasonal or short term surpluses develop and need to be moved to a nonpool plant, eliminate the receiving of milk at the pool plant and the transporting of it from the pool plant to the nonpool plant by routing the milk directly from farms to nonpool plants.

Classification. All milk and milk products received by a handler should be classified on the basis of the form in which or the purpose for which it is used as either Class I milk or Class II milk. Since skim milk and butterfat are not used in the same proportions in most products as they appear in milk or milk products received by a handler, skim milk and butterfat should be classified separately according to their separate uses. For milk products received or disposed of by a handler which cannot be accurately tested for skim milk and butterfat content and for condensed products from which water has been removed, the amount of skim milk and butterfat which was actually used to produce such products or, if such information is not available, standard factors of skim milk and butterfat used to produce such products shall be employed to determine the receipts or disposition of skim milk and butterfat in such products.

Class I milk should comprise all skim milk and butterfat (1) disposed of in the form of milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream (including sour cream), any mixture of cream and milk or skim milk, or concentrated milk disposed of for fluid consumption, except milk, skim milk, or cream disposed of in bulk to another milk plant and classified as Class II in accordance with the conditions of transfer described below, milk, skim milk, or cream disposed of in bulk during any of the months of March through August to a manufacturer of candy, soup, or bakery products who does not dispose of any milk in fluid form, frozen cream placed in storage, or skim milk dumped or fed to livestock; and (2) all shrinkage of skim milk or butterfat in producer milk which is in excess of the amount of such shrinkage permitted to be classified as Class II milk.

All milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream (including sour cream), and any mixtures of cream and milk or skim milk which is distributed within the cities of Alliance, Canton, and Massillon must be made from milk of the same quality and from milk which is produced pursuant to the health regulations of the respective cities. Since a very substantial majority of these products which are distributed within the marketing area are subject to the health regulations of these three cities, classification of milk on the basis of the health regulations of these cities is appropriate.

Concentrated milk has not yet been distributed in the marketing area, but it has been distributed in certain Ohio cities. Proper classification of this product at this time will prevent any problems concerning its classification if at some future date a handler decides to start distributing it. Concentrated milk must be made from milk of similar quality to milk used in other products for fluid consumption which would be classified in Class I. Products commonly known as evaporated milk or condensed milk and which are either packed in hermetically sealed cans or are used in the manufacture of other milk products should not be considered as concentrated milk and should not be classified in Class I unless they are used in the manufacture of milk products which are in Class I.

All milk, skim milk, and cream which is received and for which the handler cannot establish utilization should be classified as Class I milk except for allowable shrinkage in Class II. Any other classification of such milk, skim milk, or cream could result in (1) some advantage to handlers who fail to keep adequate records of utilization, (2) lack of equality among handlers in the prices they pay for milk for the same use, and (3) failure of producers to receive full value of their milk on the basis of its use.

A handler can avoid classification on this basis by maintaining complete records of utilization.

All skim milk and butterfat disposed of by a handler in the form of products other than products which would indicate a Class I classification should be Class II milk. These Class II products should include, but should not be limited to, ice cream, imitation ice cream, and other frozen desserts and mixes for such products (liquid or powdered); eggnog; butter; butter oil; cheese, including cottage cheese; condensed milk or skim milk (plain or sweetened); evaporated milk; casein; nonfat dry milk solids; dry whole milk; condensed or dry buttermilk; whey; powdered malted milk; lactose; yogurt; or aerated products.

Cream which is placed in storage and frozen should be classified in Class II. Cream is stored to a considerable extent in the months of heavy milk production for use primarily in ice cream in the months of short production.

Any skim milk which is dumped or fed to livestock or disposed of for livestock feeding should be classified as Class II milk if the market administrator can verify such dumpage or feeding or disposition for feeding.

Shrinkage at a plant should be determined by subtracting from the total receipts of skim milk and butterfat at such plant the total disposition of skim milk and butterfat, respectively, from such plant. If the receipts at the plant included both producer milk and other source milk the total shrinkage should be prorated between producer milk and other source milk. None of the shrinkage should be assigned to milk received from another pool plant because the shrinkage on such milk should be allowed to the handler operating such other pool plant. Shrinkage on milk diverted from farms to a pool plant other than the plant to which such milk is usually delivered should be allowed at the plant at which it is actually first received. No shrinkage should be allowed on milk diverted from a pool plant to a nonpool plant.

A plant which is operated in a reasonably efficient manner and for which complete and accurate records of receipts and utilization are maintained should have a total shrinkage of well under the two percent of its total receipts. It is concluded that any shrinkage assigned to producer milk which is not more than two percent of total receipts of producer milk should be classified as Class II milk, and any shrinkage which is in excess of two percent of such receipts should be classified as Class I milk. All shrinkage assigned to other source milk should be classified as Class II milk.

Milk, skim milk, or cream transferred from a pool plant to another plant, except a producer-handler's plant, should be classified either as Class I milk or on the basis of utilization at the receiving plant and an agreement between the buyer and seller. Transfers of milk, skim milk or cream to another pool plant or to a nonpool plant operating a route in the marketing area should be classified as Class II if both handlers indicate to the market administrator in their monthly reports their desire for such classification and if sufficient Class II utilization is available after the prior allocation of shrinkage, products received and disposed of in like form, frozen cream, and other source milk as described below. Otherwise such transfers should be Class I milk. Transfers to any other nonpool plant shall be classified on a similar basis except that in addition to the conditions described above which are necessary for Class II classification, Class II classification of milk transferred to a nonpool plant should be permitted only if the milk received at the nonpool plant from dairy farmers constituting the regular source of milk for such nonpool plant is equal to or greater than the total Class I disposition from such plant. If such receipts from dairy farmers are less than total Class I disposition, transferred milk should be classified as Class I milk to the extent of the difference and any remaining transferred milk should be Class II milk.

Transfers to producer-handlers are discussed elsewhere in this decision. Milk which is usually received at a pool plant but which is diverted directly from farmers to a nonpool plant should be classified as though it had been trans-

ferred from the pool plant to the nonpool plant.

When the total classification of all milk received at a plant has been determined, it is necessary to determine which of the milk so classified was producer milk and which was other source milk if both types of milk were received. A sequence of allocating skim milk and butterfat received in various forms and from various sources to the utilizations of skim milk and butterfat, respectively, is prescribed.

Skim milk and butterfat in shrinkage which is prorated to producer milk as previously described should be allocated to the first appropriate class. Since skim milk and butterfat received in the form of products other than milk, skim milk, or cream may to a considerable extent be disposed of in the same form without further processing, skim milk and butterfat received in such forms should be allocated to skim milk and butterfat disposed of in like forms. This procedure, which makes it unnecessary for the handler to show or the market administrator to verify that products received were actually disposed of without further processing, is adequate for purposes of allocation. If the volume of such products received is greater or less than the volume of like products disposed of, the difference will be allocated in subsequent steps of allocation.

Handlers proposed that certain products received by handlers in packaged form and disposed of in the same form without further processing be exempt from the provisions of the order. Pursuant to the allocation here proposed any such products which are Class II products and are other souce milk will be subject to the order only to the extent that the handler shall report and classify such receipts and disposition and permit verification of the classification of such receipts and utilization by the market administrator. However, any such products which are Class I and are other source milk will be subject to the order not only to the extent described above for such Class II products, but will also be subject to the payments described earlier in this decision on Class I other source milk.

Next skim milk and butterfat contained in frozen cream removed from storage or received from another handler should be allocated to skim milk and butterfat disposed of in the form of ice cream (or similar frozen desserts or mixes for such products). The primary use of frozen cream is for ice cream; therefore, this allocation is appropriate. Since frozen cream is not usually used as the exclusive source of butterfat for ice cream but is usually blended with fresh cream, ice cream disposed of should always contain more butterfat than was contained in frozen cream removed from storage or received. This method of allocation should seldom if ever result in frozen cream being allocated to Class I milk.

Next butterfat and skim milk contained in other source milk should be allocated to skim milk and butterfat in series beginning with Class II. Since the payments discussed earlier in this decision on Class I other source milk will be different on other source milk obtained from plants subject to another milk marketing order than on other source milk from other sources, it is necessary for the allocation procedure to provide for a situation in which both of these types of other source milk are received at a plant at which classification is being determined. Other source milk other than that received from plants subject to another order should first be allocated to skim milk and butterfat in series beginning with Class II. Then remaining other source milk (that received from plants subject to another order) should be allocated to skim milk and butterfat in series beginning with any remaining Class II milk. This sequence of allocation of the two types of other source milk should tend to minimize payments on other source milk since the payments on other source milk obtained from a plant subject to another order will generally be less than the payments on other source milk from other sources.

Handlers proposed that if in any of the months of October through January receipts of milk from producers are less than 120 percent of the total volume of Class I milk during such month, then other source milk should be allocated to Class I milk to the extent of the difference between receipts from producers and 120 percent of Class I milk. Such allocation procedure should not be adopted. The possibility was pointed out earlier in this decision that handlers may be able to obtain other source milk for use in Class I at a price below the Class I price. In view of this possibility the allocation procedure proposed by handlers, which allocates other source milk to Class I while some producer milk is being allocated to Class II, would offer an incentive to handlers to maintain supplies of producer milk at a level barely adequate in September and Februrary and to rely on supplemental supplies of other source milk in October through January.

Next skim milk and butterfat classified pursuant to the transfer conditions described above should be allocated to the classes in which it is classified. The remaining amounts of Class I milk and Class II milk should be the amounts of producer milk, exclusive of shrinkage, in each class. Add to these remaining amounts such amounts of shrinkage in producer milk and the results should be the classification of producer milk including shrinkage. If the total of all Class I and Class II milk in producer milk so computed exceeds the amount of producer milk reported to have been received at the plant for which the computation is being made, such excess (hereinafter referred to as overrun) should be allocated to the lowest class remaining, and the remaining amounts show the classification of producer milk. Any overrun at a pool plant should be paid for by the handler operating the plant at the price for the class to which such overrun was allocated. Payment for such overrun is appropriate because such overrun could be a result of underweighing or undertesting producers' milk or of failing to maintain complete and accurate records of the receipts and utilization of producer milk.

Since uniform prices to be paid producers are to be calculated monthly, the procedures described above for classifying milk should be carried out with respect to all milk received during each month.

Class prices. Class I prices should be established at a level which in conjunction with the Class II price hereinafter concluded to be appropriate will result in returns to producers high enough to maintain an adequate but not excessive supply of milk to meet the requirements of the market.

Pricing formulas which cause prices to change automatically with changes in market conditions are in general use in pricing milk sold in fluid milk markets. Such a pricing formula is desirable for pricing Class I milk in the Stark County market and should cause prices to change in response to (1) changes in the basic value of milk, and (2) changes in local market conditions which affect market supply or market demand.

Milk produced for a fluid milk market has a basic value equivalent to its value for use in the manufacture of dairy products. Reserve supplies of milk which are a necessary part of an adequate supply for a fluid market are disposed of in the manufacture of dairy products. Changes in this basic value generally reflect changes in costs of producing milk, alternative opportunities for resources used in milk production and the cost of shifting to alternative enterprises, the general level of prices, and many other factors which affect milk production.

Evaporated milk represents an important outlet for milk manufactured into dairy products. Prices paid to farmers for milk delivered to several different groups of plants engaged primarily in the manufacture of evaporated milk are available. One such group of plants for which prices are available at an early date in the following month is the one which comprises 18 different locations in Wisconsin and Michigan and which is used in other marketing orders in Ohio and throughout the mid-west. Movements in prices paid at these 18 locations are generally representative of movements in prices paid by other plants manufacturing evaporated milk and in the basic manufacturing value of milk. The average of the prices paid at these 18 locations should be used in determining the basic value of milk.

Handlers contended that prices paid for milk at these 18 locations should not be used to measure the basic manufacturing value of milk because milk from these locations has in time of extreme milk shortages been used as supplemental supplies for fluid milk markets. The fact that milk purchased at these locations is used primarily for maufacture into evaporated milk and is purchased in direct competition with other manufactures of evaporated milk and other milk products indicates that prices paid at these locations are a good measure of the manufacturing value of milk.

Other dairy products which represent important outlets for milk are cheese, butter, and nonfat dry milk solids. The prices of these products (and the prices paid for milk by manufacturers of these products) and the prices paid at the 18 locations mentioned above for milk used primarily in the manufacture of evaporated milk usually change in close relationship to each other; however, from time to time these prices depart from their usual relationship. Milk distributors purchasing milk for fluid distribution usually must compete with the most favorable manufacturing uses, particularly in a market such as Stark County where milk for use in several different manufactured products is obtained from the market supply area. It is therefore concluded that the basic value of milk would best be measured by using as alternatives the average price paid at the 18 locations mentioned above and values based on certain combinations of cheese, butter, and nonfat dry milk solids prices. No good series of prices paid for milk by manufacturers of cheese, butter, or nonfat dry milk solids is available enough to be used for this purpose.

A formula which was used a few years ago somewhat as a guide by manufacturers of evaporated milk for determining the price they paid for milk was based on the prices of butter and cheese. To determine the value of a quantity of cheese containing approximately the same quantity of butterfat as a pound of butter, the cheese price was multiplied by 2.4. The value of a pound of butter and the value of an equivalent amount of butterfat in cheese were then weighted on the basis of the volume of production of those products in a past period, and an average value determined. This value was then multiplied by 1.3 to approximate a value for a pound of butterfat and the skim milk in whole milk associated with a pound of butterfat. Multiplying this value by 3.5 would give a value for milk containing 3.5 percent of butterfat. This formula should be used as an alternative for determining the basic value of milk.

Another alternative formula based on the prices of butter and nonfat dry milk solids is used quite generally in marketing orders in Ohio. In such a formula the price of butter is used to reflect the value of butterfat in milk and the price of nonfat dry milk solids is used to reflect the value of skim milk. In order to keep the level of the value of milk computed pursuant to this formula in line with the levels computed pursuant to the other alternative formulas, 3 and 5.5 cents should be deducted from the prices of butter and nonfat dry milk solids respectively. The amount remaining after deducting 3 cents from the butter price should be multiplied by 1.2 to convert to the approximate equivalent of the value of a pound of butterfat and by 3.5 to arrive at the value of butterfat contained in a hundred weight of milk containing 3.5 percent of butterfat. The amount remaining after deducting 5.5 cents from the price of nonfat dry milk solids should be multiplied by 8.2 to convert to the approximate equivalent of the value of skim milk contained in a hundredweight of milk containing 3.5 percent of butterfat.

The relationship between prices for the Stark County market and for other markets in Ohio with marketing orders, particularly Cleveland, should remain constant unless local market conditions indicate need for a change. In order to assure this relationship the basic formula price for Stark County should be the same as for Cleveland. (The Cleveland basic formula price is identical or similar to the basic formula price in other Ohio marketing orders.) Accordingly, the basic formula price should be the highest value resulting from the three alternative formulas described above, and the prices for butter, cheese, and nonfat dry milk solids to be used in the above formulas should be obtained from the same sources as those which are used in the Cleveland marketing order. These are, for butter, the average of the daily wholesale selling prices of Grade A or 92-score bulk creamery butter at Chicago; for cheese, the average of the prices for "Cheddars" on the Wisconsin Cheese Exchange; and for nonfat dry milk solids, the average of the prices for spray and roller process nonfat dry milk solids in barrels for human consumption, f. o. b. manufacturing plants in the Chicago area for the period of the 26th day of the month preceding the month for which prices are being computed through the 25th day of the month for which prices are being computed. The butter and cheese prices would be simple averages of the prices for each trading day in the month for which prices are being computed.

To the basic formula price computed as explained above must be added amounts which will result in a level of prices herein concluded to be necessary and a desirable seasonal pattern of prices. Important considerations in establishing prices for Stark County are prices paid for milk in markets which compete with Stark County for supplies. The production areas for Akron, Cleveland, and Youngstown, Ohio, Pittsburgh, Pennsylvania, and Wheeling, West Virginia, all overlap the Stark County production area. Receiving stations for Cleveland and for Pittsburgh are located within the Stark County production area and these two markets compete to a larger extent than the other markets named above for supplies with Stark County. Since the Cleveland market is a strong competitor for supplies with the Stark County market and since a marketing order issued by the Secretary of Agriculture regulates milk handling in Cleveland, prices established for the Stark County market should be in close relationship with prices paid in the Cleveland market.

The amounts added to the basic formula price to determine Class I prices for Cleveland are $1.50 for September, October, November, December, January, and February, $1.10 for March, April, July, and August; and $0.85 for May and June. At the Cleveland receiving stations which are located in the Stark County production area a location differential of 15 cents may be deducted. In the last year or two prices paid producers by Cleveland handlers have exceeded the minimum uniform prices computed pursuant to the order in every month by premiums which on a market average ranged from 15 to 36 cents. The record indicates, however, that in certain months the premiums at one of the plants located in the Stark County production area were somewhat lower than the market average. In view of these facts it is concluded that the addition of the following amounts to the basic formula price should usually result in appropriate Class I prices for Stark County:

September, October, November, December, January, and February	$1.55
March, April, July, and August	1.15
May and June	.90

This schedule will cause seasonal price changes to be the same as they are in Cleveland. The seasonal variation in prices would be considerably greater than the seasonal variation which has existed in Stark County prices in recent years. This should be an incentive for producers to change their seasonal pattern of production to produce more milk in the fall and winter months in relation to spring and summer production.

Plants which distribute milk within the boundaries of the cities of Alliance, Canton, and Massillon must comply with the regulations issued by the health authorities of the respective cities and must obtain their milk supplies from sources approved by such health authorities. Milk distributed from plants which distribute milk only in the portions of the marketing area outside of these three cities must comply with less stringent quality standards imposed by State laws and regulations. In the administration of these State laws and regulations monthly inspection of the milk from each producer as it arrives at the plant is required. Farms of producers are inspected by a State inspector upon complaints that milk being produced on such farms is not meeting the quality standards. A large portion of these producers could qualify to produce milk in compliance with the regulations of the health authorities of Alliance, Canton or Massillon by making minor changes in their production facilities and by exercising greater care. It is concluded that the difference in quality between milk produced pursuant to the Alliance, Canton, and Massillon health regulations and milk produced for distribution in the portions of the marketing area outside of the boundaries of these three cities is sufficient to necessitate a price differential to reflect this difference in quality, and that Class I prices for milk which is not produced pursuant to the health regulations of any of these three cities should be 25 cents lower than the Class I prices described above.

At times local conditions may warrant a relationship between Stark County prices and prices in markets which compete with Stark County for supplies different from the relationship which would result from Class I prices computed by adding to the basic formula price the amounts described above. If with Class I prices so computed the market supply is either insufficient or excessive in relation to market demand (including the necessary margin of re-

serve), then the Class I price should be adjusted—upward if supplies are insufficient and downward if supplies are excessive.

Producers and handlers agreed that market supplies were adequate but not excessive in any month in which receipts of milk from producers are equal to 120 percent of market requirements for inspected milk, or inversely, in any month in which market requirements for inspected milk are about 83 percent of receipts from producers. The record indicates that the market was adequately supplied in November 1950 when milk disposed of in the form of milk and cream (which is roughly comparable with Class I milk as defined herein) by pooling milk distributors was about 85 percent of receipts from producers. It is concluded that the market will be adequately supplied in any month in which the total volume of Class I milk is equal to 85 percent of receipts from producers.

November is usually the month in which receipts from producers are lowest in relation to market requirements. If the market is to be adequately supplied in November, receipts from producers must be greater in relation to market requirements in other months of the year. On the basis of the seasonal variation which occurred in receipts from producers and in the volume of milk disposed of in the form of milk and cream by pooling milk dealers during the three years 1949–1951, it is concluded that if the relationship between market supplies and market requirements in November is to be such that the total volume of Class I milk is equal to 85 percent of receipts from producers, then a similar relationship during the other months of the year should be about as follows:

January	78	July	66
February	77	August	68
March	73	September	73
April	69	October	78
May	60	November	85
June	62	December	83

If the seasonal variation in this relationship were the same each year and followed the seasonal pattern above, then any departure in the relationship from the standard relationship shown above would indicate a trend in the relationship and should be justification for a change in prices; however, the seasonal variation is not the same from year to year, and a review of market statistics indicates that in the past many of the departures in the relationship between market supply and demand from the standard relationship shown above were due to these differences in seasonal variation and were not indications of a trend in the relationship. Therefore, if this relationship is to be used to measure trends in the relationship between market supply and demand as a basis for adjusting prices, then some method must be found of distinguishing between changes in the relationship which reflect trends and those which do not. A twofold method which has been used in other marketing orders for this purpose and which appears to be suitable and appropriate for use in this marketing order involves (1) using a two month period to compute relationships between market supply and demand, and (2) making price adjustments only after the relationship during such a two month period has changed by a prescribed amount.

It is concluded herein that the Class I price for each month should be announced on the 5th day of the next month. At that time the most recent two months for which information on receipts and classification of milk are available are the two months immediately preceding the month for which a price is being computed. It is concluded that these two months should be used to measure the current relationship between market supply and market demand. Total receipts from producers indicate market supply, and the total volume of milk classified as Class I indicates market demand since Class I includes generally those products required by health regulations to be made from locally approved milk. The standard relationship between receipts from producers and the volume of Class I milk—that is, the relationship which in view of a normal seasonal pattern is considered to represent an adequate but not excessive supply of milk in relation to market demand—for each two month period of a year and the month during which such relationship would be used for computing prices are as follows:

Two-month period	Standard relationship	Month for which prices are computed
January–February	78	March.
February–March	75	April.
March–April	71	May.
April–May	64	June.
May–June	61	July.
June–July	64	August.
July–August	67	September.
August–September	70	October.
September–October	76	November.
October–November	82	December.
November–December	84	January.
December–January	80	February.

Statistical analysis to determine the amount of price change which should be associated with a given departure in current relationship between market supply and demand from the standard relationship indicates that an average price change of 3 cents for each one point of departure in the percentage relationship would have resulted in keeping prices in good alignment with changes in market supply and demand in recent years. It should continue to do so. However, price changes occasioned in this manner should not be permitted to narrow or reduce the seasonal variation in Class I prices concluded herein to be desirable unless a marked change in the relationship between market supply and market demand occurs. To accomplish this purpose it is concluded that (1) in the months of shortest supply, October, November and December, Class I prices should be increased 4 cents for each point that the current relationship between market supply and demand exceeds the standard relationship and decreased 2 cents for each point that the current relationship is below the standard relationship; (2) in the months of greatest supplies, April, May, June, and July, Class I prices should be increased 2 cents for each point that the current relationship exceeds the standard relationship and decreased 4 cents for each point that the current relationship is below the standard relationship, and (3) in the other months of the year Class I prices should be changed 3 cents in the same direction for each point that the current relationship departs from the standard relationship.

It was concluded above that the Class I price should be changed in response to a change in the relationship between market supply and market demand only after the change had reached a prescribed amount. This can be accomplished by establishing brackets of deviations from the standard relationship. These brackets and the amount of price adjustment applicable to each bracket, using the rates described above, should be as follows:

Deviation from standard relationship	Price adjustment		
	Jan., Feb., Mar., Aug., and Sept.	Apr., May, June, and July	Oct., Nov., and Dec.
+12 or over	+28	+25	+[illegible]
+9 or +10	+25	+19	+[illegible]
+6 or +7	+20	+13	+[illegible]
+3 or +4	+10	+7	+[illegible]
+1 or −1	0	0	[illegible]
−3 or −4	−10	−14	−[illegible]
−6 or −7	−20	−26	−[illegible]
−9 or −10	−28	−38	−[illegible]
−12 or −13	−38	−50	−[illegible]
−15 or −16	−38	−50	−[illegible]
−18 or −19	−38	−50	−[illegible]
−21 or −22	−38	−50	−[illegible]
−24 or under	−38	−50	−[illegible]

(Deviations from the standard utilization percentage are computed by algebraically subtracting the current relationship from the standard relationship.) In case a deviation falls between brackets, the adjustment is determined by the adjacent bracket which is the same as or nearest to the bracket used in the previous month. Any market conditions which develop that might warrant price adjustments greater than the maximum adjustments provided for in the above table should be considered at a hearing.

Class I milk disposed of outside the marketing area should be priced at the same price as Class I milk disposed of in the marketing area. Handlers proposed that the price for packaged milk sold by handlers f. o. b. their plant to purchasers who disposed of the milk more than 8 miles outside of the boundaries of the marketing area be 25 cents less than the regular Class I price. They contended that these outlets could not be retained at the full Class I price and that unless these outlets were available milk presently disposed to such outlets would have to be used in Class II and would become a burden to the market. This should not be the case. If these outlets are lost the market requirements for milk are reduced accordingly and the Class I price should be reduced enough to restore the proper balance between market supply and demand. The pricing formula proposed above should have this result. The pricing of Class I milk sold outside of the marketing area at a price lower than the regular Class I price would mean that the sales outside of the

market are not making their share of the contribution toward the maintenance of a market supply sufficient to satisfy all the needs of the market plus the outside sales. No conditions were shown to exist which would justify this sort of pricing. The maintenance of a supply sufficient to meet the requirements for Class I sales within the marketing area and for Class I sales in certain areas outside of the marketing area, as long as such outside sales are priced at least as high as milk sold within the marketing area, may be in the direction of more efficient distribution of milk and thus be in the public interest.

Handlers insisted that if cream is classified in Class I, the price for cream should be 45 cents less than the regular Class I price. Their main reasons for this position related to the costs of processing and distributing cream and their desire to retain a certain relationship between prices of milk and cream. The prices which handlers who have been purchasing milk through the present pooling arrangement paid for milk used in cream in 1951 ranged from 30 to 45 cents below the price paid for milk distributed as fluid milk and averaged 39 cents for the year. Pursuant to the present pooling plan the price paid for milk used as cream applies to a volume of milk containing 3.5 percent of butterfat which contains an amount of butterfat equivalent to the amount of butterfat contained in the cream—that is, the price applies to the butterfat and skim milk contained in the milk used to produce cream, not just to the butterfat and skim milk contained in the cream as would be the case pursuant to the proposed order. Although the exact effect of this difference cannot be calculated from data in the record, it is estimated on the basis of what data are in the record that this difference amounts to from 5 to 10 cents per hundredweight in the cost of milk for cream. On the basis of these figures it appears that handlers have been paying not 45 cents per hundredweight less as they propose, for milk used for cream than for milk disposed of as fluid milk, but perhaps 30 to 35 cents less when the basis of pricing is made comparable to that in the proposed order.

The fact that processing and distributing costs on cream are higher than on milk does not constitute justification for establishing prices for milk disposed of in the form of cream at a lower level than prices for milk disposed of as fluid milk.

The Class II price should be the same as the basis formula price.

The Class II price should be high enough to discourage handlers from developing supplies of producer milk primarily for use in Class II products and should be low enough that handlers will continue to accept from producers on a year-round basis enough milk to meet the market requirements (including necessary reserves).

Ice cream has been one of the more important outlets for the reserve supplies of milk in the Stark County market. In the portions of the marketing area which have local health regulations relating to milk products (Alliance, Canton and Massillon) the quality of milk used to produce ice cream and cottage cheese must be somewhat higher than the quality of milk usually used in the production of other manufactured products such as evaporated milk, cheese, butter, and nonfat dry milk solids. At the basic formula price ice cream and cottage cheese should continue to provide large outlets for reserve supplies of milk. In recent years the proposed basic formula price would not have been substantially different from the price which handlers actually paid for milk used in the products proposed to be included in Class II.

Located within the production area are a large number of plants engaged in manufacturing evaporated milk, cheese, or butter. Some of the reserve supplies of milk may have to be disposed of to these plants from time to time. As the basic formula price changes in relation to the prices of butter or cheese or the prices paid for milk by plants engaged in the manufacture of evaporated milk, the relationship between the prices paid for milk by these manufacturing plants may change as between plants making different products. Handlers can dispose of reserve supplies of milk to the plants which are currently paying the highest prices. Some of these plants have been paying prices equivalent to the proposed basic formula price.

Since it is concluded in this decision that butterfat and skim milk should be accounted for separately for classification purposes, Class I and Class II prices should be broken down into prices for skim milk and prices for butterfat. The only elements used in the pricing formula which indicate values primarily for butterfat and for skim milk are the prices of butter and the prices of nonfat dry milk solids, respectively. Changes in the prices of these products are considered to accurately represent changes in the value of butterfat and skim milk. It is concluded that Class I and Class II prices should be broken down into prices for butterfat and skim milk in the same relationship that the value based on the price of butter and the value based on the price of nonfat dry milk solids contribute to the total value resulting from the formula based on butter and nonfat dry milk solids prices which is one of the alternatives used in computing the basic formula price.

Distributing proceeds to producers. The amounts paid by all handlers for producer milk and for Class I other source milk should be combined into one total and distributed among all producers on the basis of the volume of milk delivered. This is commonly known as a market-wide pooling arrangement. Producers supplying milk to a pool plant for which the handler operating such plant does not hold a permit from the health authorities of either of the cities of Alliance, Canton, or Massillon should share proportionately with other producers in Class I and Class II utilization, but since Class I producer milk at such plants is priced at 25 cents below other Class I producer milk, this lower Class I price should be reflected in the returns to such producers. For example, when 60 percent of all producer milk in the market is Class I milk, producers supplying milk to such plants would receive 15 cents less than other producers; and when 100 percent of all producer milk in the market is Class I milk, producers supplying such plants would receive 25 cents less. This difference is necessary to reflect differences in the quality of milk. Thus two uniform prices will be announced for each month—one to be paid to producers delivering to pool plants for which the health authorities of Alliance, Canton, or Massillon have issued permits, and one to be paid to producers delivering to other pool plants.

A large portion of the Stark County market has been operating under a market-wide pooling arrangement for many years. Prices paid to producers not included in the pooling arrangement have been based generally on the uniform price resulting from the operation of the pooling arrangement. Thus there has been little variation in the prices received by individual producers. Use of an individual handler pooling arrangement and the inherent variation in prices received by producers delivering to different handlers could cause uneconomic shifts of producers among handlers.

Certain handlers have been carrying larger proportions of the market reserve supplies than others and through concentration of these supplies have afforded economies in manufacturing them into dairy products. Under a market-wide pooling arrangement these reserves may remain unequally distributed among handlers while the lower returns realized from them are distributed especially among all producers.

The cooperative association proposed a certain type of base plan to be used in distributing proceeds to producers. This plan was also intended to offer some incentive for producers to reduce the seasonal variation in their production. The proposed plan would admittedly cause only a small proportion of the producers—those with the widest seasonal variation in production—to receive a lower price than other producers, and the amount which prices to such producers would be reduced would be small. The benefits which might accrue from the proposed plan do not appear to be commensurate with the problems involved in effectuating it. These problems include the administrative job of computing and announcing bases or quotas and provision for fixing bases for a farmer who did not deliver milk during the base-making period. The seasonal variation proposed in the Class I prices should provide the necessary incentive for producers to reduce their seasonal variation in production.

Handlers should make payments to each producer for milk delivered by such producer at the appropriate uniform price. Payments due any producer for milk should be paid by the handler to a cooperative association if the cooperative association makes a written request for such payments and if the producer has given the cooperative association written authorization, in the form of a contract or in any other form, to collect such payments. In making such payments for producer milk to a cooperative association the handler making such payments should also at the same time

furnish the cooperative association with a statement showing the name of each producer for whom payment is being made to the cooperative association, the volume and average butterfat content of milk delivered by each such producer, and the amount of and reasons for any deductions which the handler withheld from the amount payable to each producer. This statement is necessary so the cooperative association can make proper distribution of the money it collects among the producers for whom it collects. Handlers opposed paying a cooperative association for milk delivered by producers, primarily on the basis that it would abrogate one of their most important means of contact with producers. Producers choose by becoming members of a cooperative association to conduct their business with handlers through the cooperative association. It would appear that the contact which a handler enjoys with producers through paying them directly for milk could be maintained, even if the payments for milk are made to a cooperative association, if the handler would send each producer a statement showing the amount of milk received from such producer and the amount of payment being made to the cooperative association. Handlers generally will honor requests from producers to pay amounts due to a producer for milk, or any part thereof, to any person whom the producer directs. This requirement that handlers pay cooperative associations which producers have authorized to collect for them is, in effect, a request by producers that money due them be paid to a cooperative association.

The contract in effect between the cooperative association and its members authorizes the cooperative association to collect for milk sold by its members, and this proposed arrangement will permit that to be done pursuant to the order.

Since all producers are to receive the same price for milk (except for the quality and butterfat differentials), and since the amount which the order requires a particular handler to pay for his milk may be more or less than the amount he is required to pay to producers or cooperative associations, some method of equalizing these amounts is necessary. A producer-settlement fund should be established for this purpose. All handlers who are required to pay more for their milk than they are required to pay to producers or cooperative associations should pay the difference into the producer-settlement fund, and all handlers who are required to pay more to producers or cooperative associations than they are required to pay for their milk should receive the difference from the producer-settlement fund. Amounts paid into and out of the producer-settlement fund for this purpose will be equal, except for minor differences that may result from rounding off uniform prices. In order to permit this rounding off of prices and to permit payments to be made to any handler which audit by the market administrator reveals is due such handler from the producer-settlement fund, a reserve should be held in the producer-settlement fund at all times. The amount of the reserve contemplated in the proposed order should be sufficient for these purposes. This reserve would be adjusted each month.

Payments made by handlers on Class I other source milk should be distributed among all producers by including them in the producer-settlement fund. Any payments made by handlers to adjust for errors in prior classification and payments should also be included in the producer-settlement fund.

If at any time the balance in the producer-settlement fund is insufficient to cover payments due to all handlers from the producer-settlement fund, payments to such handlers should be reduced uniformly per hundredweight of milk. Such handlers in making payments to producers may then reduce payments to producers by an equivalent amount per hundredweight. Amounts remaining due such handlers from the producer-settlement fund should be paid as soon as the balance in the fund is sufficient, and handlers should then complete payments to producers. In order to reduce the possibility of this occurring, milk received by any handler who has not made payments required of him into the producer-settlement fund should be eliminated in the computation of the uniform price in subsequent months until such handler has completed all delinquent payments.

The uniform prices should be computed for milk containing 3.5 percent of butterfat. This follows past market practice. In distributing proceeds to producers a differential should be established for milk containing more or less than 3.5 percent of butterfat.

Producers and handlers both proposed that the butterfat differential be computed by dividing the price of butter by 10 and rounding to the next highest half cent. This butterfat differential has been used in the market for several years in paying producers whose milk is sold through the present pooling arrangement. It is somewhat less than the producer butterfat differential computed pursuant to the Cleveland order; however in the last 10 years the average butterfat content of milk received from producers has remained relatively constant—annual average butterfat content ranged from 3.77 to 3.81 percent. Since the average butterfat content of milk is near the basic test (3.5) and has remained relatively constant in recent years while the proposed butterfat differential has been in use, its use in the order is appropriate.

Administrative provisions. Certain terms are necessary in the order to provide for the proper administration of the regulations imposed by the order or to clarify or effectuate other provisions of the order.

Definitions. In addition to the definitions, discussed earlier in this decision, which define the scope of regulation of this order, certain other definitions are desirable in the interest of brevity and to assure that each usage of the term implies the same meaning.

"Act" should be defined as the Agricultural Marketing Agreement Act of 1937 which contains the statutory authority pursuant to which this order is being proposed.

"Secretary" should be defined as the Secretary of Agriculture of the United States or any other officer or employee of the United States who may be authorized to perform duties which he presently performs.

"Person" should be defined as any individual, partnership, corporation, association, or any other business unit. This definition is similar to the definition for "person" contained in the act.

"Department of Agriculture" should be defined as the United States Department or Agriculture or such other federal agency authorized to report the prices used in computing class prices in this order. This term is used in the order only in connection with these price reporting functions.

"Cooperative association" should be defined as any association of producers which the Secretary determines is qualified under the "Capper-Volstead Act", has full authority in the sale of milk of its members, is engaged in marketing milk or milk products for its members, and has all of its activities under the control of its members.

Market administrator. This order should establish an agency to administer its provisions. This agency should be headed by a market administrator who should be a person selected by the Secretary of Agriculture. The order should specify the powers of the market administrator and they should comprise all the powers authorized in the act for such agency. The market administrator should perform the following duties and such other duties as are necessary to administer the terms and provisions of the order: (1) Obtain a bond for himself and his employees who handle funds conditioned upon the faithful performance of duties; (2) employ an adequate staff to carry out his duties; (3) disburse the funds collected pursuant to the order for that purpose to pay all expenses incurred in administering the order; (4) maintain records of the operations of the agency and submit such records to the Secretary of Agriculture as requested; (5) publicly announce (unless otherwise directed) the names of any handler who has not made reports or payments as required; (6) audit handlers reports and payments by inspecting records which the order requires them to maintain and make available; and (7) publicly announce prices computed pursuant to the order.

The market administrator should also announce monthly the name of each handler who receives milk from producers and the percentages of such milk which was classified as Class I milk and as Class II milk. This information will be useful to producers and cooperative associations in allocating milk among handlers and should be useful to handlers whose supplies are either insufficient or excessive for their own needs in obtaining supplemental supplies or disposing of excess supplies.

Records and facilities, retention of records, and termination of obligations. Handlers and producer handlers should maintain and make available to the market administrator accounts and records of their operations which will verify or correct all information reported to the market administrator and all payments made pursuant to the order. These records should be retained for a three year period, and if within that period no need has arisen for further retention of such records they need not be retained longer. However if within such three year period transactions recorded by such records become connected with a court action or a proceeding under section 8e (15) (A) of the act, such records should upon written notification by the market administrator be retained until further notification by the market administrator irrespective of the three year period.

Any obligations imposed by this order should terminate after the expiration of a period of two years.

In the absence of a termination of obligations within some prescribed time, any time the application of a certain provision of the order is changed by administrative interpretation or by litigation or for any other reason in such a manner that obligations imposed by the order are changed, the market administrator may feel compelled to reaudit and recompute obligations on the basis of the changed application with respect to all milk to which the former application of the provision was made. This could extend back over several years. It is extremely difficult for handlers or the market administrator to adequately protect themselves against this sort of contingency. The termination of obligations as herein proposed will mean the handlers and the market administrator will be free from this contingency after the expiration of two years. Except in cases of court actions or proceedings under section 8c (15) (A) of the act, all verification or corrections of classification and all charges or credits resulting therefrom should be completed by the end of the two year period. Verification of classification cannot be made by the market administrator unless handlers make their accounts and records and facilities available to the market administrator as required by the order. If a handler refuses to make such accounts or records or facilities available to the market administrator the two year period after which obligations will be terminated should not begin to run until such accounts or records or facilities are made available. Obligations with respect to any transaction involving fraud or willful concealment of facts material to the obligation on the part of the person against whom the obligation is imposed by the order should not be terminated as herein proposed.

Expenses of administration. As his share of the expenses of administering this order each handler should pay not in excess of 3 cents per hundredweight with respect to (1) all producer milk received, (2) all other source milk received at a pool plant which was classified as Class I milk and (3) all other source milk at a nonpool plant operating a route in the marketing area which was classified as Class I milk and was subject to the payments described earlier in this decision. The market administrator must verify receipts and utilization of all such milk; therefore all such milk should be subject to the expenses of administration. Experience in other markets indicates that 3 cents per hundredweight with respect to all such milk should yield sufficient money to cover expenses of administration. If payment of expenses of administration at the rate of 3 cents per hundredweight yields more money than is needed, provision is made that the Secretary can prescribe a lesser rate of payment from time to time.

Marketing services. It was pointed out earlier in this decision that market-wide information concerning market supply and requirements would be useful to producers and cooperative associations in helping them maintain their production in line with market requirements. Costs involved in distributing information to producers and cooperative associations should be borne by the producers or their associations.

The cooperative association in the market has been providing marketing services to its members which include the verification of weights and tests of milk delivered by each member. The provision for such services to be rendered for producers, for whom a cooperative association does not perform such services will assure each producer that he is receiving his just proportion of the total proceeds of the market. Costs of these services should also be borne by producers.

On the basis of the costs of providing these services in other markets, and in view of the fact that handlers plants in the Stark County marketing area may be somewhat more scattered than in some markets and some may have only a few producers, it is concluded that a deduction of 6 cents per hundredweight of milk delivered by each producer should be adequate to cover these costs. Provision is made that the Secretary may reduce this deduction if experience indicates a lesser deduction will provide adequate funds. If a cooperative association is actually performing these services for producers, then in lieu of the 6 cent deduction such deduction as is authorized by such producers should be made from the amounts due producers for whom the cooperative association is performing such services and should be paid to the cooperative association.

Time schedule. Dates must be prescribed for announcing prices, filing reports, and making payments. The following time schedule should allow all interested persons adequate time to perform each function. (These time limits apply to the indicated day of the month following the month for which computations are being made.)

Day of the month	*Function*
5th	Announcement of class prices by market administrator.
8th	Submission of monthly report of receipts and utilization by handlers.
13th	Announcement of uniform price and names of handlers who received producer milk and notification to handlers of the value of their producer milk by market administrator.
14th	Payment by handlers of amounts due to producer-settlement fund and for expenses of administration.
17th	Payments by handlers to cooperative associations and by market administrator out of producer-settlement fund.
19th	Payments by handlers to producers.

Effective time, suspension, termination, agents and separability of provisions. An order should contain provisions which (1) indicate that such order shall be effective on the date set by the Secretary and shall remain in effect until suspended or terminated; (2) require the Secretary to suspend or terminate the order or any portion thereof when such order or portion thereof no longer effectuates the policy of the act; (3) continue obligations existing at the time of suspension or termination of the order or provisions thereof until such obligations are met; (4) require liquidation of the agency administering the order upon suspension of the order; (5) authorize the Secretary to designate an agent in connection with any provision of the order; and (6) specify that the invalidation of any provision of the order with respect to any person or circumstances shall not affect the application of such provision or any other provisions of the order to other persons or circumstances.

General findings. (a) The proposed marketing agreement and order, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk, in the marketing area and the minimum prices specified in the proposed marketing agreement and order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed marketing agreement and order will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a proposed marketing agreement and order upon which a hearing has been held.

Rulings. Stark County Milk Producers' Association, Inc., and Stark County Milk Dealers Committee each filed two briefs, one following each of the two sessions of the hearing. The proposed findings and conclusions and the arguments contained in these briefs were considered in making the findings and reaching the conclusions in this decision. To the extent that any proposed findings and conclusions in the briefs are at variance with the findings and conclusions of this decision, such proposed findings and conclusions are denied for the reasons set forth in support of the findings and conclusions of this decision on the issue to which the proposed findings and conclusions related.

Counsel for Stark County Milk Dealers contended at the reopened session of the hearing and in his brief following that session of the hearing that the Secretary of Agriculture did not have the power and authority to reopen the hearing for the purpose of receiving additional evidence. He sought statutory support for that position in section 608.c (3) and (4) of the Agricultural Marketing Agreement Act of 1937, which refers to "hearing" in the singular form, thus implying that more than one hearing was held on a proposed Stark County marketing agreement and order. The second session of the hearing was not a new hearing, but was a reopening of the previous hearing. Only one hearing was held on the proposed marketing agreement and order. The reopening of a hearing is therefore in accord with the statutory authorization. Such reopening is also logical and appropriate under circumstances such as existed in this instance. The evidence in the record prior to the reopening indicated that an order regulating the handling of milk in Stark County would tend to effectuate the policy of the act, but more evidence appeared desirable on what certain of the terms and provisions of that order should be—thus, the hearing was reopened.

Counsel for Stark County Milk Dealers Committee also contended that the notice of the reopening of the hearing was legally inadequate because it did not set forth precisely the issues to be considered. The notice repeated from the proposed orders considered at the earlier session those provisions on which additional testimony was desired. The notice also indicated that evidence would be received on any other issue considered at the first session of the hearing upon which any interested party desired to testify.

To specifically set forth in the notice the precise terms and provisions of the proposed orders on which additional evidence was desired appears to be a very precise statement of the issues. A request made at the reopened session of the hearing that the findings that had been made on the issues upon which more evidence was sought on the basis of the record of the first session of the hearing could not have been complied with because no findings on those issues had been made at that time, except that it had been determined that more evidence was needed on those issues before they could be thoroughly resolved.

It is therefore concluded that (1) the hearing examiner ruled properly in denying a motion that the reopened session of the hearing be stopped because the Secretary of Agriculture lacked power or authority to reopen the hearing, (2) the Secretary of Agriculture did and does have the power and authority to reopen a hearing of this sort, and (3) the notice of the reopening of the hearing gave adequate notice of the issues on which additional evidence was sought.

Recommended marketing agreement and order. The following order is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order.

DEFINITIONS

§ 963.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C., 601 et seq.).

§ 963.2 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States or any other officer or employee of the United States authorized to exercise the powers and to perform the duties of the said Secretary of Agriculture.

§ 963.3 *Marketing Area.* "Stark County, Ohio, marketing area," hereinafter referred to as "marketing area," means all territory geographically located within (a) Stark County, Ohio, except (1) Paris Township, (2) Sugar Creek Township, (3) sections 6 and 7 of Lake Township, and (4) section 3 of Jackson Township; (b) Smith Township of Mahoning County, Ohio, except Great Lot 35 thereof; (c) Knox Township of Columbiana County, Ohio; and (d) sections 1, 2, 3, 10, 11, and 12 in Sugar Creek Township of Wayne County, Ohio.

§ 963.4 *Handler.* Any person, other than a producer-handler, who operates a milk handling plant (hereinafter referred to as a "plant") shall be a "handler" with respect to all skim milk and butterfat received at such plant or caused to be diverted from producers' farms to a nonpool plant by such person in any month in which a route(s) is operated wholly or partially within the marketing area from such plant. Any cooperative association shall be a "handler" with respect to the milk of any producer which it causes to be diverted from producers' farms to a nonpool plant for the account of such cooperative association.

§ 963.5 *Pool plant.* A plant, except a plant of a producer-handler, shall be a "pool plant" in any month in which a route(s) is operated wholly or partially within the marketing area from such plant if such plant is (a) located in the marketing area; or (b) located outside the marketing area and 10 percent or more of the total combined amount of skim milk and butterfat in Class I milk at such plant is disposed of on a route(s) operated wholly or partially within the marketing area: *Provided*, That a plant located either in or outside the marketing area shall not be a pool plant in any month in which the total combined amount of skim milk and butterfat in Class I milk at such plant which is disposed of on a route(s) operated wholly or partially within the marketing area is less than 18,000 pounds.

§ 963.6 *Nonpool plant.* A plant other than a plant operated by a producer-handler shall be a "nonpool plant" in any month in which it is not a pool plant.

§ 963.7 *Producer.* "Producer" means any person, other than a producer-handler, with respect to milk produced by him which milk is moved directly from his farm to a pool plant or is diverted by the operator of the pool plant or by a cooperative association to a nonpool plant.

§ 963.8 *Producer milk.* "Producer milk" means skim milk and butterfat contained in milk received from producers.

§ 963.9 *Other source milk.* "Other source milk" means all skim milk and butterfat contained in milk, skim milk, or cream, or used to produce all other milk products received from all sources other than producers and pool plants.

§ 963.10 *Producer-handler.* "Producer-handler" means any person (a) who produces milk; (b) receives no producer milk; and (c) operates a plant from which a route(s) is operated wholly or partially within the marketing area.

§ 963.11 *Route.* "Route" means a sale or delivery (including a sale from a plant or a store) of Class I milk to a wholesale or retail store(s), including the sale or consignment of such products by a handler to wholesale or retail outlets owned, leased, or controlled, directly or indirectly, by such handler.

§ 963.12 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 963.13 *Department of Agriculture.* "Department of Agriculture" means the United States Department of Agriculture or such other Federal agency authorized to perform the price reporting functions specified in § 963.50.

§ 963.14 *Cooperative association.* "Cooperative association" means any cooperative marketing association of producers which the Secretary determines after application by the association: (a) to be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; (b) to have full authority in the sale of milk of its members and to be engaged in making collective sales or marketing milk or its products for its members; and (c) to have all of its activities under the control of its members.

MARKET ADMINISTRATOR

§ 963.20 *Designation.* The agency for the administration of this subpart shall be a market administrator who shall be a person selected by the Secretary. Such person shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 963.21 *Powers.* The market administrator shall have the power to:

(a) Administer all of the terms and provisions of this subpart;

(b) Make rules and regulations to effectuate the terms and provisions of this subpart;

(c) Receive, investigate, and report to the Secretary complaints of violations of this subpart; and

(d) Recommend to the Secretary amendments to this subpart.

§ 963.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this subpart, including but not limited to the following:

(a) Within 30 days following the date on which he enters upon his duties or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon his duties as market administrator and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer the terms and provisions of this subpart;

(c) Pay out of the funds provided by § 963.75, (1) the costs of his bond and of the bonds of those of his employees who handle funds entrusted to the market administrator, (2) his own compensation, and (3) all other expenses, except those incurred under § 963.76, necessarily incurred by him in the maintenance and functioning of his office in the performance of his duties;

(d) Keep such books and records as will clearly reflect the transactions provided for in this subpart and upon request by the Secretary surrender the same to his successor or to such other person as the Secretary may designate;

(e) Publicly announce unless otherwise directed by the Secretary by posting in a conspicuous place in his office and by such other means as he deems appropriate the name of any person who, within 10 days after the day upon which he is required to perform such acts, has not made reports pursuant to §§ 963.30 or 963.31 or payments pursuant to §§ 963.70, 963.72, 963.74, 963.75, 963.76, or 963.77;

(f) Submit his books and records to examination and furnish such information and verified reports as may be requested by the Secretary;

(g) Audit all reports and payments by each handler by inspection of such handler's records and of the records of any other person upon whose utilization the classification of skim milk and butterfat for such handler depends; and

(h) Publicly announce by posting in a conspicuous place in his office and by such other means as he deems appropriate:

(1) On or before the 5th day of each month the minimum class prices for skim milk and butterfat for the preceding month as computed pursuant to §§ 963.51 and 963.52;

(2) On or before the 13th day of each month the uniform prices for the preceding month computed pursuant to § 963.61, the butterfat differential for the preceding month computed pursuant to § 963.74, and the name of each handler who received producer milk during the preceding month and the percentages of such milk which was classified as Class I milk and as Class II milk.

REPORTS, RECORDS, AND FACILITIES

§ 963.30 *Monthly reports of receipts and utilization.* On or before the 8th day of each month each handler shall report to the market administrator in the detail and on forms prescribed by the market administrator: (a) the quantities of butterfat and the quantities of skim milk contained in all milk, skim milk, or cream and used to produce all milk products received from all sources during the preceding month; (b) the quantities of butterfat and the quantities of skim milk contained in all frozen cream which were formerly classified pursuant to § 963.41 (b) (2) and which were removed from storage or received during the preceding month; (c) the quantities of all milk or milk products and the quantities of skim milk and butterfat contained in or used to produce such milk or milk products moved from such handlers plant during the preceding month or on hand at such plant at the end of the preceding month; and (d) such other information with respect to such receipts and utilization as the market administrator may request.

§ 963.31 *Other reports.* Other reports shall be submitted to the market administrator as follows:

(a) Each producer-handler shall make reports at such time and in such manner as the market administrator may request.

(b) On or before the 25th day of each month each handler who operated a pool plant at which producer milk was received in the preceding month shall submit such handler's producer payroll for the preceding month which shall show (1) the total pounds and the butterfat content of milk received from each producer, (2) the amount and date of payment to each producer or cooperative association pursuant to § 963.70, and (3) the nature and amount of each deduction or charge made by the handler.

§ 963.32 *Records and facilities.* Each handler and producer-handler shall maintain and make available to the market administrator or to his representative during the usual hours of business such accounts and records of any of his operations including those of nonpool plants to which any producer milk is diverted and such facilities as in the opinion of the market administrator are necessary to verify or to establish the correct data with respect to: (a) The receipts of skim milk and butterfat contained in or used to produce all producer milk and other source milk received by such handler or producer-handler; (b) the removal from storage or the receipts of all frozen cream and the quantities of butterfat and skim milk contained in such frozen cream; (c) the disposition and inventories of milk and milk products and the quantities of skim milk and butterfat contained in or used to produce such milk and milk products; (d) the weights, samples, and tests for butterfat and other contents of (1) all producer milk and other source milk received by such handler or producer-handler, and (2) all milk and milk products disposed of or in inventories held by such handler or producer-handler; and (e) all payments required to be made by such handler pursuant to §§ 963.70, 963.72, 963.74, 963.75, 963.76 and 963.77.

§ 963.33 *Retention of records.* All books and records required under this subpart to be made available to the market administrator shall be retained by the handler or producer-handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided*, That if within such three-year period the market administrator notifies the handler or producer-handler in writing that the retention of such books and records or of specified books and records is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice the handler or producer-handler shall retain such books and records or specified books and records until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler or producer-handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 963.40 *Skim milk and butterfat to be classified.* Skim milk and butterfat contained in milk, skim milk, and cream or used to produce milk products received during each month from all sources by each handler shall be classified pursuant to §§ 963.41 through 963.46.

§ 963.41 *Classes of utilization.* Subject to the conditions set forth in § 963.43 and §963.44 skim milk and butterfat shall be classified separately as follows:

(a) Class I milk shall be all skim milk including reconstituted skim milk and all butterfat:

(1) Moved from a plant during the month or on hand at a plant at the end of the month in the form of milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream including sour cream, or any mixture of cream and milk or skim milk, except skim milk and butterfat which is classified as Class II milk pursuant to paragraph (b) (1), (2), or (3) of this section;

(2) Used to produce concentrated milk for fluid consumption which was moved from a plant during the month or was on hand at a plant at the end of the month; or

(3) In shrinkage of producer milk as computed pursuant to § 963.42 (b) which is in excess of such shrinkage classified as Class II milk pursuant to paragraph (b) (4) of this section.

(b) Class II milk shall be all skim milk including reconstituted skim milk and all butterfat;

(1) Contained in skim milk which is dumped or fed to livestock by the handler or is moved from a plant and disposed of to farmers or livestock feeders for livestock feeding;

(2) Contained in cream which was moved from a plant during the month to a cold storage warehouse in the form of frozen cream or in the form of cream to be frozen, or which was on hand at a plant at the end of the month in the form of frozen cream;

(3) In shrinkage of skim milk and butterfat contained in producer milk in amounts equal to either the amounts of skim milk and butterfat, respectively, computed pursuant to § 963.42 (b) or amounts equal to 2 percent of the skim milk and butterfat, respectively, con-

tained in producer milk, whichever amounts are smaller;

(4) In shrinkage of skim milk and butterfat contained in other source milk as computed pursuant to § 963.42 (b); or

(5) Used to produce or contained in any products other than those specified in paragraph (a) of this section which products are moved from a plant during the month or are on hand at a plant at the end of the month.

§ 963.42 *Shrinkage.* Shrinkage of skim milk and butterfat contained in producer milk and in other source milk shall be computed each month as follows:

(a) Combine into separate totals for skim milk and butterfat all skim milk and butterfat contained in all milk, skim milk, and cream or used to produce all milk products received during the month from all sources, and deduct therefrom all skim milk and butterfat, respectively, contained in or used to produce all milk, skim milk, cream, and all milk products moved from a plant during the month or on hand at a plant at the end of the month: *Provided*, That producer milk transferred or diverted by a handler from his pool plant to another pool plant without first having been received for purposes of weighing in the transferring or diverting handlers pool plant shall be included in the receipts at the pool plant to which such milk was transferred or diverted for the purpose of computing shrinkage and shall be excluded from the receipts at the transferring or diverting handler's pool plant for such purpose.

(b) Prorate the total shrinkage of skim milk and butterfat computed pursuant to paragraph (a) of this section to skim milk and butterfat, respectively, contained in or used to produce all producer milk and all other source milk.

§ 963.43 *Responsibility of handlers and reclassification of milk.* All skim milk and butterfat contained in producer milk and in other source milk received by a handler shall be classified as Class I milk unless the handler proves to the market administrator that such skim milk and butterfat or a portion thereof should be classified as Class II milk. Any skim milk or butterfat which is classified in one class shall be reclassified to the other class if subsequent to the original classification such skim milk or butterfat is handled in such a manner as to justify its reclassification.

§ 963.44 *Transfers.* Skim milk or butterfat transferred (including skim milk and butterfat in milk which was diverted) from a pool plant in the form of milk, skim milk or cream to:

(a) Another pool plant or a nonpool plant from which a route is operated wholly or partially within the marketing area shall be classified as Class I milk unless utilization in Class II is indicated by the operators of both plants in their reports filed pursuant to § 963.30 for the month during which such transfer was made. If the two operators indicate a Class II utilization of all or part of the transferred skim milk and butterfat and the pounds of skim milk or butterfat remaining in Class II milk after the allocation of skim milk and butterfat in other source milk pursuant to § 963.46 (e) for the plant to which such transfer was made are greater than the pounds of skim milk and butterfat, respectively, so mutually indicated to be classified as Class II milk, then all such skim milk or butterfat transferred shall be classified as Class II milk. If the pounds of skim milk or butterfat remaining in Class II milk after the allocation of skim milk and butterfat in other source milk pursuant to § 963.46 (e) for the plant to which such transfer was made are less than the pounds of skim milk or butterfat, respectively, so mutually indicated to be classified as Class II milk, then an amount of such transferred skim milk or butterfat, respectively, equal to the pounds remaining in Class II in the plant to which such transfer was made shall be classified as Class II milk and the remainder of such skim milk or butterfat so transferred shall be classified as Class I milk.

(b) To a producer-handler shall be classified as Class I milk.

(c) To a nonpool plant from which no route is operated within the marketing area shall be classified as Class I milk unless utilization in Class II is mutually indicated in writing to the market administrator by the operators of both plants on or before the 8th day of the month following that within which such transfer was made and the operator of the nonpool plant maintains books and records showing the utilization of all skim milk and butterfat received at his plant and makes such books and records available to the market administrator, upon his request, for the verification of such utilization. If the above conditions are met the market administrator shall classify all skim milk and butterfat received at the nonpool plant and the skim and butterfat so transferred shall be allocated in series beginning with any skim milk and butterfat, respectively, remaining in Class I milk after allocating skim milk and butterfat in milk received from dairy farmers who the market administrator determines constitute the regular source of milk for Class I uses at such plant in series beginning with Class I milk.

§ 963.45 *Computation of skim milk and butterfat in each class.* For each month the market administrator shall correct for mathematical and for other obvious errors the report submitted by each handler pursuant to § 963.30 and shall compute separately the pounds of skim milk and butterfat in each class.

§ 963.46 *Allocation of skim milk and butterfat.* Skim milk and butterfat to be classified pursuant to § 963.40 shall be separately allocated to skim milk and butterfat classified pursuant to §§ 963.41 through 963.44 in sequence as follows:

(a) Plant shrinkage of skim milk and butterfat contained in producer milk as computed pursuant to § 963.42 (b) shall be allocated to skim milk and butterfat, respectively, classified pursuant to § 963.41 (a) (3) and (b) (4).

(b) Skim milk and butterfat contained in or used to produce products other than milk, skim milk, or cream received in such form shall be allocated to skim milk and butterfat contained in or used to produce products moved from a plant during the month or on hand at a plant at the end of the month in like form.

(c) Skim milk and butterfat contained in any frozen cream which was classified in a previous month as Class II milk pursuant to § 963.41 (b) (2) and which was removed from storage or received from another handler during the month for which classification is being determined shall be allocated to skim milk and butterfat used to produce ice cream or other frozen desserts or mixes for such ice cream or other frozen desserts moved from a plant during such month or on hand at a plant at the end of such month.

(d) Remaining skim milk and butterfat contained in or used to produce other source milk other than that received from a plant at which the handling of milk is fully subject to the pricing and payment provisions of another marketing agreement or order issued pursuant to the act shall be allocated to remaining skim milk and butterfat, respectively, in Class II milk, and if such remaining skim milk or butterfat contained in or used to produce such other source milk exceeds the remaining skim milk or butterfat, respectively, in Class II milk, such excess of skim milk or butterfat shall be allocated to skim milk or butterfat, respectively, in Class I milk.

(e) Remaining skim milk and butterfat contained in or used to produce other source milk received from a plant at which the handling of milk is fully subject to the pricing and payment provisions of another marketing agreement or order issued pursuant to the Act shall be allocated to remaining skim milk and butterfat, respectively, in Class II milk, and if such remaining skim milk or butterfat contained in or used to produce such other source milk exceeds the remaining skim milk or butterfat, respectively, in Class II milk, such excess of skim milk or butterfat shall be allocated the skim milk and butterfat in Class I milk.

(f) Skim milk and butterfat transferred and classified pursuant to § 963.44 shall be allocated to skim milk and butterfat, respectively, pursuant to such classification.

(g) Add to the remaining skim milk and butterfat in each class the skim milk and butterfat, respectively, allocated pursuant to paragraph (a) of this section.

(h) If the then remaining skim milk or butterfat in all classes exceeds the skim milk or butterfat contained in producer milk received by such handler, subtract such excess of skim milk or butterfat from remaining skim milk or butterfat, respectively, in Class II milk, and if the remaining skim milk or butterfat in Class II milk is less than such excess of skim milk or butterfat, respectively, subtract the difference of skim milk or butterfat from remaining skim milk or butterfat, respectively, in Class I milk. The resulting volumes of skim milk and butterfat in each class are the volumes of skim milk and butterfat in producer milk in each class.

MINIMUM PRICES

§ 963.50 *Basic formula price.* The basic formula price per hundredweight of milk to be used in determining the Class I and Class II milk price pursuant to § 963.51 and § 963.52 shall be the highest of the prices per hundredweight of milk of 3.5 percent butterfat content computed by the market administrator pursuant to paragraphs (a), (b) and (c) of this section.

(a) The average of the basic (or field) prices ascertained to have been paid or to be paid per hundredweight for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture by the companies indicated below:

Present Operator and Location

Borden Co., Black Creek, Wis.
Borden Co., Greenville, Wis.
Borden Co., Mount Pleasant, Mich.
Borden Co., New London, Wis.
Borden Co., Orfordville, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Jefferson, Wis.
Carnation Co., Chilton, Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Sparta, Mich.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Bellsville, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price resulting from the following computation:

(1) Multiply by 6 the simple average as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the Department of Agriculture during the month for which prices are being computed;

(2) Add an amount equal to 2.4 times the simple average as published by the Department of Agriculture of the prices determined per pound of "Cheddars" on the Wisconsin Cheese Exchange at Plymouth, Wisconsin, for the trading days that fall within the month; and

(3) Divide by 7 and to the resulting amount add 30 percent; and then multiply by 3.5.

(c) The price computed by adding together the plus amounts pursuant to subparagraphs (1) and (2) of this paragraph:

(1) From the average price of butter as computed in paragraph (b) (1) of this section, subtract 3 cents, add 20 percent of the resulting amount, and then multiply by 3.5.

(2) From the simple average as computed by the market administrator, of the weighted averages of the carlot prices per pound for nonfat dry milk solids, spray, and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the month for which prices are being computed by the Department of Agriculture, deduct 5.5 cents, and multiply by 8.2.

§ 963.51 *Class I milk prices.* The minimum prices per hundredweight to be paid by each handler for butterfat and skim milk in producer milk received by such handler during the month which is classified as Class I milk shall be computed by the market administrator as follows:

(a) Add to the basic formula price the following amount for the month indicated:

Month:	*Amount*
May and June	$0.90
March, April, July, and August	1.15
All others	1.55

Provided, That in computing the price to be paid by any handler for butterfat and skim milk contained in producer milk which was received by such handler during the month at a pool plant for which the handler does not hold a permit from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio, and which is classified as Class I milk, the amounts to be added to the basic formula price pursuant to this paragraph shall be 25 cents less in each month than the amounts indicated above.

(b) Add or subtract from the result computed pursuant to paragraph (a) of this section a "supply-demand adjustment" computed as follows:

(1) Compute a "current utilization percentage" by dividing the total volume of producer milk and other source milk received by all handlers in the first and second months preceding the month for which a price is being computed which was classified as Class I milk pursuant to §§ 963.41 (a), 963.43, and 963.44 by the total volume of producer milk received by all handlers during the same months, multiplying the result by 100, and rounding to the nearest whole number;

(2) Compute a "net utilization percentage" by subtracting from the current utilization percentage computed pursuant to subparagraph (1) of this paragraph the appropriate "standard utilization percentage" shown below:

Month for which a price is being computed:	*Standard utilization percentage*
January	84
February	80
March	78
April	75
May	71
June	64
July	61
August	64
September	67
October	70
November	76
December	82

(3) The amount of the supply-demand adjustment shall be as follows:

[Cents per hundredweight]

If the net utilization percentage is—	Supply-demand adjustment for specified month is—		
	Jan., Feb., Mar., Aug., and Sept.	Apr., May, June, and July	Oct., Nov., and Dec.
+12 or over	+38	+23	+50
+9 or +10	+28	+19	+38
+6 or +7	+20	+13	+26
+3 or +4	+10	+7	+14
+1 to −1	0	0	0
−3 or −4	−10	−14	−7
−6 or −7	−20	−26	−13
−9 or −10	−28	−38	−19
−12 or −13	−38	−50	−25
−15 or −16	−38	−50	−31
−18 or −19	−38	−50	−37
−21 or −22	−38	−50	−43
−24 or under	−38	−50	−50

When the net utilization percentage does not fall within one of the above tabulated brackets, the supply-demand adjustment shall be determined by the adjacent bracket which is the same as or nearest to the bracket used in the previous month. If in the first month this supply-demand adjustment is in effect the net utilization percentage does not fall within one of the above tabulated brackets the supply-demand adjustment shall be determined by the adjacent bracket which would result in the higher supply-demand adjustment.

(c) Divide the price computed pursuant to § 963.50 (c) into the amount computed pursuant to § 963.50 (c) (1).

(d) Multiply the price computed pursuant to paragraphs (a) and (b) of this section by the result obtained pursuant to paragraph (c) of this section.

(e) Divide the result obtained pursuant to paragraph (d) of this section by 0.035. This result shall be the price per hundredweight of butterfat classified as Class I milk.

(f) From the price computed pursuant to paragraph (a) and (b) of this section, subtract the amount computed pursuant to paragraph (d) of this section, and divide the remainder by 0.965. The result shall be the price per hundredweight of skim milk classified as Class I milk.

§ 963.52 *Class II milk prices.* The minimum prices per hundredweight to be paid by each handler for butterfat and skim milk in producer milk received by such handler during the month which is classiged as Class II milk shall be computed by the market administrator as follows:

(a) Multiply the basic formula price computed pursuant to § 963.50 by the result obtained pursuant to § 963.51 (c).

(b) Divide the result obtained pursuant to paragraph (a) of this section by 0.035. The result shall be the price per hundredweight of butterfat classified as Class II milk.

(c) From the basic formula price computed pursuant to § 963.50 subtract the amount computed pursuant to paragraph (a) of this section, and divide the remainder by 0.965. The result shall be the price per hundredweight of skim milk classified as Class II milk.

DETERMINATION OF UNIFORM PRICE

plant from the health authorities of

ative association written authorization to collect payment for their milk a total

fied as Class I milk pursuant to § 963.44 (c) a payment shall be made pursuant

which payment is made pursuant to § 963.72 (b)

DETERMINATION OF UNIFORM PRICE

§ 963.60 *Value of producer milk.* The value of producer milk received by each handler during the month shall be computed by the market administrator by multiplying the hundredweight of skim milk and butterfat in each class as computed pursuant to § 963.46 by the applicable class prices and adding together the resulting amounts: *Provided*, That if after the allocation of skim milk and butterfat pursuant to paragraphs (a) through (g) of § 963.46 the remaining amount of skim milk or butterfat exceeds the amount of skim milk or butterfat, respectively, in producer milk received by such handler, there shall be added to the value of the producer milk received by such handler a further amount computed by multiplying the hundredweight of skim milk or butterfat as subtracted pursuant to § 963.46 (h) by the applicable class price.

§ 963.61 *Computation of uniform prices.* For each month the market administrator shall compute a uniform price per hundredweight of milk containing 3.5 percent of butterfat to be paid to producers delivering milk to any pool plant for which the handler operating such plant holds a permit for such plant from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio and a uniform price to be paid per hundredweight of milk containing 3.5 percent of butterfat to producers delivering to any pool plant for which the handler operating such plants does not hold a permit for such plant from any of such health authorities as follows:

(a) Combine into one total the value of producer milk for each handler as computed pursuant to § 963.60 for all handlers who reported pursuant to § 963.30 for such month, except those in default in payments required pursuant to § 963.72 for the preceding month;

(b) Add the total amount of all payments made pursuant to § 963.72 (b), (c), and (d);

(c) Add any amounts paid into the producer-settlement fund and subtract any amounts paid out of the producer-settlement fund pursuant to § 963.77;

(d) Add an amount representing not less than one-half of the unobligated balance in the producer-settlement fund exclusive of the amounts added or subtracted pursuant to paragraphs (b) and (c) of this section;

(e) Subtract, if the weighted average butterfat test of all producer milk represented by the amounts included under paragraph (a) of this section is greater than 3.5 percent, or add, if the weighted average butterfat test of such milk is less than 3.5 percent, an amount computed by multiplying the total pounds of butterfat represented by the difference of such weighted average butterfat test from 3.5 percent, by the butterfat differential computed pursuant to § 963.74 multiplied by 10;

(f) Subtract an amount computed by multiplying by 25 cents the hundredweight of producer milk which was (1) received during the month for which uniform prices are being computed at all pool plants for which the handler operating such plant holds a permit for such plant from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio, and (2) classified as Class I milk;

(g) Divide the resulting amount by the total hundredweight of producer milk received by all handlers during the month for which uniform prices are being computed;

(h) Subtract not less than 4 cents nor more than 5 cents, and the result shall be the uniform price to be paid per hundredweight of milk containing 3.5 percent of butterfat to producers who delivered milk during the month for which uniform prices are being computed to pool plant for which the handler operating such plant does not hold a permit for such plant from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio;

(i) Divide the amount subtracted pursuant to paragraph (f) of this section by the hundredweight of producer milk received during the month for which uniform prices are being computed at all pool plants for which the handler operating such pool plants hold permits for such plants from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio;

(j) Add the amount computed pursuant to paragraph (i) of this section to the amount computed pursuant to paragraph (g) of this section; and

(k) Subtract not less than 4 cents nor more than 5 cents, and the result shall be the uniform price to be paid per hundredweight of milk containing 3.5 percent of butterfat to producers who delivered milk during the month for which uniform prices are being computed to any pool plant for which the handler operating such plant holds a permit for such plant from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio.

§ 963.62 *Notification.* On or before the 13th day of each month the market administrator shall notify each handler who submitted a report for the preceding month pursuant to § 963.30 of:

(a) The classification pursuant to § 963.46 of skim milk and butterfat contained in producer milk received by such handler during the preceding month and the value of such milk computed pursuant to § 963.60;

(b) The uniform prices for the preceding month computed pursuant to § 963.61; and

(c) The amount due such handler pursuant to § 963.73 and the amount to be paid by such handler pursuant to §§ 963.72, 963.75, and 963.76.

PAYMENTS FOR MILK

§ 963.70 *Payments to producers or cooperative associations.* Subject to §§ 963.74 and 963.76, each handler who is not a cooperative association shall make payments to producers or cooperative associations pursuant to either paragraph (a) or (b) of this section:

(a) On or before the 17th day of each month such handler shall pay to a cooperative association which requests such payment for producer milk received in the preceding month from producers who have given such cooperative association written authorization to collect payment for their milk a total amount not less than the sum of the individual amounts otherwise payable to such producers pursuant to paragraph (b) of this section. In making such payments to a cooperative association, the payments shall be accompanied with a statement showing the name of each producer for whose milk payment is being made to the cooperative association, the volume and average butterfat content of milk received from each such producer, and the amount of and reason for any deductions which the handler has withheld from the amount due such producer.

(b) On or before the 19th day of each month such handler shall pay each producer (other than those for who a cooperative association collects pursuant to paragraph (a) of this section) for milk received from him during the preceding month at not less than the appropriate uniform price computed pursuant to § 963.61 (h) or (k) for such month, adjusted by the butterfat differential computed pursuant to § 963.74 for such month, and less any deductions authorized by such producer: *Provided*, That if the payments made to a handler pursuant to § 963.73 have been reduced pursuant to the proviso contained therein, such handler may reduce payments to producers or cooperative associations by the same amount per hundredweight of milk and such handler shall complete payments to producers or cooperative associations as required by this section or before the next date for making payments pursuant to this section following the date upon which such handler receives payment in full for amounts due him pursuant to § 963.73.

§ 963.71 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made pursuant to §§ 963.72 and 963.77 and out of which he shall make all payments pursuant to §§ 963.73 and 963.77.

§ 963.72 *Payments to the producer-settlement fund.* On or before the 14th day of each month handlers shall make payments to the market administrator as follows:

(a) If the value of producer milk received by a handler in the preceding month as computed pursuant to § 963.60 exceeds the amount which such handler is required to pay to all producers pursuant to § 963.70, such handler shall pay the difference between the two amounts.

(b) Any handler who during the preceding month operated a nonpool plant from which a route extending into the marketing area was operated shall pay an amount computed by determining the value at the Class I price which would be applicable at such plant if it were a pool plant of all Class I milk disposed of on routes operated wholly or partially within the marketing area during the preceding month and by deducting from such value the value of such milk at the Class II price: *Provided*, That if such handler received at his nonpool plant during the preceding month skim milk and butterfat from a pool plant which was classified as Class I milk pursuant to § 963.44 (c) a payment shall be made pursuant to this section only if the volume of Class I milk so disposed of on routes operated wholly or partially within the marketing area is in excess of the volume of Class I milk received from a pool plant and shall be computed only on such excess.

(c) Any handler who during the preceding month operated a pool plant shall pay an amount computed by determining the value of other source milk which was received during the preceding month and allocated to Class I milk pursuant to § 963.46 (d) at the Class I price applicable to such plant and by deducting from such value the value of such milk at the Class II price.

(d) Any handler who received other source milk in the preceding month which was allocated to Class I milk pursuant to § 963.46 (e) shall pay any amount by which the value of such milk at the Class I price applicable to the plant at which such other source milk was received exceeded the value of such milk computed pursuant to the other marketing agreement or order.

§ 963.73 *Payments out of the producer-settlement fund.* On or before the 17th day of each month, the market administrator shall pay to each handler any amount by which the sum required to be paid by such handler for the preceding month pursuant to § 963.70 is greater than the total value of the milk of such handler computed pursuant to § 963.60 for such preceding month, less any unpaid obligations of the handler to the market administrator pursuant to § 963.72: *Provided*, That if the balance in the producer-settlement fund is insufficient to make payments to all handlers pursuant to this paragraph, the market administrator shall reduce such payments by a uniform amount per hundredweight of milk and shall complete such payments as soon as the necessary funds become available.

§ 963.74 *Producer butterfat differential.* In making payments pursuant to § 963.70 the uniform prices shall be adjusted for each one-tenth of one percent of butterfat content in the milk of each producer above or below 3.5 percent, as the case may be, by a butterfat differential (computed to the next high half-cent) computed as follows: Divide the average price of butter as computed pursuant to § 963.50 (b) (1) by 10 and, if the result is not an even whole or half cent, round to the next higher whole or half cent.

§ 963.75 *Expense of administration.* As his pro rata share of the expense incurred pursuant to § 963.22 (c), each handler shall pay the market administrator on or before the 14th day of each month 3 cents per hundredweight or such lesser amount as the Secretary may from time to time prescribe with respect to (a) all receipts within the preceding month of producer milk (including such handler's own production), (b) all other source milk received at a pool plant in the preceding month and classified as Class I, and (c) all other source milk on which payment is made pursuant to § 963.72 (b).

§ 963.76 *Marketing services.* In making payments to producers or cooperative associations pursuant to § 963.70 a handler shall make deductions and dispose of amounts so deducted as follows:

(a) Except as set forth in paragraph (b) of this section a handler shall deduct 6 cents per hundredweight, or such lesser amount as the Secretary may from time to time prescribe, with respect to all producer milk for which payment is being made pursuant to § 963.70 and shall pay the total amount of such deductions to the market administrator on or before the 17th day after the end of the month in which such producer milk was received. Such amount shall be expended by the market administrator to verify weights and tests of milk of producers and to provide producers with market information, such services to be performed by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of producers for whom a cooperative association is actually performing the services described in paragraph (a) of this section, as determined by the market administrator, a handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions from payments required pursuant to § 963.70 (b) for producer milk received in the preceding month as may be authorized by such producers, and pay such deductions on or before the 17th day after the end of the month in which such producer milk was received to the cooperative association rendering such services.

§ 963.77 *Errors in payments.* Whenever audit by the market administrator of any handler's reports, books, records or accounts discloses errors or whenever skim milk or butterfat is reclassified pursuant to § 963.43 resulting in moneys due (a) the market administrator from such handler, or such handler from the market administrator or (b) any producer or cooperative association from such handler pursuant to § 963.70 the market administrator shall promptly notify such handler of any such amount due, and payment thereof shall be made on or before the next date for making payment set forth in the provision under which such error occurred, following the 5th day after such notice. In computing amounts due pursuant to this section Class prices, the appropriate uniform price, the butterfat differential, the rate of administration assessment pursuant to § 963.75, and the rate of marketing service deduction pursuant to § 963.76 which were applicable in the month for which the original calculations of amounts due were made shall be used.

§ 963.78 *Termination of obligation.* (a) The obligation of any handler to pay money required to be paid under the terms of this order shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's report of utilization of the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain but need not be limited to the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to a cooperative association, the name of such producers or association, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this subpart, to make available to the market administrator or his representatives all books or records required by this subpart to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this subpart to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this subpart shall terminate two years after the end of the calendar month during which milk involved in the claim was received if any underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within that applicable period of time, files pursuant to section 8c (15) (A) of the act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 963.80 *Effective time.* The provisions of this subpart, or any amendment to this subpart, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated. The provisions of this section shall apply to any obligation under this subpart for the payment of money.

§ 963.81 *Suspension or termination.* Whenever the Secretary finds this sub-

City	Channel No.

Sweetwater	4
Wichita Falls	6

part or any provision of this subpart obstructs or does not tend to effectuate the declared policy of the act, he shall terminate or suspend the operation of this order or any such provision of this subpart.

§ 963.82 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this subpart there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 963.83 *Liquidation.* Upon the suspension of the provisions of the subpart, except this section, the market administrator, or such other liquidation agent as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated all assets, books, and records of the market administrator shall be transferred promptly to such liquidation agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 963.90 *Agent.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this subpart.

§ 963.91 *Separability of provisions.* If any provision of this subpart, or its application to any person or circumstances, is held invalid the application of such provisions, and the remaining provisions of this subpart, to other persons or circumstances shall not be affected thereby.

Dated: July 24, 1952.

[SEAL] ROY W. LENNARTSON,
Assistant Administrator.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 3]

[Docket No. 10244]

TABLE OF ASSIGNMENTS GOVERNING TELEVISION BROADCAST STATIONS

NOTICE OF PROPOSED RULE MAKING

1. The Commission has ascertained that several assignments in the Table of Assignments do not meet the required minimum assignment separations as provided for in § 3.610 (c) of the Commission's regulations governing television stations. The distances which do not meet the required separations are between the following assignments:

City	Channel No.
Wilmington, Del.	53
and Allentown, Pa.	39
Alberton, Ga.	16
and Greenville, S. C.	23
Fort Wayne, Ind.	21
and Lima, Ohio	35
Lexington, Ky.	36
and Winchester, Ky.	37
Lexington, Ky.	36
and Cincinnati, Ohio	48
Fall River, Mass.	40
and New London, Conn.	26
North Adams, Mass.	15
and New Britain, Conn.	30
Lima, Ohio	41
and Fort Wayne, Ind.	27
Allentown, Pa.	45
and Wilmington, Del.	39
Newberry, S. C.	37
and Greenville, S. C.	23

2. In order to correct any assignments in the Table of Assignments which do not meet the separation requirements established in § 3.610 of the Commission's rules the Commission gives notice that it proposes to make the following changes in the Table of Assignments:

City	Channel No.	
	Delete	Add
Wilmington, Del.	53	83
Elberton, Ga.	16	24
Fort Wayne, Ind.	21	60
Lexington, Ky.	36	64
Fall River, Mass.	40	68
North Adams, Mass.	15	74
Lima, Ohio	41	73
Allentown, Pa.	45	67
Newberry, S. C.	37	70

In light of these changes the Table of Assignments contained in § 3.606 of the Commission's rules and regulations would be amended to read as follows:

City	Channel No.
Del.: Wilmington	12, *59—, 83 -
Florida: [1]	
Orlando	6—, 9, 18, *24—
Tallahassee	*11—, 24, 51
Georgia: Elberton	24 -
Indiana: Fort Wayne	*27 +, 33 — 69
Kentucky: Lexington	27— 64
Massachusetts:	
Fall River	46— 68
North Adams	74
Ohio: Lima	35— 73
Pennsylvania: Allentown	39 67
South Carolina: Newberry	70

[1] These changes, required by the proposed shift in the Elberton, Ga., assignment, are merely with respect to offset requirements of Channel 24 in Orlando and in Tallahassee.

3. Pending the determination of these proceedings, applications for stations on all the assignments enumerated in both columns in paragraph 1 above will not be processed.

4. Authority for the adoption of the proposed amendment is contained in sections 4 (i), 301, 303 (b), (c), (d), (e), (f), (g), (h), and (r), and section 307 (b) of the Communications Act of 1934, as amended.

5. Any interested party who is of the opinion that the proposed amendment should not be adopted or should not be adopted in the form set forth herein may file with the Commission on or before August 18, 1952, a written statement or brief setting forth his comments.

Comments in support of the proposed amendment may also be filed on or before the same date. Comments or briefs in reply to the original comments may be filed within 10 days from the last day for filing said original comments or briefs. The Commission will consider all such comments that are submitted before taking action in this matter, and if any comments appear to warrant the holding of a hearing or oral argument, notice of the time and place of such hearing or oral argument will be given.

6. In accordance with the provisions of § 1.784 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs, or comments shall be furnished the Commission.

Adopted: July 23, 1952.

Released: July 24, 1952.

FEDERAL COMMUNICATIONS COMMISSION,

[SEAL] T. J. SLOWIE,
Secretary.

MINNESOTA

SALE OF MINERAL INTERESTS; REVISED AREA DESIGNATION

Pursuant to authority contained in Public Law 760, 81st Congress, the County of Nobles, in the State of Minnesota, is hereby designated as an area in which mineral interests covered by a single application are to be sold for a consideration of $1.00, and accordingly Schedule B, entitled One Dollar Areas, accompanying the Secretary's Order dated June 26, 1951 (16 F. R. 6318), is amended by adding, under Minnesota, in alphabetical order, the county "Nobles."

(Sec. 3, Public Law 760, 81st Cong.)

Done at Washington, D. C., this 25th day of July 1952.

[SEAL] K. T. HUTCHINSON,
Acting Secretary of Agriculture.

ECONOMIC STABILIZATION AGENCY

Office of the Administrator

[General Order No. 16]

FUNCTIONS WITH RESPECT TO WAGE STABILIZATION TO BE PERFORMED BY THE WAGE STABILIZATION BOARD

Sec.
1. Purpose.
2. Legal basis and authority.
3. Functions and redelegation.
4. Transfer of personnel, property, cases, records, and funds.
5. Effective date and effect upon other orders.

SECTION 1. *Purpose.* (a) The purpose of this order is to define the functions of the Wage Stabilization Board provided for in section 403 (b) of the Defense Production Act, as amended (section 112, Pub. Law 429, 82d Cong.), and Executive Order 10377, hereinafter referred to as The Board.

SEC. 2. *Legal basis and authority.* (a) This order is promulgated under the authority vested in the Economic Stabilization Administrator by the Defense Production Act of 1950, as amended (Pub. Law 774, 81st Cong., Pub. Laws 96 and 429, 82d Cong.), Executive Order 10161, as amended, Excutive Order 10182, and Executive Order 10203.

SEC. 3. *Function and redelegation*—(a) *Functions.* The Board is hereby authorized to perform the following functions under the supervision and direction of the Economic Stabilization Administrator with respect to persons under its jurisdiction:

(1) Formulate and recommend to the Economic Stabilization Administrator for promulgation, general policies and general regulations relating to the stabilization of wages, salaries, and other compensation, and

(2) Upon the request of (i) any person substantially affected thereby, or (ii) any Federal department or agency whose functions, as provided by law, may be affected thereby or may have an effect thereon, advise as to the interpretation, or the application to particular circumstances, of policies and regulations promulgated by such Administrator which relate to the stabilization of wages, salaries, and other compensation.

(b) *Redelegation.* The Board, subject to the supervision and direction of the Economic Stabilization Administrator, is hereby redelegated, in addition to the functions authorized above, authority to perform such other functions, except those redelegated to the Chairman in paragraph (c) hereof, as are necessary to implement and effectuate the general policies, general regulations, and all other orders and directives promulgated or issued by the Economic Stabilization Administrator relating to the stabilization of wages, salaries, and other compensation with respect to persons under its jurisdiction.

(c) There are hereby redelegated to the Chairman of the Board so much of the functions of the Administrator, pursuant to the Defense Production Act of 1950, as amended and provided for in sections 902 and 903 of Executive Order No. 10161, as amended, as is necessary for the performance of the functions with respect to wage stabilization hereinabove redelegated to the Board and, except as redelegation may be prohibited therein, so much of the functions of the Administrator pursuant to Executive Order No. 10182, as amended by Executive Order No. 10205, as is necessary for the performance of the functions with respect to wage stabilization so redelegated hereinabove to the Board.

(d) The Board shall to the maximum extent practicable redelegate to the Chairman of the Board the internal administrative affairs of the Board and the administration of the regulations, orders, and decisions within the jurisdiction of the Board.

(e) In carrying out his functions pursuant to paragraphs (c) and (d) of this section, the Chairman shall be governed by such instructions and determinations as the Board may from time to time make.

SEC. 4. *Transfer of personnel, property, cases, records and funds.* (a) All the personnel, property, cases, records, and funds of the Wage Stabilization Board established under Executive Order No. 10233, are hereby transferred to the Board.

SEC. 5. *Effective date and effect upon other orders.* (a) Economic Stabilization Agency General Order No. 3 is hereby revoked effective at the close of the 29th day of July 1952, and this order shall become effective immediately upon such revocation commencing with the 30th day of July 1952.

(b) Nothing herein shall be construed to limit the jurisdiction over the wages, salaries, and other compensation conferred upon the Railroad and Airline Wage Board in Economic Stabilization Agency General Order No. 7, as revised, nor upon the Salary Stabilization Board in Economic Stabilization Agency General Order No. 8, as revised.

(c) Any provision of any other order inconsistent with this order is hereby superseded and amended accordingly in conformity to this order.

ROGER L. PUTNAM,
Economic Stabilization Administrator.

[F. R. Doc. 52-8376; Filed, July 28, 1952; 12:22 p. m.]

[General Order No. 18]

ORGANIZATION AND FUNCTIONS OF THE NATIONAL ENFORCEMENT COMMISSION

Sec.
1. Purpose.
2. Legal basis and authority.
3. Organization.
4. Functions of the National Enforcement Commission.
5. Redelegation of authority.
6. Transfer of cases, proceedings, records, property and personnel.
7. Administrative services.
8. Effect on other orders.
9. Effective date.

SECTION 1. *Purpose.* (a) The purpose of this order is to establish a National Enforcement Commission within the Economic Stabilization Agency and to define its functions.

SEC. 2. *Legal basis and authority.* (a) This order is promulgated under the authority vested in the Economic Stabilization Administrator by the Defense Production Act of 1950, as amended (Pub. Law 774, 81st Cong., Pub. Laws 96 and 429, 82d Cong.), Executive Order 10161, as amended, Executive Order 10182, and Executive Order 10205.

SEC. 3. *Organization*—(a) *National Enforcement Commission.* There is hereby established within the Economic Stabilization Agency the National Enforcement Commission. It shall consist of three public members appointed by the Administrator, one of whom shall

be designated as Chairman. The Chairman shall be assisted by a Counsel to the Commission, who shall be in charge of the administrative functions of the Commission in the absence of the Chairman.

SEC. 4. *Functions of the National Enforcement Commission.* (a) The functions of the National Enforcement Commission (hereinafter referred to as the Commission) shall be, with respect to persons within the jurisdiction of the Wage Stabilization Board, the Salary Stabilization Board and the Office of Salary Stabilization, and the Railroad and Airline Wage Board, to determine whether any wage, salary, or other compensation has been paid or accrued, at any time, in violation or contravention of any provision of the Defense Production Act of 1950, as amended, or any regulation or order or directive heretofore or hereafter promulgated under the act. Such determination shall be made by the Commission after any of the foregoing named constituent organizations of this Agency have instituted an enforcement proceeding before it or after any such organization has submitted a settlement proposal to the Commission for its approval. Such determination shall be final within the Economic Stabilization Agency.

(b) The Commission is further authorized to certify and transmit such determinations in accordance with the policy and procedure set forth in Economic Stabilization Agency General Order No. 15, and other orders, directives, general policies or general regulations of the Economic Stabilization Administrator.

SEC. 5. *Redelegation of authority.* (a) The authority delegated to the Economic Stabilization Administrator with respect to the imposition of disallowance sanctions under section 405 (b) of the Defense Production Act, as amended, for the violation or contravention of any provisions of, or any orders or any regulations issued under said act, as amended, relating to the payment of wages, salaries, or other compensation, is hereby redelegated to the Commission, in accordance with the functions described above.

(b) The Wage Stabilization Board, the Salary Stabilization Board and the Office of Salary Stabilization, and the Railroad and Airline Wage Board are hereby directed to delegate effective immediately any subsidiary authority necessary on their part to carry out the foregoing delegations.

SEC. 6. *Transfer of cases, proceedings, records, property and personnel.* (a) All the cases and proceedings presently pending before the National Enforcement Commission or its Regional Enforcement Commissions previously established under the Wage Stabilization Board are hereby transferred to the Commission established by this order.

(b) All records pertaining to the foregoing cases and proceedings, as well as the property and personnel of the National Enforcement Commission previously established under the Wage Stabilization Board, are also hereby transferred to the Commission.

(c) All the prior decisions and certifications of the National Enforcement Commission previously established by the Wage Stabilization Board are hereby continued in full force and effect.

SEC. 7. *Administrative services.* (a) The Commission shall share the administrative service facilities of the Wage Stabilization Board relating to budget, fiscal, personnel, supply, space, and other administrative management matters.

SEC. 8. *Effect on other orders.* (a) General Orders Nos. 15 and 16 and General Order No. 8, Revised, are hereby specifically superseded, and amended accordingly, to the extent that they are inconsistent herewith. However, nothing contained herein shall be construed to limit the prosecution and investigative functions of the Wage Stabilization Board and the Salary Stabilization Board and the Office of Salary Stabilization, relating to enforcement, delegated in General Orders 15, 16 and 8, Revised. Any other orders and regulations or parts of orders and regulations the provisions of which are inconsistent with the provisions of this order are hereby superseded and amended accordingly.

SEC. 9. *Effective date.* (a) This order shall become effective at the close of the 29th day of July 1952, commencing with the 30th day of July, 1952.

ROGER L. PUTNAM,
Economic Stabilization Administrator.

Office of Price Stabilization

[Ceiling Price Regulation 34, Supplementary Regulation 16, Special Order 2]

CEILING PRICES FOR WHOLESALE LABOR WARRANTY SERVICES RENDERED ON THE "AUTRONIC EYE" BY AUTHORIZED SERVICE STATIONS OF UNITED MOTORS SERVICE DIVISION OF GENERAL MOTORS CORPORATION

Statement of considerations. This Special Order 2, issued upon application of General Motors Corporation, 3044 West Grand Boulevard, Detroit, Michigan, pursuant to section 3 of Supplementary Regulation 16 to Ceiling Price Regulation 34, establishes ceiling prices for wholesale labor warranty services rendered to General Motors Corporation, by authorized service stations of its United Motors Service Division, on automatic headlight controls called "Autronic Eyes".

Section 3 of Supplementary Regulation 16 to Ceiling Price Regulation 34 provides that a manufacturer who is offering for sale a new commodity, and who has customarily set or proposed uniform prices that have been adopted throughout the United States for wholesale labor warranty services sold to it by its dealers or by central service firms, as an incident of the sale of commodities, may apply to the Office of Price Stabilization, Service Trades Branch, Washington 25, D. C., for a ceiling price for each new wholesale labor warranty service.

The "Autronic Eye" is a new product manufactured by General Motors Corporation which has customarily set or proposed uniform prices that have been adopted throughout the United States for wholesale labor warranty services sold to it by its authorized dealers or by central service firms as an incident of the sale of such new commodities.

The ceiling prices established by this special order are based upon anticipated direct labor costs and are in line with ceiling prices for the most comparable wholesale labor warranty service furnished to General Motors Corporation by authorized service stations of its United Motors Service Division.

Special provisions. For the reasons set forth in the statement of considerations and pursuant to section 3 of Supplementary Regulation 16 to Ceiling Price Regulation 34, this special order is hereby issued.

1. The ceiling prices which General Motors Corporation, 3044 West Grand Boulevard, Detroit, Michigan, may pay to authorized service stations of its United Motors Service Division for wholesale labor warranty services (not including parts used, for which it shall credit the service stations) rendered on automatic headlight controls called "Autronic Eyes", which it manufactures, and which such service stations may charge General Motors Corporation, shall be as follows:

Description of service	Ceiling price
Classification 1. Any repair, or combination of repairs, involving replacement of tubes (except the Phototube), vibrators, capacitators, or resistors, or involving shorts, grounds, loose connections, or any mechanical adjustment not requiring replacement of parts, or involving both replacement of any of the foregoing parts and mechanical adjustments	$2.00
Classification 2. Any repairs involving the replacement of the Phototube or of other parts not included in classification 1, or any combination of repairs covered in classification 1 and in this classification	3.50

2. Section 18 (c) of Ceiling Price Regulation 34 does not apply to services covered by this special order. All other provisions of Ceiling Price Regulation 34 except as changed by this special order remain in effect as to such services.

3. This special order, or any provision thereof, may be revoked, suspended, or amended by the Director of Price Stabilization at any time.

Effective date. This Special Order 2 shall become effective July 23, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 28, 1952.

[F. R. Doc. 52-8373; Filed, July 28, 1952; 11:22 a. m.]

FEDERAL POWER COMMISSION

[Docket Nos. G-1595, G-1870]

KANSAS-COLORADO UTILITIES, INC., AND COLORADO INTERSTATE GAS CO.

ORDER FIXING DATE FOR FILING BRIEFS AND FIXING DATE FOR ORAL ARGUMENT

JULY 22, 1952.

In the matters of Kansas-Colorado Utilities, Inc., Docket No. G-1595; Colorado Interstate Gas Company, Docket No. G-1870.

On June 13, 1952, the Presiding Examiner in the above-docketed proceedings filed his decision in the matters.

On June 27, 1952, the staff of the Commission, pursuant to § 1.31 of the Commission's rules of practice and procedure, submitted its exceptions to the decision of the Presiding Examiner.

On July 1, 1952, Colorado Interstate Gas Company submitted its exceptions to said decision; and on July 3, 1952, Kansas-Colorado Utilities, Inc., submitted its exceptions.

The Commission finds: Good cause exists and it is appropriate to carry out the provisions of the Natural Gas Act that opportunity be afforded each party to file a brief with respect to the exceptions to the Examiner's decision and that oral argument be had with respect to the issues thereby presented.

The Commission orders: Each party to these consolidated proceedings may file a brief with respect to the exceptions to the Examiner's decision herein on or before September 3, 1952; and the issues presented by such exceptions be and same hereby are set for argument before the Commission on September 10, 1952, at 10 a. m., e. d. s. t., in the Hearing Room, Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C.

Date of issuance: July 23, 1952.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

OFFICE OF DEFENSE MOBILIZATION

[Defense Manpower Policy No. 4, Notification 37, Revocation]

PLACEMENT OF PROCUREMENT IN THE READING, PENNSYLVANIA, AREA

NOTIFICATION TO DEPARTMENT OF DEFENSE AND GENERAL SERVICES ADMINISTRATION

The Department of Labor has notified the Surplus Manpower Committee that Reading is no longer classified as a Group IV surplus labor area, and is now classified as a Group III area. Therefore, in accordance with the standards established by the Secretary of Labor under Section III, paragraph 2 of Defense Manpower Policy No. 4, the certification of this area has been withdrawn.

The Department of Defense and the General Services Administration are hereby notified that preference in the placement of Government contracts, in accordance with Defense Manpower Policy No. 4, should no longer be given to the above named area. Effective immediately Notification 37 is revoked.

OFFICE OF DEFENSE MOBILIZATION,
JOHN R. STEELMAN,
Acting Director.

RENEGOTIATION BOARD

STATEMENT OF ORGANIZATION

LOCATIONS AND TERRITORIES OF REGIONAL BOARDS

The Statement of Organization published in the issue of February 13, 1952 (F. R. Doc. 52-1774; 17 F. R. 1400) is hereby amended by deleting section 3 (b) and inserting in lieu thereof the following:

(b) The Board has created six regional boards with authority to conduct renegotiation proceedings within the limits hereinafter described. Each of the regional boards is composed of a chairman and four members. The locations and territories of the regional boards are as follows:

LOCATION AND TERRITORY

(1) Boston Regional Board, 175 Washington Street, Boston 9, Mass. (temporary address): Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

(2) Chicago Regional Board, U. S. Courthouse, 219 South Clark Street, Chicago 4, Ill.: Arkansas, Illinois, Indiana, Iowa, Kansas, Louisiana, Minnesota, Mississippi, Missouri, Nebraska, North Dakota, Oklahoma, South Dakota, Texas, and Wisconsin.

(3) Detroit Regional Board, David Broderick Tower Building 10 Witherell Street, Detroit 26, Mich.: Michigan and Ohio.

(4) Los Angeles Regional Board, 5504 Hollywood Boulevard, Los Angeles 28, California; Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

(5) New York Regional Board, John Wanamaker Building, 70 East Tenth Street, New York 3, N. Y.: New York State.

(6) Washington Regional Board, Rizik Building, 1737 L Street NW., Washington 25, D. C.: Alabama, Delaware, District of Columbia, Florida, Georgia, Kentucky, Maryland, New Jersey, North Carolina, Pennsylvania, South Carolina, Tennessee, Virginia, and West Virginia.

Dated: July 23, 1952.

JOHN T. KOEHLER,
Chairman,
The Renegotiation Board.

[F. R. Doc. 52-8275; Filed, July 28, 1952; 8:47 a. m.]

REGIONAL BOARDS

DELEGATION OF AUTHORITY WITH RESPECT TO CERTAIN FUNCTIONS, POWERS AND DUTIES

The delegation of authority published in the issue of February 13, 1952 (F. R. Doc. 52-1777; 17 F. R. 1401), as heretofore amended, is hereby further amended by deleting section 1 and inserting in lieu thereof the following:

1. There are hereby created six Regional Boards which shall consist of five members each, and which are hereby designated as the Boston Regional Board, the Chicago Regional Board, the Detroit Regional Board, the Los Angeles Regional Board, the New York Regional Board and the Washington Regional Board, respectively.

Dated: July 23, 1952.

JOHN T. KOEHLER,
Chairman,
The Renegotiation Board.

SECURITIES AND EXCHANGE COMMISSION

DETROIT STOCK EXCHANGE

NOTICE OF PROPOSAL TO DECLARE EFFECTIVE A PLAN FILED FOR DISPOSAL OF CERTAIN DOCUMENTS

Notice is hereby given that the Securities and Exchange Commission has under consideration a plan filed on July 17, 1952 by the Detroit Stock Exchange pursuant to § 240.17a-6 (Rule X-17A-6) under the Securities Exchange Act of 1934 for the disposal of the following material filed with the Exchange prior to January 1, 1946:

(1) Forms 10K and amendments thereto filed pursuant to section 13 of the Securities Exchange Act of 1934 or the rules and regulations thereunder.

(2) Forms 4, 5 and 6 filed pursuant to section 16 of the Securities Exchange Act of 1934 or the rules and regulations thereunder.

The Exchange proposes to commence disposing of the specified material as soon as practicable after the Commission has declared its plan effective.

Information contained in the material proposed to be disposed of pursuant to the plan of the Detroit Stock Exchange is on file with the Commission where it will continue to be available.

The Securities and Exchange Commission proposes to declare the plan of the Detroit Stock Exchange effective on condition that if at any time it appears to the Commission necessary or appropriate in the public interest or for the protection of investors so to do, the Commission may suspend or terminate the effectiveness of said plan by sending at least ten days' written notice to the Exchange.

These proposals are made pursuant to the provisions of the Securities Exchange Act of 1934, particularly sections 17 (a), 23 (a), and 24 (b) thereof and Rule X-17A-6 thereunder. All interested persons are invited to submit their views and comments in writing to the Securities and Exchange Commission, 425 Second Street, NW., Washington 25, D. C., on or before August 11, 1952.

By the Commission.

JULY 21, 1952.

[SEAL] ORVAL L. DUBOIS,
Secretary.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27249]

CAUSTIC SODA FROM POINTS IN CENTRAL TERRITORY TO PISGAH FORREST, W. VA.

APPLICATION FOR RELIEF

JULY 24, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: L. C. Schuldt, Agent, for carriers parties to his tariff I. C. C. No. 4300, pursuant to fourth-section order No. 9800.

Commodities involved: Sodium (soda), caustic, in tank-car loads.

From: Points in central territory.

To: Pisgah Forest, W. Va.

Grounds for relief: Competition with rail carriers and circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] W. P. BARTEL, *Secretary.*

[F. R. Doc. 52-8271; Filed, July 28, 1952; 8:46 a. m.]

[4th Sec. application 27251]

CEMENT FROM DORENA, FLA., TO GEORGIA

APPLICATION FOR RELIEF

JULY 24, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1244.

Commodities involved: Cement and related articles, carloads.

From: Dorena, Fla.

To: Points in Georgia.

Grounds for relief: Circuitous routes and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1244, Supp. 19.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[4th Sec. Application 27250]

BITUMINOUS COAL FROM KENTUCKY, TENNESSEE, AND VIRGINIA TO GARY, IND., AND JOLIET, ILL.

APPLICATION FOR RELIEF

JULY 24, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for the Artemus-Jellico Railroad Company and other carriers.

Commodities involved: Coal, bituminous, carloads.

From: Mines in eastern Kentucky, Tennessee, and Virginia.

To: Gary, Ind., and Joliet, Ill.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1174, Supp. 22.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

DEPARTMENT OF JUSTICE

Office of Alien Property

[Vesting Order 337, as Amended, Amdt.]

STANYAN HILL APARTMENTS

In re: Interests in a business enterprise known as Stanyan Hill Apartments, operating under a Pooling Agreement, in San Francisco, California. D-28-1146.

Vesting Order 337, as amended, is hereby further amended to read as follows:

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Congress, 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR, 1943, Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR, 1946 Supp.) and Executive Order 9989 (3 CFR, 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That Mary Magdalena Groth, Claus Heinrich Theden, also known as Heinrich Theden, Sophia Christine Rolfs, Antje Catharina Theden and Heinrich Theden, each of whose last known address is Germany, are residents of Germany and nationals of a designated enemy country (Germany);

2. That the property described as follows:

a. That certain lot or parcel of land located in the City and County of San Francisco, State of California, more particularly described as follows:

Beginning at a point on the Westerly line of Stanyan Street, distant thereon 231 and 2/10 feet Southerly from the Southerly line of Parnassus Avenue; running thence Southerly along said Westerly line of Stanyan Street 62 feet 4 inches; thence at right angles Westerly 111 feet 6 inches; thence at right angles Northerly 62 feet 4 inches; and thence at right angles Easterly 111 feet 6 inches to the point of beginning.

together with all hereditaments, fixtures, improvements and appurtenances thereto, and any and all claims or rents, refunds, benefits or other payments arising from the ownership of such property.

b. That certain lot or parcel of land located in the City and County of San Francisco, State of California, more particularly described as follows:

Beginning at a point on the Westerly line of Stanyan Street distant thereon 153 and 2/10 feet Southerly from the Southerly line of Parnassus Avenue, running thence Southerly and along said line of Stanyan Street 78 feet; thence at a right angle Westerly 111 feet 6 inches; thence at a right angle Northerly 78 feet; thence at a right angle Easterly 111 feet 6 inches to the point of beginning.

together with all hereditaments, fixtures, improvements and appurtenances thereto, and any and all claims or rents, refunds, benefits or other payments arising from the ownership of such property,

is property within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by Mary Magdalena Groth, Claus Heinrich Theden, also known as Heinrich Theden, Sophia Christine Rolfs, Antje Catharina Theden and Heinrich Theden, the aforesaid nationals of a designated enemy country (Germany);

3. That the property described as follows:

a. All right, title and interest, both legal and equitable of the persons identified in subparagraph 1 hereof, in and to the assets of that business enterprise which is operated under the name of Stanyan Hill Apartments pursuant to a pooling agreement executed under date of December 15, 1925, and which maintains an office and does business at 1135 Stanyan Street, San Francisco, California,

b. All right, title and interest, both legal and equitable, of the persons identified in subparagraph 1 hereof, in and to the personal property more particularly described as household furnishings, furniture, fixtures, rugs, personal effects, refrigeration plant and accompanying units and other articles of property located on the premises situated at 1135 Stanyan Street, San Francisco, California, and

c. All right, title and interest, both legal and equitable of the persons identified in subparagraph 1 hereof, in and to all indebtedness contingent or otherwise, and whether or not matured, owing to the business enterprise by the Bank of America, San Francisco, California, including but not limited to all security rights in and to any and all collateral for any or all of such indebtedness, and including particularly, the checking account at the aforesaid Bank of America, San Francisco, California, which is carried in the name of "Hoecker & Christie",

is property within the United States payable or deliverable to or claimed by the aforesaid nationals of a designated enemy country (Germany), and represents control of said business enterprise;

and it is hereby determined:

4. That to the extent that the persons named in subparagraph 1 hereof are not within a designated enemy country, the national interest of the United States requires that such persons be treated as nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and it being deemed necessary in the national interest,

There is hereby vested the property described in subparagraphs 2-a, 2-b, 3-a, 3-b, and 3-c hereof, subject to the right, title and interest therein of Ella L. Christie and John H. Christie, citizens of the United States, and

All such property so vested to be held, use, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 24, 1952.

For the Attorney General.

[SEAL] ROWLAND F. KIRKS, *Acting Director, Office of Alien Property.*

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS by a joint resolution approved February 29, 1952 (Public Law 261, 82d Congress), the Congress of the United States has designated the 17th day of September of each year as Citizenship Day in commemoration of the formation and signing on September 17, 1787, of the Constitution of the United States and in recognition of all who, by coming of age or by naturalization, have attained the full status of citizenship; and

WHEREAS it is most fitting that every citizen of the United States, whether native-born or foreign-born, should on September 17 of each year give special thought and consideration to his rights and responsibilities under our Constitution; and

WHEREAS the aforesaid resolution authorizes the President of the United States to issue annually a proclamation calling for the observance of Citizenship Day:

NOW, THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, do hereby direct the appropriate officials of the Government to display the flag of the United States on all public buildings on Wednesday, September 17, 1952, and I urge the people of the Nation to display the flag on that day at their homes and other suitable places.

I also urge Federal, State, and local officials, as well as patriotic, religious, civic, educational, and other interested organizations to arrange for appropriate ceremonies on Citizenship Day in which all our people may join to the end that both native-born and naturalized citizens may have a fuller understanding of their rights and privileges and of their obligations and responsibilities as citizens of the United States.

And I call upon all our citizens to renew and reaffirm on that day their faith in the principles and ideals embodied in the Constitution—the foundation of our strength and the symbol of freedom and justice for all.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this 25th day of July in the year of our Lord nineteen hundred and fifty-two, and of the Independence of the United States of America the one hundred and seventy-seventh.

[SEAL]

HARRY S. TRUMAN

By the President:

DEAN ACHESON,
Secretary of State.

TITLE 7—AGRICULTURE

Chapter I—Production and Marketing Administration (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

SUBPART B—UNITED STATES STANDARDS FOR GRADES OF PROCESSED FRUITS, VEGETABLES, AND OTHER PRODUCTS

U. S. STANDARDS FOR GRADES OF FROZEN LIMA BEANS

On April 27, 1951, a notice of proposed rule making was published in the FEDERAL REGISTER (16 F. R. 3621) regarding proposed United States Standards for Grades of Frozen Lima Beans.

After due consideration the revised standards were published in the FEDERAL REGISTER (17 F. R. 3783) on April 29, 1952, to become effective 30 days after date of publication thereof.

Subsequent thereto, it has been discovered that the industry has misinterpreted the color requirements of the standards. This amendment is issued to simplify the tolerances provided and to clarify the requirements with respect to the color of frozen lima beans, showing thereby that they are less restrictive than they are being interpreted.

The following amendment to the revised United States Standards for

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended June 19, 1937.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

REVISED BOOKS

TITLE 32 of the Code of Federal Regulations

Title 32, containing the regulations of the Department of Defense and other related agencies, has been completely revised. Originally a single book, Title 32 is being reissued as two books as follows:

Parts 1–699 ($5.00)
Part 700 to end (to be announced)

These books contain the full text of regulations in effect on December 31, 1951

Order from Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Grades of Frozen Lima Beans is hereby promulgated pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621, et seq.), and the Department of Agriculture Appropriation Act, 1953 (Pub Law 451, 82d Cong., approved July 5, 1952).

The Department finds that it is unnecessary and contrary to the public interest to give preliminary notice, engage in public rule making, and postpone the effective date of the amendment until thirty (30) days after date of publication in the FEDERAL REGISTER for the reasons that:

(1) The packing season for frozen lima beans is about to begin and it is urgent that the color provisions of the standards be properly understood for grading the product;

(2) No additional preparation on the part of industry is required;

(3) The amendment will create no hardships; therefore, the effective date of the amendment will be the date of publication in the FEDERAL REGISTER; therefore, the amendment is to become effective upon date of publication in the FEDERAL REGISTER.

Section 52.172, paragraph (e) (1), subdivisions (i), (ii), and (iii), are amended to read as follows:

(i) Frozen lima beans that possess a good color may be given a score of 54 to 60 points. "Good color" means that the lima beans, regardless of type, possess a bright typical color and meet the following additional color requirements for the respective types:

(*a*) *Thin-seeded type (with skins removed); Thick-seeded Baby Potato type (with skins on).* (*1*) Not less than 93 percent, by count, of the lima beans are "green" and not more than 7 percent, by count, may be lighter in color: *Provided*, That not more than 1 percent, by count, of all the lima beans are white, or

(*2*) Not less than 97 percent, by count, of the lima beans are "green" and not more than 3 percent, by count, may be lighter in color or white lima beans.

(*b*) *Thick-seeded type (with skins on).* Not less than 85 percent, by count, of the lima beans are "green" and not more than 15 percent, by count, may be lighter in color: *Provided*, That not more than 1 percent, by count, of all the lima beans are white.

(ii) If the frozen lima beans possess a reasonably good color, a score of 48 to 53 points may be given. Frozen lima beans that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the lima beans, regardless of type, possess a typical color and meet the following additional requirements for the respective types:

(*a*) *Thin-seeded type (with skins removed); Thick-seeded Baby Potato type (with skins on).* Not less than 65 percent, by count, of the lima beans are "green" and not more than 20 percent, by count, may be lighter in color or white beans.

(*b*) *Thick-seeded type (with skins on).* Not less than 60 percent, by count, of the lima beans are "green" and not more than 40 percent, by count, may be lighter in color: *Provided*, That not more than 5 percent, by count, of all the lima beans are white.

(iii) If the frozen lima beans possess a fairly good color, a score of 42 to 47 points may be given. Frozen lima beans that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the lima beans, regardless of type, possess a typical color and meet the following additional requirements for the respective types:

(*a*) *Thin-seeded type (with skins removed); Thick-seeded Baby Potato type (with skins on).* Less than 65 percent, by count, of the lima beans are "green" and all of the lima beans may be white.

(*b*) *Thick-seeded type (with skins on).* Less than 60 percent, by count, of the lima beans are "green": *Provided*, That not more than 20 percent, by count, of all the lima beans are white."

(60 Stat. 1087; 7 U. S. C. 1621, Pub. Law 451, 82d Cong.)

Issued at Washington, D. C., this 25th day of July 1952.

[SEAL] GEORGE A. DICE,
Deputy Assistant Administrator, Production and Marketing Administration.

[F. R. Doc. 52–8339; Filed, July 29, 1952; 8:50 a. m.]

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

SUBPART B—UNITED STATES STANDARDS FOR GRADES OF PROCESSED FRUITS, VEGETABLES, AND OTHER PRODUCTS[1]

U. S. STANDARDS FOR GRADES OF CANNED CREAM STYLE CORN

A notice of proposed rule making was published on May 24, 1952, in the FEDERAL REGISTER (17 F. R. 4767) regarding proposed United States Standards for Grades of Canned Cream Style Corn. After considering all relevant matters presented, including the proposals set forth in the aforesaid notice, the following United States Standards for Grades of Canned Cream Style Corn are hereby promulgated under the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621, et seq.) and the Department of Agriculture Appropriation Act, 1953 (Pub. Law 451; 82d Cong., approved July 5, 1952).

The Department finds that it is unnecessary and contrary to the public interest to give a 30-day notice of the effective date of the standards herewith published for the reasons that:

(1) The packing season for canned corn is about to begin;

(2) The industry has been properly apprised through rule making of the revisions;

(3) No additional preparation on the part of industry is required;

(4) The revisions create no hardships; therefore, the effective date of the standards issued will be the date of publication in the FEDERAL REGISTER.

§ 52.268 *Canned cream style corn.* "Canned cream style corn" means the canned product properly prepared from the clean, sound, succulent kernels of sweet corn as defined in the definition and standard of identity for canned corn (21 CFR 51.20) issued pursuant to the Federal Food, Drug, and Cosmetic Act.

(*a*) *Color of canned cream style corn.* (1) White.

(2) Golden or Yellow.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(b) *Grades of canned cream style corn.* (1) "U. S. Grade A" or "U. S. Fancy" is the quality of canned cream style corn that possesses similar varietal characteristics; that is tender; that possesses a good color; that possesses a good consistency; that is practically free from defects; that possesses a very good flavor; and that for those factors which are scored in accordance with the scoring system outlined in this section the total score is not less than 90 points: *Provided*, That the cream style corn may possess a reasonably good color, a reasonably good consistency, and a good flavor if the total score is not less than 90 points.

(2) "U. S. Grade B" or "U. S. Extra Standard" is the quality of canned cream style corn that possesses similar varietal characteristics; that is reasonably tender; that possesses a reasonably good color; that possesses a reasonably good consistency; that is reasonably free from defects; that possesses a good flavor, and that for those factors which are scored in accordance with the scoring system outlined in this section the total score is not less than 80 points: *Provided*, That the cream style corn may possess a fairly good color, scoring not less than 7 points, if the total score is not less than 80 points.

(3) "U. S. Grade C" or "U. S. Standard" is the quality of canned cream style corn that possesses similar varietal characteristics; that is fairly tender; that possesses a fairly good color; that possesses a fairly good consistency; that is fairly free from defect; that possesses a fairly good flavor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this section.

(4) "Substandard" is the quality of canned cream style corn that fails to meet the requirements of U. S. Grade C or U. S. Standard and may or may not meet the minimum standards of quality for canned cream style corn issued pursuant to the Federal Food, Drug, and Cosmetic Act.

(c) *Fill of container for canned cream style corn.* The standard of fill of container for canned cream style corn is not incorporated in the grades of the finished product, since fill of container, as such, is not a factor of quality for the purpose of these grades. The standard fill of container for canned cream style corn is a fill of not less than 90 percent of the total capacity of the container. Canned cream style corn that does not meet this requirement is "Below standard in fill."

(d) *Ascertaining the grade.* (1) The grade of canned cream style corn is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, consistency, absence of defects, tenderness and maturity, and flavor.

(2) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

Factors:	Points
(i) Color	10
(ii) Consistency	20
(iii) Absence of defects	20
(iv) Tenderness and maturity	30
(v) Flavor	20
Total score	100

(e) *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

(1) *Color.* (i) Canned cream style corn that possesses a good color may be given a score of 9 or 10 points. "Good color" means that the cut kernels possess a practically uniform color typical of tender sweet corn and that the product is bright and is practically free from "off-variety" kernels.

(ii) Canned cream style corn that possesses a reasonably good color may be given a score of 8 points. "Reasonably good color" means that the kernels possess a reasonably uniform color typical of reasonably tender sweet corn, and that the product may lack brightness but not to the extent that the appearance is materially affected, and is reasonably free from "off-variety" kernels.

(iii) Canned cream style corn that possesses a fairly good color may be given a score of 6 or 7 points. Canned cream style corn that scores 7 points in this classification shall not be graded above U. S. Grade B or U. S. Extra Standard and that scores 6 points in this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a partial limiting rule). "Fairly good color" means that the kernels possess a fairly uniform color typical of fairly tender sweet corn and that the product may be dull, but not to the extent that the appearance is seriously affected, and is fairly free from "off-variety" kernels.

(iv) Canned cream style corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 5 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(2) *Consistency.* The factor of consistency refers to the viscosity of the product, to the degree of smoothness, and to the separation of free liquor.

(i) Canned cream style corn that possesses a good consistency may be given a score of 18 to 20 points. "Good consistency" means that the canned cream style corn, after stirring and emptying from the container to a dry flat surface, possesses a heavy cream-like consistency with not more than a slight appearance of curdling, forms a slightly mounded mass, and that at the end of two minutes after emptying on the dry flat surface there is practically no separation of free liquor.

(ii) If the canned cream style corn has a reasonably good consistency a score of 16 or 17 points may be given. "Reasonably good consistency" means that the canned cream style corn, after stirring and emptying from the container to a dry flat surface, has a reasonably good creamy consistency, with not more than a moderate appearance of curdling, may flow just enough to level off to a nearly uniform depth or may be moderately stiff and moderately mounded, and that at the end of two minutes after emptying on the dry flat surface there may be a slight separation of free liquor.

(iii) Canned cream style corn that has a fairly good consistency may be given a score of 14 or 15 points. Canned cream style corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good consistency" means that the canned cream style corn, after stirring and emptying on a dry flat surface, may be thin but not excessively thin, or thick but not excessively dry, pasty, or crumbly, or moderately but not excessively curdled, and that at the end of two minutes after emptying on the dry flat surface there may be a moderate but not excessive separation of free liquor. The approximate circular area over which the product spreads when emptied on a dry flat surface shall not exceed 12 inches except that in the case of canned cream style corn the washed, drained residue of which contains more than 20 percent of alcohol insoluble solids, the average diameter of the area over which the product spreads shall not exceed 10 inches.[2]

(iv) Canned cream style corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule), and may also be graded "Below Standard in Quality" for the following reason: excessively liquid.

(3) *Absence of defects.* The factor of absence of defects refers to the degree of freedom from pieces of cob, husk, silk, or other harmless extraneous vegetable matter, from pulled kernels, kernels affected by insect injury, discolored kernels, or other defective kernels.

(i) Canned cream style corn that is practically free from defects may be given a score of 18 to 20 points. "Practically free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, kernels affected by insect injury, discolored kernels, or other defective kernels may be present that do not more than slightly affect the appearance or eating quality of the product.

(ii) If the canned cream style corn is reasonably free from defects a score of 16 or 17 points may be given. Canned cream style corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, kernels affected by insect injury, discolored kernels, or other defective kernels may be present that do not materially affect the appearance or eating quality of the product.

(iii) Canned cream style corn that is fairly free from defects may be given a score of 14 or 15 points. Canned cream style corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means:

That for each 20 ounces of net weight there may be present: Not more than 1 cubic centimeter of pieces of cob;[2] and not more than 1 square inch (1" x 1") of husk;[2] and

That for each 2 ounces of net weight there may be present: Not more than 1 brown or black discolored kernel or discolored piece of kernel;[2] and

That for each 1 ounce of net weight there may be present: Not more than 6 inches of silk;[2] *Provided*, That pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, kernels affected by insect injury, discolored kernels, or other defective kernels do not seriously affect the appearance or eating quality of the product.

(iv) Canned cream style corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule), and may also be graded "Below Standard in Quality" for the applicable reasons:

Excessive discolored kernels.
Excessive cob.
Excessive husk.
Excessive silk.

(4) *Tenderness and maturity.* (i) Canned cream style corn that is tender may be given a score of 27 to 30 points. "Tender" means that the kernels are in the milk, early cream, or middle cream stage of maturity, have a tender texture, and that pieces of the interior portions of corn kernels or ground kernels are characteristic of sweet corn in the milk, early cream, or middle cream stage of maturity.

(ii) If the canned cream style corn is reasonably tender a score of 24 to 26 points may be given. Canned cream style corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably tender" means that the kernels are in the middle cream stage to late cream stage of maturity, have a reasonably tender texture, and that pieces of the interior portions of corn kernels or ground kernels are characteristic of sweet corn in the middle cream to late cream stage of maturity.

(iii) Canned cream style corn that is fairly tender may be given a score of 22 or 23 points. Canned cream style corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly tender" means that the kernels are in the early dough or dough stage of maturity, may be firm but not hard or tough, and that pieces of the interior portions of corn kernels or ground kernels are characteristic of sweet corn in the early dough or dough stage of maturity. The weight of the alcohol insoluble solids of the washed, drained material[2] does not exceed 27 percent of the weight of such material.

(iv) Canned cream style corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 21 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule), and may also be graded "Below Standard in Quality."

(5) *Flavor.* The factor of flavor refers to the palatability of the product. The natural flavor of the sweet corn and the effects of added sugar (sucrose) and salt are considered in evaluating this factor.

(i) Canned cream style corn that possesses a very good flavor may be given a score of 18 to 20 points. "Very good flavor" means that the product including added seasoning ingredients has a very good characteristic flavor and odor typical of tender canned sweet corn.

(ii) If the canned cream style corn possesses a good flavor a score of 16 or 17 points may be given. "Good flavor" means that the product including added seasoning ingredients has a good characteristic flavor and odor typical of reasonably tender canned sweet corn.

(iii) Canned cream style corn that possesses a fairly good flavor may be given a score of 14 or 15 points. Canned cream style corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means that the product may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

(iv) Canned cream style corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(f) *Tolerances for certification of officially drawn samples.* (1) When certifying samples that have been officially drawn and which represent a specific lot of canned cream style corn, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(i) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(ii) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(iii) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

(g) *Score sheet for canned cream style corn.*

(h) *Effective time and supersedure.* The revised United States Standards for Grades of Canned Cream Style Corn (which are the fourth issue) contained in this section will become effective on date of publication in the FEDERAL REGISTER and will thereupon supersede the United States Standards for Grades of Canned Cream Style Corn which have been in effect since December 1, 1932.

(60 Stat. 1087; 7 U. S. C. 1621, Pub. Law 451, 82d Cong.)

Issued at Washington, D. C., this 25th day of July 1952.

[SEAL] GEORGE A. DICE,
Deputy Assistant Administrator, Production and Marketing Administration.

[F. R. Doc. 52-8340; Filed, July 29, 1952; 8:50 a. m.]

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

SUBPART B—UNITED STATES STANDARDS FOR GRADES OF PROCESSED FRUITS, VEGETABLES, AND OTHER PRODUCTS[1]

U. S. STANDARDS FOR GRADES OF CANNED WHOLE KERNEL (OR WHOLE GRAIN) CORN

A notice of proposed rule making was published on May 24, 1952, in the FEDERAL

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[2] Determined as outlined in the Standard of Quality for Canned Sweet Corn (21 CFR 51.21) promulgated under the Federal Food, Drug, and Cosmetic Act.

REGISTER (17 F. R. 4769) regarding proposed United States Standards for Grades of Canned Whole Kernel (or Whole Grain) Corn. After considering all relevant matters presented, including the proposals set forth in the aforesaid notice, the following United States Standards for Grades of Canned Whole Kernel (or Whole Grain) Corn are hereby promulgated under the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621, et seq.) and the Department of Agriculture Appropriation Act, 1953 (Pub. Law 451; 82d Cong., approved July 5, 1952).

The Department finds that it is unnecessary and contrary to the public interest to give a 30-day notice of the effective date of the standards herewith published for the reasons that:

(1) The packing season for canned corn is about to begin;

(2) The industry has been properly apprised through rule making of the revisions;

(3) No additional preparation on the part of industry is required;

(4) The revisions create no hardships; therefore, the effective date of the standards issued will be the date of publication in the FEDERAL REGISTER.

§ 52.269 *Canned whole kernel (or whole grain) corn.* "Canned whole kernel (or whole grain) corn" means the canned product properly prepared from the clean, sound, succulent kernels of sweet corn as defined in the definition and standard of identity for canned corn (21 CFR 51.20) issued pursuant to the Federal Food, Drug, and Cosmetic Act. The product is considered "Vacuum Pack" or "Vacuum Packed" when the liquid in the container[2] is not more than 20 percent of the net weight and the container is closed under conditions creating a high vacuum.

(a) *Color of canned whole kernel (or whole grain) corn.* (1) White.

(2) Golden or Yellow.

(b) *Grades of canned whole kernel (or whole grain) corn.* (1) "U. S. Grade A" or "U. S. Fancy" is the quality of canned whole kernel (or whole grain) corn that possesses similar varietal characteristics; that is tender; that possesses a good color; that is well cut; that is practically free from defects; that possesses a very good flavor; and that for those factors which are scored in accordance with the scoring system outlined in this section the total score is not less than 90 points: *Provided*, That the canned whole kernel (or whole grain) corn may possess a reasonably good color, a good flavor, and may be reasonably well cut, if the total score is not less than 90 points.

(2) "U. S. Grade B" or "U. S. Extra Standard" is the quality of canned whole kernel (or whole grain) corn that possesses similar varietal characteristics; that is reasonably tender; that possesses a reasonably good color; that is reasonably well cut; that is reasonably free from defects; that possesses a good flavor; and that for those factors which are scored in accordance with the scoring system outlined in this section the total score is not less than 80 points: *Provided*, That the canned whole kernel (or whole grain) corn may possess a fairly good color, scoring not less than 7 points, and may be fairly well cut, if the total score is not less than 80 points.

(3) "U. S. Grade C" or "U. S. Standard" is the quality of canned whole kernel (or whole grain) corn that possesses similar varietal characteristics; that is fairly tender; that possesses a fairly good color; that is fairly well cut; that is fairly free from defects; that possesses a fairly good flavor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this section.

(4) "Substandard" is the quality of canned whole kernel (or whole grain) corn that fails to meet the requirements of U. S. Grade C or U. S. Standard and may or may not meet the minimum standards of quality for canned whole kernel (or whole grain) corn issued pursuant to the Federal Food, Drug, and Cosmetic Act.

(c) *Recommended fill of container.* The recommended fill of container for canned whole kernel (or whole grain) corn is not incorporated in the grades of the finished product, since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container of canned whole kernel (or whole grain) corn be filled as full as practicable with the product.

(d) *Recommended minimum drained weight.* The minimum drained weight recommendations of Table No. I of this section are not incorporated in the grades of the finished product, since drained weight, as such, is not a factor of quality for the purpose of these grades. The drained weight of whole kernel (or whole grain) corn is determined by emptying the contents of the container upon a United States Standard No. 8 circular sieve of proper diameter so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage and allowing to drain for two minutes. The drained weight is the weight of the sieve and the whole kernel (or whole grain) corn less the weight of the dry sieve. A sieve 8 inches in diameter is used for the No. 2½ size can (401" x 411") and smaller sizes and a sieve 12 inches in diameter is used for containers larger than the No. 2½ size can.

TABLE NO. I—RECOMMENDED MINIMUM DRAINED WEIGHTS, IN OUNCES, OF WHOLE KERNEL (OR WHOLE GRAIN) CORN (EXCEPT VACUUM PACK)

Container size or designation	Grade A, tenderness and maturity minimum drained weight (ounces)	Grades B, C, and substandard tenderness and maturity minimum drained weight (ounces)
8 ounce, tall	5.25	5.50
No. 1 (picnic)	6.75	7.00
No. 300	9.25	9.50
No. 303	10.50	10.75
No. 2	12.75	13.25
No. 10	70.00	72.00

(e) *Ascertaining the grade.* (1) The grade of canned whole kernel (or whole grain) corn is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, cut, absence of defects, tenderness and maturity, and flavor.

(2) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

Factors:	Points
(i) Color	10
(ii) Cut	10
(iii) Absence of defects	20
(iv) Tenderness and maturity	40
(v) Flavor	20
Total score	100

(f) *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

(1) *Color.* (i) Canned whole kernel (or whole grain) corn that possesses a good color may be given a score of 9 or 10 points. "Good color" means that the kernels possess a practically uniform color typical of tender sweet corn and that the product is bright and is practically free from "off-variety" kernels.

(ii) Canned whole kernel (or whole grain) corn that possesses a reasonably good color may be given a score of 8 points. "Reasonably good color" means that the kernels possess a reasonably uniform color typical of reasonably tender sweet corn and that the product may lack brightness but not to the extent that the appearance is materially affected and is reasonably free from "off-variety" kernels.

(iii) Canned whole kernel (or whole grain) corn that possesses a fairly good color may be given a score of 6 or 7 points. Canned whole kernel (or whole grain) corn that scores 7 points in this classification shall not be graded above U. S. Grade B or U. S. Extra Standard and that scores 6 points in this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a partial limiting rule). "Fairly good color" means that the kernels possess a fairly uniform color typical of fairly tender sweet corn and that the product may be dull but not to the extent that the appearance is seriously affected and is fairly free from "off-variety" kernels.

(iv) Canned whole kernel (or whole grain) corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 5 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(2) *Cut.* The factor of cut refers to the degree of smoothness of the cut surface of the kernels, uniformity and depth of cut, and to the degree of freedom from adhering cob tissue.

(i) Canned whole kernel (or whole grain) corn which has been well cut may be given a score of 9 or 10 points. "Well cut" means that the appearance of the product is not more than slightly affected by the presence of ragged cut kernels, torn kernels, irregular cut kernels, and kernels with attached cob tissue.

(ii) Canned whole kernel (or whole grain) corn in which the kernels are reasonably well cut may be given a score of 8 points. "Reasonably well cut" means that the appearance of the product is not materially affected by the presence of ragged cut kernels, torn kernels, irregular cut kernels, and kernels with attached cob tissue.

(iii) Canned whole kernel (or whole grain) corn in which the kernels are fairly well cut may be given a score of 6 or 7 points. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Fairly well cut" means that the appearance of the product is not seriously affected by the presence of ragged cut kernels, torn kernels, irregular cut kernels, and kernels with attached cob tissue.

(iv) Canned whole kernel (or whole grain) corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 5 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(3) *Absence of defects.* The factor of absence of defects refers to the degree of freedom from pieces of cob, husk, silk, or other harmless extraneous vegetable matter, from pulled kernels, ragged kernels, crushed kernels, loose skins, and from damaged or seriously damaged kernels.

"Damaged kernel" means any kernel affected by insect injury, or damaged by discoloration, pathological injury, or by other means to the extent that the appearance or eating quality is materially affected.

"Seriously damaged kernel" means damaged to such an extent that the appearance or eating quality is seriously affected.

(i) Canned whole kernel (or whole grain) corn that is practically free from defects may be given a score of 18 to 20 points. "Practically free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels may be present that do not more than slightly affect the appearance or eating quality of the product.

(ii) If the canned whole kernel (or whole grain) corn is reasonably free from defects a score of 16 or 17 points may be given. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels may be present that do not materially affect the appearance or eating quality of the product.

(iii) Canned whole kernel (or whole grain) corn that is fairly free from defects may be given a score of 14 or 15 points. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that for each 14 ounces of drained weight there may be present:

Not more than 1 cubic centimeter of pieces of cob;[2]

Not more than 1 square inch (1" x 1") of husk;[2] and

For each 2 ounces of drained weight there may be present:

Not more than 1 brown or black discolored kernel or discolored piece of kernel;[2] and

For each 1 ounce of drained weight there may be present:

Not more than 7 inches of silk:[2] *Provided*, That pieces of cob, silk, or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels do not seriously affect the appearance or eating quality of the product.

(iv) Canned whole kernel (or whole grain) corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule), and may also be graded "Below Standard in Quality" for the applicable reasons:

Excessive discolored kernels.
Excessive cob.
Excessive husk.
Excessive silk.

(4) *Tenderness and maturity.* (i) Canned whole kernel (or whole grain) corn that is tender may be given a score of 36 to 40 points. "Tender" means that the kernels are in the milk or early cream stage of maturity and have a tender texture.

(ii) If the canned whole kernel (or whole grain) corn is reasonably tender a score of 32 to 35 points may be given. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably tender" means that the kernels are in the cream stage of maturity and have a reasonably tender texture.

(iii) Canned whole kernel (or whole grain) corn that is fairly tender may be given a score of 20 or 31 points. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly tender" means that the kernels are in the early dough or dough stage and may be firm but not hard or tough. The weight of the alcohol insoluble solids[2] shall not exceed 27 percent of the drained weight.

(iv) Canned whole kernel (or whole grain) corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 29 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule), and may also be graded "Below Standard in Quality."

(5) *Flavor.* The factor of flavor refers to the palatability of the product. The natural flavor of the sweet corn and the effects of added sugar (sucrose) and salt are considered in evaluating this factor.

(i) Canned whole kernel (or whole grain) corn that possesses a very good flavor may be given a score of 18 to 20 points. "Very good flavor" means that the product including added seasoning ingredients has a very good characteristic flavor and odor typical of tender canned sweet corn.

(ii) If the canned whole kernel (or whole grain) corn possesses a good flavor a score of 16 or 17 points may be given. "Good flavor" means that the product including added seasoning ingredients has a good characteristic flavor and odor typical of reasonably tender canned sweet corn.

(iii) Canned whole kernel (or whole grain) corn that possesses a fairly good flavor may be given a score of 14 or 15 points. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means that the product may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

(iv) Canned whole kernel (or whole grain) corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(g) *Tolerances for certification of officially drawn samples.* (1) When certifying samples that have been officially drawn and which represent a specific lot of canned whole kernel (or whole grain) corn the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(i) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(ii) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(iii) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

(h) *Score sheet for canned whole kernel (or whole grain) corn and canned*

[2] Determined as outlined in the Standard of Quality for Canned Sweet Corn (21 CFR 51.21) promulgated under the Federal Food, Drug, and Cosmetic Act.

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

PART 976—MILK IN THE FORT SMITH, ARKANSAS, MARKETING AREA

ORDER REGULATING THE HANDLING OF MILK IN THE FORT SMITH, ARKANSAS, MARKETING AREA

Sec.

976.0 Findings and determinations.

DEFINITIONS

976.1 Act.
976.2 Secretary.
976.3 Department.
976.4 Person.
976.5 Cooperative association.
976.6 Fort Smith, Arkansas, marketing area.
976.7 Approved plant.
976.8 Unapproved plant.
976.9 Handler.
976.10 Producer.
976.11 Producer-milk.
976.12 Other source milk.
976.13 Producer-handler.
976.14 Base milk.
976.15 Excess milk.

MARKET ADMINISTRATOR

976.20 Designation.
976.21 Powers.
976.22 Duties.

REPORTS, RECORDS AND FACILITIES

976.30 Reports of receipts and utilization.
976.31 Reports of payments to producers.
976.32 Other reports.
976.33 Records and facilities.
976.34 Retention of records.

CLASSIFICATION

976.40 Basis of classification.
976.41 Classes of utilization.
976.42 Shrinkage.
976.43 Responsibility of handlers and reclassification of milk.
976.44 Transfers.
976.45 Computation of the skim milk and butterfat in each class.
976.46 Allocation of skim milk and butterfat classified.

MINIMUM PRICES

976.50 Basic formula price.
976.51 Class prices.
976.52 Butterfat differential to handlers.

APPLICATION OF PROVISIONS

976.60 Producer-handlers.
976.61 Milk price under other Federal orders.

DETERMINATION OF UNIFORM PRICE

976.70 Computation of value of milk.
976.71 Computation of uniform prices.
976.72 Computation of uniform prices for base milk and excess milk.

PAYMENTS

976.80 Time and method of payment.
976.81 Producer butterfat differential.
976.82 Producer-settlement fund.
976.83 Payments to the producer-settlement fund.
976.84 Payments out of the producer-settlement fund.
976.85 Adjustment of accounts.
976.86 Marketing services.
976.87 Expenses of administration.
976.88 Termination of obligation.

DETERMINATION OF BASE

976.90 Computation of daily average base for each producer.
976.91 Base rules.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

976.100 Effective time.
976.101 Suspension or termination.
976.102 Continuing power and duty of the market administrator.
976.103 Liquidation.

MISCELLANEOUS PROVISIONS

976.110 Agents.
976.111 Separability of provisions.

AUTHORITY: §§ 976.0 to 976.111 issued under sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c.

§ 976.0 *Findings and determinations—(a) Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and a proposed order regulating the handling of milk in the Fort Smith, Arkansas, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest;

(3) The said order regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in this order, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expenses of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, 4 cents per hundredweight or such amount not exceeding 4 cents per hundredweight as the Secretary may prescribe, with respect to all receipts within the months of (i) other source milk which is classified as Class I milk, and (ii) milk from producers including such handler's own production.

(b) *Additional findings.* In view of the fact that this order will constitute the original imposition of a regulatory program of this nature for the market, the provisions other than those relating to prices and payments to producers, should be put into effect prior to the effective date of the provisions relating to prices and payments to producers, in order that handlers may have opportunity to make necessary adjustments in their accounting and other operational procedures to conform with all provisions of the order. Reasonable time will have been afforded interested parties to prepare to comply with the aforesaid provisions. It is hereby found and determined, in view of the aforesaid facts and circumstances, that good cause exists for making §§ 976.1 through 976.15, 976.20 through 976.22 (f), 976.22 (k), 976.30 through 976.34, 976.40 through 976.46, 976.60 through 976.61 (a), 976.87, 976.88, 976.100 through 976.103, 976.110 and 976.111 effective on August 1, 1952, and that it would be contrary to the public interest to delay such effective date beyond that specified.

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order which is marketed within the Fort Smith, Arkansas, marketing area) of more than 50 percent of the milk which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order is approved or favored by at least two-thirds of the producers who participated in a referendum on the question of approval of its issuance, and who during the determined representative period (May 1952) were engaged in the production of milk for sale in the said marketing area.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the Fort Smith, Arkansas, marketing area shall be in conformity to and in compliance with the following terms and conditions as set forth below:

DEFINITIONS

§ 976.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 976.2 *Secretary.* "Secretary" means the Secretary of Agriculture or other officer or employee of the United States authorized to exercise the powers or to perform the duties of the said Secretary of Agriculture.

§ 976.3 *Department.* "Department" means the United States Department of Agriculture or other Federal agency authorized to perform the price reporting functions specified in this subpart.

§ 976.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 976.5 *Cooperative association.* "Cooperative association" means any cooperative marketing association of producers which the Secretary determines (a) to be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act," (b) to have full authority in the sale of milk of its members, and (c) to be engaged in making collective sales or marketing milk or its products for its members.

§ 976.6 *Fort Smith, Arkansas, Marketing Area.* "Fort Smith, Arkansas, Marketing Area", hereinafter called the marketing area, means all territory within the corporate limits of Fort Smith, Arkansas, and Van Buren, Arkansas, and within the boundaries of the Camp Chaffee military reservation.

§ 976.7 *Approved plant.* "Approved plant" means any milk plant approved by any health authority having jurisdiction in the marketing area from which milk, skim milk, buttermilk, flavored milk, flavored milk drinks, or cream are disposed of for fluid consumption in the marketing area on wholesale or retail routes (including plant stores).

§ 976.8 *Unapproved plant.* "Unapproved plant" means any milk processing or distributing plant other than an approved plant.

§ 976.9 *Handler.* "Handler" means (a) any person in his capacity as the operator of an approved plant; or (b) any cooperative association with respect to the milk of any producer which it causes to be diverted to an unapproved plant for the account of such cooperative association.

§ 976.10 *Producer.* "Producer" means any person, other than a producer-handler, who produces milk which is received at an approved plant: *Provided*, That such milk is produced under a dairy farm inspection permit or inspection rating issued by any health authority having jurisdiction in the marketing area for the production of milk to be disposed of for consumption as fluid milk. "Producer" shall include any such person whose milk is caused to be diverted by a handler to an unapproved plant, and milk so diverted shall be deemed to have been received at an approved plant by the handler who causes it to be diverted. "Producer" shall not include a person with respect to milk produced by him which is received at a plant operated by a handler who is subject to another Federal marketing order and who is partially exempt from the provisions of this subpart pursuant to § 976.61.

§ 976.11 *Producer milk.* "Producer milk" means all skim milk and butterfat in milk produced by a producer which is received by a handler either directly from producers or from other handlers.

§ 976.12 *Other source milk.* "Other source milk" means all skim milk and butterfat other than that contained in producer milk.

§ 976.13 *Producer-handler.* "Producer-handler" means any person who produces milk and operates an approved plant, but who receives no milk from producers.

§ 976.14 *Base milk.* "Base milk" means milk received from a producer by a handler during any of the months of April through June which is not in excess of such producer's daily average base computed pursuant to § 976.90 multiplied by the number of days in such month for which the handler received milk from the producer.

§ 976.15 *Excess milk.* "Excess milk" means milk received from a producer by a handler during any of the months of April through June which is in excess of base milk received from such producer during such month, and shall include all milk received during such month from any producer for whom no daily average base has been established pursuant to § 976.90.

MARKET ADMINISTRATOR

§ 976.20 *Designation.* The agency for the administration of this subpart shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 976.21 *Powers.* The market administrator shall have the following powers with respect to this subpart.

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 976.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this subpart, including but not limited to the following:

(a) Within 30 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond effective as of the date on which he enters upon such duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of funds provided by § 976.87 the cost of his bond and of the bonds of his employees, his own compensation, and all other expenses (except those incurred under § 976.86) necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this subpart, and upon request by the secretary, surrender the same to such other person as the Secretary may designate;

(f) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(g) Audit all reports and payments by each handler by inspection of such handler's records and of the records of any other handler or person upon whose utilization the classification of skim milk or butterfat for such handler depends;

(h) Publicly announce, at his discretion, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, within 10 days after the day upon which he is required to perform such acts, has not:

(1) Made reports pursuant to §§ 976.30 through 976.32;

(2) Maintained adequate records and facilities pursuant to § 976.33; or

(3) Made payments pursuant to §§ 976.80 through 976.87;

(i) On or before the 12th day after the end of each month, report to each cooperative association which so requests the amount and class utilization of milk received by each handler from producers who are members of such cooperative association. For the purpose of this report, the milk received shall be prorated to each class in the proportion that the total receipts of producer milk by such handler were used in each class;

(j) Publicly announce by posting in a conspicuous place in his office and by such other means as he deems appropriate the prices determined for each month as follows:

(1) On or before the 5th day of each month the minimum prices for Class I milk pursuant to § 976.51 (a) and the Class I butterfat differential pursuant to § 976.52 (a), both for the current month; and the minimum price for Class II milk pursuant to § 976.51 (b) and the Class II butterfat differential pursuant to § 976.52 (b), both for the preceding month; and

(2) On or before the 12th day of each month, the uniform price(s) computed pursuant to § 976.71 or § 976.72, as applicable, and the butterfat differential computed pursuant to § 976.81, both applicable to milk delivered during the preceding month; and

(k) Prepare and disseminate to the public such statistics and other information as he deems advisable and as do not reveal confidential information.

REPORTS, RECORDS, AND FACILITIES

§ 976.30 *Reports of receipts and utilization.* On or before the 7th day after the end of each month, each handler, except a producer-handler, shall report to the market administrator in the detail and on forms prescribed by the market administrator, as follows:

(a) The quantities of skim milk and butterfat contained in milk received from producers, and, for the months of April through June, the aggregate quantities of base milk and excess milk;

(b) The quantities of skim milk and butterfat contained in (or used in the production of) receipts from other handlers;

(c) The quantities of skim milk and butterfat contained in receipts of other source milk (except Class II products disposed of in the form in which received without further processing or packaging by the handler);

(d) The utilization of all skim milk and butterfat required to be reported pursuant to this section;

(e) The disposition of Class I products on route(s) wholly outside the marketing area; and

(f) Such other information with respect to receipts and utilization as the market administrator may prescribe.

§ 976.31 *Reports of payments to producers.* On or before the 20th day of each month, each handler shall submit to the market administrator his producer payroll for deliveries of the preceding month which shall show:

(a) The total pounds of milk received from each producer and cooperative association, the total pounds of butterfat contained in such milk and the number of days on which milk was received from such producers, including for the months of April through June such producer's deliveries of base and excess milk;

(b) The amount of payment to each producer or cooperative association; and

(c) The nature and amount of any deductions or charges involved in such payments.

§ 976.32 *Other reports.* (a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe.

(b) Each handler who causes milk to be diverted to an unapproved plant shall, prior to such diversion, report to the market administrator and to the cooperative association of which such producer is a member, of his intention to divert such milk, the proposed date or dates of such diversion, and the plant to which such milk is to be diverted.

§ 976.33 *Records and facilities.* Each handler shall maintain and make available to the market administrator or to his representative during the usual hours of business such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or establish the correct data with respect to:

(a) The receipts and utilization of all receipts of producer milk and other source milk;

(b) The weights and tests for butterfat and other content of all milk, skim milk, cream and milk products handled;

(c) Payments to producers and cooperative associations; and

(d) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream and milk products on hand at the beginning and end of each month.

§ 976.34 *Retention of records.* All books and records required under this subpart to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided*, That is, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly, upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 976.40 *Basis of classification.* All skim milk and butterfat received within the month by a handler and which is required to be reported pursuant to § 976.30 shall be classified by the market administrator pursuant to the provisions of §§ 976.41 through 976.46.

§ 976.41 *Classes of utilization.* Subject to the conditions set forth in §§ 976.43 and 976.44, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk (including reconstituted skim milk) and butterfat disposed of in fluid form as milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream, cultured sour cream and any mixture of cream and milk or skim milk (except bulk ice cream mix), and all skim milk and butterfat not specifically accounted for under paragraph (b) of this section.

(b) Class II milk shall be all skim milk and butterfat:

(1) Used to produce any product other than those specified in paragraph (a) of this section; (2) disposed of for livestock feed; (3) in shrinkage allocated to receipts of milk from producers, but not in excess of 2 percent of such receipts of skim milk and butterfat respectively, (4) in shrinkage allocated to receipts of other source milk; and (5) in inventory variations of milk, skim milk, cream or any Class I product.

§ 976.42 *Shrinkage.* The market administrator shall allocate shrinkage over a handler's receipts as follows:

(a) Compute the total shrinkage of skim milk and butterfat for each handler; and

(b) Prorate the resulting amounts between the receipts of skim milk and butterfat in producer milk and in other source milk.

§ 976.43 *Responsibility of handlers and reclassification of milk.* (a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat can prove to the market administrator that such skim milk or butterfat should be classified otherwise.

(b) Any skim milk or butterfat classified in one class (except that transferred to a producer-handler) shall be reclassified if used or reused by such handler or by another handler in another class.

§ 976.44 *Transfers.* Skim milk or butterfat disposed of by a handler either by transfer or diversion shall be classified:

(a) As Class I milk if transferred or diverted in the form of milk, skim milk or cream to the approved plant of another handler (except a producer-handler) unless utilization in Class II is mutually indicated in writing to the market administrator by both handlers on or before the 7th day after the end of the month within which such transaction occurred: *Provided*, That the skim milk or butterfat so assigned to Class II shall be limited to the amount thereof remaining in Class II in the plant of the transferee-handler after the subtraction of other source milk pursuant to § 976.46, and any additional amounts of such skim milk or butterfat shall be assigned to Class I: *And provided further*, That if either or both handlers have received other source milk, the skim milk or butterfat so transferred or diverted shall be classified at both plants so as to allocate the greatest possible Class I utilization to producer milk.

(b) As Class I milk if transferred or diverted in the form of milk, skim milk or cream to a producer-handler.

(c) As Class I milk if transferred or diverted in the form of milk or skim milk to an unapproved plant located more than 185 miles from the approved plant by the shortest highway distance as determined by the market administrator.

(d) As Class I milk if transferred in the form of cream under Grade A certification to an unapproved plant located more than 185 miles from an approved plant by the shortest highway distance as determined by the market administrator, and as Class II milk if so transferred without Grade A certification.

(e) As Class I milk, if transferred or diverted in the form of milk, skim milk or cream to an unapproved plant located not more than 185 miles from the approved plant, and from which fluid milk is disposed of on wholesale or retail routes unless the market administrator is permitted to audit the records of receipts and utilization at such unapproved plant, in which case the classification of all skim milk and butterfat received at such unapproved plant shall be determined and the skim milk and butterfat transferred or diverted from the approved plant shall be allocated to the highest use remaining after subtracting, in series beginning with Class I milk, receipts of skim milk and butterfat at such unapproved plant directly from dairy farmers who the market administrator determines constitute the regular source of supply for fluid usage of such unapproved plant in markets supplied by such plant.

(f) As Class II milk if transferred or diverted in the form of milk, skim milk, or cream to an unapproved plant located not more than 185 miles from the approved plant and from which fluid milk is not disposed of on wholesale or retail routes.

§ 976.45 *Computation of the skim milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical and for other obvious errors the monthly report submitted by each handler and shall compute the pounds of skim milk and butterfat in Class I milk and Class II milk for such handler.

§ 976.46 *Allocation of skim milk and butterfat classified.* After making the computations pursuant to § 976.45, the market administrator shall determine the classification of milk received by each handler from producers as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class II the pounds of skim milk determined pursuant to § 976.41 (b) (3);

(2) Subtract from the remaining pounds of skim milk in each class the skim milk received from other handlers in a form other than milk, skim milk or cream according to its classification pursuant to § 976.41;

(3) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk: *Provided*, That if the receipts of skim milk in other source milk are greater than the remaining pounds of skim milk in Class II, an amount equal to the difference shall be subtracted from the pounds of skim milk in Class I;

(4) Subtract from the remaining pounds of skim milk in each class the skim milk received from other handlers in the form of milk, skim milk or cream according to its classification as determined pursuant to § 976.44 (a).

(5) Add to the remaining pounds of skim milk in Class II the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph; and

(6) If the remaining pounds of skim milk in both classes exceed the pounds of skim milk received from producers, subtract such excess from the remaining pounds of skim milk in series beginning with Class II milk. Any amount so subtracted shall be called "overage."

(b) Butterfat shall be allocated in accordance with the same procedure outlined for skim milk in paragraph (a) of this section.

(c) Determine the weighted average butterfat content of Class I and Class II milk computed pursuant to paragraphs (a) and (b) of this section.

MINIMUM PRICES

§ 976.50 *Basic formula price.* The basic formula price to be used in determining the price per hundredweight of Class I milk shall be the highest of the prices computed pursuant to paragraphs (a) and (b) of this section and § 976.51 (b) for the preceding month.

(a) The average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department, divided by 3.5 and multiplied by 4.0:

Present Operator and Location

Borden Co., Mount Pleasant, Mich.
Carnation Co., Sparta, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Wayland, Mich.
Pet Milk Co., Coopersville, Mich.
Borden Co., Greenville, Wis.
Borden Co., Black Creek, Wis.
Borden Co., Oxfordville, Wis.
Borden Co., New London, Wis.
Carnation Co., Chilton, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Jefferson, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Belleville, Wis.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed by adding together the plus values pursuant to subparagraphs (1) and (2) of this paragraph:

(1) From the simple average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) per pound of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the Department during the month, subtract 3 cents, add 20 percent thereof, and multiply by 4.0.

(2) From the simple average as computed by the market administrator of the weighted averages of carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area as published for the period from the 26th day of the preceding month through the 25th day of the current month by the Department, deduct 5.5 cents, multiply by 8.5 and then multiply by 0.96.

§ 976.51 *Class prices.* Subject to the provisions of § 976.52 the minimum prices per hundredweight to be paid by each handler for milk received at his plant from producers during the month shall be as follows:

(a) *Class I milk.* The price for Class I milk shall be the basic formula price plus $1.45 for the months of April, May, and June, and plus $1.85 for all other months: *Provided*, That for each of the months of October, November, and December, such price shall not be less than that for the preceding month, and that for each of the months of April, May, and June, such price shall not be more than that for the preceding month.

(b) *Class II milk.* The price for Class II milk shall be the average of the basic or field prices reported to have been paid or to be paid for ungraded milk of 4.0 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department:

Present Operator and Location

Carnation Co., Mount Vernon, Mo.
Pet Milk Co., Neosho, Mo.
Pet Milk Co., Siloam Springs, Ark.
Sugar Creek Creamery, Russellville, Ark.

Provided, That such price shall not be less than the price computed pursuant to § 976.50 (b) for the month, less 26 cents during April, May, June, or July and less 16 cents during all other months.

§ 976.52 *Butterfat differentials to handlers.* If the average butterfat content of the milk of any handler allocated to any class pursuant to § 976.46 is more or less than 4.0 percent, there shall be added to the respective class price, computed pursuant to § 976.51, for each one-tenth of 1 percent that the average butterfat content of such milk is above 4.0 percent or subtracted for each one-tenth of 1 percent that such average butterfat content is below 4.0 percent an amount equal to the butterfat differential computed by multiplying the simple average, as computed by the market administrator, of the daily wholesale selling price per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter at Chicago as reported by the Department during the month specified below by the applicable factor listed and dividing the result by 10:

(a) *Class I milk.* Multiply such price for the preceding month by 1.25:

(b) *Class II milk.* Multiply such price for the current month by 1.15.

APPLICATION OF PROVISIONS

§ 976.60 *Producer-handlers.* Sections 976.40 through 976.46, 976.50 through 976.52, 976.70 through 976.72, 976.80 through 976.87, 976.90 and 976.91, shall not apply to a producer-handler.

§ 976.61 *Milk priced under other Federal orders.* In the case of any handler who the Secretary determines disposes of a greater portion of his milk as Class I milk in another marketing area regulated by a milk marketing agreement or order issued pursuant to the act, the provisions of this order shall not apply except as follows:

(a) The handler shall, with respect to his total receipts of skim milk and butterfat make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

(b) If the price which such handler is required to pay under the other Federal order to which he is subject for skim milk and butterfat which would be classified as Class I milk under this subpart is less than the price provided by this order, such handler shall pay to the market administrator for deposit into the producer-settlement fund (with respect to all skim milk and butterfat disposed of as Class I milk within the marketing area) an amount equal to the difference between the value of such skim milk or butterfat as computed pursuant to this order (subject to a deduction of 45 cents per hundredweight if the approved plant of such handler is subject to Federal Order No. 21) and its value as determined pursuant to the other order to which he is subject.

DETERMINATION OF UNIFORM PRICE

§ 976.70 *Computation of value of milk.* The value of milk received during each month by each handler from producers shall be a sum of money computed by the market administrator by multiplying the pounds of such milk in each class by the applicable class prices, adding together the resulting amounts and adding an amount computed by multiplying the pounds of any overage deducted from each class pursuant to § 976.46 by the applicable class prices.

§ 976.71 *Computation of uniform prices.* For each of the months of July through March the market administrator shall compute the uniform prices per hundredweight for milk of 4.0 percent butterfat content received from producers as follows:

(a) Combine into one total the values computed pursuant to § 976.70 for all handlers who made the reports prescribed in § 976.30 and who made the payments pursuant to §§ 976.80 and 976.83 for the preceding month;

(b) Add not less than one-half of the cash balance on hand in the producer-settlement fund less the total amount of the contingent obligations to handlers pursuant to § 976.84.

(c) Subtract, if the average butterfat content of the milk included in these computations is greater than 4.0 percent, or add, if such average butterfat content is less than 4.0 percent, an amount computed by multiplying the amount by which the average butterfat content of such milk varies from 4.0 percent by the butterfat differential computed pursuant to § 976.81 and multiplying the resulting figure by the total hundredweight of such milk;

(d) Divide the resulting amount by the total hundredweight of milk included in these computations; and

(e) Subtract not less than 4 cents nor more than 5 cents from the amount computed pursuant to paragraph (d) of this section. The resulting figure shall be the uniform price for milk of 4.0 percent butterfat content received from producers.

§ 976.72 *Computation of uniform prices for base milk and excess milk.* For each of the months of April through June the market administrator shall compute the uniform prices per hundredweight for base milk and for excess milk, each of 4.0 percent butterfat content, as follows:

(a) Combine into one total the values computed pursuant to § 976.70 for all handlers who made the reports prescribed in § 976.30 and who made the payments pursuant to §§ 976.80 and 976.83 for the preceding month;

(b) Add not less than one-half of the cash balance in the producer-settlement fund less the total amount of the contingent obligations to handlers pursuant to § 976.84;

(c) Subtract if the average butterfat content of the milk included in these computations is greater than 4.0 percent, or add if such average butterfat content is less than 4.0 percent, an amount computed by multiplying the amount by which the average butterfat content of such milk varies from 4.0 percent by the butterfat differential computed pursuant to § 976.81 and multiplying the resulting figure by the total hundredweight of such milk;

(d) Compute the total value on a 4.0 percent butterfat basis of excess milk included in these computations by multiplying the hundredweight of such milk not in excess of the total quantity of Class II milk included in these computations by the price for Class II milk of 4.0 percent butterfat content, multiplying the hundredweight of such milk in excess of the total hundredweight of such Class II milk by the price for Class I milk of 4.0 percent butterfat content, and adding together the resulting amounts;

(e) Divide the total value of excess milk obtained in paragraph (d) of this section by the total hundredweight of such milk, and adjust to the nearest cent. The resulting figure shall be the uniform price for excess milk of 4.0 percent butterfat received from producers.

(f) Subtract the value of excess milk obtained in paragraph (d) of this section from the value of all milk obtained pursuant to paragraphs (a), (b) and (c) of this section and adjust by any amount involved in adjusting the uniform price of excess milk to the nearest cent;

(g) Divide the amount obtained in paragraph (f) of this section by the total hundredweight of base milk included in these computations; and

(h) Subtract not less than 4 cents nor more than 5 cents from the amount computed pursuant to paragraph (g) of this section. The resulting figure shall be the uniform price for base milk of 4.0 percent butterfat content received from producers.

PAYMENTS

§ 976.80 *Time and method of payment.* Each handler shall make payment to producers as follows:

(a) On or before the 15th day after the end of the month during which the milk was received, to each producer except as provided in paragraph (c) of this section, (1) at not less than the uniform price computed pursuant to § 976.71 for all milk received from such producer if such preceding month was any of the months of July through March, or (2) at not less than the uniform price for base milk computed pursuant to § 976.72 (h), with respect to base milk received from such producer, and at not less than the uniform price for excess milk computed pursuant to § 976.72 (e) with respect to excess milk received from such producer, if such preceding month was any of the months of April through June, in each case adjusted by the butterfat differential computed pursuant to § 976.81 and less the amount of the payment made pursuant to paragraph (b) of this section: *Provided*, That if such handler has not received full payment for such month pursuant to § 976.84, he may reduce his total payments to all producers uniformly by not more than the amount of the reduction in payments from the market administrator; and the handler shall after receipt of such payment from the market administrator complete the payments to those producers not later than the date for making payments pursuant to this paragraph next following after receipt of the balance from the market administrator.

(b) On or before the last day of each month, each handler shall make payment for milk received from producers during the first 15 days of the month to each producer, except as provided in paragraph (c) of this section, at not less than the Class II price for the preceding month.

(c) On or before the 13th and the third from the last day of each month, in lieu of payments pursuant to paragraphs (a) and (b) respectively of this section, each handler shall make payment to a cooperative association which so request, with respect to producers for which such cooperative association is authorized to collect payment, in an amount equal to the sum of the individual payments otherwise payable to such producers.

§ 976.81 *Producer butterfat differential.* In making payments pursuant to § 976.80, there shall be added to or subtracted from the uniform price for each one-tenth of 1 percent that the average butterfat content of the milk received from the producer is above or below 4.0 percent, an amount computed by multiplying by 1.2 the simple average as computed by the market administrator of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter at Chicago as reported by the Department during the month, dividing the resulting sum by 10, and rounding to the nearest one-tenth of a cent.

§ 976.82 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund," into which he shall deposit all payments made by handlers pursuant to §§ 976.61 (b), 976.83 and 976.85, and out of which he shall make all payment to handlers pursuant to §§ 976.84 and 976.85.

§ 976.83 *Payments to the producer-settlement fund.* On or before the 13th day after the end of the month during which the milk was received, each handler, including a cooperative association which is a handler, shall pay to the market administrator (a) the amount, if any, by which the value of the milk received by such handler from producers as determined pursuant to § 976.70 is greater than the amount required to be paid producers by such handler pursuant to § 976.80, and (b) any amount required pursuant to § 976.61 (b).

§ 976.84 *Payments out of the producer-settlement fund.* On or before the 14th day after the end of the month during which the milk was received, the market administrator shall pay to each handler, including a cooperative association which is a handler, the amount, if any, by which the value of the milk received by such handler from producers during the month as determined pursuant to § 976.70 is less than the amount required to be paid producers by such handler pursuant to § 976.80: *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available.

§ 976.85 *Adjustment of accounts.* Whenever audit by the market administrator of any handler's reports, books, records, or accounts discloses errors resulting in moneys due (a) the market administrator from such handler; (b) such handler from the market administrator; or (c) any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which error occurred.

§ 976.86 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers (other than himself) pursuant to § 976.80, shall deduct 5 cents per hundredweight or such amount not exceeding 5 cents per hundredweight as may be prescribed by the Secretary, and shall pay such deductions to the market administrator on or before the 15th day after the end of each month. Such moneys shall be used by the market administrator to sample, test, and check the weights of milk received and to provide producers with market information.

(b) In the case of producers for whom a cooperative association is actually performing the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deduction specified in paragraph (a) of this section, such deductions from the payments to be made to such producers as may be authorized by the membership agreement or marketing contract between such cooperative association and such producers on or before the 15th day after the end of each month and pay such deduction to the cooperative association of which such producers are members, furnishing a statement showing the amount of any such deductions, and the amount and average butterfat test of milk for which such deduction was computed for each producer. In lieu of such statement a handler may authorize the market administrator to furnish such cooperative association the information with respect to such producers reported pursuant to § 976.31.

§ 976.87 *Expenses of administration.* As his pro rata share of the expense of administration of this subpart, each handler shall pay to the market administrator on or before the 15th day after the end of the month, 4 cents per hundredweight, or such amount not exceeding 4 cents per hundredweight as the Secretary may prescribe, with respect to all receipts within the month of (a) other source milk which is classified as Class I milk, and (b) milk from producers including such handler's own production.

§ 976.88 *Termination of obligation.* The provisions of this section shall apply to any obligations under this subpart for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of paragraphs (b) and (c) of this section, terminates two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this subpart, to make available to the market administrator or his representative all books and records required by this subpart to be made available, the market administrator may, within the 2-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said 2-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this subpart to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this subpart shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

DETERMINATION OF BASE

§ 976.90 *Computation of daily average base for each producer.* For the months of April through June of each year the market administrator shall compute a daily average base for each producer as follows, subject to the rules set forth in § 976.91:

(a) Divide the total pounds of milk received by a handler(s) from such producer during the months of October through January immediately preceding by the number of days, not to be less than ninety, of such producer's delivery in such period.

§ 976.91 *Base rules.* (a) A base shall apply to deliveries of milk by the producer for whose account that milk was delivered during the base forming period;

(b) Bases may be transferred by notifying the market administrator in writing on or before the last day of any applicable base paying month that such base is to be transferred to the person named in such notice only as follows:

(1) In the event of the death, retirement, or entry into military service of a producer the entire base may be transferred to a member(s) of such producer's immediate family who carriers on the dairy herd operations.

(2) If a base is held jointly and such joint holding is terminated, the entire base may be transferred to one of the joint holders.

(c) A producer who ceases to deliver milk to a handler for more than 45 consecutive days shall forfeit his base.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 976.100 *Effective time.* The provisions of this subpart or any amendment to this subpart shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated pursuant to § 976.101.

§ 976.101 *Suspension or termination.* The Secretary may suspend or terminate this subpart or any provision of this subpart whenever he finds this subpart or any provisions of this subpart obstructs or does not tend to effectuate the declared policy of the act. This subpart shall terminate in any event whenever the provisions of the act authorizing it cease to be in effect.

§ 976.102 *Continuing power and duty of the market administrator.* If, upon the suspension or termination of any or all provisions of this subpart, there are any obligations thereunder, the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 976.103 *Liquidation.* Upon the suspension or termination of the provisions of this subpart, except this section, the market administrator, or such other liquidating agent as the Secretary may designate, shall if so directed by the Secretary liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 976.110 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this subpart.

§ 976.111 *Separability of provisions.* If any provision of this subpart, or its application to any person or circumstances, is held invalid, the application of such provision and the remaining provisions of this subpart to other persons or circumstances, shall not be affected thereby.

Issued at Washington, D. C. this 25th day of July 1952.

Sections 976.1 through 976.15, 976.20 through 976.22 (f), 976.22 (k), 976.30 through 976.34, 976.40 through 976.46, 976.60 through 976.61 (a), 976.87, 976.88, 976.100 through 976.103, 976.110 and 976.111, shall be effective on and after the first day of August 1952, and the entire order (§§ 976.1 through 976.111) shall be effective on and after the first day of September 1952.

[SEAL] K. T. HUTCHINSON,
Acting Secretary of Agriculture.

TITLE 9—ANIMALS AND ANIMAL PRODUCTS

Chapter I—Bureau of Animal Industry, Department of Agriculture

Subchapter C—Interstate Transportation of Animals and Poultry

[B. A. I. Order 309, Amdt. 7]

PART 76—HOG CHOLERA, SWINE PLAGUE, AND OTHER COMMUNICABLE SWINE DISEASES

QUARANTINE AND REGULATIONS RESTRICTING INTERSTATE TRANSPORTATION OF SWINE AND CERTAIN SWINE PRODUCTS BECAUSE OF VESICULAR EXANTHEMA

Pursuant to the authority conferred by sections 1 and 3 of the act of March 3, 1905, as amended (21 U. S. C. 123 and 125), sections 1 and 2 of the act of February 2, 1903, as amended (21 U. S. C. 111 and 120), and section 7 of the act of May 29, 1884, as amended (21 U. S. C. 117), a notice of the existence of the swine disease of vesicular exanthema in certain localities and a quarantine and regulations restricting the movement of swine and certain swine products because of vesicular exanthema are hereby promulgated to appear in a new Subpart B in Part 76 of Title 9, Code of Federal Regulations, as follows:

SUBPART B—VESICULAR EXANTHEMA

Sec.
76.9 Definitions.
76.10 Notice and quarantine.
76.11 Movement of swine and swine products.
76.12 Disinfection of facilities.

§ 76.9 *Definitions.* As used in this subpart, the following terms shall have the meanings set forth below.

(a) *Bureau.* The term "Bureau" means the Bureau of Animal Industry of the United States Department of Agriculture.

(b) *Chief of the Bureau.* The term "Chief of the Bureau" means the Chief of the Bureau or any other official of the Bureau to whom authority has heretofore been delegated or may hereafter be delegated to act in his stead.

(c) *Person.* The term "person" means any person, company or corporation.

(d) *Moved.* As applied to swine, the term "moved" means transported, shipped, delivered or received for transportation, driven on foot or caused to be driven on foot, by any person, and as applied to swine products, the term "moved" means transported, shipped or delivered or received for transportation, by any person.

(e) *Swine product.* The term "swine product" means any carcass, part or offal of swine.

(f) *Interstate.* The term "interstate" means from one State, Territory, or the District of Columbia, into or through any other State, Territory, or the District of Columbia.

§ 76.10 *Notice and quarantine.* (a) Notice is hereby given that the contagious, infectious and communicable disease of swine known as vesicular exanthema exists in the following areas:

Jefferson and Mobile counties in Alabama;
Gila county in Arizona;
The State of California;
Fulton county in Georgia;
Orland township in Cook county and Lake county in Illinois;
Pocahontas and Woodbury counties in Iowa;
Geary, Sedgwick and Wyandotte counties in Kansas;
Buchanan, Clinton, Green, Howell, and Jackson counties in Missouri;
Box Butte, Dodge, Douglas, Hall, Saunders, and Washington counties in Nebraska;
Burlington, Hudson, and Ocean counties in New Jersey;
New York county in New York;
Franklin county in Ohio;
Marion and Multnomah counties in Oregon;
Minnehaha county in South Dakota;
King and Spokane counties in Washington; and
Laramie county in Wyoming;

(b) The Secretary of Agriculture, having determined that swine in the States named in paragraph (a) of this section are affected with the contagious, infectious and communicable disease known as vesicular exanthema and that it is necessary to quarantine the areas specified in paragraph (a) of this section and the following additional areas in such States, in order to prevent the spread of said disease from such States, hereby quarantines the areas specified in paragraph (a) of this section and in addition Atchison, Doniphan, Johnson and Leavenworth counties in Kansas; Clay and Platte counties in Missouri; and Bergen, Essex and Union counties in New Jersey. Hereafter no swine or swine products shall be moved interstate from any such quarantined area except as provided in the regulations in this subpart.

§ 76.11 *Movement of swine and swine products—(a) From a quarantined area.* No swine shall be moved interstate from any quarantined area specified in § 76.10 except to an establishment specifically approved for the purpose by the Chief of the Bureau, for immediate slaughter and further processing at such establishment in a manner approved by said Chief as adequate to prevent the spread of vesicular exanthema. No swine products shall be moved interstate from any quarantined area specified in § 76.10 except to an establishment specifically approved for the purpose by the Chief of the Bureau, for processing in a manner approved by said Chief as adequate to prevent the spread of said disease: *Provided, however,* That swine products identified by warehouse receipts or other information satisfactory to the Chief of the Bureau as having been slaughtered prior to June 16, 1952, may be moved interstate for any purpose with the approval of the Bureau. The Chief of Bureau may require that swine and swine products which have been exposed to or have been affected with vesicular exanthema, and which are moved interstate from any quarantined area to an approved establishment for slaughter or processing, shall be moved under Bureau seal or accompanied by a representative of the Bureau.

(b) *Through a quarantined area.* No swine or swine products which are moved interstate between points outside the quarantined areas specified in § 76.10 through any such quarantined area shall be unloaded in any such quarantined area unless all facilities to be used therein in connection with the unloading have been cleaned and disinfected in a manner approved by the Bureau and under the supervision of a person authorized for the purpose by the Bureau.

§ 76.12 *Disinfection of facilities.* Railroad cars, trucks, boats, and all other facilities, including facilities for feeding, watering, and resting swine, which are used in connection with the interstate movement of swine or swine products from a quarantined area specified in § 76.10 shall be thoroughly cleaned and disinfected immediately after each such use. Two percent sodium hydroxide (lye) at the rate of one 13-ounce can to five gallons of water or four percent sodium carbonate (soda ash-sal soda) at the rate of one pound to three gallons of water shall be used in such disinfection.

A new center heading "Subpart A—General Restrictions" is inserted preceding §§ 76.1 through 76.8 of Part 76.

Effective date. The notice, quarantine and regulations set forth above shall become effective upon issuance.

Said notice, quarantine and regulations impose restrictions necessary to prevent the spread of the contagious, infectious and communicable disease of swine known as vesicular exanthema, from the States in which such disease has been found to exist to other States or Territories of the United States or the District of Columbia. They must be made effective immediately in order to accomplish their purpose. Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003) it is found upon good cause that notice and other public procedure with respect to the notice, quarantine and regulations are impracticable and contrary to the public interest and good cause is found for making them effective less than 30 days after their publication in the FEDERAL REGISTER.

(Secs. 1 and 3, 33 Stat. 1264, 1265, as amended, 21 U. S. C. 123 and 125; secs. 1 and 2, 32 Stat. 791, 792, as amended, 21 U. S. C. 111 and 120; sec. 7, 23 Stat. 32, as amended, 21 U. S. C. 117)

Done at Washington, D. C., this 24th day of July 1952.

[SEAL] K. T. HUTCHINSON,
Acting Secretary of Agriculture.

[F. R. Doc. 52-8306; Filed, July 29, 1952; 8:45 a. m.]

part of the procedure in issuing a deviation of major importance, to coordinate his decision with the Board and the appropriate military authorities.

Interested persons have been afforded an opportunity to participate in the making of this regulation, and due consideration has been given to all relevant matter presented. Since this regulation imposes no additional burden on any person, it may be made effective on less than 30 days' notice.

In consideration of the foregoing the Civil Aeronautics Board hereby makes and promulgates a Special Civil Air Regulation effective August 1, 1952, to read as follows:

1. Contrary provisions of the Civil Air Regulations notwithstanding, the Administrator may, upon application by an air carrier, authorize an air carrier under contract to the military services, or an air carrier furnishing civil aircraft and/or flight crews to another air carrier for use in operations conducted pursuant to a contract with the military services, to deviate from the applicable provisions of Parts 40, 41, 42, 45, and 61 to the extent that he finds upon investigation a deviation from those regulations is necessary or desirable for the expeditious conduct of such operations.

2. Any authority granted by the Administrator pursuant to this regulation shall be limited to those operations conducted pursuant to military contracts and shall not be applicable to any other type of operation.

3. The Administrator shall, in any authorization granted pursuant to this regulation, specify the terms and conditions under which the air carrier may deviate from the currently prescribed regulations, and each carrier shall, in the conduct of operations pursuant to military contracts, comply with such terms and conditions.

This regulation shall terminate August 1, 1953, unless sooner superseded or rescinded.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601-610, 52 Stat. 1007-1012, 62 Stat. 1216; 49 U. S. C. 452, 551-560)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[F. R. Doc. 52-8332; Filed, July 29, 1952; 8:48 a. m.]

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Regs., Serial No. SR-385]

PART 40—AIR CARRIER OPERATING CERTIFICATION

PART 41—CERTIFICATION AND OPERATION RULES FOR SCHEDULED AIR CARRIER OPERATIONS OUTSIDE THE CONTINENTAL LIMITS OF THE UNITED STATES

PART 42—IRREGULAR AIR CARRIER AND OFF-ROUTE RULES

PART 45—COMMERCIAL OPERATOR CERTIFICATION AND OPERATION RULES

PART 61—SCHEDULED AIR CARRIER RULES

SPECIAL CIVIL AIR REGULATION; DELEGATION OF AUTHORITY TO THE ADMINISTRATOR TO PERMIT AIR CARRIERS UNDER CONTRACT TO THE MILITARY SERVICES TO DEVIATE FROM CIVIL AIR REGULATIONS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 24th day of July 1952.

Some time ago the Air Transport Association (ATA) on behalf of several scheduled air carriers under contract to the military services requested that authority be granted to such carriers to permit them to deviate from certain provisions of Parts 40, 41, 42, 45, and 61 of the Civil Air Regulations, under which they were then required to operate, in order to permit such carriers to accomplish expeditiously the mission assigned them by the military services. ATA stated that, in view of the type of operations that these carriers had been requested to perform, certain provisions of those parts imposed an undue burden upon the air carriers involved. It appeared that several difficulties encountered in complying with current regulations resulted from the fact that some of the air carriers were acting in the capacity of prime contractors with the mili-

Subchapter B—Economic Regulations

[Regs., Serial No. ER-174]

PART 241—FILING OF REPORTS BY CERTIFICATED AIR CARRIERS AND UNIFORM ACCOUNTING REQUIREMENTS

REPORTING PROCEDURES

Adopted by direction of the Civil Aeronautics Board at its office in Washington, D. C., on the 22d day of July 1952.

Pursuant to authority delegated by the Civil Aeronautics Board to the Bureau of Air Operations, this amendment to Part 241 of the Economic Regulations (14 CFR Part 241) is being adopted for the purpose of condensing and otherwise modifying the present reporting requirements for certificated air carriers. The objective is to reduce the burden of both preparing and administering CAB Form 41 reports.' In general, the changes relate to such matters as reducing the reporting frequency for certain schedules and discontinuing schedules or deleting items from them, although in one instance, requirements will be modified in such a way that an additional breakdown of certain tax expense figures will be necessary. Thus the proposed changes, for the most part, represent relief from the burden of existing requirements.

Notice of these proposed changes was published in the FEDERAL REGISTER on June 12, 1952, in Draft Release No. 54. Moreover, all air carriers affected by these changes had informally received identical notification of the changes about three weeks before that time, through distribution of a memorandum addressed to the chief accounting officers of all scheduled air carriers from the Director, Bureau of Air Operations. Since these changes will ease the burden of existing requirements and since immediate compliance with the new requirements will provide the Board promptly with information it needs for the proper performance of its responsibilities under the act, the Board urgently requests immediate compliance with the new requirements on a voluntary basis. After the effective date, compliance will, of course, be mandatory.

Interested persons have been afforded an opportunity to participate in the making of this rule and due consideration has been given to all relevant matters submitted and arguments presented.

In consideration of the foregoing, the Board hereby amends Part 241 of the Economic Regulations as follows, effective August 25, 1952:

1. By amending the list of schedules contained in Instruction No. 3 of § 241.7–1 *General instructions* so that the title of Schedule C shall read "Quarterly Flight and Traffic Statistics" and the frequency of filing shall be quarterly rather than monthly, and so that the title of Schedule C–1 shall read "Monthly Flight and Traffic Statistics".

[1] Forms filed as part of the original document.

2. By amending Instruction No. 4 of § 241.7–1 to read as follows:

4. In addition to the foregoing schedules, the carrier shall file for each of the first two months of each quarter an Interim Financial and Operating Report in accordance with the instructions for that report following Schedule F. under § 241.7–2.

3. By amending Instruction No. 5 under § 241.7–1 to read:

5. Monthly and quarterly flight and traffic statistics schedules shall reflect statistics for the respective calendar month, quarter, and twelve-months-to-date periods.

4. By inserting in Instruction No. 6 of § 241.7–1, after the first word "quarterly", the word "financial".

5. By amending the last sentence of Instruction No. 8 of § 241.7–1 to read: "Where separate reports are submitted in accordance with the above, an additional Schedule B shall be filed showing profit and loss for the 'system'. At the option of the carrier, additional Schedules C and C–1 may be filed for the 'system', presenting data covering 'All Services' only."

6. By amending Instruction No. 10 of § 241.7–1 to read:

10. Carrier reports shall be filed (i. e., postmarked) with the Civil Aeronautics Board on or before the expiration of the following number of days subsequent to the close of the periods for which reports are being made:

Schedule	*Postmarked within following number of days*
C and C–1	30
A, A–1 through A–6, B, B–1 through B–9	40
A–7 through A–10, B–10, D, E, F	90
Interim financial and operating reports	30

The time for submitting final schedules listed on the second line shall be extended to 90 days following the year's end with respect to the report for the final quarter of the carrier's fiscal year: *Provided*, That preliminary Schedules A and B (Balance Sheet and Statement of Profit and Loss, respectively) must be submitted within the 40-day filing period.

7. By changing the first "to" in line 10 of Instruction No. 11 of § 241.7–1 to read "of".

8. By amending Instruction No. 15 of § 241.7–1 to read:

15. Each reporting carrier shall, on Schedules B, B–1, B–2, B–3, C and C–1, signify the operations reported in accordance with the following classification:

Certificated U. S. mail carriers will use, as appropriate—

Trunk.	Alaskan
Local Service.	Foreign or Overseas.
Territorial.	System.

Certificated non-U. S. mail carriers will use, as appropriate—

NM—All Cargo.
NM—Pass. and Prop.

9. By amending the first two paragraphs under the heading "Filing of IBM cards" in § 241.7–1 to read:

Those carriers to whom IBM facilities are available shall file with the Board, concurrently with the schedule to which they apply, one set of IBM cards, punched to reflect detail in Schedules B (except the "system" Schedule B required under paragraph 8 above), B–2, B–3, B–4, B–5, C and C–1 as prescribed in the instructions for each schedule. The card to be used for this purpose is designated "CAB—Financial and Operating Statistics for Air Carriers." The codes to be used in card punching will be found at the end of the "Reporting Procedures' Section."

Where two amounts are reported on the same line of a schedule, such as in the quarterly and twelve-months-to-date columns, a separate card shall be provided to cover each amount. However, only one card should be submitted for an item regardless of the number of times such item may appear in the several schedules.

10. By amending the first sentence of the paragraph under the heading "IBM Tabulating Card" of Schedule B in § 241.7–2 *Schedules* to read: "An individual card shall be punched and submitted for each amount reported on each page of this schedule except that no cards will be required for items relating to the analysis of earned surplus or for the 'system' Schedule B of carriers with both domestic and foreign or overseas operations."

11. By adding after the present language of Schedule B–1 of § 241.7–2 an additional paragraph reading:

Income taxes: There shall be reported on this schedule a breakdown of the amounts shown on Schedule B in Account 9100, "Income Taxes", as between excess profits taxes and other taxes based on income.

12. By changing the phrase "Schedule C" in line 10 of the second paragraph under Schedule B–2 of § 241.7–2 to read: "Schedules C and C–1."

13. By inserting after the first sentence of the paragraph headed "Column 15" under Schedule B–5 of § 241.7–2 a sentence reading: "Fractional tons, expressed in decimals carried two places beyond the decimal point, shall be shown in reporting amounts in columns 13, 14 and 15."

14. By adding to the present language under the heading "IBM Tabulating Cards" of Schedule B–5 of § 241.7–2 a paragraph reading:

Card columns 40 through 49 shall be used for punching whole numbers. Columns 50 and 51 shall be used for punching cents and the fractional amounts of mail, express, and freight.

15. By giving Schedule C and Schedule C–1 of § 241.7–2 the following new headings: "Schedule C—Quarterly Flight and Traffic Statistics"; "Schedule C–1—Monthly Flight and Traffic Statistics."

16. By striking the first paragraph of Schedule C of § 241.7–2 and inserting three paragraphs to read:

Schedule C is designed for the reporting of flight and traffic statistics by primary and secondary classes of service and by types of aircraft for each calendar quarter.

Schedule C–1 is designed for the reporting of total flight and traffic statistics in all services and separately for scheduled and non-scheduled services with only a partial separation by aircraft type, and class of service.

The amounts reported in these schedules shall represent the total for both owned and rented aircraft, with no separation being required between the data for owned and rented units.

17. By amending the fifth and sixth paragraphs of Schedule C of § 241.7–2 to read:

The breakdown of flight and traffic statistics on Schedule C and to the extent required on Schedule C–1, shall be in accordance with the following classification of services:

Services (primary and secondary)	Abbreviation
Scheduled—Regular combination service	Sch. reg. comb.
Scheduled—Coach and tourist service	Sch. coach & tour.
Scheduled—All cargo service	Sch. all cargo
Scheduled—Total services	Total scheduled
Nonscheduled—Passenger or combination service	Nonsch. pass. or comb.
Nonscheduled—All cargo service	Nonsch. all cargo
Nonscheduled—Total services	Total nonscheduled
Exclusive nonrevenue	Excl. nonrev.
Total—All services	All services

The abbreviations indicated above shall be used to designate the services reported.

18. By adding the following aircraft type to the list in the seventh paragraph of Schedule C of § 241.7–2: "Martin 202–A".

19. By inserting over the heading "Scheduled Service" of Schedule C of § 241.7–2 a new heading to read: Schedule C—Quarterly Flight and Traffic Statistics."

20. By amending the last sentence of the first paragraph under the heading "Scheduled Service" of Schedule C of § 241.7–2 to read: "These data shall be further separated by primary and secondary classes of service."

21. By amending the last sentence of the first paragraph under the heading "Nonscheduled Service" of Schedule C of § 241.7–2 to read: "These data shall be further separated by primary and secondary classes of service."

22. By changing the line numbers in the fourth paragraph under the heading "Nonscheduled Service" of Schedule C of § 241.7–2 to read: "Lines 1 through 4, 18 through 21, 23 and 37".

23. By amending the second sentence of the second paragraph under "Reporting of revenue plane miles performed in off-line service" of Schedule C of § 241.7–2 to read: "The footnote should be placed on the sheet, or each sheet if more than one, of Schedule C on which are reported flight and traffic statistics for 'Total nonscheduled' service for the quarter in which the revenue plane miles flown in nonscheduled service exceed the specified percentage."

24 By amending the first two sentences under the heading "Numbering Pages" of Schedule C of § 241.7–2 to read:

Carriers whose operations are confined to domestic operations should use a single series in numbering the pages of Schedule C for example, page 1 of 15; carriers engaged in domestic and foreign and/or overseas operations should use separate series for each operation, for example:

(1) Trunk line, page 1 of 15.
(2) Foreign, page 1 of 13.

In numbering the pages of a series, the sheet applicable to "All Services" should be designated as page 1.

25. By inserting after the second paragraph under the heading "Numbering Pages" of Schedule C of § 241.7–2 a new heading and instructions to read:

SCHEDULE C–1—MONTHLY, FLIGHT AND TRAFFIC STATISTICS

Total flight and traffic statistics in all services, in scheduled service and in nonscheduled service shall be reported on separate pages of this schedule. The three pages shall be numbered in the foregoing order. The primary service covered by each page of this schedule shall be designated in the heading.

In those instances where a carrier performs only scheduled service, the flight and traffic statistics may be reported on a single sheet of this schedule. The words "Total scheduled" should be inserted in the heading opposite "Service" with a footnote indicating that the statistics are also "Total—All services."

The following lines are not applicable to and shall not be used for reporting information relating to nonscheduled service: 18 through 21, 23, 29, through 31, 41 through 43.

Revenue aircraft miles: The breakdown of revenue aircraft miles by types of aircraft and secondary classes of service shall be completed on the pages for scheduled and nonscheduled services only. No breakdown need be reported on the page for all services.

If the number of items to be reported under "Revenue Aircraft Miles" and "Average Revenue Hours of Use per Day per Aircraft" exceed the lines available on the form, the extra items shall be reported either (1) in the space at the bottom of the schedule or (2) on a supplemental sheet of the schedule.

Number of employees: These employee data shall be reported only on the page covering all services.

26 By inserting over the heading "Aircraft Miles" of Schedule C of § 241.7–2 a new heading to read: "Item Definitions and Instructions."

27. By amending the third sentence under Line 7 of Schedule C of § 241.7–2 to read: "Data for this line shall be reported only on the pages for 'All Services' and 'Nonscheduled' services."

28. By striking the heading "Passenger-Miles" of Schedule C of § 241.7–2 and inserting a new heading and instructions to read:

PASSENGER TRAFFIC

Line 11. Number of revenue passengers carried: This item shall be reported in total only on those pages covering "All Services," "Total Scheduled Services," and "Total Nonscheduled Services." The figures reported on line 11 shall represent an unduplicated count of revenue passengers for each operation for which separate reports are filed. Transfer passengers between separate operating units within each reporting unit shall be eliminated, but lay-over passengers shall be included. Those passengers transported at full published fares and also those carried at reduced fares shall be classified as revenue passengers, but infants carried at a small fraction of the regular fares shall not be so classified.

29. By changing the phrase "Schedule C" in the last two sentences under Line 17 of Schedule C of § 241.7–2 to read "Schedule C–1."

30. By changing the phrase "Schedule C" in the eighth line under line 29 of Schedule C of § 241.7–2 to read: "Schedule C–1."

31. By changing the phrase "Schedule C" in the sixth line under Line 30 of Schedule C of § 241.7–2 to read: "Schedule C–1."

32. By amending the first paragraph under the heading "Use of Aircraft" of Schedule C of § 241.7–2 to read:

"Aircraft days" is defined as the sum of the number of days that each aircraft owned by the reporting carrier and each aircraft rented, leased or borrowed from others is in the possession of the air carrier, including the number of days that any such aircraft is out of service due to periodic maintenance or major overhaul but excluding the number of days that each newly acquired aircraft is on hand before being placed in operation. Owned aircraft which are rented, leased or loaned to others shall not be considered as being in the possession of the reporting carrier during the period of such rental, lease or loan.

33. By amending the second sentence of paragraph (2) under the heading "Use of Aircraft" of Schedule C of § 241.7–2 to read: "The time of aircraft in maintenance or overhaul shall be distributed to domestic and international operations on the basis of the total hours flown by aircraft of the same type in the respective operations during the preceding month."

34. By amending the second paragraph under Line 32 of Schedule C of § 241.7–2 to read:

In connection with the data reported on line 32, the carrier shall show on the margin or in a statement attached to the appropriate page of Schedule C (1) for each newly acquired aircraft placed in operation during the current quarter, the license number and type of aircraft, the date acquired, and the date placed in operations; (2) for each owned aircraft retired during the quarter through sale, transfer, abandonment, etc., the license number and type of aircraft and the date retired; (3) by types of aircraft, the number of aircraft days included on line 32 for aircraft rented, leased or borrowed from others; and (4) by types of aircraft, the number of aircraft days excluded from line 32 for owned aircraft which have been rented, leased or loaned to others during all or any part of the current quarter. The data with respect to newly acquired aircraft placed in operation and owned aircraft retired shall be shown in the report for either the domestic or international operations, whichever appears appropriate for each such aircraft.

35. By amending the second sentence of the fourth paragraph under the heading "Number of Employees" of Schedule C of § 241.7–2 to read: "These employee data shall be reported in totals only on that page of Schedule C–1 relating to 'All Services'."

36. By striking the paragraphs (lines 11, 44, 45 and 46) under the heading "Miscellaneous" of Schedule C of § 241.7–2 and inserting two paragraphs to read:

Line 44. Tons of revenue express and freight carried: This item shall be reported in total only on those pages of Schedule C covering "All Services," "Total Scheduled Services," and "Total Nonscheduled Services."

Line 45. Aircraft engine fuel consumed (gallons);

Line 46. Aircraft engine oil consumed (gallons): These items shall be reported by types of aircraft and shall represent the gallons of fuel and oil consumed in revenue and nonrevenue flights. Fractional gallons shall not be shown.

37. By striking the first three paragraphs under the heading "IBM Tabulating Card" of Schedule C of § 241.7–2 and inserting five paragraphs to read:

An individual punched IBM card shall be submitted for each amount reported on lines coded 8 through 28, 40 and 45 on each page of Schedule C.

An individual punched IBM card shall be submitted for each amount reported on lines coded 8 through 28 on each page of Schedule C–1 including a card for each line under "Revenue Aircraft Miles" on which an amount is reported.

The following fields shall be used when punching the cards applying to Schedules C and C–1: 1, 2, 3, 4, 5, 8 or 11, 9, 13, 15.

The identification of the item punched on each card shall be made in the 13th field of the card using the code designation for the appropriate line on the schedule.

The decimals required as part of the percentages included on Schedules C and C–1 and the minutes included in "average revenue hours of use per day per aircraft" shall be punched in card columns 50 and 51. No other fractional amounts shall be punched for items on these schedules. Passenger-mile and available seat-mile data shall be punched in thousands.

38. By striking from § 241.7–2 the heading "Schedule C–1—Revenue Passenger-Miles" and the three paragraphs thereunder.

39. By striking from § 241.7–2 the heading "CAB Form 41 (a)—Interim Operating Statement and Selected Expenses" and the two paragraphs thereunder and inserting a new heading and paragraphs to read:

INSTRUCTIONS FOR INTERIM FINANCIAL AND OPERATING REPORT

For each of the first two months of each quarter, the carrier shall submit a report which may be a copy of the report prepared for its management, containing the following as a minimum:

1. Balance sheet as at the end of the month.

2. Statement of profit and loss for the month.

This statement should give a separation of revenues and expenses between domestic operations and foreign or overseas operations for carriers performing such operations and for which separate quarterly Schedule B reports are filed. Any provisions for excess profits tax included in the statement of profit and loss should also be identified.

The report shall be signed by an officer of the company, certifying that it is an accurate statement of the items reported as reflected in the accounts and records of the company.

40. By inserting under the heading "Codes for Punch Cards" of § 241.7–2 an additional item in the "Codes for 'type card' column one of IBM card" to read:

7 Items on schedule C–1.

41. By amending under the heading "Codes for Punch Cards" of § 241.7–2 the codes for "Certificated U. S. mail operations" to read:

10 Domestic trunk.
20 Domestic local service.
30 Domestic territorial (other than Alaskan).
40 Alaskan air carrier.
50 Foreign or overseas air carrier.

42. By inserting under the heading "Codes for Punch Cards" of § 241.7–2 additional items in numerical sequence under "Codes for 'Carrier' Columns 2.3 and 4 of IBM card" to read:

210 Christensen Air Service.
485 Midet Aviation Corporation.
510 New York Airways, Inc.

43. By inserting under the heading "Codes for Punch Cards" of § 241.7–2 additional items in numerical sequence under "Codes for 'Type Aircraft' Columns 9, 10 and 11 of IBM card" to read:

235 CV–340.
262 G–44.
282 202–A.

44. By striking from "Codes for 'Type Aircraft' Columns 9, 10 and 11 of IBM card" of § 241.7–2 code "272" and aircraft type number "14".

45. By inserting as the second word of the first sentence under "Codes for 'Station' Columns 12 through 15 of IBM card" of § 241.7–2 the word "numeric".

46. By amending the paragraph under "Codes for 'Traffic Line No.' Columns 33 and 34 of IBM card" of § 241.7–2 to read:

Each item required on Schedules C and C–1 of CAB Form 41 shall be identified in the card applicable thereto by punching in this field of the card the code as printed on the schedules for the line on which the item is reported.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interprets or applies sec. 407, 52 Stat. 1000; 49 U. S. C. 487)

By the Bureau of Air Operations.

TITLE 15—COMMERCE AND FOREIGN TRADE

Chapter III—Bureau of Foreign and Domestic Commerce, Department of Commerce

Subchapter C—Office of International Trade

[6th Gen. Rev. of Export Regs., Amdt. 5]

PART 384—GENERAL ORDERS

ORDER RELATING TO CERTAIN LICENSES FOR STEEL

Section 384.12 *Order relating to certain licenses for steel* is amended to read as follows:

§ 384.12 *Order relating to certain licenses for steel.* (a) Effective 12:01 a. m., e. d. t., July 29, 1952, exportations under validated licenses of all steel controlled materials in the forms and shapes specified in List I at the end of this section, may not be made where the steel forms and shapes to be exported were acquired on or after June 11, 1952, by the exporter from a steel distributor, as defined in NPA Order M–6A (or is being exported by such a steel distributor) and where they are to be used in the manufacture abroad of products identified in domestic programs by the DPA allotment symbol "V" followed by a digit as set forth in the NPA "Official CMP Class B Product List and Product Assignment Directory", issued May 1, 1952, by the National Production Authority of the Department of Commerce (section III, CMP Class B Product Class Codes—by the National Production Authority Divisions, pages 32A through 36A).

(b) For export shipments not prohibited by the terms of this order, exporters shall make the following certification on the shipper's export declaration covering the proposed exportation of all commodities identified by the Schedule B numbers in List II at the end of this section:

I certify to the Office of International Trade that, to the best of my knowledge and belief, this exportation is in accordance with the terms of OIT Order, § 384.12, as amended July 29, 1952.

(c) This order shall not apply to licenses bearing on OIT waiver of its requirements validated on the face of the license or on an amendment thereto after the effective date.

List I

Prohibited Exportations—Forms and Shapes

Carbon steel:
Bar, hot-rolled (round, 1½ inches or larger).
Bar, cold finished (round, 1½ inches or larger).
Electrical sheet and strip (AISI–M17, M15, M14 and oriented).
Tinplate, hot dipped.
Tinplate, electrolytic.
Structural shapes (wide-flanged sections, i. e., steel beams or columns having parallel face flanges rolled on a universal structural mill or Grey mill, in sizes ranging in depth from 4 to 36 inches).
Pressure tubing—seamless and welded.
Mechanical tubing—seamless.

List II

Alloy steel:
Bar, hot-rolled (round, 1½ inches or larger).
Bar, cold-finished (round, 1½ inches or larger).
Pressure tubing—seamless and welded.
Mechanical tubing—seamless.
Stainless steel (nickel bearing): All forms and shapes.

TITLE 26—INTERNAL REVENUE

Chapter I—Bureau of Internal Revenue, Department of the Treasury

Subchapter F—Records and Procedure

PART 601—PROCEDURE

INFORMAL CONFERENCES

The Statement of Procedure contained in F. R. Doc. 46–15357 appearing at page 177A–34, Part II, section 1, of the issue for September 11, 1946, as amended (26 CFR, Part 601, 15 F. R. 6838), is hereby further amended as follows:

PARAGRAPH 1. Section 601.4 (d) *Conferences* is amended as follows:

(A) The first three sentences are designated as subparagraph (1).

(B) All that remains after the third sentence is designated as subparagraph (3) and the fourth sentence is amended to read as follows: "The rules governing conferences, with the exception of informal conferences, as described in subparagraph (2) of this paragraph, are set forth in 'Conference and Practice Requirements, Bureau of Internal Revenue, Revised February, 1942', published in the Internal Revenue Bulletin, 1942–1, page 304."

(C) A new subparagraph (2) is added after subparagraph (1) to read as follows:

(2) Procedure for informal conferences under Reorganization Plan No. 1 of 1952 is provided for in IR–Mim. No. 6, Rco. No. 6, Aud. No. 2, of May 15, 1952, reading as follows:

1. *Purpose.* The purpose of this mimeograph is to describe informal conference procedure which will be applicable in the office of the Director of Internal Revenue on and after the date Reorganization Plan No. 1 of 1952 is put into effect in each District.

2. *Objectives of informal conference procedure.* The objective of the informal conference procedure is to give taxpayers greater opportunity to reach an early agreement with respect to disputed items arising from examinations made by internal revenue agents through the use of an informal procedure by means of which such issues may be resolved prior to the preparation of the internal revenue agent's final report. Through this means, the disposition of disputed cases will be brought closer to the taxpayer, improved coordination and supervision of the activities of field examiners will be achieved, and the closing of cases by agreement without the necessity of the taxpayer filing a formal protest will be increased.

3. *Organization of field groups.* The original examination of income, profits, estate, gift, excise, and employment tax liability will be the primary function of internal revenue agents assigned as examining officers in the audit branch of the office of each Director of Internal Revenue. Such internal revenue agents will be organized in groups, each of which will be under the immediate supervision of a group chief, designated by the Director. The present groups will be reduced in size and additional groups created so that, in addition to his general supervisory responsibilities, each group chief may act in the capacity of conferee in conformity with the informal conference procedure described in this mimeograph.

4. *Examination procedure.* At the conclusion of his examination, the internal revenue agent will discuss his findings with the taxpayer and will afford the taxpayer an opportunity to agree and to execute Form 870, or other appropriate agreement form. In the event that the taxpayer does not agree, or does not wish to execute an agreement form, the internal revenue agent will inform the taxpayer of his right to an informal conference. The examining officer then will furnish the taxpayer a brief statement identifying the proposed adjustments, substantially similar to the Exhibit A attached, as the basis for requesting an informal conference, if desired. Exhibit A reads as follows:

EXHIBIT A

REVENUE AGENT'S PROPOSED ADJUSTMENTS AFFECTING TAX LIABILITY

Name ----------

At the time the proposed adjustments affecting your tax liability were discussed you did not agree to the items marked (*) listed below.

You are advised that you may present your objections to the proposed changes at an informal conference which may be requested within the next 10 days by telephoning or writing to the address set out below:

Group Chief ------ Telephone No. ----------
Ext. ---------- Address ----------

If you decide to accept the findings as set out below, please advise. If no informal conference is requested, an examination report will be mailed to you by the Director of Internal Revenue.

Year ending ----------
Net income per return ---------- $--------
Proposed unallowable deductions and additional income:
(a)---------- $--------
( )---------- --------
( )---------- --------
Total ---------- --------
Proposed nontaxable income and additional deductions:
( )---------- $--------
( )---------- --------
Proposed corrected net income--- $--------
Other proposed adjustments affecting tax liability:
( )----------

Internal Revenue Agent

Date

A copy will be furnished promptly to the group chief. Such informal conference will be conducted by the group chief, or by such other qualified employee as may be designated, with the examining officer present, and will afford the taxpayer an opportunity to discuss orally the proposed adjustments.

5. *Attorneys and agents.* If the taxpayer does not attend the conference but is represented by an attorney or agent, the rules with respect to their recognition, the filing of powers of attorney, and the filing of fee statements will be applicable.

6. *Reports and review.* A simple, short, informal conference report will be prepared by the group chief, or other designated officer, with respect to each case on which an informal conference was held. Such conference report will show the date of the conference, the names and titles of the persons present, and will set forth briefly and concisely the facts and the conclusions reached with respect to each issue. The conference report will then be given to the examining officer who will, in preparing the examination report, give effect to the conference decisions. The examination report, the conference report, and all other data relating to the case will be subjected to review in order that uniformity in the application of the provisions of the Internal Revenue Code, the regulations and rulings, as well as general Bureau policy, may be assured.

7. *Duties of conferee.* In the conduct of informal conferences it will be the duty of the group chief, or other officer who may be acting as conferee, to conduct the conference in accordance with the objectives of the informal conference procedure and to:

(a) Provide the taxpayer a fair and courteous hearing at which he may present his statement of the facts and his view on the issues;

(b) Make certain that all pertinent facts are included in the record and are considered in arriving at the proposed recommendation;

(c) Make certain that the appropriate provisions of the Internal Revenue Code are applied in arriving at the proposed recommendation;

(d) Make certain that the proposed recommendation is in accord with Bureau interpretations as expressed in regulations and rulings; and

(e) Explain fully to the taxpayer the conclusions reached and the reasons therefor.

8. *Procedure after conference.* In the event that an agreement is reached at the informal conference, the case will be processed in accordance with established procedure. In the event that the taxpayer does not agree with the decision reached at the informal conference, the examination report will be prepared and a copy furnished the taxpayer, together with a 30-day letter affording the taxpayer the privilege of filing a formal protest, under oath, with the Director of Internal Revenue. Such 30-day letter also will afford the taxpayer an opportunity to agree to the proposed determination. If no such protest or agreement is received by the Director within the 30-day period, the case will be processed for issuance of the statutory notice of deficiency, or other appropriate action. If a timely protest is received, the case will be transmitted to the Appellate Division.

9. *Definitions.* (a) The term "income, profits, estate, and gift tax," as used in this mimeograph, will be construed to include any tax over which The Tax Court of the United States has jurisdiction.

(b) The term "excise tax," as used in this mimeograph, will be construed to include any Federal excise tax, except: (1) Any tax imposed by Chapter 8, 9, 15, 23, 26, or 27A; (2) any tax imposed by Subchapter B of Chapter 25; (3) any tax imposed by Part V, Part VI, Part VII, or Part VIII of Subchapter A of Chapter 27; and (4) any tax imposed by Subchapter B of Chapter 28, insofar as it relates to liquor and tobacco.

(c) The term "employment tax," as used in this mimeograph, will be construed to include any tax imposed by Chapter 9.

10. *Jeopardy, fraud, and other special cases.* Nothing contained in this mimeograph shall be construed to preclude the taking of appropriate action where the assessment or the collection of the tax is in jeopardy. The procedure described in this mimeograph will not apply in any case in which criminal prosecution is under consideration or in any case in which, in the discretion of the Director of Internal Revenue, the Government's interest would be prejudiced thereby.

11. *Prior instructions superseded.* The instructions contained in this mimeograph supersede prior instructions to the extent that such prior instructions are inconsistent herewith.

(R. S. 161; 5 U. S. C. 22)

[SEAL] NORMAN A. SUGARMAN, *Acting Commissioner of Internal Revenue.*

[F. R. Doc. 52-8343; Filed, July 29, 1952; 8:51 a. m.]

TITLE 30—MINERAL RESOURCES

Chapter I—Bureau of Mines, Department of the Interior

Subchapter E—Mechanical Equipment for Mines; Tests for Permissibility; Fees

PART 33—DUST COLLECTORS FOR USE IN CONNECTION WITH ROCK DRILLING IN COAL MINES

MISCELLANEOUS AMENDMENTS

The Bureau of Mines has determined that certain phases of the testing schedule set forth in Part 33 serve no useful purpose in determining whether dust collecting equipment may be approved for use in coal mines. Accordingly, the following amendments delete from the

schedule the requirements and conditions relating to drilling in hard strata such as sandstone as part of the approval test of dust collectors for use in connection with rock drilling in coal mines.

Since these amendments serve to decrease instead of increase the present requirements, it is determined that the notices and procedures prescribed by section 4 of the Administrative Procedure Act (60 Stat. 237; 5 U. S. C. 1003) are impracticable, unnecessary, and the rules and regulations shall become effective as of the date of filing in the FEDERAL REGISTER.

Part 33, of Title 30, Code of Federal Regulations heretofore promulgated (17 F. R. 1120), is amended as follows:

1. Section 33.6 (f) (1) is amended to read as follows:

(1) *Roof drilling.* Units designed for use with both percussion and rotary drills shall be tested with both types of drills; otherwise tests shall be confined to the type of drill for which the unit is designed.

Percussion and rotary drilling shall be done in friable strata that tend to produce large scale-like cuttings, as exemplified by the roof of the Bureau of Mines Experimental Mine, Bruceton, Pennsylvania.

2. Section 33.6 (f) (1) (i) is amended to read as follows:

(i) With units under consideration for approval for use in connection with drilling vertical roof holes only, holes shall be drilled as follows:

10 holes with pneumatic percussion drill.
10 holes with electric rotary drill.

3. Section 33.6 (f) (1) (iii) is amended to read as follows:

(iii) With units under consideration for use in connection with drilling through holes in steel shapes, channels 4 inches across the web shall be used (unless other shapes or sizes are designated in the application for approval) and holes shall be drilled as follows:

5 holes vertically, and 5 holes at an angle, with pneumatic percussion drill.
5 holes vertically, and 5 holes at an angle, with electric rotary drill.

(Sec. 5, 36 Stat. 370, as amended; 30 U. S. C. 7)

MASTIN G. WHITE,
Acting Secretary of the Interior.

JULY 23, 1952.

[F. R. Doc. 52-8294; Filed, July 29, 1952; 8:45 a. m.]

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 132, Amdt. 1]

CPR 132—SOUTHERN HARDWOOD AND YELLOW CYPRESS LUMBER

ESTABLISHED WEIGHTS FOR GREEN LUMBER

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 1 to Ceiling Price Regulation 132 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment establishes weights for green lumber for use in computing ceiling delivered prices under section 6.2. The regulation as originally issued provided established weights for air-dried lumber only. Since the regulation was issued, a number of requests have been received showing the need for established green weights. This amendment meets the need for such weights.

The weights shown are the weights commonly accepted in the industry. They are based on the weights shown in the "Rules for the Measurement and Inspection of Hardwood Lumber, Cypress, Veneers and Thin Lumber", effective January 1, 1952, published by the National Hardwood Lumber Association, which have been adjusted to allow for the untrimmed and unedged cuttings of circular sawmills.

In the formulation of this amendment, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

In the judgment of the Director of Price Stabilization, the provisions of this amendment are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act.

AMENDATORY PROVISIONS

Ceiling Price Regulation 132 is hereby amended in the following respect:

A new section, 3.12, is added to article III, immediately following section 3.11, to read as follows:

SEC. 3.12 *Established weights for green lumber.* The established weights per thousand feet for green lumber covered by this regulation, for use in computing transportation additions under section 6.2, are as follows:

ESTABLISHED GREEN LUMBER WEIGHTS

[Pounds per 1,000 feet]

Species	Thickness (inch)									
	1/2	5/8	3/4	4/4	5/4	6/4	8/4	10/4	12/4	16/4
Tough ash		3,500	4,200	5,600	5,600	5,700	5,800	5,800	6,000	6,000
Cabinet ash (other than tough ash)		3,000		4,000	4,900	5,000	5,200	5,200	5,300

(Sec. 704, 64 Stat. 816, amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective August 2, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 29, 1952.

[F. R. Doc. 52-8408; Filed, July 29, 1952; 10:57 a. m.]

[Ceiling Price Regulation 135, Amdt. 1 to Supplementary Regulation 1]

CPR 135, SR 1—SALES OF BAKERY ITEMS TO EATING AND DRINKING ESTABLISHMENTS LOCATED IN THE METROPOLITAN NEW YORK AREA

ESSEX COUNTY

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 1 to Supplementary Regulation 1 to Ceiling Price Regulation 135, is hereby issued.

STATEMENT OF CONSIDERATIONS

Data received by this office subsequent to the issuance of CPR 135, SR 1, indicates that Essex County in New Jersey is part of the Metropolitan New York Area insofar as sales by New York restaurant bakers are concerned. Accordingly, the definition of the Metropolitan New York Area has been amended to include this county.

In the Director's judgment the provisions of this amendment are consistent with the purposes of Title IV of the Defense Production Act of 1950, as amended, and comply with all the applicable provisions of that act.

In view of the corrective nature of this Amendment, special circumstances have rendered consultation with industry representatives, including trade associations, impracticable.

AMENDATORY PROVISIONS

Paragraph (c) of section 1 of Ceiling Price Regulation 135, Supplementary Regulation 1 is amended by adding Essex County in the State of New Jersey to the counties included within the Metropolitan New York Area. As amended, paragraph (c) of section 1 reads as follows:

(c) "Metropolitan New York Area" means the following counties in the State of New York: New York, Kings, Queens, Bronx, Richmond, Rockland, Westchester, Suffolk and Nassau; and the following counties in the State of New Jersey: Bergen, Essex, Hudson, Union, and Passaic.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective July 29, 1952.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

JULY 29, 1952.

[Ceiling Price Regulation 74, Amdt. 11]

CPR 74—CEILING PRICE OF PORK SOLD AT WHOLESALE

ADJUSTED PARITY PRICES, PROCESSING STAGES, AND MISCELLANEOUS AMENDMENTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, Economic Stabilization Agency General Order 2, this Amendment to Ceiling Price Regulation 74 is hereby issued.

STATEMENT OF CONSIDERATIONS

The accompanying amendment to Ceiling Price Regulation 74 (CPR) makes several substantive changes.

This amendment increases the ceiling prices of certain pork products in compliance with the provisions of section 402 (d) (3) of the Defense Production Act of 1950, as amended.

The Secretary of Agriculture has determined that, during the months of July, August, September, and October, the parity price for hogs shall be adjusted to a level in excess of 100 percent of parity. Data available to the Office of Price Stabilization indicate that with hog prices at or slightly in excess of parity, processors of hogs would have generally fair and equitable margins under the industry earnings standard. While these data are not complete, they also indicate that were the processors to pay the seasonally adjusted parity prices for hogs over an extended period of time, the processing industry's earnings would be below the earnings standard. It appears that processors would be unable to pay producers these seasonally adjusted hog prices for any substantial period of time without reducing their margins below fair and equitable levels. Accordingly, during these four months, in order to permit processors to realize equitable margins while permitting them to pay producers of hogs seasonally adjusted parity prices as required by the Act, this amendment raises the ceiling prices of pork products. The higher ceiling prices provided in this amendment not only reflect seasonally adjusted parity but also reflect a sufficiently high corn-hog ratio to encourage increased hog production.

After October, when the seasonal adjustments in excess of 100 percent of parity terminate, the prices established in this regulation will be again revised to reflect the then effective legal requirements of the Act.

The ceilings of only certain pork products have been raised by this amendment. These products are the ones which in an uncontrolled economy normally increase in price during these four months. In general they are the leaner cuts which require comparatively less preparation and for which the housewife has customarily paid a premium during the warm weather months. In selection of these cuts the Office of Price Stabilization has been governed by historic seasonal price trends and has made such modifications as have seemed appropriate following consultation with industry representatives.

Schedule I of section 20 has been amended so as to permit the sale of certain wholesale pork cuts heretofore not listed in the schedule, as well as to include ceiling prices for additional processing stages of certain wholesale pork cuts. Specifically, the column headings, "Smoked", "Ready to eat", and "cooked (not in molds under pressure)" have been changed to be more descriptive of the actual processing steps to which each column of prices refers. A new column of prices, headed "Browned—Not cured [may be precooked (in molds under pressure) or (not in molds under pressure)]", has been added to Schedule I of section 20.

Boneless and fatted fresh hams and boneless fresh loins (Canadian Style) have customarily been browned by processors prior to sale. Inasmuch as numerous applications have been received under section 5 of CPR 74 (specialty pork products), the Director of Price Stabilization has deemed it advisable to establish a specific dollars-and-cents ceiling price for these items. For the same reasons, ceiling prices for cured bellies—square cut, seedless and derined, barbecue ribs—over 3 pounds, fresh hog faces, and cured and smoked hog jaws have been added.

Furthermore, section 20 has been amended to permit the sale of fresh hams, long cut, bone-in to processors of dried hams in addition to processors of aged, dry cured hams, and weight classifications over 16 pounds have been specified as follows: less than 16, 16–20, 20–28, and over 28 pounds.

A new cut, Hams, bone-in, skinless and fatted, has been added to Schedule I.

Prices for bellies, square cut and seedless with spare ribs in, which are sold cured or cured and smoked, have also been added to Schedule I. Heretofore, prices were provided only for bellies without the spare ribs, which had been cured or cured and smoked. Removal of the spareribs, however, does not always leave a square cut, seedless belly of sufficient thickness to be saleable. Accordingly, the additional prices have been added for other processing stages of the belly with the spareribs in.

A new section 54 has been added which provides that slaughterers may take an addition of $1.20 per cwt. on sales of pork products to purveyors of meals. Sales of pork to purveyors of meals entail greater expense and customarily have been made at higher prices than have been charged other buyers. In recognition of these facts, Ceiling Price Regulation 74 has previously provided for additions by wholesalers and non-slaughtering processors on sales to purveyors of meals. Slaughterers now may take an addition of $1.20 per cwt. on such sales. However, if the pork products are sold to purveyors of meals by company-owned peddler trucks, this new addition may not be taken as the regulation already provides for additions in these situations. In order to maintain normal profit margin differentials, the additions for sales by wholesalers and non-slaughtering processors to purveyors of meals have been increased $1.20 per cwt.

In formulating this amendment, the Director of Price Stabilization has consulted so far as practicable with industry representatives, including trade association representatives, and has given full consideration to their recommendations. In his judgment the provisions of this amendment are generally fair and equitable, are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended, and comply with all the applicable standards of the Act.

All standards prescribed in this amendment were, prior to the issuance of Ceiling Price Regulation 74, in general use in the meat industry. Such standards as are prescribed are indispensable to price control of pork, since no practicable alternative to such standardization exists for securing effective price control of this commodity. It is not believed that this amendment will cause any substantial changes in business practices, cost practices or methods, or means or aids to distribution; however, to the extent that such changes may be compelled, they are necessary to prevent circumvention or evasion of Ceiling Price Regulation 74, as amended.

AMENDATORY PROVISIONS

Ceiling Price Regulation 74 is amended in the following respects:

1. Section 20 is amended to read as follows:

SEC. 20. ***Schedule I—Wholesale pork cuts: Fresh or frozen, cured, cured and smoked, cured and smoked—ready-to-eat, cured and smoked—cooked (not in molds under pressure), and browned (not cured).***

[All prices are on a dollar per cwt. loose basis; the price for any fraction of a cwt. shall be reduced proportionately. Weights are by range and not by average]

Item	Fresh or frozen		Cured		Cured and smoked		Cured and smoked, ready-to-eat		Cured and smoked, cooked (not in molds under pressure)		Browned—not cured [may be precooked (in molds under pressure) or (not in molds under pressure)]

SPECIAL ADJUSTMENT

If any wholesale pork cut listed above is not cut or trimmed in accordance with the specifications prescribed in Appendix 2, you must deduct $2.00 per cwt. from the prices listed above for any such improperly cut or trimmed fresh or frozen cut and $2.50 per cwt. from the prices listed above for any such improperly cut or trimmed cured or processed cut.

2. Section 21 is amended to read as follows:

SEC. 21. ***Schedule II—Wholesale pork cuts: Sliced bacon, derind, packed in shipping containers.***

[All prices are on a dollars per cwt. packed basis; the price for a fraction of a cwt. shall be reduced proportionately]

	Packed in containers 30 pounds or less	
	½-pound package	1-pound package
1. Parchment wrapped:		
(i) Grade A	$62.50	$61.80
(ii) Grade B	53.60	52.90
(iii) Grade C	49.10	48.40
2. Rolls in cellophane or other transparent material:		
(i) Grade A	63.00	62.00
(ii) Grade B	54.10	53.10
(iii) Grade C	49.60	48.60
3. Closed carton; or cardboard wrapped in cellophane or other transparent material:		
(i) Grade A	64.80	63.30
(ii) Grade B	55.60	54.40

(iv) Jowl butts	30.90	29.90
(v) Boneless regular plates	34.80	33.80

[All prices are on a dollars per cwt. packed basis; the price for a fraction of a cwt. shall be reduced proportionately]

	Packed in containers 30 pounds or less
5. Platter or bulk layers:	
(i) Hotel	$64.20
(ii) Grade A	61.00
(iii) Grade B	52.10
(iv) Grade C	47.60
(v) Grade D	33.70
6. Bacon ends:	
(i) Packages 2 pounds or less	22.70
(ii) Loose in carton or packages over 2 pounds	22.10

SPECIAL ADJUSTMENTS

Each of the above prices includes wrapping and packaging allowances and you may not add to the prices listed above any addition specified in section 51 or 52.

If any of the above items is packaged in a shipping container containing more than 30 pounds, the price listed above for each such item shall be reduced $0.50 per cwt.

3. Section 22 is amended to read as follows:

SEC. 22. ***Schedule III—Wholesale pork cuts: Cured and cooked, cured, smoked and cooked, and browned.***

[All prices are on a dollars per cwt. loose basis; the price for any fraction of a cwt. shall be reduced proportionately. Weights are by range and not by average. Cooked items in this schedule must be cooked in molds under pressure]

	Weight range (pounds)	Price		
		Cured and cooked	Cured, smoked and cooked	Browned
1. Hams—Regular, boneless and fatted	10 down	$88.70	$90.80	$93.00
	Over 10	85.20	87.20	89.30
2. Hams—Skinless, boneless and fatted	10 down	92.90	100.20	102.20
	Over 10	94.60	96.90	98.80
3. Picnics—Skinless, boneless and fatted	5 down	69.30	71.00	73.40
	Over 5	64.80	66.40	68.40
4. Shoulders—Skinless, boneless and fatted	10 down	69.00	70.70	72.70
	Over 10	64.90	66.60	68.60

SPECIAL ADJUSTMENT

If any wholesale pork cut listed above is not trimmed in accordance with the specifications prescribed in Appendix 2, you must deduct $2.50 per cwt. from the prices listed above for any such improperly trimmed cut.

4. Section 24 is amended to read as follows:

SEC. 24. ***Schedule V—Wholesale pork cuts: Miscellaneous pork cuts.***

[All prices are on a dollars per cwt. loose basis except that pebatin skins are priced on a dollars per cwt. packed basis. The price for any fraction of a cwt. shall be reduced proportionately]

	Price		
	Fresh or frozen	Cured and smoked	Cooked
1. Hocks, ½ pound up	$30.00	$30.00	
2. Knuckles under ½ pound	22.00	30.00	
3. Feet, regular	8.00		
4. Feet, short cut	6.00		
5. Tail bits from hind feet	15.00		
6. Tails	17.00	22.00	
7. Neck bones	16.00	20.00	
8. No. 1 skins—strips	12.00		
9. Bacon skins		11.00	
10. Gelatin skins (price includes the container; you may not add the additions provided in section 51 or 52)	9.50		
11. Blade butts (blade bones)	36.00	43.00	
12. Backbones	5.00	10.00	
13. Country backbones (southern style)	53.00		
14. Pork tenderloin	80.00		
15. Pork tenderloin tips	87.00		
16. Cappicola butts (cured and cooked) (natural casings):			
2½ pounds down			$91.00
Over 2½ pounds			86.00
17. Cappicola butts (cured and cooked) (artificial casings):			
2½ pounds down			95.00
Over 2½ pounds			87.00
18. Cappicola butts (cured and cooked) (wrapped in cellophane or other transparent material or vegetable parchment):			
2½ pounds down			95.00
Over 2½ pounds			87.00

NOTE: If you sell hocks, knuckles, feet, tailbits from hind feet, No. 1 skins—strips, tails, or neck bones, cured, you may add $1.00 per cwt. to the prices for these items as listed for fresh or frozen.

5. Section 25 is amended to read as follows:

SEC. 25. *Schedule VI—Wholesale pork cuts: Semi-sterile canned meats.*

[All prices are on a dollars per cwt. packed basis. The price for any fraction of a cwt. shall be reduced proportionately. Weights are by range and not by average except for exact weight hams under 7 pounds. Weights refer to the weight of the product immediately before canning. You may not add to the prices listed below the additions provided in section 51 or 52]

	Weight range (pounds)	Price	
		Unsmoked	Smoked
1. Canned whole ham:			
(a) Skinless (exact net weight each) (limited to quarters, halves and full pounds only).	Under 7	$94.00	$97.60
	7 to 9	86.50	89.20
	9 to 11	85.50	88.20
	11 to 13	82.00	84.60
	13 to 15	78.90	81.40
(b) Skinless (all shapes other than Pullman style).	7 to 9	83.50	86.20
	9 to 11	82.50	85.20
	11 to 13	79.00	81.50
(c) Pear-shaped (Polish style with shank collar).	7 to 10	87.00	89.70
	10 to 13	83.80	86.50
(d) Pullman, skinless	4 to 8	70.60	
2. Canned whole picnics	3	54.70	
3. Canned spiced luncheon meat.	6 or 8	58.20	
4. Canned spiced ham	3	76.10	
	6 or 8	74.60	
5. Canned pressed ham, boneless, chopped.	3	80.30	
	6 or 8	78.80	
	10	78.10	
6. Canned chopped pork, boneless.	3	57.50	
	6 or 8	56.00	
	10	55.30	

SPECIAL ADJUSTMENTS

Your ceiling price for canned whole hams—skinless, which are opened and testing, shall be $5.00 per cwt. below the prices listed in section 22, Schedule III, Item 2, for cured and cooked hams of the applicable weight range.

Your ceiling price for canned whole hams (Polish style), which are opened and removed from the can for inspection and testing, shall be $8.00 per cwt. below the prices listed in Section 22, Schedule III, Item 2, for cured and cooked hams of the applicable weight range.

6. Section 27 is amended to read as follows:

SEC. 27. *Schedule VIII—Wholesale pork cuts: Fabricated Loin cuts.*

[All prices are on a dollars per cwt. loose basis; the price for any fraction of a cwt. shall be reduced proportionately]

	Price
Bladeless loin chops (cut end to end):	
Sales by—	
Hotel supply houses to purveyors of meals and by anyone to purveyors of meals as defined in section 60 (p) (4)	$70.30
Combination distributors or peddler truck sellers as defined in section 60 (l) (1) to purveyors of meals	67.80
All other sales	62.80

NOTE: The above cut may be sold only to purveyors of meals, hotel supply houses, combination distributors, ship suppliers and peddler truck sellers as defined in section 60 (l) (1).

7. Section 28 is amended to read as follows:

SEC. 28. *Schedule IX—Wholesale pork cuts: Aged, dry-cured pork cuts.*

[All prices are on a dollars per cwt. loose basis; the price for any fraction of a cwt. shall be reduced proportionately]

Item	Price (aged, dry cured)
1. Ham	$93.50
2. Shoulders	61.10
3. Bacon sides (boneless)	56.00
4. Bacon sides (spareribs in)	59.20
5. Hog jaws (also known as rough jowls)	28.20

8. Section 31 is amended to read as follows:

SEC. 31. *Schedule XI—Dressed hogs: Flat price basis.* This section or section 30 may be used to determine the ceiling price of a dressed hog sold to a certified dressed hog processor. This section shall be used to determine the ceiling price of a dressed hog sold to a person other than a certified dressed hog processor.

[All prices are on a dollars per cwt. basis; the price for any fraction of a cwt. shall be reduced proportionately. Weights are by range and not by average]

Shipper Style		Packer Style	
Dressed weight ranges (pounds)	Price	Dressed weight ranges (pounds)	Price
Pigs:		Pigs:	
81 to 99	$36.20	73 to 89	$38.50
100 to 119	35.60	90 to 107	37.80
120 to 139	35.00	108 to 123	37.20
Butchers:		Butchers:	
137 to 153	34.50	124 to 138	36.60
154 to 171	34.40	139 to 154	36.50
172 to 188	33.70	155 to 169	35.80
189 to 213	32.80	170 to 192	34.80
214 to 235	32.40	193 to 213	34.30
236 to 265	31.50	214 to 239	33.30
Over 265	30.30	Over 239	32.00
Sows:		Sows:	
Under 312	32.60	Under 280	33.60
312 and over	29.80	280 and over	31.50

NOTE: Dressed pigs weighing less than 81 pounds, shipper style, or less than 73 pounds, packer style, shall remain under the General Ceiling Price Regulations, as amended and supplemented.

9. Section 43 (a) is amended by deleting paragraph (2) thereof and by inserting a new paragraph (2) to read as follows:

(2) To purveyors of meals, you may add $3.70 per cwt. to the prices specified in Schedules I through IX and XI and to your ceiling price determined under section 29 (a) (2); however, you may not add more than $2.50 to these prices if you take the peddler truck selling addition provided in Section 49; or

10. Section 44 (a) is amended by deleting paragraph (2) thereof and by inserting a new paragraph (2) to read as follows:

(2) To purveyors of meals, you may add $2.70 per cwt. to the prices specified in Schedules I through IX and XI and to your ceiling price determined under section 29 (a) (2); however, you may not add more than $1.50 to these prices if you take the peddler truck selling addition provided in Section 49; or

11. A new secton 54 is added to read as follows:

SEC. 54. *Addition 15—Slaughterer's addition on a sale to a purveyor of meals.* (a) On the sale of any pork product to a purveyor of meals, you may add $1.20 to the ceiling prices specified in Article II. However, you may not take this addition if you take the peddler truck selling addition provided in section 49.

12. Appendix 2 (c) (1) is amended by adding at the end thereof a new subdivision (i) reading as follows:

(i) *Ham, bone in, skinless and fatted,* means a ham cut as described in Appendix 2 (c) (1) except that all skin has been removed and all trimmable fat has been removed therefrom to within ½ inch of the lean.

13. Appendix 2 (c) (89) is amended by adding at the end thereof a new subdivision (ii) reading as follows:

(ii) *Hog face* means a hog head as defined in Appendix 2 (c) (89) except that the lower jaw is removed.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment shall become effective on July 29, 1952.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

JULY 29, 1952.

[Ceiling Price Regulation 5, Amdt. 9]

CPR 5—IRON AND STEEL SCRAP

AUTOMOBILE BODY SCRAP—DEALER TO DEALER DIFFERENTIAL; MISCELLANEOUS AMENDMENTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this amendment to Ceiling Price Regulation 5, is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment makes two major changes in CPR 5 in addition to several changes of a clarifying and corrective nature.

There is established a new unprepared grade of steel scrap of dealer and industrial origin consisting of automobiles, buses, trucks, trailers and other motor vehicles sold prior to demolition for scrapping purposes or to a consumer of iron and steel scrap. Prior to this amendment such motor vehicles were included within the definition of demolition projects and were priced under the General Ceiling Price Regulation. It is the opinion of the Director that such vehicles do not properly belong within this category of projects which historically have been distinguished from unprepared scrap because of the special skills and equipment needed to handle them not ordinarily available to the average processor of scrap and because of the varying amount of reusable and non-ferrous material contained in such projects. The costs of demolition and preparation of true demolition projects will vary greatly with each job and at times may even exceed the ceiling price for the resultant scrap. It was because of these distinguishing characteristics that demolition projects were left under

the General Ceiling Price Regulation in the absence of adequate provisions in CPR 5 to price such material.

Automobiles, buses, trucks, trailers and other motor vehicles, on the other hand produce fairly uniform quantities of iron and steel scrap and non-ferrous scrap and have been customarily considered by the iron and steel scrap industry as important and regular sources of grades 33, 34, and motor blocks. In fact, auto scrap is preceded only by industrial and railroad scrap in importance.

Normally such vehicles are purchased by auto wreckers who strip them of all usable parts for resale. After being stripped, they are demolished and prepared by the auto wrecker, or sold to scrap preparation yards who have developed facilities for the efficient processing of this scrap. To facilitate the pricing of such scrap material on a uniform basis, the lack of which under the GCPR has hitherto led to much confusion among both buyers and sellers, a grade differential has been established by this amendment which takes into account the normal amount of non-metallic attachments such as upholstery, glass, etc., and the cost of burning, demolishing and preparing the vehicle into its component grades of iron and steel scrap. No allowance has been made for the non-ferrous batteries or radiators in view of the fact that such items are customarily and easily removed prior to demolition. Correspondingly, however, no additional charge may be made for such items unless they are removed by the seller and invoiced, weighed and shipped separately. No fees for intransit preparation of the new grade 35 may be charged or paid.

The second major change affecting dealer and industrial scrap is the revision of the dealer to dealer differential. When ceiling prices were established by Amendment 5 to CPR 5 for sales of iron and steel scrap between dealers, a one dollar differential was provided for the scrap collection in recognition that the spread between the ceiling price for unprepared scrap paid to the industrial producer and the ceiling price received for the prepared grade must be apportioned among the collecting, trucking, preparation and handling functions. Considering the fact that the collectors and small peddlers normally pick up such unprepared scrap at the generator's plant in their own trucks and haul it directly to the preparer's yard, which may be some distance away, without bringing it into their own yard, the trucking and delivery aspect of their operation is an important one. It has been amply demonstrated, however, since the effective date of Amendment 5, that the one dollar per gross ton is disproportionately small and has forced many collectors to curtail or abandon their delivery operation. This in effect forces the preparer to remove the scrap from the collector's yard either in his own truck or in a common carrier truck, the added expense of which must be met out of the remaining spread realized by the preparer.

This amendment apportions the respective charges more realistically by increasing from one dollar to two and a half dollars the fee which the dealer who sells unprepared scrap to another dealer and delivers it in his own truck to the preparer's yard may charge.

The provisions relating to vessel movements have been amended to permit the payment of dock charges where the National Production Authority allocates for rail shipment, scrap which has already been stored at a dock for water movement. Since the shipper who has already stored the scrap at a dock for water shipment will have incurred the costs contemplated by the regulation, it is felt that such a shipper should receive compensation for the costs involved where he is directed by a governmental agency to ship his scrap by rail.

The restrictions on intransit preparation of dealer and industrial scrap have been clarified to correspond with the interpretations which have been issued concerning the method of shipment permitted. One of the circumstances in which a consumer may designate a dealer to prepare steel scrap of dealer and industrial origin on an intransit basis is where he purchases such unprepared scrap in rail carload lots. The term "rail carload lots" designates the mode of transportation as well as the quantity. Thus the only circumstances under which scrap may be trucked into the preparer's yard on an intransit basis is when the material is allocated by the National Production Authority for shipment by truck.

Another aspect of the same problem is the quantity of scrap intended by the words "rail carload lot". It is obvious that as regards sheet iron (grade 33) and other light scrap a rail car cannot always be loaded to the full weight to which the minimum carload freight applies. This results in dead freight charges for the difference in weight. The provisions have been amended to specify that a rail car must be loaded to at least maximum visible capacity and that all freight charges for a carload weighing 30,000 pounds and over may be charged to the consumer. For carloads weighing less than 30,000 pounds, the prorated dead freight charges for the difference between the weight actually shipped and the 30,000 pounds may not be paid by the consumer or his broker and must be charged back to the shipper.

In the formulation of this amendment there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

Ceiling Price Regulation 5 is amended in the following respects:

1. Section 1 (a) (1) is amended to read as follows;

(1) All sales and deliveries, including export sales and sales for export, by any person of prepared and unprepared iron and steel scrap:

2. Section 3 (a) (2) is amended by adding the following grade (35):

35. Automobiles, buses, trucks, trailers and other motor vehicles: —12.00.

3. Section 3 (c) (5) is amended to read as follows:

(5) The ceiling shipping point price for the sale of any grade of unprepared steel scrap of dealer or industrial origin (grades 32, 33, 34 and 35) by a dealer to another dealer (excluding brokers) is the price determined for the applicable grade in accordance with section 4 plus an amount not to exceed one of the following:

(i) When the material is loaded in a railroad car or common carrier truck or vessel—$1.00 per gross ton.

(ii) When the material is delivered to the preparer's yard in a vehicle owned or controlled by the shipper—$2.50 per gross ton.

4. Section 5 (a) is amended by changing the name Warren, Pennsylvania, to read Warren, Ohio.

5. Section 6 (a) is amended to read as follows:

(a) The ceiling delivered price of any grade of steel scrap delivered by rail, vessel, or combination thereof, shall be the shipping point price as determined in section 4 hereof, plus the actual charge for transporting the scrap from the shipping point to the point of delivery by the means of transportation employed, except as provided in section 15 (f) on intransit preparation.

6. Section 6 is amended by adding the following paragraph (d):

(d) Where scrap is allocated by the National Production Authority for rail shipment, and prior to the date of the NPA allocation order such scrap has been stored at a dock for water movement, the dock charges set forth in paragraph (b) may be charged and paid.

7. Section 15 (a) (1) is amended to read as follows:

(1) Where unprepared steel scrap of dealer and industrial origin (other than grade 35) is allocated for preparation intransit by the National Production Authority.

8. Section 15 (a) (2) is amended to read as follows:

(2) Where a consumer purchases unprepared steel scrap of dealer and industrial origin (other than grade 35) for shipment by rail to the preparer's yard in minimum rail carload lots. A railroad car loaded to maximum visible capacity will be considered a minimum rail carload lot. Grade 35 cannot be prepared on an intransit preparation fee basis.

9. Section 15 (f) is amended to read as follows:

(f) Whenever intransit preparation of iron or steel scrap is permissible pursuant to the provisions of this section, the ceiling delivered price shall be the ceiling shipping point price plus the rail transportation charges to the point of preparation, or the ceiling on-line price plus any off-line rail transportation charges to the point of preparation, plus the applicable ceiling preparation fee as established in section 16 of this regulation, plus the transportation charges from the preparation yard to the point

of delivery as established and restricted in sections 6, 9, 12 or 13 of this regulation, whichever is applicable.

The rail transportation charges to the point of preparation may include any charges for dead freight providing the scrap material is loaded in the railroad car to maximum visible capacity and weighs not less than 30,000 pounds. If the scrap material weighs less than 30,000 pounds an adjustment must be made for the prorated dead freight charges for the difference in the weight actually shipped and 30,000 pounds so that this proportion of the dead freight charges will not be paid by the consumer or his broker.

10. Section 23 is amended by adding the following paragraph (d):

(d) *Unprepared grades.*

(32) *Unprepared steel scrap which when compressed constitutes No. 1 bundles.*

(33) *Unprepared steel scrap which when compressed constitutes No. 2 bundles.*

(34) *Unprepared steel scrap other than material suitable for hydraulic compression.*

(35) *Automobiles, buses, trucks, trailers and other motor vehicles.* Automobiles, buses, trucks, trailers and other motor vehicles; it may include non-ferrous and non-metallic attachments which are an integral part of the vehicle, including the attached tires, batteries, radiators, upholstery and glass. It must be free of all non-metallic material which is not an integral and attached part of the vehicle.

11. Section 28 (b) is amended to read as follows:

(b) "Iron and steel scrap" means all ferrous materials, either alloyed or unalloyed, of which iron or steel is a principal component, which are the waste of industrial fabrication, or objects that have been discarded on account of obsolescence, failure or any other reason. It does not include any material which qualifies as a re-usable product by reason of its condition, which is sold as a re-usable product, and which is not purchased for use in any of the operations mentioned in paragraph (c) of this section It does not include demolition projects, as defined in paragraph (n) of this section, prior to demolition. It includes automobiles, buses, trucks, trailers and other motor vehicles when sold for demolition into scrap or when sold to any consumer as defined in paragraph (c). It does not include metal coated ferrous material sold for the recovery of the coating substance to a person regularly engaged in such operation. It does not include tool steel scrap containing 1 percent or more of tungsten or molybdenum nor does it include stainless steel scrap for which ceiling prices have been established under Ceiling Price Regulation 29.

12. Section 23 (n) is amended by deleting the word "automobiles" in the first sentence.

Effective date. This amendment to Ceiling Price Regulation 5 shall become effective August 2, 1952.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

ELLIS ARNALL,
Director of Price Stabilization.

JULY 29, 1952.

[F. R. Doc. 52-8405; Filed, July 29, 1952; 10:57 a. m.]

[Ceiling Price Regulation 151, Amdt. 1]

CPR 151—APPALACHIAN HARDWOOD LUMBER

ESTABLISHED WEIGHTS FOR GREEN LUMBER

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 1 to Ceiling Price Regulation 151 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment establishes weights for green lumber for use in computing ceiling delivered prices under section 6.2. The regulation as originally issued provided established weights for air-dried lumber only. Since the regulation was issued, a number of requests have been received showing the need for established green weights. This amendment meets the need for such weights.

The weights shown are the weights commonly accepted in the industry. They are based on the weights shown in the "Rules for the Measurement and Inspection of Harwood Lumber, Cypress, Veneers and Thin Lumber," effective January 1, 1952, published by the National Hardwood Lumber Association, which have been adjusted to allow for the untrimmed and unedged cuttings of circular sawmills.

In the formulation of this amendment, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

In the judgment of the Director of Price Stabilization, the provisions of this amendment are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act.

AMENDATORY PROVISIONS

Ceiling Price Regulation 151 is hereby amended in the following respect:

A new section, 3.12, is added to article III, immediately following section 3.11, to read as follows:

SEC. 3.12. *Established weights for green lumber.* The established weights per thousand feet for green lumber covered by this regulation, for use in computing transportation additions under section 6.2, are as follows:

ESTABLISHED GREEN LUMBER WEIGHTS

[Pounds per 1,000 feet]

Species	Thickness (inch)								
	5/8	3/4	4/4	5/4	6/4	8/4	10/4	12/4	16/4
Firm to tough ash		4,100	4,900	4,900	5,000	5,100	5,100	5,300	5,300
Basswood		3,500	4,800	5,000	5,000	5,200	5,200	5,400	5,400
Beech	3,700	4,400	5,700	5,800	6,000	6,200	6,300	6,500

CPR 5—IRON AND STEEL SCRAP

CEILING SHIPPING POINT PRICES FOR STEEL SCRAP ORIGINATING IN YARDS SITUATED IN NEW YORK CITY

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this amendment to Ceiling Price Regulation 5 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment to Ceiling Price Regulation 5 modifies the provisions of section 4 (d) which establish ceiling shipping point prices for steel scrap at shipping points in New York City and Brooklyn, New York.

Prior to the issuance of this amendment, section 4 (d) provided that the ceiling shipping point price of the base grade, OPS Grade 1, No. 1 bundles, with differentials established in section 3 of CPR 5 for other grades, at all shipping points in New York City and Brooklyn, New York, should be $36.99 per gross ton. The definition of shipping point which is pertinent here is stated in section 28 (i) to be the point where the scrap has been placed f. o. b. railroad cars.

It has now come to the attention of the Office of Price Stabilization that there is at least one dealer in iron and steel scrap whose yard is located in New York City but who uses rail facilities situated outside New York City. Historically, this dealer has been recognized in the trade as a New York City dealer and he is in direct competition with the other dealers situated in New York City. The closest rail point to his yard is beyond the New York City limits, and the railroad has constructed special facilities at this rail point for this dealer. The rail rates from this rail point outside New York City to Bethlehem and Pittsburgh, Pennsylvania, are the same as the rates to Bethlehem and Pittsburgh, Pennsylvania, prevailing at the two rail points in New York City which are closest to this scrap dealer's yard.

However, due to the wording of section 4 (d) and the definition of "shipping point" as set forth in section 28 (i) a dealer is not entitled to use the ceiling shipping point prices established for the New York City area if he loads at a rail point outside New York City even though his yard is situated in New York City. As a result, a dealer in this position is not able to effectively compete with other dealers in the New York City area who use rail points within the city of New York.

Therefore, it appears that Ceiling Price Regulation 5, although generally fair and equitable to the group which it covers, may work hardship or inequity on at least one dealer in iron and steel scrap. The Office of Price Stabilization has recognized that adjustments should be made in such individual hardship cases. To alleviate this unintended hardship on such dealers in iron and steel scrap, this amendment to CPR 5 is being issued. It will permit a dealer to use the ceiling shipping point prices established for New York City when the scrap originates at his yard located in New York City even though he may use a rail point located outside New York City, if such rail point is the closest one to his yard where the scrap in question originates. It is believed that this modification of section 4 (d) will evoke a more equitable situation and will enable such dealers to effectively compete in the New York City area.

In the formulation of this amendment there has been consultation with industry representatives, including trade association representatives, to the extent practicable, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

1. Section 4 (d) is amended to read as follows:

(d) The ceiling shipping point price for No. 1 bundles (with differentials established in section 3 hereof for all other grades) at all shipping points in New York City (or Brooklyn, New York) shall be $36.99 per gross ton: *Provided, however,* a dealer whose yard is situated in New York City and who customarily places his scrap f. o. b. railroad cars at a point outside New York City may use the ceiling shipping point prices established above for shipping points in New York City, if the rail point outside New York City which he uses is the closest rail point to the yard in which the scrap originated.

Effective date. This amendment to Ceiling Price Regulation 5 is effective August 2, 1952.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

ELLIS ARNALL,
Director of Price Stabilization.

[NPA Order M-6A, Direction 3 of July 28, 1952]

M-6A—STEEL DISTRIBUTORS

DIR. 3—SUPPLEMENTAL SHIPMENTS BY PRODUCERS—LIMITATIONS ON DISTRIBUTORS' DELIVERIES

This direction to NPA Order M-6A is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this direction, consultation with industry representatives has been rendered impracticable due to the need for immediate action.

Sec.
1. What this direction does.
2. Limitations on deliveries by distributors.
3. Shipments to distributors.
4. Item limitation.

AUTHORITY: Sections 1 to 4 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this direction does.* This direction makes a number of changes in the present orders and regulations concerning steel distributors. These changes are occasioned by the recent work stoppage in the steel industry. It requires certain forms and shapes in stock or acquired by distributors to be shipped or delivered by them only on defense orders for a limited period. It increases the quantities of steel required to be shipped by producers to distributors subject to certain limitations. It makes provision with respect to the recent production losses. It temporarily modifies section 5 of NPA Order M-6A by permitting steel distributors to accept and fill orders for smaller quantities than heretofore required.

SEC. 2. *Limitations on deliveries by distributors.* From the effective date of this direction through the close of business August 7, 1952, no steel distributor shall ship or deliver any steel in the shapes and forms listed in List A of this direction from his inventory of such steel on hand on the effective date of this direction, except on authorized controlled material orders bearing allotment symbols A, B, C, or E, and a digit, or Z-2, or allotment symbols accompanied with the suffix B-5. No steel distributor, who receives steel in the shapes and forms listed in List A of this direction during the period from the effective date of this direction through the close of business December 31, 1952, shall ship or deliver more than 50 percent of the tonnage of any product listed in List A received in any one shipment during such period for a period of 15 days after receipt of any such shipment, except on authorized controlled material orders bearing allotment symbols A, B, C, or E, and a digit, or Z-2, or allotment symbols accompanied with the suffix B-5. Accurate records of each transaction covered by this section shall be set up and maintained by each steel distributor in accordance with and pursuant to the provisions of section 10 of NPA Order M-6A.

SEC. 3. *Shipments to distributors.* (a) Subject to the limitations in this paragraph, each producer shall be obligated to accept purchase orders from steel distributor customers which call for shipments during the months of September, October, and November 1952, or to ship on unfilled orders calling for earlier delivery, up to a minimum of not less than 120 percent of the base tonnage of each steel distributor customer instead of the 100 percent presently provided in section 3 of NPA Order M-6A. A producer may cancel orders (to the extent hereafter provided) for any product received from any steel distributor customer in excess of such distributor's base tonnage of that product if the total tonnage of orders for that product

scheduled for delivery in that month from steel distributors, further converters as defined in NPA Order M–1, and from persons placing authorized controlled material orders bearing allotment symbols A, B, C, or E, and a digit, or Z–2, or allotment symbols accompanied with the suffix B–5, exceeds 50 percent of the producer's planned production for that month. The amount by which such orders mentioned in the preceding sentence exceeded 50 percent of such producer's planned production is herein referred to as the "supplemental tonnage". If the supplemental tonnage exceeds 20 percent of the base tonnage of all steel distributor customers, then all steel distributor orders for that product in excess of the base tonnage shall be cancelled. If the supplemental tonnage is less than 20 percent of the base tonnage of all steel distributor customers then a percentage of the orders for that product from any steel distributor customer in excess of such distributor's base tonnage of that product shall be cancelled. Such percentage shall be determined by dividing the difference between 20 percent of the base tonnage and the supplemental tonnage of all steel distributor customers by 20 percent of the base tonnage. If any such order is cancelled there shall be no obligation upon the producer cancelling the order to fill the same in a subsequent month.

(b) To the extent practicable and within the limitations of paragraph (a) of this section, producers shall ship during August 1952 to their steel distributor customers up to a minimum of 120 percent of their base tonnage on orders calling for delivery during the month of August or in prior months.

(c) Under section 3 to NPA Order M–6A producers are required to accept purchase orders from steel distributor customers up to a minimum of 100 percent of such distributor's base tonnage. To the extent that shipment of such orders were or are stopped for reasons occasioned by the work stoppage, producers are not required to accept orders pursuant to section 3 of NPA Order M–6A, provided tonnage is shipped to distributors in the quantities provided in section 3 (a) of this direction, it being the intent hereof that the flow of steel to distributors commence immediately pursuant to this section 3, but that producers be relieved of any obligation to make up lost tonnages.

SEC. 4. *Item limitation.* During the period from the effective date of this direction through the close of business November 29, 1952, no steel distributor shall be required to make delivery on an authorized controlled material order from inventory to any one customer to any one destination during any calendar week of any item of a steel product in quantities in excess of the following:

Any item of carbon steel more than 4,000 pounds.

Any item of alloy steel more than 2,500 pounds.

Any item of stainless steel sheet more than 1,000 pounds.

Any item of stainless bars and plates more than 500 pounds.

Any item of stainless tubing or pipe more than 500 pounds or feet, whichever is less.

In no case shall a steel distributor be required to make deliveries to any one customer aggregating 20,000 pounds or more during any calendar week unless the deliveries include 10 or more different items, subject to the limitations of the preceding sentence as to each item.

This direction shall take effect July 28, 1952.

[CMP Regulation 1, Direction 15 of July 29, 1952]

CMP REG. 1—BASIC RULES OF THE CONTROLLED MATERIALS PLAN

DIR. 15—SPECIAL DELIVERY STATUS OF CERTAIN MILITARY ORDERS

This direction under CMP Regulation No. 1 is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this direction, consultation with industry representatives has been rendered impracticable due to the need for immediate action and because the direction affects many different industries.

Sec.
1. What this direction does.
2. Preferential status of certain authorized controlled material orders.
3. Applicability of other regulations and orders.

AUTHORITY: Sections 1 to 3 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR 1951 Supp.

SECTION 1. *What this direction does.* The purpose of this direction is to insure, so far as practicable, that all authorized controlled material orders placed with steel mills in support of military, atomic energy, and machine tool programs, calling for delivery prior to the fourth quarter (or calling for delivery in the first 2 months of the fourth quarter when placed with third quarter allotments pursuant to Direction 16 to CMP Regulation No. 1), are delivered not later than November 30, 1952. This will be accomplished by according preferential delivery status to such orders.

SEC. 2. *Preferential status of certain authorized controlled material orders.* A steel controlled materials producer who has accepted, or hereafter accepts, an authorized controlled material order for steel bearing a program identification A, B, C, or E, and a digit (including the suffix B–5), or Z–2, calling for delivery on or before September 30, 1952, or calling for delivery in October or November 1952 when placed with a third calendar quarter allotment pursuant to Direction 16 to CMP Regulation No. 1, shall make shipment against such order as close to the requested delivery date as is practicable. If it not possible for him to make shipment by November 30, 1952, against all authorized controlled material orders for steel calling for delivery on or before September 30, 1952, or calling for delivery in October or November 1952 when placed with third calendar quarter allotments pursuant to Direction 16 to CMP Regulation No. 1, he must schedule for production and ship against orders bearing a program identification A, B, C, or E, and a digit (including the suffix B–5), or Z–2, in preference to orders not bearing such a program identification: *Provided, however,* That those provisions of NPA Order M–1 and NPA Order M–6A pertaining to shipments by producers to further converters and distributors are not superseded. To the extent that he is unable to make shipment by November 30, 1952, against all authorized controlled material orders for steel bearing a program identification A, B, C, or E, and a digit (including the suffix B–5), or Z–2, calling for delivery on or before September 30, 1952, or calling for delivery in October or November 1952 when placed with third calendar quarter allotments pursuant to Direction 16 to CMP Regulation No. 1, he shall promptly notify NPA, Iron and Steel Division, by letter or telegram, listing such orders.

SEC. 3. *Applicability of other regulations and orders.* The provisions of CMP Regulation No. 1, Revised CMP Regulation No. 6, NPA Order M–1, including the directions and amendments thereto, and of any other NPA regulation and order heretofore issued, are superseded to the extent to which they are inconsistent with the provisions of this direction, but in all other respects the provisions of such regulations and orders shall remain in full force and effect.

This direction shall take effect July 29, 1952.

CMP REG. 1—BASIC RULES OF THE CONTROLLED MATERIALS PLAN

DIR. 16—THIRD AND FOURTH QUARTER AUTHORIZED CONTROLLED MATERIAL ORDERS

This direction under CMP Regulation No. 1 is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this direction, consultation with industry representatives has been rendered impracticable due to the need for immediate action and because the direction affects many different industries.

Sec.
1. What this direction does.
2. Third quarter authorized controlled material orders.
3. Fourth quarter authorized controlled material orders.
4. Applicability of other regulations and orders.

AUTHORITY: Sections 1 to 4 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR 1951 Supp.

SECTION 1. *What this direction does.* The purpose of this direction is to permit the placement and acceptance of certain third quarter 1952 and fourth quarter 1952 authorized controlled material orders even though they call for delivery after the end of such quarters.

SEC. 2. *Third quarter authorized controlled material orders.* (a) The provisions of this section apply to all authorized controlled material orders for the third calendar quarter of 1952 which are placed on and after the effective date of this direction.

(b) An authorized controlled material order for steel placed pursuant to an allotment for the third calendar quarter of 1952 which contains the quarterly identification 3Q52, or an authorized controlled material order for steel placed pursuant to self-authorization (for example, Direction 1 to CMP Regulation No. 1) or quota (for example, CMP Regulation No. 5) for the third calendar quarter of 1952 which does not contain a quarterly identification, may call for delivery at any time up to November 30, 1952: *Provided, however,* That such order is placed pursuant to load time requirements. A steel controlled materials producer or a steel controlled materials distributor who receives an authorized controlled material order for steel which bears the quarterly identification 3Q52 and which calls for delivery between October 1, 1952, and November 30, 1952, shall accept and fill such order in preference to an authorized controlled material order which bears the quarterly identification 4Q52 and which calls for delivery between October 1, 1952, and November 30, 1952, notwithstanding the sequence of order placement.

SEC. 3. *Fourth quarter authorized controlled material orders.* (a) The provisions of this section apply only to authorized controlled material orders for the fourth calendar quarter of 1952 which do not bear a program identification A, B, C, or E, and a digit (including the suffix B–5), or Z–2, and which are placed on and after the effective date of this direction.

(b) An authorized controlled material order for steel placed pursuant to an allotment for the fourth calendar quarter of 1952 which contains the quarterly identification 4Q52, or an authorized controlled material order for steel placed pursuant to self-authorization (for example, Direction 1 to CMP Regulation No. 1) or quota (for example, CMP Regulation No. 5) for the fourth calendar quarter of 1952 which does not contain a quarterly identification, may call for delivery at any time from October 1, 1952, to February 28, 1953: *Provided, however,* That such order is placed pursuant to lead time requirements. A steel controlled materials producer or a steel controlled materials distributor who receives an authorized controlled material order for steel which bears the quarterly identification 4Q52 and which calls for delivery between January 1, 1953, and February 28, 1953, shall accept and fill such order in preference to an order which bears the quarterly identification 1Q53 and which calls for delivery between January 1, 1953, and February 28, 1953, notwithstanding the sequence of order placement.

SEC. 4. *Applicability of other regulations and orders.* The provisions of CMP Regulations Nos. 1 and 4, Revised CMP Regulation No. 6, NPA Orders M–1 and M–6A, including the directions and amendments thereto, and of any other NPA regulation and order heretofore issued, are superseded to the extent to which they are inconsistent with the provisions of this direction, but in all other respects the provisions of such regulations and orders shall remain in full force and effect.

This direction shall take effect July 29, 1952.

CMP REG. 2—INVENTORIES OF CONTROLLED MATERIALS

This amendment is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this amendment, consultation with industry representatives has been rendered impracticable due to the need for immediate action and because the amendment affects many different industries.

This amendment affects CMP Regulation No. 2, as amended October 12, 1951, by amending paragraph (a) of section 3 to read as follows:

(a) No user of controlled material shall accept delivery of any item of steel listed in Schedule I of CMP Regulation No. 1, if his inventory of such item is, or by such receipt would become, in excess of the quantity of such item necessary to meet his deliveries, supply his services, or perform his operations, on the basis of his currently scheduled method and rate of operation during the succeeding 45-day period, or in excess of a "practicable minimum working inventory" (as defined in NPA Reg. 1), whichever is less: *Provided, however,* That from September 1, 1952, to December 31, 1952, the above specified 45-day period shall be a 30-day period.

(64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154)

This amendment shall take effect July 29, 1952.

CMP REG. 3—PREFERENCE STATUS OF DELIVERY ORDERS UNDER THE CONTROLLED MATERIALS PLAN

DIR. 4—SPECIAL PREFERENCE STATUS OF CERTAIN DO RATED ORDERS

This amended direction under CMP Regulation No. 3 is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this direction as amended, consultation with industry representatives has been rendered impracticable due to the need for immediate action and because the direction affects many different industries.

Sec.
1. What this direction does.
2. Status of certain DO rated orders.
3. Applicability of other regulations and orders.

AUTHORITY: Sections 1 to 3 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951,

[1] AISI—M17, M15, M14, and oriented.

[2] Wide-flanged sections are steel beams or columns having parallel face flanges rolled on a universal structural mill or Gray mill, in sizes ranging in depth from 4 to 36 inches.

16 F. R. 61; 3 CFR 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR 1951 Supp.

SECTION 1. *What this direction does.* The purpose of this direction is to channel into defense programs, so far as practicable, Class A and B products containing steel. This will be accomplished by according special preference status to DO rated orders for such products, calling for delivery on or before December 31, 1952, placed in support of military, atomic energy, and machine tool programs.

SEC. 2. *Status of certain DO rated orders.* Any DO rated order for a Class A product containing steel or a Class B product containing steel, bearing a program identification A, B, C, or E, and a digit (including the suffix B–5), or Z–2, calling for delivery on or before December 31, 1952, must be accepted and filled in preference to all other DO rated orders for Class A products containing steel or Class B products containing steel, previously or subsequently received, but which do not bear a program identification A, B, C, or E, and a digit (including the suffix B–5), or Z–2: *Provided, however,* That such a DO rated order need not be accepted if filling it would stop or interrupt the supplier's operations during the next 15 days in a way which would cause a substantial loss of total production or a substantial delay in operations. All DO rated order (including those previously placed) for Class A products containing steel or Class B products containing steel, which bear a program identification A, B, C, or E, and a digit (including the suffix B–5), or Z–2, shall have equal preferential status.

SEC. 3. *Applicability of other regulations and orders.* The provisions of CMP Regulation No. 3, NPA Reg. 2, including the directions and amendments thereto, and of any other NPA regulation and order heretofore issued, are superseded to the extent to which they are inconsistent with the provisions of this direction, but in all other respects the provisions of such regulations and orders shall remain in full force and effect.

This direction, as amended, shall take effect July 29, 1952.

SECTION 1. *What this direction does.* The purpose of this direction is to permit the placement and acceptance of certain third quarter 1952 and fourth quarter 1952 authorized controlled material orders even though they call for delivery after the end of such quarters.

SEC. 2. *Third quarter authorized controlled material order.* (a) The provisions of this section apply to all authorized controlled material orders for the third calendar quarter of 1952 which are placed on and after the effective date of this direction.

(b) An authorized controlled material order for steel placed pursuant to an allotment for the third calendar quarter of 1952 which contains the quarterly identification 3Q52, or placed for delivery in the third calendar quarter of 1952 pursuant to the provisions relating to self-authorization set forth in either Article IV of Revised CMP Regulation No. 6 or in NPA Order M–100, may call for delivery at any time up to November 30, 1952: *Provided, however,* That such order is placed pursuant to lead-time requirements. A steel controlled materials producer or a steel controlled materials distributor who receives an authorized controlled material order for steel which bears the quarterly identification 3Q52 and which calls for delivery between October 1, 1952, and November 30, 1952, shall accept and fill such order in preference to an authorized controlled material order which bears the quarterly identification 4Q52 and which calls for delivery between October 1, 1952, and November 30, 1952, notwithstanding the sequence of order placement.

SEC. 3. *Fourth quarter authorized controlled material orders.* (a) The provisions of this section apply only to authorized controlled material orders for the fourth calendar quarter of 1952 which do not bear a program identification A, B, C, or E, and a digit (including the suffix B–5), or Z–2, and which are placed on and after the effective date of this direction.

(b) An authorized controlled material order for steel placed pursuant to an allotment for the fourth calendar quarter of 1952 which contains the quarterly identification 4Q52, or placed for delivery in the fourth calendar quarter of 1952 pursuant to the provisions relating to self-authorization set forth either in Article IV of Revised CMP Regulation No. 6 or in NPA Order M–100, may call for delivery at any time from October 1, 1952, to February 28, 1953: *Provided, however,* That such order is placed pursuant to lead-time requirements. A steel controlled materials producer or a steel controlled materials distributor who receives an authorized controlled material order for steel which bears the quarterly identification 4Q52 and which calls for delivery between January 1, 1953, and February 28, 1953, shall accept and fill such order in preference to an order which bears the quarterly identification 1Q53 and which calls for delivery between January 1, 1953, and February 28, 1953, notwithstanding the sequence of order placement.

SEC. 4. *Applicability of other regulations and orders.* The provisions of CMP Regulations Nos. 1 and 4, Revised CMP Regulation No. 6, NPA Orders M–1 and M–6A, including the directions and amendments thereto, and of any other NPA regulation and order heretofore issued, are superseded to the extent to which they are inconsistent with the provisions of this direction, but in all other respects the provisions of such regulations and orders shall remain in full force and effect.

This direction shall take effect July 29, 1952.

NATIONAL PRODUCTION AUTHORITY,
By JOHN B. OLVERSON,
Recording Secretary.

Chapter XXI—Office of Rent Stabilization, Economic Stabilization Agency

[Rent Regulation 1, Amdt. 66 to Schedule A]

[Rent Regulation 2, Amdt. 64 to Schedule A]

RR 1—HOUSING

RR 2—ROOMS IN ROOMING HOUSES AND OTHER ESTABLISHMENTS

SCHEDULE A—DEFENSE-RENTAL AREAS

CERTAIN STATES

Effective July 30, 1952, Rent Regulation 1 and Rent Regulation 2 are amended as set forth below.

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C App. Sup. 1894)

Issued this 25th day of July 1952.

TIGHE E. WOODS,
Director of Rent Stabilization.

1. Schedule A, Item 33a, is amended to describe the counties in the defense-rental area as follows:

Monterey County, except the Cities of Carmel-by-the-Sea, Monterey, Pacific Grove and Salinas.

In Monterey County, the Townships of Alisal, Castroville, Gonzales, Monterey and Pajaro, except the Cities of Carmel-by-the-Sea, Monterey, Pacific Grove and Salinas.

In Santa Cruz County, the Township and City of Watsonville; in San Benito County, the Townships of Hollister and San Juan.

This decontrols the Cities of Monterey and Pacific Grove in Monterey County, California, portions of the Monterey Bay, California, Defense-Rental Area.

2. Schedule A, Item 83, is amended to describe the counties in the defense-rental area as follows:

Cook County, except (i) the Cities of Berwyn, Blue Island, Calumet City, Chicago Heights, Des Plaines, Harvey, Park Ridge, and that portion of the City of Elgin located therein, (ii) the Town of Cicero, (iii) the Villages of Arlington Heights, Bartlett, Bellwood, Brookfield, Burnham, Calumet Park, Crestwood, Dolton, East Hazelcrest, Flossmoor, Franklin Park, Glencoe, Glenview, Hazelcrest, Hillside, Homewood, Kenilworth, La Grange Park, Lansing, Lemont, Lyons, Markham, Matteson, Morton Grove, Mt. Prospect, Northfield, Oak Forest, Orland Park, Palatine, Phoenix, Riverdale, River Forest, Riverside, South Holland, Thornton, Tinley Park, Westchester, Western Springs, Wheeling, Wilmette, Winnetka, and (iv) those portions of the Villages of Barrington, Hinsdale and Steger located in said Cook County; Kane County, except that portion of the City of Elgin located therein, the Cities of Batavia, Geneva and St. Charles, and the Villages of Carpentersville, East Dundee, Hampshire, South Elgin and West Dundee; and Lake County, except the City of Lake Forest, the Villages of Deerfield and Grayslake, and that portion of the Village of Barrington located therein.

This decontrols the Town of Cicero in Cook County, Illinois, a portion of the Chicago, Illinois, Defense-Rental Area.

3a. In Rent Regulation 1, Item 91 of Schedule A is amended to describe the counties in the defense-rental area as follows:

Champaign County, except the Cities of Champaign and Urbana, and the Village of St. Joseph; and Vermilion County.

b. In Rent Regulation 2, Item 91 of Schedule A is amended to describe the counties in the defense-rental area as follows:

Champaign County, except the Cities of Champaign and Urbana, and the Village of St. Joseph.

This decontrols the Village of St. Joseph in Champaign County, Illinois, a portion of the Champaign-Vermilion, Illinois, Defense-Rental Area.

4. Schedule A, Item 102, is amended to describe the counties in the defense-rental area as follows:

Lake County, except the Cities of Crown Point, East Chicago, Hammond, Hobart and Whiting, the Towns of Highland and Munster, and the Townships of Cedar Creek, Eagle Creek, Hanover, West Creek and Winfield.

Ditto.

In Lake County, the Cities of Crown Point and Whiting, the Towns of Highland and Munster, and the Townships of Hanover and Winfield.

This decontrols the Cities of East Chicago, Hammond and Hobart in Lake County, Indiana, portions of the Gary-Hammond, Indiana, Defense-Rental Area.

5. Schedule A, Item 149, is amended to describe the counties in the defense-rental area as follows:

Oakland County, except (i) the Townships of Addison, Avon, Bloomfield, Brandon, Commerce, Farmington, Groveland, Highland, Holly, Independence, Milford, Novi, Oakland, Orion, Oxford, Pontiac, Rose, Springfield, Troy, Waterford and West Bloomfield, (ii) the Villages of Clarkston, Holly, Lake Orion, Leonard, Milford, Ortonville, Oxford, Rochester and that portion of Northville located in Oakland County, and (iii) the Cities of Berkley, Birmingham, Bloomfield Hills, Clawson, Farmington, Ferndale, Hazel Park, Pleasant Ridge, Pontiac, Royal Oak, South Lyon and Sylvan Lake; Wayne County, except (i) the Cities of Belleville, Ecorse, Garden City, Grosse Pointe, Grosse Pointe Farms, Grosse Pointe Park, Grosse Pointe Woods, Lincoln Park, Livonia, Melvindale, Plymouth and River Rouge, (ii) the Villages of Allen Park, Flat Rock, Grosse Pointe Shores, Inkster, Rockwood, Trenton and Wayne, (iii) that portion of the Village of Northville located in Wayne County, and (iv) the Townships of Brownstown, Canton, Ecorse, Grosse Ile, Huron, Nankin, Northville, Plymouth, Romulus, Sumpter, Taylor and Van Buren; and Macomb County, except the Cities of East Detroit and Mount Clemens, the Villages of Fraser and Roseville, and the Townships of Armada, Bruce, Harrison, Lenox, Macomb, Ray, Richmond, Shelby, Sterling and Washington.

This decontrols the City of Ecorse in Wayne County, Michigan, a portion of the Detroit, Michigan, Defense-Rental Area.

6. Schedule A, Item 160, is amended to describe the counties in the defense-rental area as follows:

Anoka, Dakota and Hennepin Counties; Ramsey County, except the City of White Bear Lake, the Town of White Bear, and the Village of New Brighton; and Washington County, except the City of Stillwater, and the Village of Bayport.

This decontrols the Town of White Bear in Ramsey County, Minnesota, a portion of the Minneapolis-St. Paul, Minnesota, Defense-Rental Area.

7. Schedule A, Item 228, is amended to describe the counties in the defense-rental area as follows:

Cuyahoga County, except the Cities of Bedford, Berea, Shaker Heights and University Heights, and the Villages of Bay, Beachwood, Bentleyville, Bratenahl, Brecksville, Brooklyn Heights, Chagrin Falls, Gates Mills, Highland Heights, Hunting Valley, Independence, Lyndhurst, Mayfield Heights, Moreland Hills, North Olmsted, North Royalton, Oakwood, Orange, Parkview, Pepper Pike, Seven Hills, Solon, Strongsville, Valley View, Warrensville Heights, Westlake and West View.

This decontrols the Village of Brooklyn Heights in Cuyahoga County, Ohio, a portion of the Cleveland, Ohio, Defense-Rental Area.

8. Schedule A, Item 229, is amended to describe the counties in the defense-rental area as follows:

Franklin County, except the City of Upper Arlington, the Villages of Riverlea, Westerville and Worthington, and that part of the Village of Canal Winchester located in Franklin County.

In Licking County, the City of Newark and the Townships of Madison and Newark.

This decontrols the Villages of Riverlea and Westerville in Franklin County, Ohio, portions of the Columbus, Ohio, Defense-Rental Area.

9. Schedule A, Item 237, is amended to describe the counties in the defense-rental area as follows:

Portage County, except the Cities of Kent and Ravenna, and the Villages of Aurora and Mantua.

This decontrols the Village of Mantua in Portage County, Ohio, a portion of the Ravenna, Ohio, Defense-Rental Area.

All decontrols effected by these amendments are based on resolutions submitted under section 204 (j) (3) of the Housing and Rent Act of 1947, as amended.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 6—UNITED STATES GOVERNMENT LIFE INSURANCE

PART 8—NATIONAL SERVICE LIFE INSURANCE

MISCELLANEOUS AMENDMENTS

1. In Part 6, § 6.2 (a) is amended to read as follows:

§ 6.2 *Applications for insurance under section 5 of the Servicemen's Indemnity Act of 1951 (Pub. Law 23, 82d Cong.).* (a) Any person who, while in the active service on or after April 25, 1951, surrenders a permanent plan of United States Government life insurance which is in force other than as extended term insurance, for its cash value under the provisions of § 6.115, or under § 6.186 if the policy has no cash value, shall be granted a new policy of United States Government life insurance as provided in § 6.3 (a) upon written application signed by the applicant and payment of the required premium within 120 days after separation from such active service. Such insurance shall be granted without medical examination. If the applicant is mentally incompetent the application for insurance under this paragraph may be made only by the guardian (committee or conservator), and, if required under the State law, after the court shall have authorized the fiduciary to make such application.

* * * * *

2. A new centerhead immediately preceding § 6.3 is added as follows: "United States Government Life Insurance Issued Pursuant to Section 5 of the Servicemen's Indemnity Act."

3. In § 6.3, paragraph (a) is amended to read as follows:

§ 6.3 *United States Government life insurance issued pursuant to section 5 of the Servicemen's Indemnity Act of 1951.* (a) United States Government life insurance on a permanent plan, issued pursuant to the provisions of section 5 of the Servicemen's Indemnity Act of 1951, shall be issued on the same plan and under the same terms and conditions as United States Government life insurance surrendered under the provisions of such section. The amount of permanent plan United States Government life insurance issued pursuant to section 5 of the Servicemen's Indemnity Act of 1951 shall not be in excess of the amount of insurance surrendered under such section.

* * * * *

4. In § 6.86, paragraph (a) is amended to read as follows:

§ 6.86 *Applications for reinstatement of United States Government life insurance pursuant to section 5 of the Servicemen's Indemnity Act of 1951.* (a) Any person who, while in the active service on or after April 25, 1951, surrenders a permanent plan policy of United States Government life insurance which is in force other than as extended term insurance, for its cash value under the provisions of § 6.115, or under § 6.186, if the policy has no cash value, upon written application made by any such person within 120 days after separation from such active service, may reinstate such surrendered United States Government life insurance (or any portion thereof in multiples of $500, not less than $1,000) without medical examination upon payment of (1) an amount required to provide the full reserve of the insurance at the end of the month prior to the month in which application is made and (2) the full premium on the amount of insurance for the month in which application is made. If the applicant is mentally incompetent the application for reinstatement under this paragraph may be made only by the guardian (committee or conservator), and, if required under the State law, after the court shall have authorized the fiduciary to make such application.

* * * * *

5. A new centerhead immediately following § 6.185 is added as follows: "Surrender Under Section 5, Public Law 23, 82d Congress of Permanent Plan Policies in Force Less Than One Year"

6. A new § 6.186 is added as follows:

§ 6.186 *Surrender of permanent plan policies of United States Government life insurance, in force for less than one year, under the provisions of section 5, Servicemen's Indemnity Act of 1951.* A permanent plan policy of United States Government life insurance in force for less than 1 year by payment or waiver of premiums shall not have a cash value. Such a policy which is not lapsed may be surrendered by the insured while in active service, with right of replacement, pursuant to the provisions of section 5 of the Servicemen's Indemnity Act of 1951, upon written request therefor and upon complete surrender of the policy with all claims thereunder: *Provided,* That such surrender shall be effective as of the date written request therefor is delivered to the Veterans' Administration. If forwarded by mail, properly addressed, the postmark date will be taken as the date of delivery; if forwarded through military channels, the date the request is placed in military channels will be taken as the day of delivery. (Pub. Law 23, 82d Cong.)

(Sec. 5, 43 Stat. 608, as amended, sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9, sec. 6, Pub. Law 23, 82d Cong.; 38 U. S. C. 11a, 426, 707. Interpret or apply secs. 300, 301, 43 Stat. 624, as amended; 38 U. S. C. 511, 512)

7. In Part 8, § 8.0 (d) (1) is amended to read as follows:

§ 8.0 *Eligibility.* * * *

(d) *Applications for insurance under section 5, of the Servicemen's Indemnity Act of 1951 (Pub. Law 23, 82d Cong.).* (1) Any person who, while in the active service on or after April 25, 1951, surrenders a permanent plan of National Service life insurance which is not lapsed, for its cash value under the provisions of § 8.27 (a) or (b), or under § 8.114, if the policy has no cash value, shall be granted a new policy of National Service life insurance as provided in § 8.110 (a) upon written application signed by the applicant and payment of the required premium within 120 days after separation from such active service. Such insurance shall be granted without medical examination. If the applicant is mentally incompetent the application for insurance under this paragraph may be made only by the guardian (committee or conservator), and, if required under the State law, after the court shall have authorized the fiduciary to make such application.

* * * * *

8. In § 8.22, paragraph (b) (1) is amended to read as follows:

§ 8.22 *Reinstatement of National Service life insurance.* * * *

(b) *Applications for reinstatement of insurance pursuant to section 5 of the Servicemen's Indemnity Act of 1951.* (1) Any person who, while in the active service on or after April 25, 1951, surrenders a permanent plan policy of National Service life insurance which is not lapsed, for its cash value under the provisions of § 8.27 (a) or (b), or under § 8.114, if the policy has no cash value, upon written application made by any such person within 120 days after separation from such active service, may reinstate such surrendered National Service life insurance (or any portion thereof in multiples of $500, not less than $1,000) without medical examination upon payment of (i) an amount required to provide the full reserve of the insurance at the end of the month prior to the month in which application is made and (ii) the full premium on the amount of insurance for the month in which application is made. If the applicant is mentally incompetent the application for reinstatement under this paragraph may be made only by the guardian (committee or conservator), and, if required under the State law, after the court shall have authorized the fiduciary to make such application.

* * * * *

9. In § 8.110, paragraph (a) is amended to read as follows:

§ 8.110 *National Service life insurance issued pursuant to section 5 of the Servicemen's Indemnity Act of 1951.* (a) National Service life insurance on a permanent plan, issued pursuant to the provisions of section 5 of the Servicemen's Indemnity Act of 1951 shall be issued on the same plan and under the same terms and conditions as National Service life insurance surrendered under the provisions of such section: *Provided,* That waiver of premiums under section 602 (n) of the National Service Life Insurance Act, as amended, shall not be denied because the total disability of the applicant commenced prior to the date of his application for such insurance.

The amount of permanent plan National Service life insurance issued pursuant to section 5 of the Servicemen's Indemnity Act of 1951 shall not be in excess of the amount of insurance surrendered under such section.

* * * * *

10. In § 8.112, paragraph (a) is amended to read as follows:

§ 8.112 *National Service life insurance issued under section 621 of the National Service Life Insurance Act, as amended April 25, 1951.* (a) National Service life insurance granted under the provisions of section 621 of the National Service Life Insurance Act, as amended, shall be issued upon the same terms and conditions as are contained in the standard policies of National Service life insurance on the 5-year level premium term plan except (1) all such insurance may be renewed for successive 5-year term periods at the attained ages in accordance with the provisions of § 8.86 but may not be exchanged for or converted to insurance on any other plan; (2) the premium rates for such insurance shall be based on the Commissioners 1941 Standard Ordinary Table of Mortality with interest at the rate of 2¼ per centum per annum; (3) all settlements on policies involving annuities shall be calculated on the basis of the annuity table for 1949, with interest at the rate of 2¼ per centum per annum; and (4) insurance issued under this section of the act shall be nonparticipating.

* * * * *

11. A new centerhead immediately following § 8.113 is added as follows: "Surrender Under Section 5 of Public Law 23, 82d Congress of Permanent Plan Policies in Force Less Than One Year."

12. A new § 8.114 is added as follows:

§ 8.114 *Surrender of permanent plan policies of National Service life insurance in force for less than one year, under the provisions of section 5, Servicemen's Indemnity Act of 1951.* (a) A permanent plan policy of National Service life insurance in force for less than 1 year by payment or waiver of premiums shall not have a cash value. Such a policy which is not lapsed may be surrendered by the insured while in active service, with right of replacement, pursuant to the provisions of section 5 of the Servicemen's Indemnity Act of 1951, upon written request therefor and upon complete surrender of the policy with all claims thereunder: *Provided,* That such surrender shall be effective as of the date written request therefor is delivered to the Veterans' Administration. If forwarded by mail, properly addressed, the postmark date will be taken as the date of delivery; if forwarded through military channels, the date the request is placed in military channels will be taken as the day of delivery. (Pub. Law 23, 82d Cong.)

(Sec. 608, 54 Stat. 1012, as amended, sec. 6, Pub. Law 23, 82d Cong.; 38 U. S. C. 808. Interpret or apply sec. 602, 54 Stat. 1009, as amended; 38 U. S. C. 802)

This regulation effective July 30, 1952.

[SEAL] H. V. STIRLING,
Deputy Administrator.

[F. R. Doc. 52-8326; Filed, July 29, 1952; 8:48 a. m.]

Chapter II—Veterans' Education Appeals Board

PART 200—RULES OF PRACTICE

MISCELLANEOUS AMENDMENTS

The Board, pursuant to authority vested in it by the Veterans' Education and Training Amendments of 1950, Public Law 610, 81st Congress, approved July 13, 1950, particularly section 2 thereof, and finding such action necessary and appropriate for carrying out the provisions of the said act, hereby adopts, promulgates, and prescribes the accompanying additions and revision to its Rules of Practice, effective on and after August 1, 1952:

1. Section 200.37 is revised as follows:

§ 200.37 *Effect of initial decision.* The initial decision shall become the final decision of the Board 40 days after date of issuance of the initial decision, unless

(a) Either of the parties files an appeal therefrom under Rule 38 within 30 days from date of issuance or within such additional time as may be granted by the Board for good cause shown, or

(b) The Board shall, within 40 days from date of issuance, issue an order staying the effective day of the decision or place the case on its own docket for review.

2. A new § 200.43 is added as follows:

§ 200.43 *Petition for rehearing.* Whenever either party desires to question the correctness or sufficiency of the Board's decision, or to amend same, the complaining party must file a petition for rehearing, in quadruplicate, within 15 days from receipt of the decision. All grounds relied upon shall be included in one petition and be accompanied by brief. A petition founded on error of fact shall specify the fact or facts which are regarded as erroneously found, or omitted, with full reference to the record. If founded on error of law the petition shall specify points which the Board is supposed to have erred, with references to authorities relied upon to support the petition. A petition upon the ground of newly discovered evidence shall not be entertained unless it appears therein that the newly discovered evidence came to the knowledge of the party filing the petition after hearing on merits; that it was not for want of due diligence that such evidence did not sooner come to its knowledge; that it is so material that it would probably produce a different decision if a rehearing is granted; and that it is not cumulative. A petition upon the grounds of newly discovered evidence shall be accompanied by an affidavit of the party setting forth the facts in detail which the petitioner expects to be able to prove, the name, occupation, and residence of each witness and the identity of documents; and why such facts could not have been discovered before the hearing by due diligence. A petition for rehearing shall be served by the Board upon the opposite party, who may file response thereto within 20 days unless such time is extended. The petition and response, if any, shall thereafter be considered by the Board in conference, and will there be decided or scheduled for argument and/or for rehearing.

3. A new § 200.44 is added as follows:

§ 200.44 *Inspection of Board's decisions and rulings.* All rulings and final decisions of the Board are available for inspection at the office of the Board and at the various Regional Offices of the Veterans' Administration as listed in Appendix II, Section 1 of this part.

(64 Stat. 338; 38 U. S. C. Chap. 12 note)

Approved: July 11, 1952.

By the Board.

[SEAL] F. J. LONG,
Executive Officer.

[F. R. Doc. 52-8327; Filed, July 29, 1952; 8:48 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[7 CFR Part 55]

SAMPLING, GRADING, GRADE LABELING, AND SUPERVISION OF PACKAGING OF EGGS AND EGG PRODUCTS

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Department is considering, pursuant to the authority contained in the Department of Agriculture Appropriation Act, 1953 (Pub. Law 451, 82d Cong., approved July 5, 1952) or any other act conferring similar authority, an amendment to the regulations (7 CFR Part 55) governing the sampling, grading, grade labeling, and supervision of packaging of eggs and egg products.

The proposed amendment grants the Administrator a greater discretion in the rejection of applications for grading, inspection or sampling service and in the denial of such service to persons presently receiving such service. The proposed amendment is deemed necessary in order to protect and maintain the integrity of, and maintain public confidence in, the grading, inspection and sampling service. Sections 55.11 and 55.56 are being amended, and § 55.59 is being deleted and its provisions amended and included in § 55.56.

All persons who desire to submit written data, views or arguments with respect to the proposed amendment

should file the same with the Director, Poultry Branch, Production and Marketing Administration, U. S. Department of Agriculture, Washington 25, D. C., not later than 10 days following publication of this notice in the FEDERAL REGISTER.

The proposed amendment is as follows:

1. Amend § 55.11 *When application may be rejected,* to read as follows:

§ 55.11 *When application may be rejected.* Any application for grading service, inspection service or sampling service may be rejected by the Administrator (a) for noncompliance with the act or the regulations in this part by the applicant, or by any individual holding office or a responsible position with, or having any interest or share in the applicant; (b) whenever the product involved is owned by, or located on the premises of, a person currently denied the benefits of the act; (c) where any individual holding office or a responsible position with, or having any interest or share in the applicant is currently denied the benefits of the act or was responsible in whole or in part for the current denial of the benefits of the act to any person; or (d) where he determines that the application is a subterfuge on the part of a person currently denied the benefits of the act to obtain grading, inspection or sampling service. Each such applicant shall be notified promptly of the reasons for the rejection.

2. Amend § 55.56 to read as follows:

§ 55.56 *Denial of service.* (a) The following acts or practices may be deemed sufficient cause for the debarment of any person by the Administrator from any or all benefits of the act after opportunity for hearing has been accorded him:

(1) *Misrepresentation, deceptive or fraudulent act or practice.* Any misrepresentation or deceptive or fraudulent act or practice found to be made or committed by any person in connection with:

(i) The making or filing of any application for any grading service, inspection service or sampling service, appeal or regrading service;

(ii) The making of the product accessible for sampling or inspection;

(iii) The use of any grading certificate or inspection certificate issued pursuant to the regulations in this part, or the use of any official stamp, label or identification;

(iv) The use of the terms "United States" or "U. S." in conjunction with the grade of the product; or

(v) The use of any of the aforesaid terms or an official stamp, label or identification in the labeling or advertising of any product.

(2) *Use of facsimile forms.* The unauthorized use of a facsimile form which simulates, in whole or in part, any official certificate, stamp, label or identification authorized to be issued or used under the regulations in this part to evidence the inspection or grade of any product.

(3) *Wilful violation of regulations.* Any wilful violation of the regulations in this part or of any of the supplementary rules and instructions issued thereunder by the Administrator.

(4) *Interfering with a grader or inspector.* (i) Any interference with or obstruction of any inspector or grader in the performance of his duties by intimidation, threats, bribery, ridicule, assault or any other improper means by any person, personally or by an employee, agent or representative.

(ii) The payment by any person, personally or by an employee, agent, or representative, of any gift or gratuity to any inspector or grader for any purpose.

(5) *Misleading labeling or advertising.* The use of the terms "Government graded," "Federal-State graded," or terms of similar import in the labeling or advertising of any product without stating in the label or advertising the U. S. grade of the product as determined by an authorized grader.

(6) *Conduct reflecting on integrity of grading or inspection service.* (i) Any misrepresentation or deceptive or fraudulent act or practice in connection with any product handled or processed in a plant where grading, inspection or sampling service is supplied, irrespective of whether the misrepresentation or deceptive or fraudulent act or practice was made or committed in connection with a product inspected, graded or sampled by such service.

(ii) The existence of any of the circumstances set forth in § 55.11 constituting a basis for the rejection of an application for grading, inspection or sampling service.

(b) Whenever the Administrator has reason to believe that any person, or his employee, agent or representative, has flagrantly or repeatedly committed any of the acts or practices specified in paragraph (a) of this section, he may, without hearing, direct that the benefits of the act be denied such person pending investigation and hearing.

3. Delete § 55.59 *Interfering with a grader, inspector or sampler.*

(Pub. Law 451, 82d Cong., approved July 5, 1952)

Issued at Washington, D. C., this 25th day of July 1952.

[SEAL] K. T. HUTCHINSON,
Acting Secretary of Agriculture.

[7 CFR Part 70]

GRADING AND INSPECTION OF POULTRY AND EDIBLE PRODUCTS THEREOF AND UNITED STATES SPECIFICATIONS FOR CLASSES, STANDARDS, AND GRADES WITH RESPECT THERETO

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Department is considering, pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1953 (Pub. Law 451, 82d Cong., approved July 5, 1952) or any other act conferring similar authority, an amendment to the regulations (7 CFR Part 70) governing the grading and inspection of poultry and edible products thereof and United States classes, standards, and grades with respect thereto.

The proposed amendment grants the Administrator a greater discretion in the rejection of applications for grading or inspection service and in the denial of such service to persons presently receiving such service. The proposed amendment is deemed necessary in order to protect and maintain the integrity of, and maintain public confidence in, the grading and inspection service. Sections 70.6 and 70.7 are being amended and § 70.8 is being deleted, and its provisions amended and included in § 70.7.

All persons who desire to submit written data, views, or arguments with respect to the proposed amendment should file the same with the Director, Poultry Branch, Production and Marketing Administration, U. S. Department of Agriculture, Washington 25, D. C., not later than 10 days following publication of this notice in the FEDERAL REGISTER.

The proposed amendment is as follows:

1. Amend paragraph (f) of § 70.6 *Applying for grading service or inspection service,* to read as follows:

(f) *Rejection of application.* Any application for grading service or inspection service may be rejected by the Administrator (1) for noncompliance with the act or the regulations in this part by the applicant, or by any individual holding office or a responsible position with, or having any interest or share in the applicant; (2) whenever the product involved is owned by, or located on the premises of, a person currently denied the benefits of the act; (3) where any individual holding office or a responsible position with, or having any interest or share in the applicant is currently denied the benefits of the act or was responsible in whole or in part for the current denial of the benefits of the act to any person; or (4) where he determines that the application is a subterfuge on the part of a person currently denied the benefits of the act to obtain grading or inspection service. Each such applicant shall be notified promptly of the reasons for the rejection.

2. Amend § 70.7 to read as follows:

§ 70.7 *Denial of service.* (a) The following acts or practices may be deemed sufficient cause for the debarment of any person by the Administrator from any or all benefits of the act after opportunity for hearing has been accorded him:

(1) *Misrepresentation, deceptive or fraudulent act or practice.* Any misrepresentation or deceptive or fraudulent act or practice found to be made or committed by any person in connection with:

(i) The making or filing of any application for any grading service or inspection service, appeal or regrading service;

(ii) The making of the product accessible for sampling or inspection;

(iii) The use of any grading certificate or inspection certificate issued pursuant to the regulations in this part, or the use of any official stamp, label or identification;

(iv) The use of the terms "United States or "U. S." in conjunction with the grade of the product; or

(v) The use of any of the aforesaid terms or an official stamp, label or identification in the labeling or advertising of any product.

(2) *Use of facsimile forms.* The unauthorized use of a facsimile form which simulates, in whole or in part, any official certificate, stamp, label or identification authorized to be issued or used under the regulations in this part to evidence the inspection or grade of any product.

(3) *Wilful violation of regulations.* Any wilful violation of the regulations in this part or of any of the supplementary rules and instructions issued thereunder by the Administrator.

(4) *Interfering with a grader or inspector.* (i) Any interference with or obstruction of any inspector or grader in the performance of his duties by intimidation, threats, bribery, ridicule, assault or any other improper means by any person, personally or by an employee, agent or representative.

(ii) The payment by any person, personally or by an employee, agent or representative, of any gift or gratuity to any inspector or grader for any purpose.

(5) *Misleading labeling or advertising.* The use of the terms "Government graded," "Federal-State graded," or terms of similar import in the labeling or advertising of any product without stating in the label or advertising the U. S. grade of the product as determined by an authorized grader.

(6) *Conduct reflecting on integrity of grading or inspection service.* (i) Any misrepresentation or deceptive or fraudulent act or practice in connection with any product handled or processed in a plant where grading or inspection service is supplied, irrespective of whether the misrepresentation or deceptive or fraudulent act or practice was made or committed in connection with a product inspected or graded by such service.

(ii) The existence of any of the circumstances set forth in § 70.6 (f) constituting a basis for the rejection of an application for grading or inspection service.

(b) Whenever the Administrator has reason to believe that any person, or his employee, agent or representative, has flagrantly or repeatedly committed any of the acts or practices specified in paragraph (a) of this section, he may, without hearing, direct that the benefits of the act be denied such person pending investigation and hearing.

3. Delete § 70.8 *Interfering with a grader or inspector.*

(60 Stat. 1087; 7 U. S. C. 1621; Pub. Law 451, 82d Cong.)

Issued at Washington, D. C., this 25th day of July 1952.

[7 CFR Part 935]

[Docket No. AO 86-A9]

HANDLING OF MILK IN THE OMAHA-LINCOLN-COUNCIL BLUFFS MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders (7 CFR Part 900) a public hearing was conducted at Omaha, Nebraska, on March 26 and 27, 1952, pursuant to notice thereof which was issued on March 5, 1952 (17 F. R. 2066) upon proposed amendments to the marketing agreement and to the order, as amended, regulating the handling of milk in the Omaha-Lincoln-Council Bluffs marketing area.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Assistant Administrator, Production and Marketing Administration, on June 27, 1952, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision and opportunity to file written exceptions thereto which was published in the FEDERAL REGISTER on July 3, 1952 (17 F. R. 6003).

Exceptions to the recommended decision were filed on behalf of certain interested parties in the marketing area. In arriving at the findings, conclusions, and regulatory provisions of this decision, each of these exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings, conclusions, and actions decided herein are at variance with the exceptions such exceptions are overruled.

The major issues developed at the hearing were concerned with:

1. Whether the marketing area should be expanded to include the cities of Lincoln, York and Fremont, Nebraska, and certain areas contiguous to the city of Lincoln;
2. Revision of definitions of handler and producer;
3. Revision of the classification of milk;
4. Revision of transfer provisions;
5. Revision of class prices;
6. Adoption of seasonal prices to producers;
7. Modification of the emergency milk provisions;
8. Inclusion of location differentials to producers and handlers;
9. Application of administrative assessment to other source milk and emergency milk; and
10. Revision of the administrative provisions of the order.

Findings and conclusions. The findings and conclusions of the recommended decision set forth in the FEDERAL REGISTER (17 F. R. 6003) are hereby approved and adopted as the findings and conclusions of this decision as if set forth in full herein.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled respectively "Marketing Agreement Regulating the Handling of Milk in the Omaha-Lincoln-Council Bluffs Marketing Area," and "Order Amending the Order, as Amended, Regulating the Handling of Milk in the Omaha-Lincoln-Council Bluffs Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision except the attached marketing agreement, be published in the Federal Register. The regulatory provisions of said marketing agreement are identical with those contained in the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 25th day of July 1952.

[SEAL] K. T. HUTCHINSON,
Acting Secretary of Agriculture.

Order [1] Amending the Order, as Amended, Regulating the Handling of Milk in the Omaha-Lincoln-Council Bluffs Marketing Area

§ 935.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to Public Act No. 10, 73d Congress (May 12, 1933) as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (hereinafter referred to as the "act") and the rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendments to the marketing agreement and to the order, as amended, regulating the handling of milk in the Omaha-Lincoln-Council Bluffs marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions of said order, as amended, and as hereby further amended, will tend to effectuate the declared policy of the act;

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and orders have been met.

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for such milk, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factions, insure a sufficient quantity of pure and wholesome milk and be in the public interest, and

(3) The said order regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(4) All milk and milk products delivered by handlers, as defined herein, are in the current of interstate or foreign commerce or directly burden, obstruct, or affect interstate commerce in milk or its products.

(5) It is hereby found that the expense of the market administrator for the maintenance and functioning of such agency will require the payment monthly by each handler, as his pro rata share of such expenses, two cents per hundredweight, or such amount not exceeding two cents per hundredweight as the Secretary may prescribe, with respect to all milk received by him during the month from producers (including such handler's own production) and with respect to other source milk and emergency milk received by him during such month which is classified as Class I.

Order relative to handling. It is therefore ordered that on and after the effective date hereof, the handling of milk in the Omaha-Lincoln-Council Bluffs marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended; and the aforesaid order, as amended, is hereby further amended to read as follows:

DEFINITIONS

§ 935.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 1940 ed., 601 et seq.).

§ 935.2 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States or any officer or employee of the United States Department of Agriculture who is authorized to exercise the powers and to perform the duties of the Secretary of Agriculture of the United States.

§ 935.3 *Omaha - Lincoln - Council Bluffs Marketing Area.* "Omaha-Lincoln-Council Bluffs Marketing Area," hereinafter called "marketing area" means the territory within the corporate limits of the cities of Omaha, and Lincoln, Nebraska, and Council Bluffs, Iowa; within Kane, Lake, Garner and Lewis townships in Pottawattamie County, Iowa; within Florence, Union, McArdle, Moorhead, McHugh, Benson, Beechwood, Pershing, Dundee, Loveland, Boystown, Ralston, Ashland and May precincts in Douglas County, Nebraska; within Gilmore, Highland and Bellevue precincts in Sarpy County, Nebraska; within West Lincoln precinct including the Lincoln Air Base, and the Veterans' Administration Hospital in Lancaster precinct, both in Lancaster County, Nebraska.

§ 935.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 935.5 *Producer.* "Producer" means any person, irrespective of whether such person is also a handler, who produces milk which is received at an approved plant: *Provided*, That such milk is (a) produced under a dairy farm permit or rating issued by a municipal or state health authority having jurisdiction in the marketing area for the production of milk to be disposed for consumption as Grade A milk, or (b) acceptable to a Federal agency located within the marketing area. This definition shall include any such person who is regularly classified as a producer but whose milk is caused to be diverted to an unapproved plant by a handler and milk so diverted shall be deemed to have been received at an approved plant by the handler who caused it to be diverted. This definition shall not include a person with respect to milk produced by him which is received by a handler who is subject to another Federal marketing order and who is partially exempt from the provisions of this subpart pursuant to § 935.56.

§ 935.6 *Handler.* "Handler" means (a) any person in his capacity as the operator of an approved plant(s), and (b) a cooperative association with respect to milk which it causes to be delivered from a producer to an approved plant or which it causes to be diverted to an unapproved plant for the account of such cooperative association, and such milk shall be deemed to have been received at an approved plant by the cooperative association. In the case of recognized divisions of a corporation which are operated as separate business units each such division shall be deemed to be a handler.

§ 935.7 *Approved plant.* "Approved plant" means (a) any milk processing plant from which skim milk and butterfat are disposed of as Class I milk (1) to any Federal agency located within the marketing area, or (2) on wholesale or retail routes (including plant stores) within the marketing area under a Grade A permit issued by any municipal or state health authority having jurisdiction in the marketing area, or (b) a plant which is under regular inspection by one or more of the several health authorities having jurisdiction in the marketing area, which is approved by such authority for the receiving of Grade A milk, and from which Grade A milk is regularly disposed of to plants described in paragraph (a) (2) of this section for Class I use.

§ 935.8 *Unapproved plant.* "Unapproved plant" means any milk processing plant other than an approved plant.

§ 935.9 *Producer-handler.* "Producer-handler" means any person who is both a producer and a handler and who receives no milk from other producers or associations of producers: *Provided*, That the maintenance, care and management of the dairy animals and other resources necessary to produce the milk and the processing, packaging and distribution of the milk are the personal enterprise and the personal risk of such person.

§ 935.10 *Cooperative association.* "Cooperative association" means any cooperative association of producers which the Secretary determines (a) has its entire activities under the control of its members, and (b) has and is exercising full authority in the sale of milk of its members.

§ 935.11 *Producer milk.* "Producer milk" means any skim milk or butterfat which is produced by a producer, other than a producer-handler, and which is received by a handler either directly from producers or from other handlers.

§ 935.12 *Other source milk.* "Other source milk" means any skim milk or butterfat other than that contained in producer milk or emergency milk.

§ 935.13 *Emergency milk.* "Emergency milk" means skim milk or butterfat other than that in producer milk which is received by a handler under the conditions and subject to the limitations prescribed in § 935.45.

§ 935.14 *Butter price.* "Butter price" means the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter at Chicago as reported by the United States Department of Agriculture during the delivery period.

MARKET ADMINISTRATOR

§ 935.20 *Designation.* The agency for the administration of this subpart shall be a market administrator who shall be a person selected by the Secretary. Such person shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of the Secretary.

§ 935.21 *Powers.* The market administrator shall have the power to:

(a) Administer the terms and provisions of this subpart;

(b) Report to the Secretary complaints of violations of the provisions of this subpart;

(c) Make rules and regulations to effectuate the terms and provisions of this subpart; and

(d) Recommend to the Secretary amendments to this subpart.

§ 935.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this subpart, including but not limited to the following:

(a) Within 45 days following the date upon which he enters upon his duties execute and deliver to the Secretary a bond conditioned upon the faithful performance of his duties in an amount and with surety thereon satisfactory to the Secretary;

(b) Pay out of the funds provided by § 935.73 the cost of his bond, his own compensation and all other expenses necessarily incurred in the maintenance and functioning of his office;

(c) Keep such books and records as will clearly reflect the transactions provided for in this subpart, and surrender the same to his successor or to such other person as the Secretary may designate;

(d) Unless otherwise directed by the Secretary, publicly disclose to handlers and producers the name of any person who, within 10 days after the date upon which he is required to perform such acts, has not (1) made reports pursuant to § 935.30 or (2) made payments pursuant to §§ 935.65 and 935.69;

(e) Promptly verify the information contained in reports submitted by handlers;

(f) Publicly announce by such means as he deems appropriate the prices determined for each delivery period as follows:

(1) On or before the 3d day after the end of each delivery period, the minimum class prices computed pursuant to § 935.51, and the butterfat differential computed pursuant to § 935.66;

(2) On or before the 9th day after the end of each delivery period, the uniform price computed pursuant to § 935.61.

(g) Prepare and disseminate to the public such statistics and information as he deems advisable and as do not reveal confidential information.

REPORTS, RECORDS AND FACILITIES

§ 935.30 *Delivery period report of receipts and utilization.* On or before the 7th day after the end of each delivery period, each handler, who purchases or receives milk from producers or associations of producers shall report to the market administrator in the detail and on forms prescribed by the market administrator as follows:

(a) The respective quantities of skim milk and butterfat contained in producer milk, other source milk (except products disposed of in the form in which received without further processing or packaging in the plant of the handler), and emergency milk received during the delivery period;

(b) The quantities of skim milk and butterfat contained in the opening and closing inventories;

(c) The utilization of all skim milk and butterfat reported pursuant to paragraphs (a) and (b) of this section; and

(d) Such other information with respect to such receipts and utilization as the market administrator may request.

§ 935.31 *Mid-delivery period reports.* On or before the 22d day of each delivery period each handler shall report to the market administrator the pounds of milk received by him from each producer or association of producers during the first 15 days of the delivery period.

§ 935.32 *Reports of payments to producers.* On or before the 17th day after the end of each delivery period, each handler shall submit to the market administrator his producer payroll for the delivery period which shall show for each producer:

(a) The total pounds of milk received and the average butterfat content thereof;

(b) The price, amount, and date of payment made pursuant to § 935.65; and

(c) The nature and amount of each deduction or charge involved in the payments referred to in paragraph (b) of this section.

§ 935.33 *Producer-handler and other handler reports.* Each producer-handler and each handler who receives milk only from other handlers which are not cooperative associations shall make reports to the market administrator at such time and in such manner as the market administrator may request.

§ 935.34 *Records and facilities.* Each handler shall maintain and make available to the market administrator, or his representative, during the usual hours of business, such accounts and records of his operations, including those of any other person upon whose utilization the classification of milk depends, and such facilities as, in the opinion of the market administrator, are necessary to verify or to establish the correct data with respect to:

(a) The receipts and utilization in whatever form of all skim milk and butterfat required to be reported pursuant to § 935.30;

(b) The weights and tests for butterfat and other contents of all milk and milk products received or utilized; and

(c) Payments to producers or cooperative associations.

§ 935.35 *Retention of records.* All books and records required under this subpart to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided*, That if, within such three-year period the market administrator notifies the handler in writing that the retention of such records or of specific books and records is necessary in connection with the proceedings under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records or specified books and records, until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION OF MILK

§ 935.40 *Skim milk and butterfat to be classified.* Skim milk and butterfat contained in all milk, skim milk, cream and milk products required to be reported pursuant to § 935.30, which during the delivery period were received by a handler at an approved plant or caused by a cooperative association to be diverted to an unapproved plant shall be classified by the market administrator in the classes set forth in § 935.41.

§ 935.41 *Classes of utilization.* Subject to the conditions set forth in §§ 935.43, 935.44, and 935.47, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk and butterfat (1) disposed of in the form of milk, skim milk, buttermilk, yogurt, flavored milk, flavored milk drinks, cream, either sweet or sour (including any mixture of butterfat and skim milk containing more than 6 percent butterfat except mixes for ice cream and frozen desserts) and eggnog, (2) used in the production of concentrated milk, not sterilized, for fluid consumption, and (3) not specifically accounted for as Class II milk.

(b) Class II milk shall be all skim milk and butterfat (1) used to produce a milk product not specified in paragraph (a) of this section, (2) in shrinkage up to 2 percent of receipts from producers and cooperative associations and of emergency milk, and (3) in shrinkage of other source milk.

§ 935.42 *Shrinkage.* The market administrator shall allocate shrinkage over a handler's receipts as follows:

(a) Compute the total shrinkage of skim milk and butterfat for each handler.

(b) Prorate the resulting amounts between the receipts of skim milk and butterfat contained in (1) producer milk and emergency milk, and (2) other source milk.

§ 935.43 *Responsibility of handlers and reclassification of milk.* (a) In establishing the classification of skim milk and butterfat as required in § 935.41, the burden rests upon the handler who received such skim milk or butterfat from producers or cooperative associations to prove to the market administrator that such skim milk or butterfat should not be classified as Class I.

(b) Any skim milk or butterfat which has been classified by the market administrator shall be reclassified if verification discloses that the original classification was incorrect.

§ 935.44 *Transfers.* (a) Skim milk and butterfat when transferred or diverted by a handler which is not a cooperative association from an approved plant to an approved plant of another handler who receives milk from producers or from a cooperative association shall be Class I if transferred in the form of milk, skim milk or cream: *Provided*, That if the selling handler, on or before the 7th day after the end of the delivery period during which such transfer is made, furnishes the market administrator with a statement signed by the buyer indicating that such skim milk or butterfat was used in a different class, such skim milk or butterfat may be assigned to the indicated class up to the amount thereof remaining in such class in the plant of the buyer after the subtraction of receipts of other source milk.

(b) Skim milk and butterfat when transferred or diverted by a handler to a producer-handler shall be Class I if transferred or diverted in the form of milk, skim milk or cream.

(c) Skim milk and butterfat which is caused to be delivered from producers to an approved plant by a cooperative

association which is a handler for the account of such cooperative association shall be ratably apportioned over the receiving handler's total utilization of producer milk.

(d) Skim milk and butterfat when transferred from an approved plant to an unapproved plant located more than 150 miles from the marketing area shall be Class I if transferred in the form of milk, skim milk, or cream.

(e) Skim milk and butterfat when transferred or diverted from an approved plant to an unapproved plant located less than 150 miles from the marketing area shall be Class I if transferred in the form of milk, skim milk, or cream unless the transferring handler reports that such skim milk or butterfat was used in Class II: *Provided*, That if the buyer refuses to permit the market administrator to audit his books and records, such milk, skim milk or cream shall be classified as Class I: *Provided further*, That if upon audit of the buyer's records it is found that the use of skim milk and butterfat in the buyer's plant in Class II is less than the amount stated to have been so used, any amount in excess of such Class II use shall be classified as Class I.

(f) Skim milk and butterfat received by a handler as other source milk shall, except as provided in § 935.57, be classified in the lowest class in which such handler has use.

(g) Skim milk and butterfat received by a handler as emergency milk shall be ratably apportioned over the receiving handler's total utilization of milk.

(h) Skim milk and butterfat of a handler's own production shall be ratably apportioned over such handler's total utilization of producer milk.

§ 935.45 *Emergency milk.* In any delivery period in which the market administrator determines that the supply of skim milk or butterfat in producer milk available to any handler is insufficient for such handler's disposition of Class I milk, skim milk and butterfat other than that in producer milk which is received by a handler and which is permitted by a health authority having jurisdiction in the marketing area to be disposed of as Grade A milk shall be considered emergency milk up to an amount equal to the difference between the receipts of skim milk or butterfat in producer milk by such handler and 107 percent of his total disposition of skim milk or butterfat in Class I milk.

§ 935.46 *Computation of skim milk and butterfat in each class.* For each delivery period the market administrator shall correct for mathematical and other obvious errors the delivery period report submitted by each handler and shall compute the total pounds of skim milk and butterfat, respectively, in each class for such handler.

§ 935.47 *Allocation of skim milk and butterfat classified.* After computing, pursuant to § 935.46, the classification of all skim milk and butterfat received by a handler, the market administrator shall determine the classification of milk received from producers in the following manner.

(a) Skim milk shall be allocated as follows:

(1) Subtract from the total pounds of skim milk in Class II the pounds of skim milk allocated to shrinkage of producer milk;

(2) Subtract from the pounds of skim milk in Class I the pounds of skim milk in other source milk allocated to Class I pursuant to § 935.57;

(3) Subtract from the remaining pounds of skim milk in Class II the remaining pounds of skim milk in other source milk: *Provided*, That, if the pounds of skim milk in such other source milk are greater than the remaining pounds of skim milk in Class II, an amount equal to the difference shall be subtracted from Class I;

(4) Subtract from the remaining pounds of skim milk in each class the pounds of skim milk contained in receipts from other handlers in accordance with its classification as determined pursuant to § 935.44 (a);

(5) Add to the remaining pounds of skim milk in Class II the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph;

(6) Subtract pro rata from the remaining pounds of skim milk in each class the pounds of skim milk contained in (i) milk of the handler's own production, (ii) emergency milk, and (iii) milk received from a cooperative association which is a handler;

(7) If the remaining pounds of skim milk in all classes exceed the pounds of skim milk received from producers an amount equal to the difference shall be subtracted from the pounds of skim milk in Class II. Any amount in excess of that in Class II shall be subtracted from Class I. The amounts so subtracted shall be called "overage."

(b) Butterfat shall be allocated in accordance with the same procedure outlined for skim milk in paragraph (a) of this section.

MINIMUM PRICES

§ 935.50 *Basic price to be used in computing the Class I price.* The basic price to be used in computing the minimum price per hundredweight of Class I milk for each delivery period shall be the higher of the prices computed pursuant to paragraphs (a) and (b) of this section.

(a) The average of the basic or field prices reported to have been paid for milk of 3.5 percent butterfat content received during the preceding delivery period at the following plants or places for which prices are reported to the market administrator or to the Department of Agriculture, divided by 3.5, and multiplied by 3.8, and adjusted to the nearest cent:

Present Operator of Plant	*Location of Plant*
Amboy Milk Products Co.	Amboy, Ill.
Borden Co.	Dixon, Ill.
Borden Co.	Sterling, Ill.
Carnation Co.	Northfield, Minn.
Carnation Co.	Morrison, Ill.
Carnation Co.	Oregon, Ill.
Carnation Co.	Waverly, Iowa.
Dean Milk Co.	Pecatonica, Ill.
Fort Dodge Creamery Co.	Fort Dodge, Iowa.
Pet Milk Co.	Shullsburg, Wis.
United Milk Products Co.	Argo Fay, Ill.

(b) The price computed pursuant to § 935.51 (b) for the preceding delivery period for Class II milk containing 3.8 percent butterfat plus 15 cents.

§ 935.51 *Class prices.* Subject to the provisions of §§ 935.52 and 935.53 the minimum prices per hundredweight to be paid by each handler for milk received by him from producers or from a cooperative association during the delivery period shall be as follows:

(a) *Class I milk.* The price per hundredweight of Class I milk containing 3.8 percent butterfat shall be the basic price computed pursuant to § 935.50 plus $1.40.

(1) The price per hundredweight of butterfat in Class I shall be computed by adding $28.00 to the price computed pursuant to paragraph (b) (1) of this section for the preceding delivery period.

(2) The price per hundredweight of skim milk in Class I shall be computed by (i) multiplying by 0.038 the price computed pursuant to subparagraph (1) of this paragraph, (ii) subtracting the result from the price computed pursuant to this paragraph for Class I milk containing 3.8 percent butterfat, (iii) dividing the result by 0.962, and (iv) adjusting to the nearest cent.

(b) *Class II milk.* The price per hundredweight of Class II milk containing 3.8 percent butterfat shall be that computed by multiplying by 3.8 the price computed pursuant to subparagraph (1) (ii) of this paragraph and adding thereto the amount computed pursuant to subparagraph (2) (i) of this paragraph.

(1) The price per hundredweight of butterfat in Class II milk shall be computed by (i) multiplying the butterfat price by 1.25, (ii) subtracting 8 cents, (iii) adjusting to the nearest cent, and (iv) multiplying the result by 100.

(2) The price per hundredweight of skim milk in Class II shall be computed by (i) adding to 17 cents, 3 cents for each full one-half cent that the price of nonfat dry milk solids is above 7 cents per pound, (ii) dividing the resulting sum by 0.962, and (iii) adjusting to the nearest cent. The price per pound of non-fat dry milk solids to be used shall be the simple average of carlot prices for nonfat dry milk solids for human consumption both spray and roller process, delivered at Chicago as reported by the Department of Agriculture during the delivery period. In the event the Department does not publish carlot prices for nonfat dry milk solids for human consumption delivered at Chicago, there shall be used the weighted average of carlot prices per pound for non-fat dry milk solids, spray and roller process, for human consumption, f. o. b. manufacturing plants in the Chicago area as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month, and 3 cents shall be added for each full one-half cent that the latter price is above 6 cents per pound.

§ 935.52 *Emergency price provision.* Whenever the provisions of this subpart require the market administrator to use a specific price (or prices) for milk or any milk product for the purpose of determining class prices or for any other purpose, and the specified price is not reported or published the market administrator shall use a price determined by the Secretary to be equivalent to or comparable with the price specified.

§ 935.53 *Location differential to handlers.* With respect to milk received from producers at an approved plant located outside the marketing area and which is transferred to an approved plant located within the marketing area in the form of milk, skim milk or cream, the Class prices computed pursuant to § 935.51 shall be reduced 5 cents per hundredweight with respect to milk received at a plant located in Waterloo precinct in Douglas County, Nebraska, and 10 cents per hundredweight with respect to milk received at any other plant located more than 45 miles from the marketing area.

APPLICATION OF PROVISIONS

§ 935.55 *Producer-handlers.* Sections 935.40 to 935.47, 935.50 to 935.53, 935.60 to 935.62, and 935.65 to 935.74 shall not apply to a producer-handler.

§ 935.56 *Handlers subject to other orders.* In the case of any handler who the Secretary determines disposes of a greater portion of his milk in another marketing area regulated by another milk marketing order issued pursuant to the act, the provisions of this subpart shall not apply except as follows:

(a) The handler shall, with respect to his total receipts and utilization of skim milk and butterfat, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports in accordance with § 935.34.

(b) If the price which such handler is required to pay under the other order to which he is subject for skim milk and butterfat which are classified as Class I milk under this subpart, is less than the price provided by this subpart, such handler, on or before the 10th day after the end of the delivery period in which a bill is rendered, shall pay to the market administrator for deposit into the producer-settlement fund (with respect to all skim milk and butterfat disposed of as Class I milk within the marketing area) an amount equal to the difference between the value of such skim milk or butterfat as computed pursuant to this order and its value as determined pursuant to the other order to which he is subject.

§ 935.57 *Other source milk in Class I.* (a) In the case of approved plants which are permitted by the applicable health authorities to receive and process non-Grade A milk, non-Grade A skim milk and butterfat in other source milk shall be allocated to Class I up to the extent of the actual disposition of non-Grade A skim milk and butterfat as Class I milk outside the marketing area in localities where Grade A milk is not required for Class I use.

(b) During any delivery period prior to November 1, 1952, Grade A skim milk and butterfat in other source milk which is received in bulk at an approved plant from an unapproved plant which receives Grade A milk in packaged form for Class I use from the approved plant, shall be allocated to Class I in an amount not in excess of the amounts of skim milk and butterfat either (1) transferred from the unapproved to the approved plant as Grade A milk, or (2) transferred from the approved to the unapproved plant in packaged form, whichever is the lesser amount.

DETERMINATION OF UNIFORM PRICE

§ 935.60 *Computation of the value of milk received from producers.* The value of the milk received by each handler from producers during each delivery period shall be a sum of money computed by the market administrator by multiplying the hundredweight of skim milk and butterfat in each class computed pursuant to § 935.47 by the applicable class prices and adding together the resulting amounts and adding any amounts computed pursuant to paragraphs (a) and (b) of this section.

(a) If the handler had overage of either skim milk or butterfat there shall be added to the above value an amount computed by multiplying the pounds of overage by the applicable class prices;

(b) If any skim milk or butterfat in other source milk has been subtracted from Class I pursuant to § 935.47 (a) (3) in any delivery period, other than one in which any handler has received skim milk or butterfat which has been designated by the market administrator as emergency milk, the market administrator in computing the value of milk of such handler shall add an amount computed by multiplying the hundredweight of skim milk or butterfat so subtracted by the difference between the Class I and Class II prices.

§ 935.61 *Computation of uniform price.* For each delivery period the market administrator shall compute the uniform price per hundredweight of milk received from producers as follows:

(a) Combine into one total the values computed pursuant to § 935.60 for all handlers who filed the reports prescribed by § 935.30 and who made the payments pursuant to §§ 935.65 and 935.69 for the preceding delivery period;

(b) Subtract during each of the delivery periods of April, May, and June, an amount equal to 8 percent of the resulting sum;

(c) Add during each of the delivery periods of September, October, and November one-third of the total amount subtracted pursuant to paragraph (b) of this section;

(d) Add an amount equal to the total value of the location differentials computed pursuant to § 935.67;

(e) Subtract if the average butterfat content of the milk included in these computations is more than 3.8 percent, or add, if such butterfat content is less than 3.8 percent, an amount computed by multiplying the amount by which the average butterfat content of such milk varies from 3.8 percent by the butterfat differential computed pursuant to § 935.66 and multiplying the result by the total hundredweight of producer milk included in these computations;

(f) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(g) Divide the resulting sum by the total hundredweight of milk included in these computations; and

(h) Subtract not less than 4 cents nor more than 5 cents per hundredweight for the purpose of retaining in the producer-settlement fund a cash balance to provide against errors in reports and payments or delinquencies in payments by handlers. The result shall be known as the "uniform price" for milk received from producers.

§ 935.62 *Notification of handlers.* On or before the 9th day of each delivery period the market administrator shall notify each handler of:

(a) The amount and value of his milk in each class computed pursuant to §§ 935.47 and 935.60;

(b) The uniform price computed pursuant to § 935.61;

(c) The amount, if any, due such handler from the producer-settlement fund or the amount to be paid by such handler to the producer-settlement fund; and

(d) The total amounts to be paid by such handler pursuant to §§ 935.65 and 935.69.

PAYMENTS

§ 935.65 *Time and method of payment.* Each handler shall make payment for milk received during the delivery period as follows:

(a) *Final payment.* On or before the 12th day after the end of the delivery period:

(1) To each producer for milk which was not caused to be delivered by a cooperative association which is a handler at not less than the uniform price computed in accordance with § 935.61, subject to the butterfat and location differentials computed pursuant to §§ 935.66 and 935.67, and less the amount of the payment made to such producers pursuant to paragraph (b) (1) of this section.

(2) To a cooperative association which is a handler for milk which it caused to be delivered to such handler by such cooperative association at not less than the value of such milk at the applicable class prices, less the amount of the payment made pursuant to paragraph (b) (2) of this section.

(b) *Mid-delivery period payment.* On or before the 27th day of each delivery period:

(1) To each producer for milk which was not caused to be delivered by a cooperative association which is a handler an amount computed by multiplying the hundredweight of milk delivered during the first 15 days of the delivery period by the uniform price announced by the market administrator for the immediately preceding delivery period.

(2) To a cooperative association which is a handler for milk which was caused to be delivered to such handler by such cooperative association an amount computed by multiplying the hundredweight of milk caused to be so delivered during the first 15 days of the delivery period by the uniform price announced by the market administrator for the immediately preceding delivery period.

§ 935.66 *Butterfat differential to producers.* If any handler has received from any producer during the delivery period, milk having an average butterfat content other than 3.8 percent, such handler, in making the payment pursuant to § 935.65 (a) (1) shall add to the uniform price for each one-tenth of 1 percent that the average butterfat content of such milk is above 3.8 percent not less than, or shall subtract for each one-tenth of 1 percent that the average butterfat content of such milk is below 3.8 percent not more than an amount computed as follows: add 20 percent to the butter price, divide the resulting sum by 10, and adjust to the nearest cent.

§ 935.67 *Location differential to producers.* In making payments to producers pursuant to § 935.65 (a) (1) there shall be deducted with respect to milk received at an approved plant located in Waterloo precinct in Douglas County, Nebraska, 5 cents per hundredweight, and with respect to milk received at approved plants located more than 45 miles from the marketing area, 10 cents per hundredweight.

§ 935.68 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 935.56, 935.69 and 935.71 and out of which he shall make all payments to handlers pursuant to §§ 935.70 and 935.71.

§ 935.69 *Payments to the producer-settlement fund.* On or before the 10th day after the end of each delivery period each handler, including a cooperative association which is a handler, shall pay to the market administrator the amount, if any, by which the total value of the milk received by such handler from producers computed pursuant to § 935.60 is greater than the amount required to be paid producers by such handler pursuant to § 935.65 (a) (1).

§ 935.70 *Payments out of the producer-settlement fund.* On or before the 12th day after the end of each delivery period the market administrator shall pay to each handler, including a cooperative association which is a handler, the amount, if any, by which the value of the milk received by such handler from producers computed pursuant to § 935.60 is less than the amount required to be paid producers by such handler pursuant to § 935.65 (a) (1); *Provided,* That the market administrator shall offset any payment due any handler against payments due from such handler.

§ 935.71 *Adjustment of accounts.* Whenever verification by the market administrator of reports or payments of any handler discloses errors made in payments to or from the producer-settlement fund pursuant to §§ 935.69 and 935.70, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 5 days, make payment to the market administrator of the amount so billed. Whenever verification discloses that payment is due from the market administrator to any handler, the market administrator shall, within 5 days, make such payment to such handler.

§ 935.72 *Adjustment of errors in payments to producers.* Whenever verification by the market administrator of the payments by a handler to any producer or cooperative association, discloses payment of less than is required by § 935.65, the handler shall make up such payment to the producer or cooperative association not later than the time of making payments next following such disclosure.

§ 935.73 *Expense of administration.* As his pro rata share of the expense of administration of this subpart each handler on or before the 12th day after the end of the delivery period shall pay to the market administrator, 2 cents per hundredweight or such lesser amount as the Secretary from time to time may prescribe with respect to all milk received from producers (including such handler's own production) and cooperative associations and with respect to emergency milk or other source milk which is classified as Class I. As its pro rata share of the expense of administration of this subpart, a cooperative association which is a handler, shall pay to the market administrator on or before the 12th day after the end of the delivery period, with respect to the milk of any producer which it causes to be delivered to an unapproved plant, an amount per hundredweight equivalent to that required to be paid by other handlers pursuant to this section.

§ 935.74 *Termination of obligations.* The provisions of this section shall apply to any obligation under this subpart for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this subpart shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on milk involved in such obligation unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses with respect to any obligation under this subpart, to make available to the market administrator or his representative all books and records required by this subpart to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this subpart to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this subpart shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or setoff by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files pursuant to section 8c (15) (A) of the act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 935.80 *Effective time.* The provisions of this subpart or any amendment to this subpart shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated pursuant to § 935.81.

§ 935.81 *Suspension or termination.* The Secretary may suspend or terminate this subpart or any provision of this subpart whenever he finds this subpart or any provision of this subpart obstructs or does not tend to effectuate the declared policy of the act. This subpart shall terminate in any event whenever the provisions of the act authorizing it cease to be in effect.

§ 935.82 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this subpart, there are any obligations under this subpart the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 935.83 *Liquidation.* Upon the suspension or termination of the provisions of this subpart, except this section, the market administrator, or such other liquidating agent as the Secretary may designate, shall if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books, and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 935.90 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this subpart.

§ 935.91 *Separability of provisions.* If any provision of this subpart, or its application to any person or circumstances, is held invalid, the application of such provision and of the remaining provisions of this subpart, to other persons or circumstances shall not be affected thereby.

Order Directing That Referendum Be Conducted Among Producers; Determination of Representative Period; and Designation of Agent To Conduct Such Referendum

Pursuant to section 8c (19) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608c (19)), it is hereby directed that a referendum be conducted among producers (as defined in the proposed order amending the order, as amended, regulating the handling of milk in the Omaha-Lincoln-Council Bluffs marketing area which is filed simultaneously herewith) who, during the month of May 1952 were engaged in the production of milk for sale in the marketing area specified in the aforesaid order to determine whether such producers favor the issuance of the order which is a part of the decision of the Secretary of Agriculture filed simultaneously herewith.

The month of May 1952 is hereby determined to be a representative period for the conduct of such referendum. Wayne McPherren is hereby designated agent of the Secretary to conduct such referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders as published in the FEDERAL REGISTER on August 10, 1950 (15 F. R. 5177).

Done at Washington, D. C., this 25th day of July 1952.

[SEAL] K. T. HUTCHINSON,
Acting Secretary of Agriculture.

DEPARTMENT OF COMMERCE

Office of the Secretary

[44 CFR Part 401]

DISPOSAL OF FOREIGN EXCESS PROPERTY

EXCESS PROPERTY FABRICATED FROM CRITICAL MATERIALS; NOTICE OF PROPOSED REVOCATION

Insofar as the Administrative Procedure Act may be applicable herein, notice is hereby given of the proposed revocation of the determination and other provisions of document issued January 9, 1951, and published in 16 F. R. 320. Interested persons may submit to the Foreign Excess Property Officer, Department of Commerce, Room 3-H-15, New General Accounting Office Building, Washington 25, D. C., written data, views or arguments relative to this proposed revocation. Such representations may not be presented orally in any manner. All relevant material received within 20 days following the day of publication of this notice will be considered.

At the time of the determination referred to, practically all non-agricultural items of foreign excess property fabricated for defense use in whole or in part from critical materials were in short supply in this country. Under section 402 of the Federal Property and Administrative Services Act of 1949, foreign excess property could not be sold without a condition forbidding its importation into the United States unless the Secretary of Commerce (in the case of nonagricultural property) determined that the importation of such property would relieve domestic shortages or otherwise be beneficial to the economy of this country.

Since the making of this determination the demand-supply situation for many materials and products has changed from one of scarcity to an adequate or an oversupply. Because of this change in the general supply situation affecting materials and products involved in foreign excess property, and to make the regulations under the Act consistent with the general purpose of the legislation, I deem it advisable to place the importation of foreign excess property on a more selective and individual basis. Accordingly, I propose to revoke my determination either in whole or in part. The effect of such revocation will be to require prospective importers to resort entirely to the procedure prescribed by Foreign Excess Property Order 1, as amended August 23, 1950 (15 F. R. 5847).

It is contemplated that the effective date of such revocation will be not less than thirty days from the time of its publication.

Pending the receipt of any views or suggestions with reference to the proposed revocation and any postponement of the effective date, prospective importers are advised to make application for authority to import in accordance with section 5 of said Foreign Excess Property Order 1.

(Sec. 402, 63 Stat. 393; 41 U. S. C. Sup. 272. Interprets or applies Reg. 8, Feb. 10, 1950, as amended, 15 F. R. 845, 5930)

Dated: July 24, 1952.

[SEAL] CHARLES SAWYER,
Secretary of Commerce.

CIVIL AERONAUTICS BOARD

[14 CFR Parts 40, 61]

SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

NOTICE OF PROPOSED RULE MAKING

JULY 25, 1952.

Notice is hereby given that the Civil Aeronautics Board has under consideration adoption of the annexed revision of Part 40 of the Civil Air Regulations.

This is the third time which the basic principles embodied in the proposed revised draft of Part 40 have been circulated to the public, the first such occasion being on September 26, 1950 (15 F. R. 6700), and the second on September 1, 1951 (16 F. R. 8923). The revision circulated herewith incorporates changes made as a result of comment received on the earlier drafts, which has been considered at length by the Board and its staff. However, since it is deemed desirable to incorporate certain material on which earlier opportunity for public comment has not been afforded, the Board desires to recirculate the proposal again, so that specific written comment on the new items may be received. While the Board will not preclude comment on matters which were contained in the earlier drafts, particularly comment inspired by changes in fact occurring since the prior circulations, or matters formerly discussed but not contained in this or earlier drafts, it does not seek nor desire to receive written comment which are simply repetitious of matter already fully considered. Furthermore, with respect to the new matter herein contained, the Board is of the opinion that a 45-day period for return of comment will be fully adequate. Interested persons are advised that the Board does not intend to extend the deadline for comment and will not consider comment submitted after September 8, 1952. Comment should be explicit rather than general and include definitive proposals where changed wording or additional sections are involved. Comment should be submitted in writing and in duplicate addressed to the Civil Aeronautics Board attention Bureau of Safety Regulation, Washington 25, D. C. If any interested person desires to present oral argument to the Board on any point raised in its written comment, the comment should specify the particular point or points on which oral argument is desired. Copies of communications received in response to this Notice of Proposed Rule Making will be available after September 12, 1952, for examination by interested persons at the Docket Section of the Board, Room 5412, Commerce Building, Washington, D. C.

The following major points of difference from earlier drafts are items to which attention is particularly called:

1. Provision has been made whereby a carrier may operate over any route between the terminals which it is authorized to serve, if the operating facilities and procedures on such routes are substantially similar to those on which the issuance of the operating certificate was predicated. This will facilitate traffic flow in congested areas

with no decrease in safety. Accordingly, pilot route qualifications are based on flight between the terminals of a trip usually assigned to the pilot.

2. The requirement of written approval of the Administrator prior to the discontinuance or substantial modification of any facility upon which the original issuance of an air carrier operating certificate was based has been deleted. Instead, the Administrator has been given the authority to require a carrier to "show" the adequacy of any such facilities both before and after the issuance of an operating certificate.

3. The requirement that after December 31, 1953, all airplanes must comply with transport category requirements has been eliminated. The Bureau of Safety Regulation, in 16 F. R. 11787, has previously proposed such action on the basis that adequate performance limitations for nontransport category airplanes could be devised and that, prior to December 31, 1953, the Board could determine precisely what provisions of the transport category airworthiness requirements should be made applicable to nontransport category airplanes. Such performance limitations substantially as proposed in 17 F. R. 2896 have been included in the part, and certain equipment requirements of Part 4b have been incorporated to become effective December 31, 1953. Certain other such equipment proposals will be handled separately at an early date.

4. The requirements for emergency evacuation gear, emergency lighting requirements, and certain survival equipment requirements as well as the requirements for a formal briefing of passengers have been deleted from Part 40 because of the considerable controversy which they engendered. The Bureau of Safety Regulation will prepare a separate draft release covering this entire field and expects to present its proposals to the Board in the near future.

5. The radio requirements have been amended to permit night VFR operation by pilotage without the requirement for duplicate air-borne radio facilities. Also, special exception has been made for automatic direction finding equipment in order to avoid the necessity for duplicate facilities in operations in which the use of ADF has been authorized by the Administrator. These amendments are consistent with current Parts 40 and 61 with the exception that, in the case of operation by ADF, a requirement is introduced for an alternate routing to a suitable airport equipped with navigational systems the signals from which may be received by the remaining aircraft radio system. This latter restriction is currently imposed on air carriers by the Administrator in the operations specifications.

6. Provision has been made for flight engineer training as well as strengthened requirements for all crew training.

7. The previous proposal did not include minimum altitude requirements for air carrier aircraft, because it was contemplated that the entire subject would be treated in Part 60. However, since Part 60 has not been amended to date, the Board considers it advisable to continue the minimum altitude rules presently contained in Part 61.

The Board also will rescind present Part 61 at the time the revised Part 40 becomes effective. In addition Special Regulations 366, 368, and 382 and any extensions thereof will be rescinded insofar as they purport to affect operations covered by revised Part 40 on and after its effective date.

This proposal is made under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended, and may be changed in the light of comment received.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601–610, 52 Stat. 1007–1012, 62 Stat. 1216; 49 U. S. C. 452, 551–560)

Dated: July 25, 1952, at Washington, D. C.

By the Civil Aeronautics Board.

[SEAL] FRED A. TOOMBS, *Acting Secretary.*

PART 40—SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

APPLICABILITY AND DEFINITIONS

Sec.
40.0 Applicability of this part.
40.1 Applicability of Parts 43 and 60 of this subchapter.
40.2 Definitions.

CERTIFICATION RULES AND OPERATIONS SPECIFICATIONS REQUIREMENTS

40.3 Certificate required.
40.4 Contents of certificate.
40.5 Application for certificate.
40.6 Issuance of certificate.
40.7 Amendment of certificate.
40.8 Display of certificate.
40.9 Duration of certificate.
40.10 Transferability of certificate.
40.12 Operations specifications required.
40.13 Contents of specifications.
40.14 Utilization of operations specifications.
40.15 Amendment of operations specifications.
40.16 Inspection.
40.17 Operations base and office.

REQUIREMENTS FOR SERVICES AND FACILITIES

40.20 Route requirements; demonstration of competence.
40.21 Width of routes.
40.22 IFR routes outside of control areas.
40.23 Airports.
40.24 Communications facilities.
40.25 Weather reporting facilities.
40.26 En route navigational facilities.
40.27 Servicing and maintenance facilities.
40.28 Location of dispatch centers.

MANUAL REQUIREMENTS

40.30 Preparation of manual.
40.31 Contents of manual.
40.32 Distribution of manual.

AIRCRAFT REQUIREMENTS

40.50 General.
40.51 Aircraft certification requirements.
40.52 Aircraft limitation for type of route.

OPERATING LIMITATIONS

40.53 Operating limitations for transport category airplanes.
40.54 Weight limitations.
40.55 Take-off limitations to provide for engine failure.
40.56 En route limitations; all engines operating.
40.57 En route limitations; one engine inoperative.
40.58 En route limitations; two engines inoperative.
40.59 Special en route limitations.
40.60 Landing distance limitations; airport of destination.
40.61 Landing distance limitations; alternate airports.
40.62 Operating limitations for aircraft not certificated in the transport category.
40.63 Take-off limitations.
40.64 En route limitations; one engine inoperative.
40.65 Landing distance limitations; airport of intended destination.
40.66 Proving tests.

AIRCRAFT INSTRUMENTS AND EQUIPMENT

40.70 Aircraft instruments and equipment.

INSTRUMENTS AND EQUIPMENT FOR ALL OPERATIONS

40.71 Flight and navigational equipment for all operations.
40.72 Powerplant instruments for all operations.
40.73 Emergency equipment for all operations.
40.74 Seats and safety belts for all occupants.
40.75 Miscellaneous equipment for all operations.
40.76 Cockpit check procedure for all operations.
40.77 Passenger information for all operations.
40.78 Exit and evacuation marking for all operations.

INSTRUMENTS AND EQUIPMENT FOR SPECIAL OPERATIONS

40.80 Instruments and equipment for operations at night.
40.81 Instruments and equipment for operations under IFR.
40.83 Supplemental oxygen.
40.84 Supplemental oxygen requirements for pressurized cabin airplanes.
40.85 Equipment standards.
40.86 Protective breathing equipment for the flight crew.
40.87 Equipment for overwater operation.
40.88 Equipment for operations in icing conditions.

RADIO EQUIPMENT

40.90 Radio equipment; general.
40.91 Radio equipment for operations under VFR over routes navigated by pilotage.
40.92 Radio equipment for operations under VFR over routes not navigated by pilotage or for operations under IFR.

MAINTENANCE AND INSPECTION REQUIREMENTS

40.100 General.
40.101 Maintenance and inspection requirements.
40.102 Maintenance and inspection training program.
40.103 Maintenance and inspection personnel duty time limitations.

AIRMAN AND CREW MEMBER REQUIREMENTS

40.110 Utilization of airman; general.
40.111 Composition of flight crew.
40.112 Flight engineer.
40.113 Flight attendant.
40.114 Aircraft dispatcher.

TRAINING PROGRAM

40.120 Training program; general.
40.121 Initial pilot ground training.
40.122 Initial pilot flight training.
40.123 Initial flight engineer training.
40.124 Initial crew member emergency training.
40.125 Initial aircraft dispatcher training.
40.126 Recurrent training.

FLIGHT CREWMAN AND DISPATCHER QUALIFICATIONS

Sec.
40.130 Qualification; general.
40.131 Pilot recent experience; aircraft.
40.132 Pilot checks.
40.135 Pilot route and airport qualification requirements.
40.136 Maintenance of pilot route and airport qualifications for particular trips.
40.137 Competence check; other pilots.
40.138 Flight engineer; qualification for duty.
40.139 Aircraft dispatcher; qualification for duty.

FLIGHT TIME LIMITATIONS

40.140 Flight time limitations.

DUTY TIME LIMITATIONS; AIRCRAFT DISPATCHER

40.144 Aircraft dispatcher daily duty limitations.

FLIGHT OPERATIONS

40.150 General.
40.151 Operational control.
40.153 Operations notices.
40.154 Operations schedules.
40.155 Flight crew members at controls.
40.156 Manipulation of controls.
40.157 Admission to flight deck.
40.158 Use of cockpit check procedure.
40.159 Flashlights.
40.160 Restriction or suspension of operation.
40.161 Emergency decisions; pilot in command and aircraft dispatcher.
40.162 Reporting potentially hazardous meteorological conditions and irregularities of ground and navigational facilities.
40.163 Reporting mechanical irregularities.
40.165 Powerplant failure or precautionary stoppage.
40.166 Instrument approach procedures.
40.168 Requirements for air carrier equipment interchange.

DISPATCHING RULES

40.170 General.
40.171 Necessity for dispatching authority.
40.174 Familiarity with weather conditions.
40.175 Facilities and services.
40.176 Aircraft equipment required for dispatch.
40.177 Communications and navigational facilities required for dispatch.
40.178 Dispatching under VFR.
40.179 Dispatching under IFR or over-the-top.
40.180 Alternate airport for departure; IFR.
40.181 Alternate airport for destination; IFR.
40.182 Continuance of flight; flight hazards.
40.183 Operation in icing conditions.
40.184 Redispatch and continuance of flight.
40.185 Dispatch to and from provisional airport.
40.186 Take-offs from alternate airports or from airports not listed in the operations specifications.
40.187 Fuel supply for all operations.
40.188 Factors involved in computing fuel required.
40.191 Take-off and landing weather minimums; VFR.
40.192 Take-off and landing weather minimums; IFR.
40.193 Flight altitude rules.
40.194 Alternate airport weather minimums.
40.195 Preparation of dispatch release.
40.196 Preparation of load manifest form.

REQUIRED RECORDS AND REPORTS

40.200 Records; general.
40.201 Crew member and dispatcher records.
40.202 List of aircraft.
40.203 Dispatch release form.
40.204 Load manifest.
40.205 Disposition of load manifest, dispatch release form, and flight plans.
40.206 Maintenance records.
40.207 Maintenance log.
40.208 Daily mechanical reports.
40.209 Mechanical interruption summary report.
40.211 Alteration and repair reports.
40.212 Maintenance release.

SPECIAL AIRWORTHINESS REQUIREMENTS

40.300 Fire prevention.
40.301 Susceptibility of materials to fire.
40.302 Cabin interiors.
40.303 Internal doors.
40.304 Ventilation.
40.305 Fire precautions.
40.306 Proof of compliance.
40.307 Propeller de-icing fluid.
40.308 Pressure cross feed arrangements.
40.309 Location of fuel tanks.
40.310 Fuel system lines and fittings.
40.311 Fuel lines and fittings in designated fire zones.
40.312 Fuel valves.
40.313 Oil lines and fittings in designated fire zones.
40.314 Oil valves.
40.315 Oil system drains.
40.316 Engine breather line.
40.317 Fire walls.
40.318 Fire-wall construction.
40.319 Cowling.
40.320 Engine accessory section diaphragm.
40.321 Powerplant fire protection.
40.322 Flammable fluids.
40.323 Shutoff means.
40.324 Lines and fittings.
40.325 Vent and drain lines.
40.326 Fire-extinguisher systems.
40.327 Fire-extinguishing agents.
40.328 Extinguishing agent container pressure relief.
40.329 Extinguishing agent container compartment temperature.
40.330 Fire-extinguishing system materials.
40.331 Fire-detector systems.
40.332 Fire detectors.
40.333 Protection of other airplane components against fire.
40.340 Control of engine rotation.
40.341 Fuel system independence.
40.342 Induction system ice prevention.
40.343 Carriage of cargo in passenger compartments.

APPLICABILITY AND DEFINITIONS

§ 40.0 *Applicability of this part.* The provisions of this part are applicable to air carriers holding certificates of public convenience and necessity issued in accordance with Title IV of the Civil Aeronautics Act of 1938, as amended, when they engage in scheduled interstate air transportation within the Continental limits of the United States: *Provided*, That the provisions of this part shall not apply to operations conducted pursuant to economic exemption authority issued by the Board for a period of 90 days or less: *And provided further*, That the Administrator may authorize any air carrier holding authority to engage in scheduled cargo operations pursuant to Title IV of the Civil Aeronautics Act of 1938, as amended, to conduct such operations in accordance with the air carrier certification and operations rules prescribed in Part 42 of this subchapter: *And provided further*, That in the case of routes extending beyond the Continental limits of the United States, the Administrator may authorize a specific air carrier to conduct operations over the whole or portions of such routes pursuant to provisions of Part 41 of this subchapter.

§ 40.1 *Applicability of Parts 43 and 60 of this subchapter.* The provisions of Parts 43 and 60 of the Civil Air Regulations shall be applicable to all air carrier operations conducted under the provisions of this part unless otherwise specified in this part.

§ 40.2 *Definitions.* (a) As used in this part terms shall be defined as follows:

(1) *Accelerate-stop distance.* Accelerate-stop distance is the distance required to accelerate the airplane to a specified speed and, assuming failure of the critical engine at the instant that speed is attained, to bring the airplane to a stop. (See the pertinent airworthiness requirements for the manner in which such distance is determined.)

(2) *Administrator.* The Administrator is the Administrator of Civil Aeronautics.

(3) *Air carrier.* Air carrier means any citizen of the United States who directly or indirectly, or by lease or by other arrangement, undertakes the carriage by aircraft of persons or property as a common carrier for compensation or hire or the carriage of mail by aircraft, in commerce, whether such commerce moves wholly by aircraft or partly by aircraft and partly by other forms of transportation, between any of the following places: A place in any State of the United States, or the District of Columbia, and a place in any other State of the United States, or the District of Columbia; places in the same State of the United States through the air space over any place outside thereof; places in the same Territory or possession of the United States, or the District of Columbia; a place in any State of the United States, or the District of Columbia, and any place in a Territory or possession of the United States; a place in a Territory or possession of the United States and a place in any other Territory or possession of the United States; a place in the United States and any place outside thereof.

(4) *Air traffic clearance.* An air traffic clearance is an authorization issued by air traffic control for an aircraft to proceed under specified conditions.

(5) *Air traffic control.* Air traffic control is a service provided for the purpose of:

(i) Preventing collisions between aircraft, and, on the airport ground maneuvering area, between aircraft and obstructions; and

(ii) Expediting and maintaining an orderly flow of air traffic.

(6) *Aircraft.* An aircraft shall mean any contrivance now known or hereafter invented, used, or designed for navigation of or flight in the air.

(7) *Aircraft dispatcher.* An aircraft dispatcher is an individual holding a valid aircraft dispatcher certificate issued by the Administrator who exercises responsibility with the pilot in command in the operational control of each flight.

(8) *Airframe.* Airframe shall mean any and all kinds of fuselages, booms, nacelles, cowlings, fairings, empennages, airfoil surfaces, and landing gear, and all parts, accessories, or controls, of

whatever description, appertaining thereto, but not including powerplants and propellers.

(9) *Airport.* An airport is an area of land or water which is used, or intended for use, for the landing and take-off of aircraft.

(10) *Alternate airport.* An alternate airport is an airport listed in the dispatch release as an airport to which a flight may proceed if a landing at the airport to which the flight was initially dispatched becomes inadvisable.

(11) *Appliances.* Appliances shall mean instruments, equipment, apparatus, parts, appurtenances, or accessories of whatever description, which are used, or are capable of being or intended to be used, in the navigation, operation, or control of aircraft in flight (including communication equipment, electronic devices, and any other mechanism or mechanisms installed in or attached to aircraft during flight, but excluding parachutes), and which are not a part or parts of airframes, powerplants, or propellers.

(12) *Approved.* Approved, when used alone or as modifying terms such as means, method, action, equipment, etc., shall mean approved by the Administrator.

(13) *Authorized representative of the Administrator.* An authorized representative of the Administrator shall mean any employee of the Civil Aeronautics Administration or any private person, authorized by the Administrator to perform particular duties of the Administrator under the provisions of this part.

(14) *Ceiling.* Ceiling is the distance from the surface of the ground or water to the lowest cloud layer or other obscuring media reported as "broken clouds," "overcast", or "obscuration", and not classified as "thin" or "partial."

(15) *Check airman.* A check airman is an airman designated by the air carrier and approved by the Administrator to examine other airmen to determine their proficiency with respect to procedures and technique and their competence to perform their respective airman duties.

(16) *Control area.* Control area is airspace having defined dimensions, designated by the Administrator, which extends upward from an altitude of 700 feet above the surface, within which air traffic control is exercised.

(17) *Control zone.* Control zone is airspace having defined dimensions, designated by the Administrator, which extends upward from the surface, which includes one or more airports, and within which rules additional to those governing control areas apply for the protection of air traffic.

(18) *Crew member.* A crew member is any individual assigned by an air carrier for the performance of duty on an aircraft in flight.

(19) *Critical engine.* The critical engine is that engine the failure of which gives the most adverse effect on the airplane flight characteristics relative to the case under consideration.

(20) *Critical-engine-failure speed, V_1 (transport category airplanes).* The critical-engine-failure speed is the airplane speed used in the determination of the take-off distance required at which the critical engine is assumed to fail. (See the pertinent airworthiness requirements for the manner in which such speed is determined.)

(21) *Dispatch release.* A dispatch release is an authorization issued by an air carrier specifying the conditions for the origination or continuance of a particular flight.

(22) *Duty aloft.* Duty aloft includes the entire period during which an individual is assigned as a member of an aircraft crew during flight time.

(23) *Effective length of runway*—(i) *Take-off.* The effective length of runway for take-offs as used in the take-off operating limitations for nontransport category airplanes is the distance from the end of the runway at which the take-off is started to the point at which the obstruction clearance plane associated with the other end of the runway intersects the center line of the runway.

(ii) *Landing.* The effective length of runway for landing as used in the landing operating limitations for both transport and nontransport category airplanes is the distance from the point at which the obstruction clearance plane associated with the approach end of the runway intersects the center line of the runway to the far end thereof.

(24) *En route.* En route shall mean the entire flight from the point of origination to the point of termination including intermediate stops.

(25) *Extended overwater operation.* An extended overwater operation shall be considered an operation over water conducted at a distance in excess of 50 miles from the nearest shore line.

(26) *Flight crew member.* A flight crew member is a crew member assigned to duty on an aircraft as a pilot or flight engineer.

(27) *Flight engineer.* A flight engineer is an individual holding a valid flight engineer certificate issued by the Administrator and whose primary assigned duty during flight is to assist the pilots in the mechanical operation of the aircraft.

(28) *Flight time.* Flight time is the time from the moment the aircraft first moves under its own power for the purpose of flight until it comes to rest at the next point of landing (block-to-block time).

(29) *High altitude operation.* High altitude operation is flight conducted at or above 12,500 feet above sea level east of longitude 100° W. and at or above 14,500 feet above sea level west of longitude 100° W.

(30) *IFR.* IFR is the symbol used to designate instrument flight rules.

(31) *Interstate air transportation.* Interstate air transportation means the carriage by aircraft of persons or property as a common carrier for compensation or hire or the carriage of mail by aircraft, in commerce between a place in any State of the United States, or the District of Columbia, and a place in any other State of the United States, or the District of Columbia; or between places in the same State of the United States through the air space over any place outside thereof; or between places in the same Territory or possession of the United States, or the District of Columbia.

(32) *Maximum certificated take-off weight.* Maximum certificated take-off weight is the maximum take-off weight authorized by the terms of the aircraft airworthiness certificate.[1]

(33) *Minimum control speed.* The minimum control speed is the minimum speed at which the aircraft can be safely controlled in flight after an engine suddenly becomes inoperative. (See pertinent airworthiness requirements for the manner in which such speed is determined.)

(34) *Month.* Month shall mean that period of time extending from the first day of any month as delineated by the calendar through the last day thereof.

(35) *Night.* Night is the time between the ending of evening civil twilight and the beginning of morning civil twilight as published in the American Air Almanac converted to local time for the locality concerned.[2]

(36) *Obstruction clearance area*—(i) *Take-off.* A take-off obstruction clearance area as used in the take-off operating limitations for nontransport category airplanes is an area on the earth's surface defined as follows: The center line of the obstruction clearance area in plan view shall coincide with and prolong the center line of the runway, beginning at the point where the obstruction clearance plane intersects the center line of the runway and proceeding to a point not less than 1,500 feet from the beginning point. Thereafter the center line shall proceed in a path consistent with the take-off procedure for the runway or, where such a procedure has not been established, consistent with turns of at least 4,000-foot radius until a point is reached beyond which the obstruction clearance plane clears all obstructions. The obstruction clearance area shall extend laterally for a distance of 200 feet on each side of the center line at the point where the obstruction clearance plane intersects the runway and shall continue at this width until the end of the runway; thence it shall increase uniformly to 500 feet on each side of the center line at a point 1,500 feet from the intersection of the obstruction clearance plane with the runway; thereafter the obstruction clearance area shall extend laterally for a distance of 500 feet on each side of the center line.

(ii) *Landing.* A landing obstruction clearance area as used in the landing operating limitations for both transport and nontransport category airplanes is an area on the earth's surface defined as

[1] Note that the aircraft airworthiness certificate incorporates as a part thereof the aircraft operating record or that portion of an Airplane Flight Manual which contains the pertinent limitation.

[2] The American Air Almanac containing the ending of evening twilight and the beginning of morning twilight tables may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. Information is also available concerning such tables in the offices of the Civil Aeronautics Administration or the United States Weather Bureau.

follows: The center line of the obstruction clearance area in plan view shall coincide with and prolong the center line of the runway, beginning at the point where the obstruction clearance plane intersects the center line of the runway and proceeding to a point not less than 1,500 feet from the beginning point. Thereafter the center line shall proceed in a path consistent with the instrument approach procedure for the runway or, where such a procedure has not been established, consistent with turns of at least 4,000-foot radius until a point is reached beyond which the obstruction clearance plane clears all obstructions. The obstruction clearance area shall extend laterally for a distance of 200 feet on each side of the center line at the point where the obstruction clearance plane intersects the runway and shall continue at this width until the end of the runway; thence it shall increase uniformly to 500 feet on each side of the center line at a point 1,500 feet from the intersection of the obstruction clearance plane with the runway; thereafter the obstruction clearance area shall extend laterally for a distance of 500 feet on each side of the center line.

(37) *Obstruction clearance plane.* An obstruction clearance plane is a plane which is tangent to or clears all obstructions within the obstruction clearance area and which slopes upward from the runway at a slope of 1:20 to the horizontal as shown in a profile view of the obstruction clearance area.

(38) *Operational control.* Operational control is the exercise of authority over initiation, continuation, diversion, or termination of a flight.

(39) *Person.* Person means any individual, firm, copartnership, corporation, company, association, joint-stock association, or body politic; and includes any trustee, receiver, assignee, or other similar representative thereof.

(40) *Pilot in command.* The pilot in command is the pilot designated by the air carrier as the pilot responsible for the operation and safety of the aircraft during the time defined as flight time.

(41) *Pilotage.* Pilotage is navigation by means of visual reference to landmarks.

(42) *Propeller.* Propeller shall mean a device for propelling an aircraft through the air, having blades mounted on a power-driven shaft, which when rotated produces by its action on the air a thrust approximately parallel to the longitudinal axis of the aircraft.

(43) *Provisional airport.* A provisional airport is an airport approved for use by an air carrier for the purpose of providing service to a community when the regular airport serving that community is not available.

(44) *Rating.* Rating is an authorization issued with a certificate, and forming a part thereof, delineating special conditions, privileges, or limitations pertaining to such certificate.

(45) *Refueling airport.* A refueling airport is an airport approved as an airport to which flights may be dispatched only for refueling.

(46) *Regular airport.* A regular airport is an airport approved as a regular terminal or intermediate stop on an authorized route.

(47) *Route.* A route is airspace of a specified width which joins those points on the surface of the earth between which an air carrier provides air transportation in accordance with the terms of its certificate of public convenience and necessity issued by the Board.

(48) *Route segment.* A route segment is a portion of a route each terminus of which is identified by:

(i) A continental or insular geographic location, or

(ii) A point at which a definite radio fix can be established.

(49) *Runway.* A runway is a clearly defined area of an airport suitable for the safe landing or take-off of aircraft.

(50) *Scheduled for duty aloft.* Scheduled for duty aloft shall mean the assignment of a flight crew member on the basis of the flight time established in the operations schedules rather than the actual flight time.

(51) *Second in command.* Second in command is any pilot, other than the pilot in command, who is designated by the air carrier to act as second in command of an aircraft with a crew of three or more airmen.

(52) *Show.* Show shall mean to demonstrate or prove to the satisfaction of the Administrator prior to the issuance of the air carrier operating certificate and at any time thereafter required by the Administrator.

(53) *Synthetic trainer.* A synthetic trainer is a device the use of which is approved to simulate certain flight operating conditions.

(54) *Take-off safety speed, V_2.* The take-off safety speed is the airplane speed used in the determination of the take-off flight path at which the climb-out following take-off can be safely executed with one engine inoperative and with the aircraft in the take-off configuration. (See the pertinent airworthiness requirements for the manner in which such speed is determined.)

(55) *Time in service.* Time in service, as used in computing maintenance time records, is the time from the moment an aircraft leaves the ground until it touches the ground at the end of a flight.

(56) *Transport category aircraft.* Transport category aircraft are aircraft which have been type certificated in accordance with the requirements of Part 4b of this subchapter or the transport category requirements of Part 4a of this subchapter.

(57) *Type.* With regard to airman qualifications, type shall mean all aircraft of the same basic design, including all modifications thereto except those modifications which the Administrator has found result in a substantial change in handling or flight characteristics.

(58) *UHF.* UHF is the symbol used to designate ultrahigh frequency.

(59) *VFR.* VFR is the symbol used to designate visual flight rules.

(60) *VHF.* VHF is the symbol used to designate very high frequency.

(61) *V_{s_1}.* *V_{s_1}* denotes the true indicated stall speed or the minimum steady flight speed in the landing configuration.

(62) *Visibility.* Visibility is the greatest distance at which conspicuous objects can be seen and identified.

(i) *Flight visibility.* Flight visibility is the average range of visibility forward from the cockpit of an aircraft in flight, expressed in units of distance, to see and identify prominent unlighted objects by day and prominent lighted objects by night.

(ii) *Ground visibility.* Ground visibility is the visibility at the earth's surface as reported by the United States Weather Bureau or by a source approved by the Weather Bureau.

(63) *Year.* Year shall mean that period of time extending from the first day of any year as delineated by the calendar through the last day thereof.

CERTIFICATION RULES AND OPERATIONS SPECIFICATIONS REQUIREMENTS

§ 40.3 *Certificate required.* No person subject to the provisions of this part shall operate aircraft in scheduled interstate air transportation without, or in violation of the terms of, an air carrier operating certificate issued by the Administrator.

§ 40.4 *Contents of certificate.* An air carrier operating certificate shall specify the points to and from which, and the routes over which, an air carrier is authorized to operate.

§ 40.5 *Application for certificate.* An application for an air carrier operating certificate shall be made in the form and manner and contain information prescribed by the Administrator.

§ 40.6 *Issuance of certificate.* (a) An air carrier operating certificate shall be issued by the Administrator to an applicant having a certificate of public convenience and necessity issued by the Civil Aeronautics Board when the Administrator finds, after investigation, that such person is properly and adequately equipped and able to conduct a safe operation in accordance with the requirements of this part and with the operations specifications authorized in this part.

(b) Whenever, upon investigation, the Administrator finds that the general standards of safety required for air carrier operations in aircraft of 12,500 pounds or less maximum certificated take-off weight, or for air carrier operations conducted pursuant to a temporary authorization issued under Title IV of the act, require or permit a deviation from any specific requirement for a particular operation or class of operations for which an application for an air carrier operating certificate has been made, he may issue operations specifications prescribing requirements which deviate from the requirements of this part. The Administrator shall promptly notify the Board of such deviations in the operations specifications and the reasons therefor.

§ 40.7 *Amendment of certificate.* (a) The Administrator shall, after notice and opportunity for hearing, amend an air carrier operating certificate when he finds that such amendment is reasonably required in the interest of safety.

(b) Upon application by an air carrier the Administrator shall amend an air carrier operating certificate when he finds that the general standards of safety permit such an amendment.

§ 40.8 *Display of certificate.* The air carrier operating certificate shall be available at the principal operations office of an air carrier for inspection by any authorized representative of the Board or the Administrator.

§ 40.9 *Duration of certificate.* (a) An air carrier operating certificate shall remain in effect until termination of the certificate of public convenience and necessity or other economic authorization issued by the Board held by the air carrier, or until surrendered, suspended, revoked, or otherwise terminated by order of the Board. After suspension or revocation it shall be returned to the Administrator.

(b) Nothing in this section shall be construed to deny or to defeat the jurisdiction of the Federal courts, the Administrator, or the Board to impose any authorized sanction, including revocation of the certificate, for a violation of the act, the Civil Air Regulations, or the air carrier operating certificate occurring during the effective period of such certificate.

§ 40.10 *Transferability of certificate.* An air carrier operating certificate is not transferable, except with the written consent of the Administrator.

§ 40.12 *Operations specifications required.* (a) On and after the effective date of this part all air carrier operations specifications currently in force relating to interstate air transportation shall cease to be a part of any air carrier operating certificate and shall be deemed to be operations specifications issued under this part. Thereafter new or amended specifications shall be issued by the Administrator for operations subject to this part in a form and manner prescribed by him and in accordance with the provisions of this part.

(b) No person subject to the provisions of this part shall operate aircraft in scheduled interstate transportation in violation of the operations specifications issued by the Administrator.

§ 40.13 *Contents of specifications.* The operations specifications shall contain the following:

(a) Types of operations authorized,

(b) Types of aircraft authorized for use,

(c) En route authorizations and limitations,

(d) Airport authorizations and limitations,

(e) Time limitation for aircraft overhaul, inspections, and checks, or standards by which such time limitations shall be determined,

(f) Procedures used to maintain control of weight and balance of aircraft,

(g) Interline equipment interchange requirements, if pertinent, and

(h) Such additional items as the Administrator determines, under the enabling provisions of this part, are necessary to cover a particular situation.

§ 40.14 *Utilization of operations specifications.* The air carrier shall keep its personnel informed with respect to the contents of the operations specifications and all amendments thereto applicable to the individual's duties and responsibilities. A set of specifications shall be maintained by the air carrier as a separate and complete document. Pertinent excerpts from the specifications or references thereto shall be inserted in the manual issued by the air carrier.

§ 40.15 *Amendment of operations specifications.* Any operations specification may be amended by the Administrator if he finds that safety in air transportation so requires or permits. Except in the case of an emergency requiring immediate action in respect to safety in air transportation or upon consent of the air carrier concerned, no amendment shall become effective prior to thirty days after the date the air carrier has been notified of such amendment. Within thirty days after either the receipt of such notice or the refusal of the Administrator to approve an air carrier's application for amendment, the air carrier may petition the Board to review the action of the Administrator. Except with regard to emergency amendments by the Administrator, the effectiveness of any amendment concerning which the carrier has petitioned for review shall be stayed pending the Board's decision.

§ 40.16 *Inspection.* An authorized representative of the Board or the Administrator shall be permitted at any time and place to make inspections or examinations to determine an air carrier's compliance with the requirements of the act, the Civil Air Regulations, the provisions of the air carrier's operating certificate, and the operations specifications.

§ 40.17 *Operations base and office.* Each scheduled air carrier shall give written notice to the Administrator of his principal business office, his principal operations base, and his principal maintenance base. Thereafter, prior to any change in any such office or base, he shall given written notice to the Administrator.

REQUIREMENTS FOR SERVICES AND FACILITIES

§ 40.20 *Route requirements; demonstration of competence.* Except as otherwise provided in this part, no air carrier shall conduct scheduled operations over any route or route segment until the air carrier has shown that it is competent to conduct such operations and that the facilities and services available are adequate for the type of operation proposed. The Administrator shall not require actual flight over a route or route segment, if the air carrier shows that such flight is not essential to safety. The air carrier may thereafter conduct operations between regular, provisional, or refueling airports on any approved route or routes on which the operational facilities and procedures are substantially similar: *Provided*, That high altitude operations may be conducted over any route.

§ 40.21 *Width of routes.* A route or route segment shall include the navigable airspace on each side of an approved track or tracks, and it shall have a width designated by the Administrator consistent with terrain, available navigational aids, traffic density, and air traffic control procedures.

§ 40.22 *IFR routes outside of control areas.* IFR routes outside of control areas shall be approved if the air carrier shows that the navigational and communications facilities are adequate for the operations proposed, unless the Administrator finds that because of traffic density an adequate level of safety cannot be assured in a particular area.

§ 40.23 *Airports.* The air carrier shall show that each route has sufficient airports found by the Administrator to be properly equipped and adequate for the type of operations to be conducted. Consideration shall be given to items such as size, surface, obstructions, facilities, public protection, lighting, navigation and communications aids, and traffic control.

§ 40.24 *Communications facilities.* The air carrier shall show that a two-way ground-to-aircraft radio communication system is available at such points as will insure reliable and rapid communications over the entire route, either direct or via approved point-to-point circuits for the following purposes:

(a) Communications between the aircraft and the appropriate dispatch office, in which case such system shall be independent of systems operated by the Federal Government, and

(b) Communications between the aircraft and the appropriate air traffic control unit, in which case the Administrator may permit the use of communications systems operated by the Federal Government.

§ 40.25 *Weather reporting facilities.* The air carrier shall show that sufficient weather reporting services are available at such points along the route as are necessary to insure such weather reports and forecasts as are necessary for the operation. Weather reports used to control flight movements shall be those prepared and released by the U. S. Weather Bureau, or by a source approved by the Weather Bureau. Forecasts used to control flight movements shall be prepared from such weather reports.

§ 40.26 *En route navigational facilities.* The air carrier shall show that nonvisual ground aids to air navigation are available along each route, that they are so located as to permit navigation to any regular, provisional, refueling, or alternate airport within the degree of accuracy necessary for the operation involved, and that they are available for the navigation of the aircraft within the degree of accuracy required to adhere to the flow of traffic established for air traffic control: *Provided*, That no nonvisual ground aids to navigation are required for day VFR operations where the characteristics of the terrain are such that navigation can be conducted by pilotage.

§ 40.27 *Servicing and maintenance facilities.* The air carrier shall show that competent personnel and adequate facilities and equipment, including spare parts, supplies, and materials, are available at such points along the air carrier's routes as are necessary for the proper servicing, maintenance, repair, and inspection of aircraft and auxiliary equipment.

§ 40.28 *Location of dispatch centers.* The air carrier shall show that it has a sufficient number of dispatch centers adequate for the operations to be conducted and located at such points as are necessary to insure the proper operational control of each flight.

MANUAL REQUIREMENTS

§ 40.30 *Preparation of manual.* The air carrier shall prepare and keep current a manual for the use and guidance of flight and ground operations personnel in the conduct of its operations.

§ 40.31 *Contents of manual.* (a) The manual shall contain instructions, information, and data necessary for the personnel concerned to carry out their duties and responsibilities with a high degree of safety. It shall be in a form to facilitate easy revision, and each page shall bear the date of the last revision thereof. The contents of such manual shall not be contrary to the provisions of any Federal regulations, operations specifications, or the operating certificate. The manual may be in two or more separate parts (e. g., flight operations, ground operations, maintenance, communications, etc.) to facilitate use by the personnel concerned, but each part shall contain so much of the information listed below as is appropriate for each group of personnel:

(1) General policies,

(2) Duties and responsibilities of each flight crew and crew member and appropriate members of the ground organization,

(3) Reference to appropriate Civil Air Regulations and Civil Aeronautics Manuals,

(4) Flight dispatching and control,

(5) En route flight, navigation, and communication procedures, including procedures for the dispatch or continuance of flight, if any item of equipment required for the particular type of operation becomes inoperative or unserviceable en route,

(6) Appropriate information from the en route operations specifications, including for each approved route the type of aircraft authorized, its crew complement, the type of operation (i. e., VFR, IFR, day, night) and other pertinent information,

(7) Appropriate information from the airport operations specifications, including for each airport its location, its designation (i. e., regular, alternate, provisional, etc.), type of aircraft authorized, instrument approach procedures, landing and take-off minimums, and other pertinent information,

(8) Take-off, en route, and landing weight limitations,

(9) Procedures for briefing or familiarizing passengers, with the use of emergency equipment during flight,

(10) Emergency procedures and equipment,

(11) The method of designating succession of command of flight crew members,

(12) Procedures for determining the usability of all landing and take-off areas and for dissemination of pertinent information to operations personnel,

(13) Procedures for operation during periods of icing, hail, thunderstorms, turbulence, or any potentially hazardous meteorological conditions,

(14) Airman training programs, including appropriate ground, flight, and emergency phases,

(15) Instructions and procedures for maintenance, repair, overhaul, and servicing,

(16) Time limitations for overhaul, inspection, and checks, and standards governing revision of such time limitations,

(17) Procedures for refueling aircraft, elimination of fuel contamination, protection from fire including electrostatic protection, and the supervision and protection of passengers during refueling,

(18) Inspections for airworthiness, including instructions covering procedures, standards, responsibilities, and authority of the inspection personnel,

(19) Methods and procedures for maintaining the aircraft weight and center of gravity within approved limits,

(20) Pilot and dispatcher route and airport qualification procedures,

(21) Accident notification procedures, and

(22) Other data or instructions related to safety.

(b) At least one complete master copy of the manual containing all parts thereof shall be retained at the principal operations base of the air carrier.

§40.32 *Distribution of manual.* (a) Copies and revisions of the manual shall be furnished to the following:

(1) The Administrator,

(2) Authorized representatives of the Administrator assigned to the air carrier to act as aviation safety agents,

(3) Appropriate operations and maintenance personnel of the air carrier.

(b) All copies of the manual shall be kept up to date.

AIRCRAFT REQUIREMENTS

§ 40.50 *General.* Aircraft shall be identified, certificated, and equipped in accordance with the applicable airworthiness requirements of the Civil Air Regulations. No air carrier shall operate any aircraft in scheduled operation unless:

(a) The air carrier has complied with the appropriate requirements of § 40.66, and

(b) Such aircraft meets the requirements of this part.

§ 40.51 *Aircraft certification requirements*—(a) *Aircraft certificated on or before June 30, 1942.* Aircraft certificated as a basic type on or before June 30, 1942, shall either:

(1) Retain their present airworthiness certification status and meet the requirements of § 40.62, or

(2) Comply with either the performance requirements of §§ 4a.737–T through 4a.750–T of this subchapter or the performance requirements of Part 4b of this subchapter, and in addition shall meet the requirements of §§ 40.53 through 40.61: *Provided*, That should any type be so qualified, all aircraft of any one operator of the same or related types shall be similarly qualified and operated.

(b) *Aircraft certificated after June 30, 1942.* Aircraft certificated as a basic type after June 30, 1942, and used in passenger operation shall be certificated as transport category aircraft and shall meet the requirements of §§ 40.53 through 40.61 over each route to be flown.

§ 40.52 *Aircraft limitation for type of route.* All aircraft used in scheduled passenger air transportation shall be multiengine aircraft and shall comply with the following requirements:

(a) *Two- or three-engine aircraft.* Two- or three-engine aircraft shall not be used in passenger-carrying operations unless adequate airports are so located along the route that the aircraft will at no time be at a greater distance therefrom than one hour of flying time in still air at normal cruising speed with one engine inoperative: *Provided*, That the Administrator may specify distances between airports greater or less than those set forth in this paragraph when he determines that the character of the terrain, the type of operation, or the performance of the aircraft to be used so permit or require.

(b) *Land aircraft on overwater routes.* Land aircraft operated on flights involving extended overwater operations shall be certificated as adequate for ditching in accordance with the ditching provisions of Part 4b of this subchapter.

OPERATING LIMITATIONS

§ 40.53 *Operating limitations for transport category airplanes.* (a) In operating any passenger-carrying transport category airplane the provisions of §§ 40.54 through 40.61 shall be complied with, unless deviations therefrom are specifically authorized by the Administrator on the ground that the special circumstances of a particular case make a literal observance of the requirements unnecessary for safety.

(b) For transport category aircraft the performance data contained in the Airplane Flight Manual shall be applied in determining compliance with these provisions. Where conditions differ from those for which specific tests were made, compliance shall be determined by interpolation or by computation of the effects of changes in the specific variables where such interpolations or computations will give results substantially equaling in accuracy the results of a direct test.

(c) No airplane shall be taken off at a weight which exceeds the allowable weight for the runway being used as determined in accordance with the take-off runway limitations of the transport category operating rules, after taking into account the temperature operating correction factors required by §§ 4a.749a-T or 4b.117 of this subchap-

ter, and set forth in the Airplane Flight Manual for the airplane.

§ 40.54 *Weight limitations.* (a) No airplane shall be taken off from any airport located at an elevation outside of the altitude range for which maximum take-off weights have been determined, and no airplane shall depart for an airport of intended destination or have any airport specified as an alternate which is located at an elevation outside of the altitude range for which maximum landing weights have been determined.

(b) The weight of the airplane at take-off shall not exceed the authorized maximum take-off weight for the elevation of the airport from which the take-off is to be made.

(c) The weight at take-off shall be such that, allowing for normal consumption of fuel and oil in flight to the airport of intended destination, the weight on arrival will not exceed the authorized maximum landing weight for the elevation of such airport.

§ 40.55 *Take-off limitations to provide for engine failure.* No take-off shall be made except under conditions which will permit compliance with the following requirements.

(a) It shall be possible, from any point in the take-off up to the time of attaining the critical-engine-failure speed, to bring the airplane to a safe stop on the runway as shown by the accelerate-stop distance data.

(b) It shall be possible, if the critical engine should fail at any instant after the airplane attains the critical-engine-failure speed, to proceed with the take-off and attain a height of 50 feet, as indicated by the take-off path data, before passing over the end of the runway. Thereafter it shall be possible to clear all obstacles, either by at least 50 feet vertically, as shown by the take-off path data, or by at least 200 feet horizontally within the airport boundaries and by at least 300 feet horizontally after passing beyond such boundaries. In determining the allowable deviation of the flight path in order to avoid obstacles by at least the distances above set forth, it shall be assumed that the airplane is not banked before reaching a height of 50 feet, as shown by the take-off path data, and that a maximum bank thereafter does not exceed 15°.

(c) In applying the requirements of paragraphs (a) and (b) of this section, corrections shall be made for any gradient of the take-off surface. To allow for wind effect, take-off data based on still air may be corrected by not more than 50 percent of the reported wind component along the take-off path if opposite to the direction of take-off, and shall be corrected by not less than 150 percent of the reported wind component if in the direction of take-off.

§ 40.56 *En route limitations; all engines operating.* No airplane shall be taken off at a weight in excess of that which would permit a rate of climb (expressed in feet per minute), with all engines operating, of at least 6 V_{s_0} (when V_{s_0} is expressed in miles per hour) at an altitude of at least 1,000 feet above the elevation of the highest ground or obstruction within 10 miles on either side of the intended track. Transport category airplanes certificated under Part 4a of this subchapter are not required to comply with this section. For the purpose of this section it shall be assumed that the weight of the airplane as it proceeds along its intended track is progressively reduced by normal consumption of fuel and oil.

§ 40.57 *En route limitations; one engine inoperative.* No airplane shall be taken off at a weight in excess of that which would permit a rate of climb (expressed in feet per minute), with one engine inoperative, of at least $\left(0.06-\frac{0.08}{N}\right)V_{s_0}^2$ (when N is the number of engines installed and V_{s_0} is expressed in miles per hour) at an altitude of at least 1,000 feet above the elevation of the highest ground or obstruction within 10 miles on either side of the intended track: *Provided*, That for transport category airplanes certificated under Part 4a of this subchapter, the rate of climb shall be 0.02 $V_{s_0}^2$. For the purpose of this section it shall be assumed that the weight of the airplane as it proceeds along its intended track is progressively reduced by normal consumption of fuel and oil.

§ 40.58 *En route limitations; two engines inoperative.* No airplane having four or more engines shall be flown along an intended track except under the following conditions: *Provided*, That this section shall not apply to transport category airplanes certificated under Part 4a of this subchapter:

(a) No place along the intended track shall be more than 90 minutes away from an available landing area at which a landing may be made in accordance with the requirements of § 40.61, assuming all engines are operating at cruising power; or

(b) The take-off weight is such that the airplane with two engines inoperative shall have a rate of climb (expressed in feet per minute) of at least 0.01 $V_{s_0}^2$ (when V_{s_0} is expressed in miles per hour) either at an altitude of 1,000 feet above the elevation of the highest ground or obstruction within 10 miles on either side of the intended track or at an altitude of 5,000 feet, whichever is higher. The rate of climb referred to in this paragraph shall be determined by assuming the airplane's weight to be either that expected at the moment of failure of the second engine, assuming the failure to occur 90 minutes after departure, or that which may be attained by dropping fuel at the moment of failure of the second engine, assuming that sufficient fuel is retained to arrive at an altitude of at least 1,000 feet directly over the landing area.

§ 40.59 *Special en route limitations.* The 10-mile lateral distance specified in §§ 40.56 through 40.58 may, for a distance of no more than 20 miles, be reduced to 5 miles, if operating VFR, or if air navigational facilities are so located as to provide a reliable and accurate identification of any high ground or obstruction located outside of such 5-mile lateral distance but within the 10-mile distance.

§ 40.60 *Landing distance limitations; airport of destination.* No airplane shall be taken off at a weight in excess of that which, under the conditions stated hereinafter would permit the airplane to be brought to rest at the field of intended destination within 60 percent of the effective length of the runway from a point 50 feet directly above the intersection of the obstruction clearance plane and the runway. For the purpose of this section it shall be assumed that the take-off weight of the airplane is reduced by the weight of the fuel and oil expected to be consumed in flight to the field of intended destination.

(a) It shall be assumed that the aircraft is landed on the most favorable runway and direction in still air.

(b) It shall be assumed, considering the probable wind velocity and direction, that the airplane is landed on the most suitable runway, taking due account of the ground handling characteristics of the airplane type involved and other conditions (e. g., landing aids, terrain, etc.) and allowing for the effect on the landing path and roll of not more than 50 percent of the wind component along the landing path if opposite to the direction of landing, or not less than 150 percent of the wind component if in the direction of landing.

(c) If the airport of intended destination will not permit full compliance with paragraph (b) of this section, the aircraft may be taken off if an alternate airport is designated which permits compliance with § 40.61.

§ 40.61 *Landing distance limitations; alternate airports.* No airport shall be designated as an alternate airport in a dispatch release unless the aircraft at the weight anticipated at the time of arrival at such airport can comply with the requirements of § 40.60: *Provided*, That the aircraft can be brought to rest within 70 percent of the effective length of the runway.

§ 40.62 *Operating limitations for aircraft not certificated in the transport category.* In operating any large, nontransport category aircraft in passenger service after December 31, 1953, the provisions of §§ 40.63 through 40.65 shall be complied with, unless deviations therefrom are specifically authorized by the Administrator on the ground that the special circumstances of a particular case make a literal observance of the requirements unnecessary for safety. Prior to that date such aircraft shall be operated in accordance with such operating limitations as the Administrator determines will provide a safe relation between the performance of the aircraft and the airports to be used and the areas to be traversed. Performance data published or approved by the Administrator for each such nontransport category aircraft shall be used in determining compliance with these provisions.

§ 40.63 *Take-off limitations.* No take-off shall be made at a weight in excess of that which will permit the aircraft to be brought to a safe stop within the effective length of the runway from any

point during the take-off up to the time of attaining 105 percent V_{MC} or 115 percent V_{s_1}, whichever is the greater. In applying the requirements of this section:

(a) It may be assumed that take-off power is used on all engines during the acceleration;

(b) Account may be taken of not more than 50 percent of the reported wind component along the take-off path if opposite to the direction of take-off, and account shall be taken of not less than 150 percent of the reported wind component if in the direction of the take-off;

(c) Account shall be taken of the average runway gradient when the average gradient is greater than ½ percent. The average runway gradient is the difference between the elevations of the end points of the runway divided by the total length;

(d) It shall be assumed that the aircraft is operating in the standard atmosphere.

§ 40.64 *En route limitations; one engine inoperative.* (a) No take-off shall be made at a weight in excess of that which will permit the aircraft to climb at a rate of at least 50 feet per minute with the critical engine inoperative at an altitude of at least 1,000 feet above the elevation of the highest obstacle within 5 miles on either side of the intended track or at an altitude of 5,000 feet, whichever is the higher: *Provided*, That in the alternative an air carrier may utilize a procedure whereby the aircraft is operated at an altitude such that, in event of an engine failure, the aircraft can clear the obstacles within 5 miles on either side of the intended track by 1,000 feet, if the air carrier can demonstrate to the satisfaction of the Administrator that such a procedure can be used without impairing the safety of operation. If such a procedure is utilized, the rate of descent for the appropriate weight and altitude shall be assumed to be 50 feet per minute greater than indicated by the performance information published or approved by the Administrator. Before approving such a procedure, the Administrator shall take into account, for the particular route, route segment, or areas concerned, the reliability of wind and weather forecasting, the location and types of aids to navigation, the prevailing weather conditions, particularly the frequency and amount of turbulence normally encountered, terrain features, air traffic control problems, and all other operational factors which affect the safety of an operation utilizing such a procedure.

(b) In applying the requirements of paragraph (a) of this section, it shall be assumed that:

(1) The critical engine is inoperative;

(2) The propeller of the inoperative engine is in the minimum drag position;

(3) The wing flaps and landing gear are in the most favorable positions;

(4) The operative engine or engines are operating at the maximum continuous power available;

(5) The aircraft is operating in the standard atmosphere;

(6) The weight of the aircraft is progressively reduced by the weight of the anticipated consumption of fuel and oil.

§ 40.65 *Landing distance limitations; airport of intended destination.* No take-off shall be made at a weight in excess of that which, allowing for the anticipated weight reduction due to consumption of fuel and oil, will permit the aircraft to be brought to a stop within 60 percent of the effective length of the most suitable runway at the airport of intended destination.

(a) This weight shall in no instance be greater than that permissible if the landing were to be made:

(1) On the runway with the greatest effective length in still air and,

(2) On the runway required by the condition of the probable wind, taking into account not more than 50 percent of the probable head-wind component and not less than 150 percent of the probable tail-wind component.

(b) In applying the requirements of this section it shall be assumed that:

(1) The aircraft passes directly over the intersection of the obstruction clearance plane and the runway at a height of 50 feet in a steady gliding approach at a true indicated air speed of at least 1.3 V_{s_1};

(2) The landing is made in such a manner that it does not require any exceptional degree of skill on the part of the pilot.

(3) The aircraft is operating in the standard atmosphere.

§ 40.66 *Proving tests.* (a) A type of aircraft not previously approved for use in scheduled operation shall have at least 100 hours of proving tests, in addition to the aircraft certification tests, accomplished under the supervision of an authorized representative of the Administrator. As part of the 100-hour total at least 50 hours shall be flown over authorized routes and at least 10 hours shall be flown at night.

(b) A type of aircraft which has been previously proved shall be tested for at least 50 hours of which at least 25 hours shall be flown over authorized routes when the aircraft:

(1) Is materially altered in design, or

(2) Is to be used by an air carrier who has not previously proved such a type.

(c) During proving tests only those persons required to make the tests and those designated by the Board or the Administrator shall be carried. Mail, express, and other cargo may be carried when approved by the Administrator.

AIRCRAFT INSTRUMENTS AND EQUIPMENT

§ 40.70 *Aircraft instruments and equipment.* (a) Instruments and equipment shall be approved and shall be installed in accordance with the provisions of the airworthiness requirements applicable to the instruments or equipment concerned.

(b) The following instruments and equipment shall be in operable condition prior to take-off, except as provided in § 40.182 (b) for continuance of flight with equipment inoperative:

1) Instruments and equipment required to comply with airworthiness requirements under which the aircraft is type certificated and as required by the provisions of § 40.300,

(2) Instruments and equipment specified in §§ 40.71 through 40.78 for all operations, and the instruments and equipment specified in §§ 40.80 through 40.92 for the type of operation indicated, wherever these items are not already provided in accordance with subparagraph (1) of this paragraph.

INSTRUMENTS AND EQUIPMENT FOR ALL OPERATIONS

§ 40.71 *Flight and navigational equipment for all operations.* The following flight and navigational instruments and equipment are required for all operations:

(a) An air-speed indicating system with heated pitot tube or equivalent means for preventing malfunction due to icing,

(b) Sensitive altimeter,

(c) Clock (sweep-second),

(d) Free-air temperature indicator,

(e) Gyroscopic bank and pitch indicator,

(f) Gyroscopic rate-of-turn indicator combined with a slip-skid indicator,

(g) Gyroscopic direction indicator,

(h) Magnetic compass,

(i) Rate-of-climb indicator (vertical speed).

§ 40.72 *Powerplant instruments for all operations.* The following powerplant instruments are required for all operations:

(a) Carburetor air temperature indicator for each engine,

(b) Coolant temperature indicator for each liquid-cooled engine,

(c) Cylinder head temperature indicator for each air-cooled engine,

(d) Fuel pressure indicator for each pump-fed engine,

(e) Fuel flowmeter or fuel mixture indicator for each engine not equipped with an automatic altitude mixture control,

(f) Means for indicating fuel quantity in each fuel tank used,

(g) Manifold pressure indicator for each engine,

(h) Oil pressure indicator for each engine,

(i) Oil quantity indicator for each oil tank when a transfer or separate oil reserve supply is used,

(j) Oil temperature indicator for each engine,

(k) Tachometer for each engine,

(l) On and after December 31, 1953, an independent fuel pressure warning device for each engine or a master warning device for all engines with means for isolating the individual warning circuits from the master warning device.

§ 40.73 *Emergency equipment for all operations.* (a) The emergency equipment specified in paragraphs (b), (c), and (d) of this section is required for all operations. Such equipment shall be readily accessible to the crew, and the method of operation shall be plainly indicated. When such equipment is carried in compartments or containers, the compartments or containers shall be so marked as to be readily identifiable.

(b) Hand fire extinguishers for crew, passenger, and cargo compartments:

Hand fire extinguishers of an approved type shall be provided for use in crew, passenger, and cargo compartments in accordance with the following requirements:

(1) The type and quantity of extinguishing agent shall be suitable for the type of fires likely to occur in the compartment where the extinguisher is intended to be used.

(2) At least one hand fire extinguisher shall be provided and conveniently located on the flight deck for use by the flight crew.

(3) At least one hand fire extinguisher shall be conveniently located in the passenger compartment of aircraft accommodating more than six but less than 31 passengers. On aircraft accommodating more than 30 passengers, at least two fire extinguishers shall be provided. None need be provided in passenger compartments of aircraft accommodating six or less persons.

(c) First-aid equipment: First-aid equipment suitable for treatment of injuries likely to occur in flight or in minor accidents shall be provided in a quantity appropriate to the number of passengers and crew accommodated in the airplane.

(d) Crash ax: All aircraft shall be equipped with at least one crash ax, and if accommodations are provided for more than 30 persons including the crew aircraft shall be equipped with at least two crash axes. This equipment shall be stowed in readily accessible locations.

§ 40.74 *Seats and safety belts for all occupants.* A seat and an individual safety belt are required for each passenger and crew member, excluding infants, who are in other than a supine position during take-off and landing. One safety belt only is required in a berth for one or two persons in a supine position during take-off and landing. During flight between take-off and landing, one safety belt is sufficient for two persons occupying a multiple lounge or divan seat.

§ 40.75 *Miscellaneous equipment for all operations.* All aircraft shall have installed the following equipment:

(a) If protective fuses are used, spare fuses of a number approved for the particular aircraft and appropriately described in the air carrier manual.

(b) Windshield wiper or equivalent for each pilot.

(c) A power supply and distribution system capable of producing and distributing the load for all required instruments and equipment using an external power supply in the event of failure of any one power source or component of the power distribution system: *Provided*, That the Administrator may authorize the use of common elements in the power distribution system when he finds that such elements are so designed as to be reasonably protected against malfunction. Engine-driven sources of energy, when used, shall be on separate engines.

(d) Means for indicating the adequacy of the power being supplied to required flight instruments.

(e) Two independent static pressure systems, so vented to the outside atmosphere that they will be least affected by air flow variation, moisture, or other foreign matter, and so installed as to be airtight except for the vent into the atmosphere. When a means is provided for transferring an instrument from its primary operating system to an alternate system, such means shall include a positive positioning control and shall be marked to indicate clearly which system is being used.

(f) Means for locking all companionway doors which separate passenger compartments from crew compartments. Keys for all doors which separate passenger compartments from other compartments having emergency exit provisions shall be readily available to all crew members. All doors which lead to compartments normally accessible to passengers and which are capable of being locked by passengers shall be provided with means for unlocking by the crew in the event of an emergency.

(g) For seaplanes only, anchor light or lights, a warning bell for signalling when not under way during fog conditions, and an anchor adequate for the size of the seaplane.

§ 40.76 *Cockpit check procedure for all operations.* The air carrier shall provide for each type of aircraft a cockpit check procedure adapted to each operation in which the aircraft is to be utilized. This procedure shall include all items necessary for flight crew members to check for safety prior to starting engines, prior to taking off, prior to landing, and in powerplant emergencies. It shall be so designed as to obviate the necessity for a flight crew member to rely upon his memory for items to be checked and shall be readily usable in the cockpit of each aircraft.

§ 40.77 *Passenger information for all operations.* All aircraft shall be equipped with signs visible to passengers and cabin attendants to notify such persons when smoking is prohibited and when safety belts should be fastened. These signs shall be capable of on-off operation by the crew.

§ 40.78 *Exit and evacuation marking for all operations.* All aircraft shall comply with the provisions of this section.

(a) Emergency exits of aircraft carrying passengers shall be clearly marked as such in letters not less than three-fourths of an inch high with luminous paint, such markings to be located either on or immediately adjacent to the pertinent exit and readily visible to passengers. Location and method of operation of the handles shall be marked with luminous paint.

(b) The exterior areas of the fuselage of an aircraft shall be marked to indicate the location of mechanisms of access and those areas suitable for cutting to facilitate the escape and rescue of occupants in the event of an accident.

INSTRUMENTS AND EQUIPMENT FOR SPECIAL OPERATIONS

§ 40.80 *Instruments and equipment for operations at night.* Each aircraft operated at night shall be equipped with the following instruments and equipment in addition to those required for all operations:

(a) Flashing position lights,

(b) Two landing lights,

(c) Two class 1 or class 1A landing flares,

(d) Instrument lights providing sufficient illumination to make all instruments, switches, etc., easily readable, so installed that their direct rays are shielded from the pilots' eyes and that no objectionable reflections are visible to them. A means of controlling the intensity of illumination shall be provided unless it is shown that non-dimming instrument lights are satisfactory,

(e) At least one heavy-duty electric lantern conveniently located for use in passenger compartments. For aircraft carrying more than 30 passengers, at least two such lanterns shall be provided,

(f) An air-speed indicating system with heated pitot tube or equivalent means for preventing malfunctioning due to icing, and

(g) A sensitive altimeter.

§ 40.81 *Instruments and equipment for operations under IFR.* Each aircraft operated under IFR shall be equipped with the following instruments and equipment in addition to those required by §§ 40.71 through 40.78.

(a) An additional air-speed indicating system with heated pitot tube or equivalent means for preventing malfunctioning due to icing,

(b) An additional sensitive altimeter, and

(c) Instrument lights providing sufficient illumination to make all instruments, switches, etc., easily readable, so installed that their direct rays are shielded from the pilots' eyes and that no objectionable reflections are visible to them. A means of controlling the intensity of illumination shall be provided unless it is shown that non-dimming instrument lights are satisfactory.

§ 40.83 *Supplemental oxygen*—(a) *General.* Except where supplemental oxygen is provided in accordance with the requirements of § 40.84, supplemental oxygen shall be furnished and used as set forth in paragraphs (b) and (c) of this section. The amount of supplemental oxygen required for a particular operation to comply with the rules in this part shall be determined on the basis of flight altitudes and flight duration consistent with the operating procedures established for each such operation and route. As used in the oxygen requirements set forth in this section, "altitude" shall mean the pressure altitude corresponding with the pressure in the cabin of the airplane, and "flight altitude" shall mean the altitude above sea level at which the airplane is operated.

(b) *Crew members.* (1) At altitudes above 10,000 feet to and including 12,000 feet oxygen shall be provided for, and used by, each member of the flight crew on flight deck duty, and provided for all other crew members during the portion of the flight in excess of 30 minutes within this range of altitudes.

(2) At altitudes above 12,000 feet oxygen shall be provided for, and used by, each member of the flight crew on flight deck duty, and provided for all other crew members during the entire flight time at such altitudes.

(c) *Passengers.* Each air carrier shall provide a supply of oxygen for passenger safety as approved by the Administrator in accordance with the following standards:

(1) For flights of over 30-minute duration at altitudes above 8,000 feet to and including 14,000 feet a supply of oxygen sufficient to furnish oxygen for 30 minutes to 10 percent of the number of passengers carried shall be required.

(2) For flights at altitudes above 14,000 feet to and including 15,000 feet a supply of oxygen sufficient to provide oxygen for the duration of the flight at such altitudes for 30 percent of the number of passengers carried shall generally be considered adequate.

(3) For flights at altitudes above 15,000 feet a supply of oxygen sufficient to provide oxygen for each passenger carried during the entire flight at such altitudes shall be required.

§ 40.84 *Supplemental oxygen requirements for pressurized cabin airplanes.* When operating pressurized cabin airplanes, the air carrier shall so equip such airplanes as to permit compliance with the following requirements in the event of cabin pressurization failure.

(a) *For crew members.* When operating such airplanes at flight altitudes above 10,000 feet, the air carrier shall provide sufficient oxygen for all crew members for the duration of the flight at such altitudes: *Provided*, That not less than a 2-hour supply of oxygen shall be provided for the flight crew members on flight deck duty. The oxygen supply required by § 40.86 may be considered in determining the supplemental breathing supply required for flight crew members on flight deck duty in the event of cabin pressurization failure.

(b) *For passengers.* When operating such airplanes at flight altitudes above 8,000 feet, the air carrier shall provide the following amounts of oxygen:

(1) When an airplane is not flown at a flight altitude of over 25,000 feet, a supply of oxygen sufficient to furnish oxygen for 30 minutes to 10 percent of the number of passengers carried shall be considered adequate, if at any point along the route to be flown the airplane can safely descend to a flight altitude of 14,000 feet or less within 4 minutes.

(2) In the event that such airplane cannot descend to a flight altitude of 14,000 feet or less within 4 minutes, the following supply of oxygen shall be provided:

(i) For the duration of the flight in excess of 4 minutes at flight altitudes above 15,000 feet a supply sufficient to comply with § 40.83 (c) (3);

(ii) For the duration of the flight at flight altitudes above 14,000 feet to and including 15,000 feet, a supply sufficient to comply with § 40.83 (c) (2); and

(iii) For flight at flight altitudes above 8,000 feet to and including 14,000 feet, a supply sufficient to furnish oxygen for 30 minutes to 10 percent of the number of passengers carried.

(3) When an airplane is flown at a flight altitude above 25,000 feet, sufficient oxygen shall be furnished in accordance with the following requirements to permit the airplane to descend to an appropriate flight altitude at which the flight can be safely conducted. Sufficient oxygen shall be furnished to provide oxygen for 30 minutes to 10 percent of the number of passengers carried for the duration of the flight above 8,000 feet to and including 14,000 feet and to permit compliance with § 40.83 (c) (2) and (c) (3) for flight above 14,000 feet.

(c) For purposes of this section it shall be assumed that the cabin pressurization failure will occur at a time during flight which is critical from the standpoint of oxygen need and that after such failure the airplane will descend, without exceeding its normal operating limitations, to flight altitudes permitting safe flight with respect to terrain clearance.

§ 40.85 *Equipment standards.* The oxygen apparatus, the minimum rates of oxygen flow, and the supply of oxygen necessary to comply with the requirements of § 40.83 shall meet the standards established in § 4b.651 of this subchapter: *Provided*, That where full compliance with such standards is found by the Administrator to be impractical, he may authorize such changes in these standards as he finds will provide an equivalent level of safety.

§ 40.86 *Protective breathing equipment for the flight crew*—(a) *Pressurized cabin airplanes.* Each required flight crew member on flight deck duty shall have easily available at his station protective breathing equipment covering the eyes, nose, and mouth, or the nose and mouth where accessory equipment is provided to protect the eyes, to protect him from the effects of smoke, carbon dioxide, and other harmful gases. Not less than a 300-liter STPD supply of oxygen for each required flight crew member on flight deck duty shall be provided for this purpose.

(b) *Nonpressurized cabin airplanes.* The requirement stated in paragraph (a) of this section shall apply to nonpressurized cabin airplanes, if the Administrator finds that it is possible to obtain a dangerous concentration of smoke, carbon dioxide, or other harmful gases in the flight crew compartments in any attitude of flight which might occur when the aircraft is flown in accordance with either the normal or emergency procedures approved by the Administrator.

§ 40.87 *Equipment for overwater operations.* (a) The following equipment shall be required for all extended overwater operations.

(1) Life preserver or other adequate individual flotation device for each occupant of the aircraft,

(2) Lifesaving rafts sufficient in number to adequately carry all occupants of the aircraft,

(3) Suitable pyrotechnic signalling devices,

(4) One portable emergency radio signalling device, capable of transmission on the appropriate emergency frequency or frequencies, which is not dependent upon the aircraft power supply and which is self-buoyant and water-resistant, and

(b) Rafts and life preservers referred to in paragraph (a) (1) and (2) of this section shall be installed so as to be available to the crew and passengers.

§ 40.88 *Equipment for operations in icing conditions.* (a) For all operations in icing conditions each aircraft shall be equipped with means for the prevention or removal of ice on windshields, wings, empennage, propellers, and other parts of the aircraft where ice formation will adversely affect the safety of the aircraft.

(b) For operations in icing conditions at night means shall be provided for illuminating or otherwise determining the formation of ice on the portions of the wings which are critical from the standpoint of ice accumulation. When illuminating means are used, such means shall be of a type which will not cause glare or reflection which would handicap crew members in the performance of their normal functions.

RADIO EQUIPMENT

§ 40.90 *Radio equipment; general.* Each aircraft used in scheduled air transportation shall be equipped with the radio equipment specified for the type of operation in which it is engaged. Where two independent radio systems are required by §§ 40.91 and 40.92, each system shall have an independent antenna installation: *Provided*, That where rigidly supported nonwire antennas or other antenna installations of equivalent reliability are used, only one such antenna need be provided.

§ 40.91 *Radio equipment for operations under VFR over routes navigated by pilotage.* (a) For operations conducted under VFR over routes on which navigation can be accomplished by pilotage, each aircraft shall be equipped with such radio equipment as is necessary to:

(1) Permit communications, under normal operating conditions, with at least one appropriate ground station (as specified in § 40.24) from any point on the route and with other aircraft operated by the air carrier;

(2) Permit communications with airport traffic control towers from any point in the control zone within which flights are intended. The means employed for compliance with paragraph (a) of this section may be used for compliance with this subparagraph; and

(3) Receive meteorological information from any point en route by either of two independent systems. Either of the means required for compliance with subparagraphs (1) and (2) of this paragraph may be used to comply with one of the systems required by this paragraph.

(b) For all operations at night conducted under VFR over routes on which navigation can be accomplished by pilotage, each aircraft, in addition to the equipment specified in paragraph (a) of this section, shall be equipped with at least one receiving system capable of receiving route navigation signals applicable to the route to be flown, except that no marker beacon receiver or ILS receiver need be provided.

§ 40.92 *Radio equipment for operations under VFR over routes not navigated by pilotage or for operations under*

IFR. (a) For operations conducted under VFR over routes on which navigation cannot be accomplished by pilotage or for operations conducted under IFR, each aircraft, in addition to the equipment required by § 40.91, shall be equipped with such approved radio equipment as is necessary to receive satisfactorily, by either of two independent systems, radio navigational signals from all primary en route and approach navigational facilities intended to be used, except that only one marker beacon receiver which provides visual and aural signals or one ILS receiver need be provided. Equipment provided to receive signals en route may be used to receive signals on approach if it is capable of receiving both signals.

(b) In the case of operation on routes using procedures based on automatic direction finding, only one automatic direction finding system need be installed: *Provided,* That ground facilities are so located and the aircraft so fueled that, in case of failure of the automatic direction finding equipment, the flight may proceed safely to a suitable airport which has ground radio navigational facilities whose signals may be received by use of the remaining aircraft radio systems.

(c) During the period of transition from low frequency to very high frequency radio navigation systems one means of satisfactorily receiving signals over each of these systems shall be considered as complying with the requirement that two independent systems be provided to receive en route or approach navigation facility signals: *Provided,* That ground facilities are so located and the aircraft so fueled that in case of failure of either system the flight may proceed safely to a suitable airport which has ground radio navigational facilities whose signals may be received by use of the remaining aircraft radio system.

MAINTENANCE AND INSPECTION REQUIREMENTS

§ 40.100 *General.* Irrespective of whether the air carrier has made arrangements with any other person for the performance of maintenance and inspection functions, each air carrier shall have the primary responsibility for the airworthiness of its aircraft and required equipment.

§ 40.101 *Maintenance and inspection requirements.* (a) The inspection organization shall be responsible for determining that workmanship, methods employed, and material used are in conformity with the requirements of the Civil Air Regulations, with accepted standards and good practices, and that any airframe, powerplant, propeller, or appliance released for flight is airworthy.

(b) Any individual who is directly in charge of inspection, maintenance, overhaul, or repair of any airframe, powerplant, propeller, or appliance shall hold an appropriate license or airman certificate.

§ 40.102 *Maintenance and inspection training program.* The air carrier, or the person with whom arrangements have been made for the performance of maintenance and inspection functions, shall establish and maintain a training program to insure that all maintenance and inspection personnel charged with determining the adequacy of work performed are fully informed with respect to all procedures and techniques and with new equipment introduced into service, and are competent to perform their duties.

§ 40.103 *Maintenance and inspection personnel duty time limitations.* All mechanics shall be relieved of all duty for a period of at least 24 consecutive hours during any 7 consecutive days.

AIRMAN AND CREW MEMBER REQUIREMENTS

§ 40.110 *Utilization of airman; general.* No air carrier shall utilize an individual as an airman unless he holds a valid appropriate airman certificate issued by the Administrator and is otherwise qualified for the particular operation in which he is to be utilized.

§ 40.111 *Composition of flight crew.* (a) No air carrier shall operate an aircraft with less than the minimum flight crew specified in the airworthiness certificate for the type of aircraft and required in this part for the type of operation.

(b) Where the provisions of this part require the performance of two or more functions for which an airman certificate is necessary, such requirement shall not be satisfied by the performance of multiple functions at the same time by any airman.

(c) Where the air carrier is authorized to operate under instrument conditions or operates aircraft of 12,500 pounds or more maximum certificated weight, the minimum pilot crew shall be 2 pilots.

(d) On flights requiring a flight engineer, at least one other flight crew member shall be sufficiently qualified, so that in the event of illness or other incapacity, emergency coverage can be provided for that function for the safe completion of the flight. A pilot need not hold a flight engineer certificate to function in the capacity of a flight engineer for emergency conditions only.

§ 40.112 *Flight engineer.* An airman holding a valid flight engineer certificate shall be required on all aircraft certificated for more than 80,000 pounds maximum certificated take-off weight and on all four-engine aircraft certificated for more than 30,000 pounds maximum certificated take-off weight where the Administrator finds that the design of the aircraft used or the type of operation is such as to require engineer personnel for the safe operation of the aircraft.

§ 40.113 *Flight attendant.* At least one flight attendant shall be provided by the air carrier on all flights carrying passengers in aircraft of 10-passenger capacity or more.

§ 40.114 *Aircraft dispatcher.* Each air carrier shall provide an adequate number of qualified dispatchers at each dispatch center to insure the proper operational control of each flight.

TRAINING PROGRAM

§ 40.120 *Training program; general.* (a) Each air carrier shall establish a training program sufficient to insure that each crew member and dispatcher used by the air carrier is adequately trained to perform the duties to which he is to be assigned. The initial training phases will be satisfactorily completed prior to serving in scheduled operations.

(b) Each air carrier shall be responsible for providing adequate ground and flight training facilities and properly qualified instructors. A sufficient number of check airmen holding airman certificates and ratings appropriate to the type of check being conducted shall be provided for flight checking.

(c) The training program for each flight crew member shall consist of appropriate ground and flight training including proper crew coordination. Procedures for each flight crew function shall be standardized to the extent that each flight crew member will know the functions for which he is responsible and the relation of those functions to those of other flight crew members. The initial program shall include at least the appropriate requirements specified in §§ 40.121 through 40.124.

(d) The crew member emergency procedures training program shall include at least the requirements specified in § 40.124.

(e) The appropriate instructor, supervisor, or check airman shall certify to the proficiency of each crew member and dispatcher upon completion of his training, and such certification shall become a part of the individual's record.

§ 40.121 *Initial pilot ground training.* Ground training for all pilots shall include instruction in at least the following:

(a) The appropriate provisions of the air carrier operations specifications and appropriate provisions of the Civil Air Regulations with particular emphasis on the operation and dispatching rules and aircraft operating limitations;

(b) Dispatch procedures and appropriate contents of the manuals;

(c) The duties and responsibilities of crew members;

(d) The type of aircraft to be flown, including a study of the aircraft, engines, all major components and systems, performance limitations, standard and emergency operating procedures, and appropriate contents of the approved Airplane Flight Manual;

(e) The principles and methods of determining weight and balance limitations for take-off and landing;

(f) Navigation and use of appropriate aids to navigation, including the instrument approach facilities and procedures which the air carrier is authorized to use;

(g) Airport and airways traffic control systems and procedures, and ground control letdown procedures if pertinent to the operation. (To the extent practicable this should include visits to typical air traffic control units);

(h) Meteorology sufficient to insure a practical knowledge of the principles of icing, fog, thunderstorms, frontal systems, etc., and the recommended methods of operating under these various conditions;

(i) Procedures for operation in turbulent air and during periods of ice, hail, thunderstorms, or potentially hazardous meteorological conditions.

§ 40.122 *Initial pilot flight training.* (a) Flight training for all pilots shall include at least take-offs, landings, and normal and emergency flight maneuvers in each type of aircraft to be flown by him in scheduled operations, and flight under simulated instrument flight conditions.

(b) Flight training for a pilot qualifying to serve as pilot in command shall include flight instruction and practice in at least the following maneuvers and procedures:

(1) In each type of aircraft to be flown by him in scheduled operations:

(i) At the authorized maximum take-off weight, take-off using maximum take-off power with simulated failure of the critical engine. For transport category aircraft the simulated engine failure shall be accomplished as closely as possible to the critical engine failure speed (V_1), and climb-out shall be accomplished at a speed as close as possible to the take-off safety speed (V_2). Each pilot shall determine the proper values for speeds V_1 and V_2;

(ii) At the authorized maximum landing weight, flight in four-engine aircraft, where appropriate, with the most critical combinations of two engines inoperative, or operating at zero thrust utilizing appropriate climb speeds as set forth in the Airplane Flight Manual;

(iii) At the authorized maximum landing weight, simulated pull-out from the landing and approach configurations accomplished at a safe altitude with the critical engine inoperative or operating at zero thrust: *Provided,* That suitable combinations of aircraft weight and power less than those specified in subdivisions (i), (ii), and (iii) of this subparagraph may be employed if the performance capabilities of the aircraft under the above conditions are simulated.

(2) Conduct of flight under simulated instrument conditions, utilizing all types of navigational facilities and the letdown procedures used in normal operations. If a particular type of facility is not available in the training area, such training may be accomplished in a synthetic trainer.

§ 40.123 *Initial flight engineer training.* (a) The training for flight engineers shall include at least paragraphs (a) through (e) of § 40.121.

(b) Flight engineers shall be given sufficient training in flight to become proficient in those duties assigned them by the air carrier. Except for emergency procedures, this training may be accomplished during scheduled flight under the supervision of a qualified flight engineer.

§ 40.124 *Initial crew member emergency training.* (a) The training in emergency procedures shall be designed to give each crew member appropriate individual instruction in all emergency procedures, including assignments in the event of an emergency, and proper coordination between crew members. At least the following subjects as appropriate to the individual crew member shall be taught: the procedures to be followed in the event of the failure of an engine, or engines, or other aircraft components or systems, emergency decompression, fire in the air or on the ground, ditching, evacuation, the location and operation of all emergency equipment, and power setting for maximum endurance and maximum range.

(b) Synthetic trainers may be used for training of crew members in emergency procedures where the trainers sufficiently simulate flight operating emergency conditions for the equipment to be used.

§ 40.125 *Initial aircraft dispatcher training.* (a) The training program for aircraft dispatchers shall provide for training in their duties and responsibilities and shall include a study of the flight operation procedures, air traffic control procedures, the performance of the aircraft used by the air carrier, navigational aids and facilities, and meteorology. Particular emphasis shall be placed upon the procedures to be followed in the event of emergencies, including the alerting of proper Governmental, company, and private agencies to render maximum assistance to the aircraft in distress.

(b) Each aircraft dispatcher shall, prior to initially performing the duty of an aircraft dispatcher, satisfactorily demonstrate to the ground instructor authorized to certify to his proficiency, his knowledge of the following subjects:

(1) Contents of the air carrier operating certificate and appropriate provisions of the air carrier operations specifications and manual and of the Civil Air Regulations,

(2) Characteristics of the aircraft operated by the air carrier,

(3) Cruise control data and cruising speeds for such aircraft,

(4) Maximum authorized loads for the aircraft for the routes and airports to be used,

(5) Air carrier radio facilities,

(6) Characteristics and limitations of each type of radio and navigational facility to be used,

(7) Effect of weather conditions on aircraft radio reception,

(8) Airports to be used and the general terrain over which the aircraft are to be flown,

(9) Prevailing weather phenomena,

(10) Sources of weather information available,

(11) Pertinent air traffic control procedures, and

(12) Emergency procedures.

§ 40.126 *Recurrent training.* (a) Each air carrier shall provide such training as is necessary to insure the continued competence of each crew member and dispatcher and to insure that each possesses adequate knowledge and familiarity with all new equipment and procedures to be used by him.

(b) Each air carrier shall, at intervals established as part of the training program, check the competence of each crew member and dispatcher with respect to procedures, techniques, and information essential to the satisfactory performance of his duties. Where the check of the pilot in command requires actual flight, such check shall be considered to have been met by the checks accomplished in accordance with § 40.132.

(c) The appropriate instructor, supervisor, or check airman shall certify as to the proficiency demonstrated, and such certification shall become a part of the individual's record. In the case of copilots, the pilot in command may make such certification.

FLIGHT CREWMAN AND DISPATCHER QUALIFICATIONS

§ 40.130 *Qualification; general.* (a) No air carrier shall utilize any flight crew member or dispatcher, nor shall any such airman perform the duties authorized by his airman certificate, unless he satisfactorily meets the appropriate requirements of § 40.120 or § 40.126, and §§ 40.131 through 40.139, and the recent experience requirements specified in the appropriate airman certification parts. All pilots serving as pilot in command shall hold appropriate airline transport pilot certificates and ratings. All other pilots shall hold at least commercial pilot certificates and instrument ratings.

(b) Check airmen shall certify as to the proficiency of the pilot in command being examined, as required by §§ 40.132 and 40.135, and such certification shall become a part of the airman's records.

§ 40.131 *Pilot recent experience; aircraft.* No air carrier shall schedule a pilot to serve as such in scheduled air transportation unless within the preceding 90 days he has made at least 3 take-offs and 3 landings in the aircraft of the particular type on which he is to serve.

§ 40.132 *Pilot checks*—(a) *Line check.* Prior to serving as pilot in command, and at least once each 12 months thereafter, a pilot shall satisfactorily accomplish a line check in one of the types of aircraft normally to be flown by him. This check shall be given by a check pilot who is qualified for the route. It shall consist of at least a flight between terminals over a route to which the pilot is normally assigned.

(b) *Proficiency check.* (1) An air carrier shall not utilize a pilot as pilot in command until he has satisfactorily demonstrated to a check pilot or a representative of the Administrator his ability to pilot and navigate aircraft to be flown by him. Thereafter, at least twice each 12 months at intervals of not less than 4 months or more than 8 months, a similar pilot proficiency check shall be given each such pilot. Where such pilots serve in more than one aircraft type, the pilot proficiency check shall be given in the larger and more complicated type of aircraft. In the event only the smaller type of aircraft in which he is qualified is available, he may take the proficiency check immediately due in that aircraft, but his next proficiency check shall be accomplished in the larger and more complicated type of aircraft.

(2) The pilot proficiency check shall include at least the following:

(i) The flight maneuvers specified in § 40.122 (b) (1), except that the simulated engine failure during take-off need not be accomplished at speed V_1,

(ii) Flight maneuvers approved by the Administrator accomplished under simulated instrument conditions utilizing the navigational facilities and letdown procedures normally used by the pilot: *Provided*, That maneuvers other than those associated with approach procedures for which the lowest minimums are approved may be given in a synthetic trainer which contains the radio equipment and instruments necessary to simulate other navigational and letdown procedures approved for use by the air carrier.

(c) Prior to serving as pilot in command in a particular type aircraft, a pilot shall have accomplished during the preceding 12 months either a proficiency check or a line check in that type aircraft.

§ 40.135 *Pilot route and airport qualification requirements.* (a) An air carrier shall not utilize a pilot as pilot in command until he has been qualified for the route on which he is to serve in accordance with paragraphs (b), (c), and (d) of this section and the appropriate instructor or check pilot has so certified.

(b) Each such pilot shall demonstrate adequate knowledge concerning the subjects listed below with respect to each route to be flown. Those portions of the examination pertaining to holding procedures and instrument approach procedures may be accomplished in a synthetic trainer which contains the radio equipment and instruments necessary to simulate the navigational and letdown procedures approved for use by the air carrier.

(1) Weather characteristics,
(2) Navigational facilities,
(3) Communication procedures,
(4) Type of en route terrain and obstructional hazards,
(5) Minimum safe flight levels,
(6) Position reporting points,
(7) Holding procedures,
(8) Pertinent traffic control procedures, and
(9) Congested areas, obstructions, physical layout, and all instrument approach procedures for each regular, provisional, and refueling airport approved for the route.

(c) Each such pilot shall fly through the approach procedure for which the lowest minimums are authorized for each regular, provisional, and refueling airport into which he is scheduled to fly: *Provided*, That the approaches to refueling airports may be accomplished in a synthetic trainer, unless the Administrator finds in particular cases that actual flight is necessary in the interest of safety. Unless impracticable, such flights shall be conducted under day VFR to permit the qualifying pilot to observe the airport and surrounding terrain, including any obstructions to landing and take-off. The qualifying pilot shall be accompanied by a pilot who is qualified over the route.

(d) Where an en route operation is to be conducted at or below the level of the adjacent terrain which is within a horizontal distance of 25 miles on either side of the center line of the route to be flown, the pilot shall be familiarized with such terrain by not less than one round trip as pilot or additional member of the flight crew over the route under day VFR conditions, and when night operation is authorized, one way of the round trip shall be made under night VFR conditions.

§ 40.136 *Maintenance of pilot route and airport qualifications for particular trips.* To maintain pilot route and airport qualifications, each pilot being utilized as pilot in command, within the preceding 12-month period, shall have made at least one trip as pilot or other member of the flight crew between terminals into which he is scheduled to fly and one actual or simulated entry into each regular, provisional, and refueling airport into which he is scheduled to fly, and shall have complied with the provisions of § 40.135 (d), if applicable. In order to reestablish pilot route and airport qualifications after absence from a route or any airport thereon for a period in excess of 12 months, a pilot shall comply with the appropriate provisions of § 40.135.

§ 40.137 *Competence check; other pilots.* Prior to serving as pilot, and at least twice each 12 months thereafter at intervals of not less than 4 months nor more than 8 months, each pilot not being utilized as pilot in command shall demonstrate that he is capable of flying by instruments. This demonstration may be made to a pilot serving as pilot in command or a check pilot of the air carrier.

§ 40.138 *Flight engineer; qualification for duty.* A flight engineer shall not be assigned to nor perform duties for which he is required to be certificated as a flight engineer unless, within the preceding 12-month period, he has had at least 50 hours of experience as a flight engineer on the type aircraft on which he is to serve, or until the air carrier or an authorized representative of the Administrator has checked such flight engineer and determined that he is familiar with all current information and operating procedures relating to the type aircraft to which he is to be assigned and is competent with respect to such aircraft.

§ 40.139 *Aircraft dispatcher; qualification for duty.* (a) Prior to dispatching aircraft over any route or route segment, an aircraft dispatcher shall be familiar, and the air carrier shall determine that he is familiar, with all pertinent operating procedures for the entire route and with the aircraft to be used: *Provided*, That where he is qualified only on a portion of such route, he may dispatch aircraft but only after coordinating with dispatchers who are qualified for the other portions of the route between the points to be served.

(b) An aircraft dispatcher shall not dispatch aircraft in the area over which he is authorized to exercise dispatch jurisdiction unless within the preceding 12 months he has made at least one round trip over the particular area on the flight deck of an aircraft. The trip selected for qualification purposes shall be one which includes entry into as many points as practicable, but it shall not be necessary for the aircraft dispatcher to make a flight over each route in the area.

FLIGHT TIME LIMITATIONS

§ 40.140 *Flight time limitations.* (a) An air carrier shall not schedule any flight crew member for duty aloft in scheduled air transportation or in other commercial flying if his total flight time in all commercial flying will exceed the following flight time limitations:

(1) 1,000 hours in any year.
(2) 100 hours in any month.

(b) An air carrier shall not schedule any flight crew member for duty aloft for more than 8 hours during any 24 consecutive hours unless he is given an intervening rest period at or before the termination of 8 scheduled hours of duty aloft. Such rest period shall equal twice the number of hours of duty aloft since the last preceding rest period, and in no case shall the rest period be less than 8 hours.

(c) When a flight crew member has been on duty aloft in excess of 8 hours in any 24 consecutive hours, he shall, upon completion of his assigned flight or series of flights, be given at least 16 hours for rest before being assigned any further duty with the air carrier.

(d) Time involved in transportation required of a flight crew member by an air carrier and provided by the air carrier for the purpose of transporting the flight crew member to an airport at which he is required to serve on a flight as a crew member, or from the airport at which he was relieved from duty as a crew member to return to his home station, shall not be considered as part of any required rest period.

(e) Each flight crew member engaged in scheduled air transportation shall be relieved from all duty with the air carrier for at least 24 consecutive hours during any seven consecutive days.

(f) No flight crew member shall be assigned any duty with an air carrier during any rest period prescribed by these regulations.

(g) A flight crew member shall not be considered to be scheduled for duty in excess of prescribed limitations, if the flights to which he is assigned are scheduled and normally terminate within such limitations, but due to exigencies beyond the air carrier's control, such as adverse weather conditions, are not at the time of departure expected to reach their destination within the scheduled time.

DUTY TIME LIMITATIONS; AIRCRAFT DISPATCHER

§ 40.144 *Aircraft dispatcher daily duty limitations.* (a) The daily duty period for aircraft dispatchers shall commence at such time as will permit him to become thoroughly familiar with existing and anticipated weather conditions along the route prior to the dispatch of any aircraft. He shall remain on duty until all aircraft dispatched by him have completed their flights, or have proceeded beyond his jurisdiction, or until he is relieved by another qualified aircraft dispatcher.

(b) The following rules will govern the hours of duty for aircraft dispatchers, except when circumstances or emergency conditions beyond the control of the air carriers require otherwise:

(1) Maximum consecutive hours of duty. No dispatcher shall be scheduled for duty as such for a period of more than 10 consecutive hours.

(2) *Maximum scheduled hours of duty in 24 consecutive hours.* If a dispatcher is scheduled for duty as such for more than 10 hours in a period of 24 hours, he shall be given a rest period of not less than 8 hours, at or before the termination of 10 hours of dispatcher duty.

(3) *Dispatcher's time off.* Each aircraft dispatcher shall be relieved from all duty with the air carrier for a period of at least 24 consecutive hours during any 7 consecutive days.

FLIGHT OPERATIONS

§ 40.150 *General.* All scheduled flight operations shall be conducted in accordance with the requirements set forth in §§ 40.151 through 40.196.

§ 40.151 *Operational control.* The air carrier shall be responsible for operational control.

(a) *Joint responsibility of aircraft dispatcher and pilot in command.* The aircraft dispatcher and the pilot in command shall be jointly responsible for the preflight planning and dispatch release of the flight in compliance with the applicable Civil Air Regulations and operations specifications.

(b) *Responsibility of dispatcher.* The aircraft dispatcher shall be responsible:

(1) For monitoring the progress of each flight and the issuance of instructions and information necessary for the continued safety of the flight.

(2) For the cancellation, delay, or redispatch of a flight, if, in his opinion or in the opinion of the pilot in command, the flight cannot operate or continue to operate safely.

(c) *Responsibility of pilot in command.* The pilot in command shall during flight time be in command of the aircraft and crew and shall be responsible for the safety of the passengers, crew members, cargo, and aircraft.

§ 40.153 *Operations notices.* Each air carrier shall notify the appropriate operations personnel promptly of all changes in equipment and operating procedures, including known changes in the use of navigational aids, airports, air traffic control procedures and regulations, local airport traffic control rules, and of all known hazards to flight, including icing and other potentially hazardous meteorological conditions and irregularities of ground and navigational facilities.

§ 40.154 *Operations schedules.* In establishing flight operations schedules, each air carrier shall allow sufficient time for the proper servicing of aircraft with fuel and oil at intermediate stops, and it shall consider the prevailing winds along the particular route and the cruising speed of the type of aircraft to be flown which shall not exceed the specified cruising output of the aircraft engines.

§ 40.155 *Flight crew members at controls.* All required flight crew members shall remain at their respective stations when the aircraft is taking off or landing, and while en route except when the absence of one such flight crew member is necessary in connection with his regular duties. All flight crew members shall keep their seat belts fastened when at their respective stations.

§ 40.156 *Manipulation of controls.* No person other than a qualified pilot of the air carrier shall manipulate the flight controls during flight, excepting that any one of the following persons may, with the permission of the pilot in command, manipulate such controls:

(a) Authorized pilot safety representatives of the Administrator or the Board who are qualified on the aircraft and are engaged in checking flight operations, or

(b) Pilot personnel of another air carrier properly qualified on the aircraft and authorized by the operating carrier.

§ 40.157 *Admission to flight deck.* For purposes of this section the Administrator shall determine what constitutes the flight deck of an aircraft.

(a) In addition to the crew members assigned to a particular aircraft, CAA aviation safety agents and authorized representatives of the Board while in the performance of official duties shall be admitted to the flight deck of an aircraft.

NOTE: Nothing contained in this paragraph shall be construed as limiting the emergency authority of the pilot in command to exclude any person from the flight deck in the interest of safety.

(b) The persons listed below may, under the conditions specified, be admitted to the flight deck when authorized by the pilot in command.

(1) An employee of the Federal Government or of an air carrier or other aeronautical enterprise whose duties are such that his presence on the flight deck is necessary or advantageous to the conduct of safe air carrier operations,[1] or

(2) Any other person specifically authorized by the air carrier management and the Administrator.

(c) All persons admitted to the flight deck shall have seats available for their use in the passenger compartment except:

(1) CAA aviation safety agents or other authorized representatives of the Civil Aeronautics Administration or the Civil Aeronautics Board engaged in checking flight operations,

(2) Air traffic controllers who have been authorized by the Administrator to observe ATC procedures,

(3) Certificated airmen of the air carrier,

(4) Certificated airmen of another air carrier who have been authorized by the air carrier concerned to make specific trips over the route.

[1] Federal employees who deal responsibly with matters relating to air carrier safety and such air carrier employees as pilots, dispatchers, meteorologists, communication operators, and mechanics whose efficiency would be increased by familiarity with flight conditions may be considered eligible under this requirement. Employees of traffic, sales, and other air carrier departments not directly related to flight operations cannot be considered eligible unless authorized under subparagraph (2) of this paragraph.

§ 40.158 *Use of cockpit check procedure.* The cockpit check procedure shall be used by the flight crew for each procedure as set forth in § 40.76.

§ 40.159 *Flashlights.* The pilot in command shall assure that at least one flashlight for each crew member is aboard the aircraft.

§ 40.160 *Restriction or suspension of operation.* When conditions exist which constitute or might constitute a hazard to the conduct of safe air carrier operations, including airport and runway conditions, the air carrier shall restrict or suspend operations until such hazardous conditions are corrected.

§ 40.161 *Emergency decisions; pilot in command and aircraft dispatcher.* (a) In emergency situations which require immediate decision and action, the pilot in command may follow any course of action which he considers necessary under the circumstances. In such instances the pilot in command, to the extent required in the interest of safety, may deviate from prescribed operations procedures and methods, weather minimums, and Civil Air Regulations.

(b) If an emergency situation arises during the course of a flight which requires immediate decision and action on the part of the aircraft dispatcher, and which is known to him, he shall advise the pilot in command of such situation. The aircraft dispatcher shall ascertain the decision of the pilot in command and shall cause the same to be made a matter of record. If unable to communicate with the pilot, the dispatcher shall declare an emergency and follow any course of action which he considers necessary under the circumstances.

(c) When emergency authority is exercised by the pilot in command or by the dispatcher, the appropriate dispatch center shall be kept fully informed regarding the progress of the flight, and within 10 days after the completion of the particular flight a written report of any deviation shall be submitted by the individual declaring the emergency to the Administrator through the air carrier operations manager.

§ 40.162 *Reporting potentially hazardous meteorological conditions and irregularities of ground and navigational facilities.* When any meteorological condition or irregularity of ground or navigational facilities is encountered in flight the knowledge of which the pilot in command considers essential to the safety of other flights, he shall notify an appropriate ground radio station as soon as practicable. Such information shall thereupon be relayed by that station to the appropriate Governmental agency.

§ 40.163 *Reporting mechanical irregularities.* The pilot in command shall enter or cause to be entered in the maintenance log of the aircraft all mechanical irregularities encountered during flight. He shall, prior to each flight, inspect the log to ascertain the status of any irregularities entered in the log at the end of the last preceding flight.

§ 40.165 *Powerplant failure or precautionary stoppage.* (a) Except as provided in paragraph (b) of this section, when one engine of an aircraft fails or where the rotation of an engine of an aircraft is stopped in flight as a precautionary measure to prevent possible damage, a landing shall be made at the nearest suitable airport in point of time where a safe landing can be effected.

(b) The pilot in command of an aircraft having 4 or more engines may, if not more than one engine fails or the rotation thereof is stopped, proceed to an airport of his selection, if, upon consideration of the following factors, he determines such action to be as safe a course of action as landing at the nearest suitable airport:

(1) The nature of the malfunctioning and the possible mechanical difficulties which may be encountered if flight is continued,

(2) The availability of the feathered engine for use,

(3) The altitude, aircraft weight, and usable fuel at the time of engine stoppage,

(4) The weather conditions en route and at possible landing points,

(5) The air traffic congestion,

(6) The type of terrain, and

(7) The familiarity of the pilot with the airport to be used.

(c) When engine rotation is stopped in flight, the pilot in command shall immediately notify the proper ground station and shall keep such station fully informed regarding the progress of the flight.

(d) In cases where the pilot in command selects an airport other than the nearest suitable airport in point of time, he shall, upon completion of the trip, submit a written report, in duplicate, to his operations manager setting forth his reasons for determining that the selection of an airport other than the nearest was as safe a course of action as landing at the nearest suitable airport. The operations manager shall, within 7 days after completion of the trip, furnish a copy of this report with his own comments thereon to the Administrator.

§ 40.166 *Instrument approach procedures.* When an instrument approach is necessary, the instrument approach procedures and weather minimums specified by the Administrator shall be strictly adhered to.

§ 40.168 *Requirements for air carrier equipment interchange.* (a) Prior to conducting any operations pursuant to an interchange agreement authorized by the Civil Aeronautics Board, the air carrier shall show that:

(1) The procedures proposed for the conduct of such operations by the carriers involved conform with the provisions of the Civil Air Regulations and with safe operating practices;

(2) All operations personnel involved are familiar with the aircraft and equipment of the air carrier with whom interchange is to be effected, and with the communications and dispatching procedures to be used;

(3) All maintenance personnel involved are familiar with the aircraft and equipment, and the maintenance procedures of the air carrier with whom interchange is to be effected;

(4) The flight crew and the dispatchers involved meet the appropriate route and airport qualifications; and

(5) All aircraft operated are essentially similar to those aircraft of the carrier with whom interchange is to be effected with respect to flight instruments and their arrangement and with respect to the arrangement and motion of controls critical to safety, unless the Administrator determines that adequate training programs have been established to insure that any dissimilarities which might be a potential hazard will be safely overcome by flight crew familiarization.

(b) The pertinent provisions and procedures affecting the carriers involved shall be included in their manuals.

DISPATCHING RULES

§ 40.170 *General.* Aircraft operating in scheduled air transportation shall be dispatched only by qualified aircraft dispatchers in accordance with the provisions of this part.

§ 40.171 *Necessity for dispatching authority.* No flight shall be started without specific authority from an aircraft dispatcher, except when an aircraft has landed at an intermediate airport specified in the original dispatch release and has remained there for one hour or less.

§ 40.174 *Familiarity with weather conditions.* No aircraft dispatcher shall release a flight unless he is thoroughly familiar with existing and anticipated weather conditions along the route to be flown.

§ 40.175 *Facilities and services.* The dispatcher shall furnish to the pilot in command all available current reports or information pertaining to irregularities of navigational facilities and airport conditions which may affect the safety of the flight. He shall also furnish the pilot, during flight, any additional available information concerning irregularities which may affect the safety of the flight.

§ 40.176 *Aircraft equipment required for dispatch.* All aircraft dispatched shall be airworthy and shall be equipped in accordance with the provisions of § 40.70.

§ 40.177 *Communications and navigational facilities required for dispatch.* No aircraft shall be dispatched over any route or route segment unless the communications and navigational facilities required by §§ 40.24 and 40.26 are in satisfactory operating condition.

§ 40.178 *Dispatching under VFR.* Under VFR aircraft shall be dispatched only if appropriate weather reports, forecasts, or a combination thereof indicate that the ceilings and visibilities along the route to be flown are, and will remain, at or above the minimums required for flight under VFR until the flight arrives at the airport or airports of intended landing specified in the flight release.

§ 40.179 *Dispatching under IFR or over-the-top.* Under IFR or over-the-top, aircraft shall be dispatched only if the appropriate weather reports, forecasts, or a combination thereof pertaining to the airport or airports to which dispatched indicate that the ceilings and visibilities will be at or above the minimums approved by the Administrator at the estimated time of arrival thereat.

§ 40.180 *Alternate airport for departure; IFR.* (a) If the weather conditions at the airport of take-off are below the approved landing minimums for that airport, no aircraft shall be dispatched from that airport unless an alternate airport located with respect to the airport of take-off as follows is specified: *Provided*, That such alternate need not be selected if the ceiling at the take-off airport is at least 300 feet and the visibility at least one mile:

(1) *Aircraft having 2 or 3 engines.* Alternate airport located at a distance no greater than one hour of flying time in still air at normal cruising speed with one engine inoperative.

(2) *Aircraft having 4 or more engines.* Alternate airport located at a distance no greater than 2 hours of flying time in still air at normal cruising speed with one engine inoperative.

(b) The alternate airport weather requirements shall be those specified in § 40.194.

(c) All alternate airports shall be listed in the dispatch release.

§ 40.181 *Alternate airport for destination; IFR.* (a) For all IFR or over-the-top operations there shall be at least one alternate airport designated for each airport of destination and, when the weather conditions forecast for the destination and first alternate are marginal, at least one additional alternate airport: *Provided*, That no alternate need be designated when the ceiling at the airport to which the flight is dispatched is forecast to be at least 1,000 feet above the minimum initial approach altitude applicable to such airport and the visibility at such airport is forecast to be at least 3 miles for the period 2 hours before to 2 hours after the estimated time of arrival.

(b) All required alternate airports shall be listed in the dispatch release.

§ 40.182 *Continuance of flight; flight hazards.* (a) No aircraft shall be continued in flight toward any airport to which it has been dispatched when, in the opinion of the pilot-in-command or the aircraft dispatcher, the flight cannot be completed with safety, unless in the opinion of the pilot-in-command there is no safer procedure. In the latter event, continuation shall constitute an emergency situation.

(b) If any item of equipment required for the particular operation being conducted becomes unserviceable en route, the pilot-in-command shall comply with the procedures specified in the manual for such occurrence.

§ 40.183 *Operation in icing conditions.* (a) An aircraft shall not be dispatched, en route operations continued, or landing made when, in the opinion of the pilot in command or aircraft dispatcher, icing conditions are expected or

encountered which might adversely affect the safety of the flight.

(b) No aircraft shall take-off when frost, snow, or ice is adhering to the wings or control surfaces of the aircraft.

§ 40.184 *Redispatch and continuance of flight.* (a) Any regular, provisional, or refueling airport the use of which is authorized for the type of aircraft to be operated may be specified as a destination for the purpose of original dispatch.

(b) An airport specified as a destination for the purpose of original dispatch may be changed en route to another regular, provisional, or refueling airport, providing that the appropriate requirements of §§ 40.170 through 40.194 and § 40.60 or § 40.65 are met at the time of redispatch.

(c) No flight shall be continued to any airport to which it has been dispatched unless the weather conditions at an alternate airport specified in the flight release remain at or above the minimums specified for such airport when used as an alternate: *Provided*, That the flight release may be amended en route to include any approved alternate airport lying within the fuel range of the aircraft as specified in §§ 40.187 and 40.188.

(d) When the flight release is amended while the aircraft is en route, such amendments shall be made a matter of record.

§ 40.185 *Dispatch to and from provisional airport.* (a) No aircraft dispatcher shall dispatch an aircraft to a provisional airport unless such airport complies with all of the requirements of this part pertinent to regular airports.

(b) Dispatch from a provisional airport shall be accomplished in accordance with the same regulations governing dispatch from a regular airport.

§ 40.186 *Take-offs from alternate airports or from airports not listed in the operations specifications.* No aircraft shall take off from an alternate airport or from an airport which is not listed in the air carrier operating specifications unless:

(a) Such airport and related facilities are adequate for the operation of the aircraft,

(b) In taking off it is possible to comply with the applicable aircraft operating limitations,

(c) The weather conditions at that airport are equal to or better than those prescribed for such airport, and

(d) The aircraft is dispatched in accordance with all dispatching rules applicable to operation from an approved airport.

§ 40.187 *Fuel supply for all operations.* No aircraft shall be dispatched unless it carries sufficient fuel:

(a) To fly to the airport to which dispatched, and thereafter,

(b) To fly to and land at the most distant alternate for the airport to which dispatched where such alternate is required, and, thereafter,

(c) To fly for a period of at least 45 minutes at normal cruising consumption.

§ 40.188 *Factors involved in computing fuel required.* In computing the fuel required, consideration shall be given to the wind and other weather conditions forecast, traffic delays anticipated, and any other conditions which might delay the landing of the aircraft. In computing the required fuel, no account shall be taken of unusable fuel.

§ 40.191 *Take-off and landing weather minimums; VFR.* Irrespective of any clearance which may be obtained from air traffic control, no aircraft shall takeoff or land under VFR when either the ceiling or ground visibility as reported by the United States Weather Bureau or by a source approved by the Weather Bureau is less than specified below: *Provided*, That where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the visibility for both day and night operations may be reduced to one-half mile, if all turns after take-off and prior to landing and all flight beyond a mile from the airport boundary can be accomplished outside the area so restricted.

(a) For day operations: 1,000-foot ceiling and one mile visibility;

(b) For night operations: 1,000-foot ceiling and two miles visibility.

§ 40.192 *Take-off and landing weather minimums; IFR.* (a) No aircraft shall take off or land under IFR when either the ceiling or visibility is less than that approved by the Administrator for use as a regular airport.

(b) No instrument approach procedure shall be executed at any airport not served by ILS and GCA when the latest weather report furnished by a source authorized in accordance with the provisions of § 40.25 indicates the ceiling or visibility to be less than the approved minimums for landing at that airport.

(c) An instrument approach procedure may be executed when such weather report indicates that the ceiling or visibility are less than the approved minimums for landing at that airport only if both ILS and GCA are operative and are used by the pilot. A landing may be made in the event weather conditions equal to or better than the prescribed minimums for the airport are found to exist by the pilot in command of the flight upon reaching the approved minimum altitude.

§ 40.193 *Flight altitude rules.* Except during take-off and landing, the flight altitude rules prescribed in paragraphs (a) and (b) of this section, in addition to the applicable provisions of § 60.17, shall govern air carrier operations: *Provided*, That other altitudes may be established by the Administrator for any route or portion thereof where he finds, after considering the character of the terrain being traversed, the quality and quantity of meteorological service, the navigational facilities available, and other flight conditions, that the safe conduct of flight permits or requires such other altitudes: *And provided further*, That where the Administrator has established minimum over-the-top altitudes for any route or portion thereof lower than the minimum en route IFR altitudes, operations at such altitudes shall be conducted only by day, in accordance with such weather minimums as the Administrator may prescribe for over-the-top operations in the Flight Information Manual, and in accordance with IFR procedures appropriate to the route and the facilities for instrument approach intended to be used.

(a) *Day VFR passenger operations.* No aircraft engaged in passenger operations shall be flown at an altitude less than 1,000 feet above the surface or less than 1,000 feet from any mountain, hill, or other obstruction to flight.

(b) *Night VFR or IFR operations.* No aircraft shall be flown at an altitude less than 1,000 feet above the highest obstacle located within a horizontal distance of 5 miles from the center of the course intended to be flown or, in mountainous terrain designated by the Administrator, 2,000 feet above the highest obstacle located within a horizontal distance of 5 miles from the center of the course intended to be flown: *Provided*, That in VFR operations at night in such mountainous areas aircraft may be flown over a lighted civil airway at a minimum altitude of 1,000 feet above such obstacle: *And provided further*, That in the case of high altitude operations, the minimum altitude shall be not less than 2,000 feet above the elevation of the highest ground within 25 miles of the intended track.

§ 40.194 *Alternate airport weather minimums.* An airport shall not be selected as an alternate airport unless the weather conditions existing there at the time of dispatch are equal to or above the ceiling and visibility minimums approved for such airport when using it as an alternate, and the hourly weather reports and current forecasts indicate that the weather conditions will be at or above such minimums until the flight shall arrive thereat. The weather minimums at such alternate airport shall not be less than one of the following and in no event less than the corresponding minimums specified for the airport when used as a regular airport: *Provided*, That the Administrator may approve higher or lower minimums at particular airports where the safe conduct of the flight requires or permits, considering the character of the terrain being traversed, the meteorological service and navigational facilities available, and other conditions affecting flight.

(a) An airport served by an approved radio navigational facility and either an instrument landing system or a ground control approach system which the carrier has been authorized to use: ceiling 800 feet and visibility one mile; or ceiling 700 feet and visibility of 1½ miles; or ceiling 600 feet and visibility of two miles;

(b) An airport served by an approved radio navigational facility: ceiling 1,000 feet and visibility of one mile; or ceiling 900 feet and visibility of 1½ miles; or ceiling 800 feet and visibility of two miles;

(c) An airport not served by an approved radio navigational facility: If overcast, not less than 1,000 feet above the minimum en route instrument altitude applicable to the route to such alternate airport and visibility of two miles; if broken clouds, not less than

1,000 feet above the elevation of the airport and visibility of two miles.

§ 40.195 *Preparation of dispatch release.* A dispatch release shall be prepared for each flight between specified points from information furnished by the authorized aircraft dispatcher. This release shall be signed by the pilot in command and by the authorized aircraft dispatcher only when both believe the flight can be made with safety. The aircraft dispatcher may delegate authority to sign such release for a particular flight, but he shall not delegate the authority to dispatch.

§ 40.196 *Preparation of load manifest form.* The air carrier shall be responsible for the preparation and accuracy of a load manifest form prior to each takeoff. This form shall be prepared by personnel of the air carrier charged with the duty of supervising the loading of the aircraft and the preparation of load manifest forms or by other qualified persons authorized by the air carrier.

REQUIRED RECORDS AND REPORTS

§ 40.200 *Records; general.* Each scheduled air carrier shall maintain records and submit reports in accordance with the requirements of §§ 40.201 through 40.212. All records shall be retained for the period specified in Part 249 of the Economic Regulations of the Board, unless otherwise specified herein.

§ 40.201 *Crew member and dispatcher records.* Each air carrier shall maintain current records of every crew member and aircraft dispatcher. These records shall contain such information concerning the qualifications of each such crew member and dispatcher as is necessary to show compliance with the appropriate requirements of the Civil Air Regulations, e. g., proficiency and route checks, aircraft qualifications, training, physical examinations, and flight time records. The disposition of any flight crew member or aircraft dispatcher released from the employ of the air carrier, or who becomes physically or professionally disqualified, shall be indicated in these records which shall be retained by the air carrier for at least three months.

§ 40.202 *List of aircraft.* Each air carrier shall maintain a current list of all aircraft being operated by it in scheduled air transportation: *Provided*, That aircraft of another air carrier being operated in accordance with an interchange agreement may be incorporated by reference.

§ 40.203 *Dispatch release form.* (a) The dispatch release may be in any form but shall contain at least the following information with respect to each flight:

(1) Identification number of the aircraft to be used, and the trip number,

(2) Airport of departure, intermediate stops, destination, and alternates therefor,

(3) Fuel supply,

(4) Type of operation, e. g., IFR, VFR.

(b) The dispatch release shall contain, or have attached thereto, weather reports, available weather forecasts, or a combination thereof, for the destination, intermediate stops, and alternates specified therein which shall be the latest available at the time the dispatch release is signed by the pilot in command and dispatcher. It shall include such additional weather reports and forecasts, as available, considered necessary or desirable by the pilot in command and aircraft dispatcher.

§ 40.204 *Load manifest.* (a) The load manifest shall contain at least the following information with respect to the loading of an aircraft at the time of take-off:

(1) The weight of:

(i) Aircraft,

(ii) Fuel and oil,

(iii) Cargo, including mail and baggage, and

(iv) Passengers;

(2) The maximum allowable weight applicable for the particular flight;

(3) The total weight computed in accordance with approved procedures;

(4) Evidence that the airplane is loaded in accordance with an approved schedule which insures that the center of gravity is within approved limits.

(b) The load manifest shall be prepared and signed for each flight by qualified personnel of the air carrier charged with the duty of supervising the loading of the aircraft and the preparation of load manifest forms, or by other qualified personnel authorized by the air carrier.

§ 40.205 *Disposition of load manifest, dispatch release form, and flight plans.* Copies of the completed load manifest, or information therefrom except with respect to cargo and passenger distribution, the dispatch release form, and the flight plan shall be in the possession of the pilot in command and shall be carried in the aircraft to its destination. Copies also shall be kept in the station files for at least 60 days.

§ 40.206 *Maintenance records.* (a) Each air carrier shall keep at its principle maintenance base current records of the total time in service, the time since last overhaul, and the time since last inspection of all major components of the airframe, engines, propellers, and, where practicable, appliances.

(b) Records of total time in service may be discontinued when it has been shown that the service life of component parts is safely controlled by other means, such as inspection, overhaul, or parts retirement procedures. The Administrator may require the keeping of total time records for specific parts when it is found that other procedures will not safely limit the service life of such parts.

(c) An aircraft component, engine, propeller, or appliance for which complete records are not available may be placed in service; *Provided*, That:

(1) It is of a type for which total time in service records are not required under the provisions of paragraph (b) of this section.

(2) Parts which are limited by the Administrator or manufacturer to a specific service time are retired and replaced by new parts, and

(3) It has been properly overhauled or rebuilt, and a record of such overhaul or rebuilding is included in the maintenance records.

§ 40.207 *Maintenance log.* A legible record shall be made in the aircraft's maintenance log of the action taken in each case of reported or observed failures or malfunctions of airframes, powerplants, propellers, and appliances critical to the safety of the flight. The air carrier shall establish an approved procedure for retaining an adequate number of copies of such records in the aircraft in a place readily accessible to the flight crew and shall incorporate such procedure in the air carrier manual.

§ 40.208 *Daily mechanical reports.* (a) Whenever a failure, malfunctioning, or other defect is detected in flight or on the ground in an aircraft or aircraft component which may reasonably be expected by the air carrier to cause a serious hazard in the operation of any aircraft, a report shall be made of such failure, malfunctioning, or other defect to the Administrator. This report shall cover a 24-hour period beginning and ending at midnight, shall be submitted by 12 o'clock midnight of the following working day, or sooner if the seriousness of the malfunction or difficulty so warrants, and shall include as much of the following information as is available on the first daily report following such incidents.

(1) Type and CAA identification number of the aircraft, name of air carrier, and date;

(2) Emergency procedure effected: unscheduled landing, dumping fuel, etc.;

(3) Nature of condition: Fire, structural failure, etc.;

(4) Identification of part and system involved, including the type designation of the major component:

(5) Apparent cause of trouble: Wear, cracks, design deficiency, personnel error, etc.;

(6) Disposition: Repaired, replaced, aircraft grounded, etc.;

(7) Brief narrative summary to supply any other pertinent data required for more complete identification, determination of seriousness, corrective action, etc.

(b) These reports shall not be withheld pending accumulation of all of the information specified in paragraph (a) (1) through (7) of this section. When additional information is obtained relative to the incident, it shall be expeditiously submitted as a supplement to the original report, reference being made to the date and place of submission of the first report.

§ 40.209 *Mechanical interruption summary report.* Each air carrier shall submit regularly and promptly to the Administrator a summary report containing information on the following occurrences:

(a) All interruptions to a scheduled flight, unscheduled changes of aircraft en route, and unscheduled stops and diversions from route which result from known or suspected mechanical difficulties or malfunctions.

(b) The number of engines removed prematurely because of mechanical trouble, listed by make and model of engine and the aircraft type in which the engine was installed.

(c) The number of propeller featherings in flight, listed by type of propeller and type of engine and the aircraft on which the propeller is installed.

§ 40.211 *Alteration and repair reports.* Reports of major alterations or repairs of airframes, powerplants, propellers, and appliances shall be made available to the Administrator promptly upon completion of such alterations or repairs.

§ 40.212 *Maintenance release.* When an airplane is released by the maintenance organization to flight operations, a maintenance release or appropriate entry into the maintenance log certifying that the aircraft is in an airworthy condition shall be prepared and signed by a maintenance inspector or a person authorized by the inspection organization prior to release of such aircraft. If a maintenance release form is prepared, a copy shall be given to the pilot in command. An appropriate record shall be kept in the station file for at least 60 days.

SPECIAL AIRWORTHINESS REQUIREMENTS

§ 40.300 *Fire prevention.* Irrespective of the basis for certification, all aircraft used in passenger service powered by engines rated at more than 600 horsepower each for maximum continuous operation shall comply with the requirements contained in §§ 40.301 through 40.333.: *Provided*, That if the Administrator finds that in particular models of existing aircraft literal compliance with specific items of these requirements might be extremely difficult of accomplishment and that such compliance would not contribute materially to the objective sought, he may accept such measures of compliance as he finds will effectively accomplish the basic objectives of these regulations.*

§ 40.301 *Susceptibility of materials to fire.* Where necessary for the purpose of determining compliance with any of the following definitions, the Administrator shall prescribe the heat conditions and testing procedures which any specific material or individual part must meet.

(a) *Fireproof.* "Fireproof" material means a material which will withstand heat equally well or better than steel in dimensions appropriate for the purpose for which it is to be used. When applied to material and parts used to confine fires in designated fire zones "fireproof" means that the material or part will perform this function under the most severe conditions of fire and duration likely to occur in such zones.

*The requirements of §§ 40.301 through 40.333 are taken directly from Part 04, as of November 1, 1946, and are the requirements made applicable by the Board in Amendment 61-2, effective November 1, 1946, to all aircraft powered by engines of more than 600 horsepower each for maximum continuous operation when used in passenger service. As the requirements on Part 04 pertaining to liquid-cooling systems are not applicable they have been omitted from this part.

(b) *Fire-resistant.* When applied to sheet or structural members, "fire-resistant" material shall mean a material which will withstand heat equally well or better than aluminum alloy in dimensions appropriate for the purpose for which it is to be used. When applied to fluid-carrying lines, this term refers to a line and fitting assembly which will perform its intended protective functions under the heat and other conditions likely to occur at the particular location.

(c) *Flame-resistant.* "Flame-resistant" material means a material which will not support combustion to the point of propagating, beyond safe limits, a flame after removal of the ignition source.

(d) *Flash-resistant.* "Flash-resistant" material means material which will not burn violently when ignited.

(e) *Flammable.* "Flammable" fluids or gases mean those which will ignite readily or explode.

§ 40.302 *Cabin interiors.* All compartments occupied or used by the crew or passengers shall comply with the following provisions:

(a) Materials shall in no case be less than flash-resistant.

(b) The wall and ceiling linings, the covering of all upholstering, floors, and furnishings shall be flame-resistant.

(c) Compartments where smoking is to be permitted shall be equipped with ash trays of the self-contained type which are completely removable. All other compartments shall be placarded against smoking.

(d) All receptacles for used towels, papers, and wastes shall be of fire-resistant material, and shall incorporate covers or other provisions for containing possible fires started in the receptacles.

§ 40.303 *Internal doors.* Where internal doors are equipped with louvres or other ventilating means, provision convenient to the crew shall be made for closing the flow of air through the door when such action is found necessary.

§ 40.304 *Ventilation.* All passenger and crew compartments shall be suitably ventilated. Carbon monoxide concentration shall not exceed one part in 20,000 parts of air, and fuel fumes shall not be present. Where partitions between compartments are equipped with louvres or other means allowing air to flow between such compartments, provision convenient to the crew shall be made for closing the flow of air through the louvres or other means when such action is found necessary.

§ 40.305 *Fire precautions.* Each compartment shall be designed so that, when used for the purpose of storing cargo or baggage, it shall comply with all the requirements prescribed for cargo or baggage compartments. It shall include no controls, wiring, lines, equipment, or accessories, the damage or failure of which would affect the safe operation of the airplane, unless such item is adequately shielded, isolated, or otherwise protected so that it cannot be damaged by movement of cargo in the compartment, and so that any breakage or failure of such item would not create a fire hazard in the compartment. Provisions shall be made to prevent cargo or baggage from interfering with the functioning of the fire-protective features of the compartment. All materials used in the construction of cargo or baggage compartments, including tie-down equipment, shall be flame-resistant or better. In addition, all cargo and baggage compartments shall include provisions for safeguarding against fires according to the following classifications:

(a) Cargo and baggage compartments shall be classified in the "A" category, if presence of a possible fire therein can be readily discernible to a member of the crew while at his station, and if all parts of the compartment are easily accessible in flight. A hand fire extinguisher shall be available for such compartment.

(b) Cargo and baggage compartments shall be classified in the "B" category, if sufficient access is provided while in flight to enable a member of the crew to move by hand all contents and to reach effectively all parts of the compartment with a hand fire extinguisher. Furthermore, the design of the compartment shall be such that, when the access provisions are being used, no hazardous quantity of smoke, flames, or extinguishing agent will enter any compartment occupied by the crew or passengers. Each compartment in this category shall be equipped with a separate system of an approved type smoke detector or fire detector other than heat detector to give warning at the pilot or flight engineer station. Hand fire extinguishers shall be readily available for use in all compartments of this category. Compartments in this category shall be completely lined with fire-resistant material, except that additional service lining of flame-resistant material may be employed.

(c) Cargo and baggage compartments shall be classified in the "C" category, if they do not conform with the requirements for the "A" or "B" categories. Each compartment of the "C" category shall be equipped with: (1) A separate system of an approved type smoke detector or fire detector other than heat detector to give warning at the pilot or flight engineer station, and (2) an approved built-in fire-extinguishing system controlled from the pilot or flight engineer station. Means shall be provided to exclude hazardous quantities of smoke, flames, or extinguishing agent from entering into any compartment occupied by the crew or passengers. Ventilation and drafts shall be further controlled within each such cargo or baggage compartment of the extent that the extinguishing agent provided can control any fire which may start within the compartment. All cargo and baggage compartments of this category shall be completely lined with fire-resistant material, except that additional service lining of flame-resistant material may be employed.

§ 40.306 *Proof of compliance.* Compliance with those provisions of § 40.305 which refer to compartment accessibility, the entry of hazardous quantities of smoke or extinguishing agent into com-

partments occupied by the crew or passengers, and the dissipation of the extinguishing agent in category "C" compartments shall be demonstrated by tests in flight. It shall also be demonstrated during these tests that no inadvertent operation of smoke or fire detectors in adjacent or other compartments within the airplane would occur as a result of fire contained in any one compartment, either during or after extinguishment, unless the extinguishing system floods such compartments simultaneously.

§ 40.307 *Propeller de-icing fluid.* If combustible fluid is used for propeller deicing, the provisions of §§ 40.321 through 40.325 shall be complied with.

§ 40.308 *Pressure cross feed arrangements.* Pressure cross feed lines shall not pass through portions of the airplane devoted to carrying personnel or cargo unless means are provided to permit the flight personnel to shut off the supply of fuel to these lines, or unless the lines are enclosed in a fuel and fume proof enclosure that is ventilated and drained to the exterior of the airplane. Such enclosures need not be used if these lines incorporate no fittings on or within the personnel or cargo areas and are suitably routed or protected to safeguard against accidental damage. Lines which can be isolated from the remainder of the fuel system by means of valves at each end shall incorporate provisions for the relief of excessive pressures that may result from exposure of the isolated line to high ambient temperatures.

§ 40.309 *Location of fuel tanks.* Location of fuel tanks shall comply with the provisions of § 40.322. In addition, no portion of engine nacelle skin which lies immediately behind a major air egress opening from the engine compartment shall act as the wall of an integral tank. Fuel tanks shall be isolated from personnel compartments by means of fume and fuel proof enclosures.

§ 40.310 *Fuel system lines and fittings.* Fuel lines shall be installed and supported in a manner that will prevent excessive vibration and will be adequate to withstand loads due to fuel pressure and accelerated flight conditions. Lines which are connected to components of the airplane between which relative motion may exist shall incorporate provisions for flexibility. Flexible connections in lines which may be under pressure and subjected to axial loading shall employ flexible hose assemblies rather than hose clamp connections. Flexible hose shall be of an acceptable type or proven suitable for the particular application.

§ 40.311 *Fuel lines and fittings in designated fire zones.* Fuel lines and fittings in all designated fire zones (see § 40.321) shall comply with the provisions of § 40.324.

§ 40.312 *Fuel valves.* In addition to the requirements contained in § 40.323 for shutoff means, all fuel valves shall be provided with positive stops or suitable index provisions in the "on" and "off" positions and shall be supported in such a manner that loads resulting from their operation or from accelerated flight conditions are not transmitted to the lines connected to the valve.

§ 40.313 *Oil lines and fittings in designated fire zones.* Oil lines and fittings in all designated fire zones (see § 40.321) shall comply with the provisions of § 40.324.

§ 40.314 *Oil valves.* Requirements of § 40.323 for shutoff means shall be complied with. Closing of oil shutoff means shall not prevent feathering the propeller, unless equivalent safety provisions are incorporated. All oil valves shall be provided with positive stops or suitable index provisions in the "on" and "off" positions, and shall be supported in such a manner that loads resulting from their operation or from accelerated flight conditions are not transmitted to the lines attached to the valve.

§ 40.315 *Oil system drains.* Accessible drains shall be provided to permit safe drainage of the entire oil system and shall incorporate means for positive or automatic locking in the closed position. (See also § 40.325)

§ 40.316 *Engine breather line.* Engine breather lines shall be so arranged that condensed water vapor which may freeze and obstruct the line cannot accumulate at any point. Breathers shall discharge in a location which will not constitute a fire hazard in case foaming occurs and so that oil emitted from the line will not impinge upon the pilots' windshield. The breather shall not discharge into the engine air induction system. (See also § 40.325)

§ 40.317 *Fire walls.* All engines, auxiliary power units, fuel-burning heaters, and other combustion equipment which are intended for operation in flight shall be isolated from the remainder of the airplane by means of fire walls or shrouds, or other equivalent means.

§ 40.318 *Fire-wall construction.* Fire walls and shrouds shall be constructed in such a manner that no hazardous quantity of air, fluids, or flame can pass from the engine compartment to other portions of the airplane. All openings in the fire wall or shroud shall be sealed with close-fitting fireproof gromments, bushings, or fire-wall fittings. Fire walls and shrouds shall be constructed of fireproof material and shall be protected against corrosion. The following materials have been found to comply with this requirement:

(a) Heat and corrosion resistant steel 0.015 inch thick;

(b) Low carbon steel, suitably protected against corrosion, 0.018 inch thick.

§ 40.319 *Cowling.* Cowling shall be constructed and supported in such a manner as to be capable of resisting all vibration, inertia, and air loads to which it may normally be subjected. Provision shall be made to permit rapid and complete drainage of all portions of the cowling in all normal ground and flight attitudes. Drains shall not discharge in locations constituting a fire hazard. Cowling, unless otherwise specified by these regulations, shall be constructed of fire-resistant material. Those portions of the cowling which are subjected to high temperatures due to their proximity to exhaust system parts or exhaust gas impingement shall be constructed of fireproof material.

§ 40.320 *Engine accessory section diaphragm.* Unless equivalent protection can be demonstrated by other means, a diaphragm shall be provided on air-cooled engines to isolate the engine power section and all portions of the exhaust system from the engine accessory compartment. This diaphragm shall comply with the provisions of § 40.318.

§ 40.321 *Powerplant fire protection.* Engine accessory sections, installations where no isolation is provided between the engine and accessory compartment, also regions wherein lie auxiliary power units, fuel-burning heaters, and other combustion equipment shall be referred to as designated fire zones. Such zones shall be protected from fire by compliance with §§ 40.322 through 40.325.

§ 40.322 *Flammable fluids.* No tanks or reservoirs which are a part of a system containing flammable fluids or gases shall be located in designated fire zones, except where the fluid contained, the design of the system, the materials used in the tank, the shutoff means, and all connections, lines, and controls are such as to provide equivalent safety. Not less than ½ inch of clear air space shall be provided between any tank or reservoir and a fire wall or shroud isolating a designated fire zone.

§ 40.323 *Shutoff means.* Means for each individual engine shall be provided for shutting off or otherwise preventing hazardous quantities of fuel, oil, de-icer, and other flammable fluids from flowing into, within, or through any designated fire zone, except that means need not be provided to shut off flow in lines forming an integral part of an engine. In order to facilitate rapid and effective control of fires, such shutoff means shall permit an emergency operating sequence which is compatible with the emergency operation of other equipment, such as feathering the propeller. Shutoff means shall be located outside of designated fire zones, unless equivalent safety is provided (see § 40.322), and it shall be shown that no hazardous quantity of such flammable fluid will drain into any designated fire zone after shutting-off has been accomplished. Adequate provisions shall be made to guard against inadvertent operation of the shutoff means and to make it possible for the crew to reopen the shutoff means after it has once been closed.

§ 40.324 *Lines and fittings.* All lines and fittings for same located in designated fire zones which carry flammable fluids or gases and which are under pressure, or which attach directly to the engine, or are subject to relative motion between components, exclusive of those lines and fittings forming an integral part of the engine, shall be flexible, fire-resistant lines with fire-resistant factory-fixed detachable or other approved fire-resistant ends. Lines and fittings which are not subject to pressure or to relative motion between components shall be of fire-resistant materials.

§ 40.325 *Vent and drain lines.* All vent and drain lines and fittings for same located in designated fire zones and which carry flammable fluids or gases shall comply with the provisions of § 40.324, if the Administrator finds that rupture or breakage of a particular drain or vent line may result in a fire hazard.

§ 40.326 *Fire-extinguisher systems.* (a) Unless it can be demonstrated that equivalent protection against destruction of the airplane in case of fire is provided by the use of fireproof materials in the nacelle and other components which would be subjected to flame, fire-extinguishing systems shall be provided to serve all designated fire zones.

(b) Materials in the fire-extinguishing system shall not react chemically with the extinguishing agent so as to constitute a hazard.

§ 40.327 *Fire-extinguishing agents.* Extinguishing agents employed shall be methyl bromide, carbon dioxide, or any other agent which has been demonstrated to provide equivalent extinguishing action. If methyl bromide or any other toxic extinguishing agent is employed, provisions shall be made to prevent the entrance of harmful concentrations of fluid or fluid vapors into any personnel compartment either due to leakage during normal operation of the airplane or as a result of discharging the fire extinguisher on the ground or in flight when a defect exists in the extinguisher system. If a methyl bromide system is provided, the containers shall be charged with dry agent and shall be sealed by the fire-extinguisher manufacturer or any other party employing satisfactory recharging equipment. If carbon dioxide is used, it shall not be possible to discharge sufficient gas into personnel compartments to constitute a hazard from the standpoint of suffocation of the occupants.

§ 40.328 *Extinguishing agent container pressure relief.* Extinguisher agent containers shall be provided with a pressure relief to prevent bursting of the container due to excessive internal pressures. The discharge line from the relief connection shall terminate outside the airplane in a location convenient for inspection on the ground. An indicator shall be provided at the discharge end of the line to provide a visual indication when the container has discharged.

§ 40.329 *Extinguishing agent container compartment temperature.* Precautions shall be taken to assure that the extinguishing agent containers are installed in locations where reasonable temperatures can be maintained for effective use of the extinguisher system.

§ 40.330 *Fire-extinguishing system materials.* All components of fire-extinguishing systems located in designated fire zones shall be constructed of fireproof materials, except for connections which are subject to relative motion between components of the airplane, in which case they shall be of flexible fire-resistant construction so located as to minimize the possibility of failure.

§ 40.331 *Fire-detector systems.* Quick-acting fire detectors shall be provided in all designated fire zones and shall be sufficient in number and location to assure the detection of fire which may occur in such zones.

§ 40.332 *Fire detectors.* Fire detectors shall be constructed and installed in such a manner as to assure their ability to resist without failure, all vibration, inertia, and other loads to which they may normally be subjected. Detectors shall be unaffected by exposure to oil, water, or other fluids or fumes which may be present.

§ 40.333 *Protection of other airplane components against fire.* All airplane surfaces aft of the nacelles in the region of one nacelle diameter on both sides of the nacelle center line shall be constructed of fire-resistant material. This provision need not be applied to tail surfaces lying behind nacelles unless the dimensional configuration of the aircraft is such that the tail surfaces could be affected readily by heat, flames, or sparks emanating from a designated fire zone or engine compartment of any nacelle.

§ 40.340 *Control of engine rotation.* All aircraft shall be provided with means for individually stopping and restarting the rotation of any engine in flight.

§ 40.341 *Fuel system independence.* Aircraft fuel systems shall be arranged in such manner that the failure of any one component will not result in the irrecoverable loss of power of more than one engine. A separate fuel tank need not be provided for each engine if the Administrator finds that the fuel system incorporates features which provide equivalent safety.

§ 40.342 *Induction system ice prevention.* Means for preventing the malfunctioning of each engine due to ice accumulation in the engine air induction system shall be provided for all aircraft.

§ 40.343 *Carriage of cargo in passenger compartments.* When operating conditions require the carriage of cargo which cannot be loaded in approved cargo racks, bins, or compartments which are separate from passenger compartments, such cargo may be carried in a passenger compartment if the following requirements are complied with: *Provided*, That the Administrator under a particular set of circumstances may authorize deviations from these requirements when he finds that safety will not be adversely affected and that it is in the public interest to carry such cargo:

(a) It shall be packaged or covered in a manner to avoid possible injury to passengers.

(b) It shall be properly secured in the aircraft by means of safety belts or other tie-downs possessing sufficient strength to eliminate possibility of shifting under all normally anticipated flight and ground conditions.

(c) It shall not be carried aft of or directly above seated passengers.

(d) It shall not impose any loads on seats or on the floor structure which exceed the designated loads for those components.

(e) It shall not be placed in any position which restricts the access to or use of any required emergency or regular exit or the use of the aisle between the crew and the passenger compartments.

[F. R. Doc. 52-8333; Filed, July 29, 1952; 8:49 a. m.]

NOTICES

DEPARTMENT OF STATE

[Public Notice 111]

REGISTER OF VOLUNTARY FOREIGN AID AGENCIES

Under authority of section 4 of the act of May 26, 1949 (63 Stat. 111; 5 U. S. C. Supp. 151 (c)) and Public Notice 32, effective February 17, 1950 (15 F. R. 1049), notice is hereby given that, in accordance with the last paragraph of Departmental Regulation 108.158 of July 8, 1952 (17 F. R. 6083), the following agencies are registered as voluntary foreign aid agencies; or are affiliates of registered voluntary foreign aid agencies:

Aid Refugee Chinese Intellectuals, Inc., 537 Fifth Avenue, New York 17, N. Y.

American Committee for Resettlement of Polish Displaced Persons, 1520 West Division Street, Chicago 22, Ill.

American Federation of International Institutes, 11 West Forty-second Street, New York 18, N. Y.

American Friends of Austrian Children, 202 East Nineteenth Street, 9th Floor, New York 3, N. Y.

American Friends Service Committee, 20 South Twelfth Street, Philadelphia 7, Pa.

Affiliate:

American Foundation for Overseas Blind, 22 West Seventeenth Street, New York 11, N. Y.

American Fund for Czechoslovak Refugees, 1775 Broadway, Room 607, New York 19, N. Y.

American Jewish Joint Distribution Committee, 270 Madison Avenue, New York 16, N. Y.

American Middle East Relief, 350 Fifth Avenue, New York 1, N. Y.

American National Committee to Aid Homeless Armenians (ANCHA), 297 Powell Street, San Francisco 2, Calif.

American ORT Federation, 212 Fifth Avenue, New York 10, N. Y.

American Relief for Korea, 133 East Thirty-ninth Street, New York 16, N. Y.

American Relief for Poland, 1300 North Ashland Avenue, Chicago 22, Ill.

Brethren Service Commission, 22 South State Street, Elgin, Ill.

Church World Service, Inc., Third Floor, 120 East Twenty-third Street, New York 10, N. Y.

Congregational Christian Service Committee, 110 East Twenty-ninth Street, New York 16, N. Y.

Cooperative for American Remittances to Europe (CARE), Inc., 20 Broad Street, New York 5, N. Y.

Council of Relief Agencies Licensed for Operation in Germany (CRALOG), 20 West Fortieth Street, New York 18, N. Y.

Affiliates:
American Baptist Relief, 1628 Sixteenth Street NW., Washington 9, D. C.

Assemblies of God—Foreign Service Committee, 160 Fifth Avenue, New York 10, N. Y.

Committee on Christian Science Wartime Activities of the Mother Church, 105 Falmouth Street, Boston 15, Mass.

Russian Children's Welfare Society, 59 East Second Street, New York 3, N. Y.

Displaced Persons Committee (Orphan Program),
Order of Ahepa,
1420 K Street NW.,
Washington 5, D. C.

Foster Parents' Plan for War Children,
55 West Forty-second Street,
New York 18, N. Y.

Greek War Relief Association,
221 West Fifty-seventh Street,
New York 19, N. Y.

Hadassah,
1819 Broadway,
New York 23, N. Y.

Hebrew Sheltering and Immigrant Aid Society (HIAS),
425 Lafayette Street,
New York 3, N. Y.

International Rescue Committee, Inc.
62 West Forty-fifth Street,
New York 36, N. Y.

International Social Service—American Branch,
425 Fourth Avenue,
New York 16, N. Y.

Iran Foundation, Inc.,
Empire State Building, Room 6807,
New York 1, N. Y.

Licensed Agencies for Relief in Asia (LARA),
20 West Fortieth Street,
New York 18, N. Y.

Little House of Saint-Pantaleon,
107 South Avolyn Avenue,
Ventnor, N. J.

Lutheran Service to Refugees,
3919 John R.
Detroit, 1, Mich.

Lutheran World Relief,
50 Madison Avenue,
New York 10, N. Y.

Mennonite Central Committee,
Akron, Pa.

National CIO Community Service Committee,
1776 Broadway,
New York 19, N. Y.

National Travelers Aid Association,
425 Fourth Avenue,
New York 16, N. Y.

Near East Foundation,
54 East Sixty-fourth Street,
New York 21, N. Y.

Affiliate:
American Foundation for Overseas Blind,
22 West Seventeenth Street,
New York 11, N. Y.

Polish Immigration Committee,
25 St. Marks Place,
New York 3, N. Y.

Refuge des Petits,
30 Broad Street, Forty-seventh Floor,
New York 4, N. Y.

Resettlement Service—National Lutheran Council,
145 East Thirty-second Street,
New York 16, N. Y.

Salvation Army, National Headquarters,
120–130 West Fourteenth Street,
New York 11, N. Y.

Save the Children Federation,
80 Eighth Avenue,
New York 11, N. Y.

Selfhelp of Emigres from Central Europe,
147 West Forty-second Street, Room 519,
New York 18, N. Y.

Serbian National Defense Council,
Division of Displaced Persons,
54 West Randolph Street,
Chicago 1, Ill.

The Federation of Russian Charitable Organizations of the United States,
376 Twentieth Avenue,
San Francisco 21, Calif.

Tolstoy Foundation,
300 West Fifty-eighth Street,
New York 19, N. Y.

Unitarian Service Committee,
9 Park Street,
Boston 8, Mass.
New York Office
31 Union Square West,
New York 3, N. Y.

Affiliate:
Universalist Service Committee,
16 Beacon Street,
Boston, 8, Mass.

United Friends of Needy and Displaced People of Yugoslavia, 497 Onderdonk Avenue, Brooklyn 27, N. Y.

United Lithuanian Relief Fund of America, 105 Grand Street, Brooklyn 11, N. Y.

United Service for New Americans, 15 Park Row, New York 7, N. Y.

United States Book Exchange, c/o Library of Congress, Washington 25, D. C.

U. S. Committee for the Care of European Children, 215 Fourth Avenue, New York 3, N. Y.

United Ukrainian American Relief Committee, 45 DeLong Building, Thirteenth and Chestnut Streets, Philadelphia 7, Pa.

War Relief Services—National Catholic Welfare Conference, 350 Fifth Avenue, New York 1, N. Y.

Affiliates:
American Hungarian Relief, 246 Fifth Avenue, Room 509, New York 1, N. Y.
American Relief to Austria, 149 Madison Avenue, 12th Floor, New York 16, N. Y.

World Student Service Fund, 20 West Fortieth Street, New York 18, N. Y.

Y. W. C. A. World Emergency Fund, 600 Lexington Avenue, New York 22, N. Y.

These registrations shall remain in force until amended, suspended, or terminated in accordance with 22 CFR 98.5 and 98.8 as established by Departmental Regulation 108.158 of July 8, 1952 (17 F. R. 6083).

Issued: July 21, 1952.

WILLIARD L. THORP,
Assistant Secretary of State.

[Public Notice 112]

FIELD ORGANIZATION

Pursuant to the requirements of section 3 (a) (1) of the Administrative Procedure Act (5 U. S. C. 1002; 60 Stat. 238), notice is hereby given that the Field Organization of the Department of State as described in Department of State Public Notice 43 of April 27, 1950 (15 F. R. 2498), is amended as follows:

1. Effective April 28, 1952, the date on which the Japanese Peace Treaty became effective, the Office of the United States Political Advisor and its Branches in Japan were redesignated as follows:

a. American Embassy: Tokyo.
b. American Consulates General: (1) Osaka-Kobe, and (2) Yokohama.
c. American Consulates: (1) Nagoya, (2) Fukuoka, and (3) Sapporo.

2. Effective June 25, 1952, the American Legation at Saigon, Vietnam, and the American Legation at Phnom Penh, Cambodia, were raised to the rank of Embassy.

Issued: July 23, 1952.

For the Secretary of State.

WALTER A. RADIUS,
Director,
Management Staff.

FEDERAL POWER COMMISSION

[Docket No. E-6364]

TENNESSEE VALLEY AUTHORITY ET AL.

NOTICE OF ORDER SUPPLEMENTING ORDER DETERMINING EMERGENCY AND GRANTING EXEMPTION FOR USE OF INTERCONNECTIONS

JULY 24, 1952.

In the matters of Tennessee Valley Authority, Public Service Company of Indiana, Inc., Atomic Energy Commission, the Dayton Power and Light Company, Indianapolis Power & Light Company, Southern Indiana Gas and Electric Company, Northern Indiana Public Service Company; Docket No. E-6364.

Notice is hereby given that, on July 23, 1952, the Federal Power Commission issued its order entered July 22, 1952, in the above entitled matters, supplementing order (16 F. R. 7324) determining emergency and granting exemption for use of interconnections.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 52-8298; Filed, July 29, 1952; 8:45 a. m.]

[Docket No. E-6369]

TENNESSEE VALLEY AUTHORITY ET AL.

NOTICE OF ORDER SUPPLEMENTING ORDER DETERMINING EMERGENCY AND GRANTING EXEMPTION FOR USE OF INTERCONNECTIONS

JULY 24, 1952.

In the matters of Tennessee Valley Authority, Atomic Energy Commission, the Cleveland Electric Illuminating Company, Columbus and Southern Ohio Electric Company, Duquesne Light Company, the Toledo Edison Company; Docket No. E-6369.

Notice is hereby given that, on July 23, 1952, the Federal Power Commission issued its order entered July 22, 1952, in the above entitled matters, supplementing order determining emergency and granting exemption for use of interconnections.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 52-8299; Filed, July 29, 1952; 8:45 a. m.]

[Docket No. E-6436]

GULF STATES UTILITIES CO.

NOTICE OF ORDER SUPPLEMENTING ORDER AUTHORIZING ISSUANCE OF SECURITIES

JULY 24, 1952.

Notice is hereby given that, on July 23, 1952, the Federal Power Commission issued its order entered July 22, 1952, in the above-entitled matter, supplementing order (17 F. R. 6116) authorizing issuance of securities.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 52-8300; Filed, July 29, 1952; 8:45 a. m.]

[Docket No. E-6438]

VIRGINIA ELECTRIC AND POWER CO.

NOTICE OF ORDER AUTHORIZING MERGER OR CONSOLIDATION OF FACILITIES

JULY 24, 1952.

Notice is hereby given that, on July 23, 1952, the Federal Power Commission issued its order entered July 22, 1952, in the above entitled matter, authorizing merger or consolidation of facilities of the Hydro-Electric Corporation of Virginia by Virginia Electric and Power Company,

[SEAL] LEON M. FUQUAY,
Secretary.

PANHANDLE EASTERN PIPE LINE CO. ET AL.

NOTICE OF ORDER MODIFYING DECISION

JULY 14, 1952.

In the matters of Panhandle Eastern Pipe Line Company, Docket Nos. G-1612, G-1642, G-1714, G-1723, G-1724 and G-1725; Panhandle Eastern Pipe Line Company, complainant v. Central Indiana Gas Company, defendant, Docket No. G-1858; Central Indiana Gas Company, complainant v. Panhandle Eastern Pipe Line Company, defendant, Docket No. G-1837.

Notice is hereby given that, on July 23, 1952, the Federal Power Commission issued its order entered July 22, 1952, in the above entitled matters, modifying decision of the Presiding Examiner, issued to Panhandle Eastern Pipe Line Company in Docket No. G-1642.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 52-8295; Filed, July 29, 1952; 8:45 a. m.]

[Docket No. G-2003]

MOUNTAIN FUEL SUPPLY CO.

NOTICE OF APPLICATION

JULY 24, 1952.

Take notice that Mountain Fuel Supply Company (Applicant), a Utah corporation having its principal place of business at 36 South State Street, Salt Lake City, Utah, filed on July 14, 1952, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain natural gas compression facilities on Applicant's main transmission line as hereinafter described.

Applicant proposes to install compressors of 2640 horsepower (sea level rating) together with necessary facilities on its main transmission line in Uinta County, Wyoming, at the point of interconnection with Applicant's Church Buttes field pipeline, for the purpose of meeting a deficiency in its ability to supply the peak load requirements of its downstream customers in Utah and Wyoming. Applicant states that this proposed compressor station would increase deliverability to Utah from 165 Mmcf a day to 177 Mmcf a day. Applicant estimates the cost of this station, auxiliaries, and appurtenant facilities to be $772,000, and proposes to finance the project from its available cash funds.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 13th day of August 1952. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 52-8302; Filed, July 29, 1952; 8:45 a. m.]

[Docket No. G-2004]

TEXAS ILLINOIS NATURAL GAS PIPELINE CO.

NOTICE OF APPLICATION

JULY 24, 1952.

Take notice that Texas Illinois Natural Gas Pipeline Company (Applicant), a Delaware corporation having its principal place of business at 20 North Wacker Drive, Chicago 6, Illinois, filed on July 16, 1952, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the transportation and sale of natural gas in the quantities and under the conditions hereinafter described.

Applicant proposes to transport and sell natural gas for resale to Allied Gas Company in quantities not to exceed 501 Mcf per day, this gas to be consumed by the Department of the Air Force for use at its Chanute Air Force Base at Rantoul, Illinois, for cooking, and water and space heating. Applicant states that the above quantities of natural gas will be taken out of previously authorized but presently unallocated capacity, and that no additional facilities or costs will be entailed.

Protests of petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 13th day of August 1952. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27252]

LIQUEFIED CHLORINE GAS FROM BATON ROUGE AND NORTH BATON ROUGE, LA., TO POINTS IN OHIO, INDIANA, AND WISCONSIN

APPLICATION FOR RELIEF

July 25, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-

haul provision of section 4 (1) of the Intertsate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to Agent W. P. Emerson, Jr.'s tariff I. C. C. No. 378, pursuant to fourth-section order No. 16101.

Commodities involved: Liquefied chlorine gas, in tank-car loads.

From: Baton Rouge and North Baton Rouge, La.

To: Cincinnati, Ohio, Indianapolis, Ind., and Madison, Wis.

Grounds for relief: Circuitous routes and operation through higher-rated territory.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] W. P. BARTEL, *Secretary.*

[4th Sec. Application 27253]

RAIL-WATER CLASS RATES BETWEEN BALTIMORE, MD., AND THE SOUTH

APPLICATION FOR RELIEF

JULY 25, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for the Baltimore Steam Packet Company and other carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1312.

Involving: Class rates.

Between: Baltimore, Md., and points taking same rates, on the one hand, and points in southern territory, on the other, over rail-water or water-rail routes.

Grounds for relief: Rail competition, circuity, grouping, and to maintain rates differentially related to all-rail rates.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1312.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

SECURITIES AND EXCHANGE COMMISSION

[File Nos. 54-171, 59-92]

NORTH AMERICAN CO. AND NORTH AMERICAN UTILITY SECURITIES CORP.

ORDER DIRECTING DISSOLUTION AND APPROVING PLAN

JULY 23, 1952.

In the matter of The North American Company, File No. 54-171; North American Utility Securities Corporation, The North American Company, File No. 59-92.

The North American Company ("North American"), a registered holding company, having filed a plan and an amendment thereto ("Amended Plan") pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("the act") providing, among other things, for the liquidation and dissolution of its subsidiary, North American Utility Securities Corporation ("NAUSCORP") by a cash payment of $9.00 per share for the publicly held common stock of NAUSCORP and the distribution of the remaining assets of NAUSCORP to North American;

The Commission having by notice and order dated August 3, 1948, instituted proceedings pursuant to section 11 (b) (2) of the act with respect to North American and NAUSCORP, and the Commission having consolidated the proceedings under sections 11 (b) (2) and 11 (e) of the act;

Public hearings having been held after appropriate notice, at which hearings all interested persons were afforded an opportunity to be heard;

North American having requested the Commission to enter an order finding that the Amended Plan is necessary to effectuate the provisions of section 11 (b) of the act and is fair and equitable to the persons affected thereby;

North American having further requested the Commission, pursuant to section 11 (e) of the act, to apply to an appropriate court, in accordance with the provisions of section 18 (f) of the act, to enforce and carry out the terms and provisions of the Amended Plan;

The Commission being duly advised, and having this day issued its findings and opinion, on the basis of said findings and opinion, and pursuant to the applicable provisions of the act and the rules and regulations thereunder

It is ordered, That North American take appropriate steps, consistent with the act and the rules and regulations thereunder, to liquidate and dissolve NAUSCORP.

It is further ordered, That the Amended Plan be, and it hereby is, approved subject to the terms and conditions contained in Rule U-24 of the general rules and regulations promulgated under the act and to the following additional terms and conditions:

1. The order entered herein shall not be operative to authorize the consummation of the transactions proposed in the Amended Plan until a court of competent jurisdiction shall, upon application thereto, enter an order enforcing said plan.

2. North American and NAUSCORP shall pay only such fees and expenses in connection with the Amended Plan and the proceedings relating thereto as the Commission may approve on appropriate application made to it.

3. Jurisdiction be and it hereby is specifically reserved with respect to the following matters:

a. The supervision of efforts to locate public common stockholders entitled to a cash payment under the terms of the Amended Plan.

b. The entertaining of such further proceedings, entering of such further orders and the taking of such other action as may be necessary or appropriate to effectuate the provisions of section 11 (b) of the act and as may be appropriate in connection with the Amended Plan, the transactions incident thereto and the consummation thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

FEDERAL REGISTER

VOLUME 17 NUMBER 149

Washington, Thursday, July 31, 1952

TITLE 7—AGRICULTURE

Chapter I—Production and Marketing Administration (Standards, Inspections, Marketing Practices), Department of Agriculture

Subchapter K—Federal Seed Act

PART 201—FEDERAL SEED ACT REGULATIONS

KENTUCKY BLUEGRASS SEED; EXEMPTION FROM LABELING REQUIREMENTS

It having been found that the time interval between seed harvesting and sowing is not sufficient to assure the completion of a germination test of freshly harvested seed of Kentucky bluegrass, Poa pratensis, now therefore pursuant to the provisions of section 203 (c) of the Federal Seed Act of August 9, 1939 (53 Stat. 1281; 7 U. S. C. 1573 (c)), the following regulation is hereby promulgated:

Exemption from labeling as to germination of Kentucky bluegrass seed. The requirements of paragraph 201 (a) (8) of the Federal Seed Act of August 9, 1939, as to labeling seed for germination when it is transported or delivered for transportation in interstate commerce for seeding purposes, shall not apply to the 1952 crop of seed of Kentucky bluegrass, Poa pratensis, during the period beginning August 30, 1952, and ending October 15, 1952.

Section 203 (c) of the Federal Seed Act of August 9, 1939, provides that the Secretary of Agriculture may, with or without hearing, amend the regulations issued thereunder to provide exemptions from labeling requirements with respect to germination. Pursuant to this provision, the Secretary in various prior years amended the regulations to provide for a seasonal exemption from such labeling requirements, similar to the one provided for herein, for freshly harvested seed of Kentucky bluegrass, and there were never any objections to such action. The carry-over of this seed from the former crop year is not sufficient to meet the planting requirements therefor and by reason of the imminence of the planting season it is in the public interest that notice of the exemption of such seed from labeling requirements as to germination be published as soon as possible. In view of these facts, and in accordance with the provisions of section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it is hereby found upon good cause that notice and public procedure in connection with this amendment would be impracticable and contrary to the public interest.

This regulation shall be effective during the period from August 30, 1952, to October 15, 1952, both inclusive.

Issued this 28th day of July 1952.

(Sec. 402, 53 Stat. 1285; 7 U. S. C. 1592. Interprets or applies sec. 203, 53 Stat. 1281; 7 U. S. C. 1573)

[SEAL] C. J. MCCORMICK, *Acting Secretary of Agriculture.*

Chapter VII—Production and Marketing Administration (Agricultural Adjustment), Department of Agriculture

PART 701—NATIONAL AGRICULTURAL CONSERVATION PROGRAM

SUBPART—1953

Population in the United States is increasing at the rate of 7,400 every 24 hours. For every 4 people in this country who now depend on the production from our farms there will be 5 people by 1975. The production so essential to the welfare of all the people and the strength and prosperity of the Nation must come largely from the land now being farmed. The possible further expansion of the Nation's cropland acres will leave us far short of meeting our Nation's future agricultural requirements.

To meet current needs for defense and the increase in population, the Nation's farmers are being called on to produce more than they have ever produced before. At the same time, to safeguard the future of the Nation, their farms must be protected against erosion and depletion and their acres put in condition to meet the ever increasing demands of a rapidly growing country.

Through the Agricultural Conservation Program, the Nation provides assistance to aid individual farmers in protecting and improving their land and

in conserving water. The 1953 program was developed jointly by the Production and Marketing Administration, the Soil Conservation Service, and the Forest Service, working with local conservation districts and with the assistance of other interested State and Federal agencies.

The 1953 Agricultural Conservation Program, with more definite and direct emphasis on providing assistance only for the most urgently needed conservation on an individual farm, follows through on the "farm-by-farm—first-things-first" approach launched in 1952. Every effort is to be made to see that program assistance is directed to those soil and water conservation practices which farmers would not carry out to the extent necessary for the national welfare without this assistance. Every effort is to be made to see that program assistance is shifted away from those practices which are becoming established in farmers' regular operations on their farms. This assistance is to be used to encourage and aid farmers to carry out conservation over and above what they would do with their own resources and on their own initiative.

The practices to be included at the local level and for individual farms should be aimed toward the most permanent benefit to the productive capacity and conservation of the agricultural resources of the area. Each county program should be integrated with the objectives of the broad general conservation programs of the area, such as flood prevention, wind and water erosion, or changing land use.

Experiences gained in the counties where PMA community committeemen were used to make farm-by-farm contacts have been used in developing the 1953 program. This experience definitely shows that where community committeemen have been used to make these contacts participation has been increased substantially and there has been a decided increase in the volume of the more permanent-type practices, such as terraces, dams, improved pasture, irrigation structures, contour striperopping, and range and forestry improvement. This farm-by-farm contact will be expanded to every county in 1953.

Successful operation of this program depends on the fullest assumption by each State, county, or community PMA committeeman of his responsibility under the program to his fellow-farmers and the Nation as a whole. This responsibility includes obtaining for each dollar of program funds expended the maximum additional conservation of our farming resources.

INTRODUCTION

Sec.
701.400 Introduction.

DISTRIBUTION AND CONTROL OF FUNDS

701.401 State funds.
701.402 Control of funds.
701.403 Adjustments.

DEVELOPMENT OF STATE AND COUNTY AGRICULTURAL CONSERVATION PROGRAMS, PRACTICE SPECIFICATIONS, SELECTION OF PRACTICES, ADAPTATION OF PRACTICES AND RATES OF ASSISTANCE, SPECIAL CONSERVATION PRACTICES, POOLING AGREEMENTS, COMPLIANCE WITH REGULATORY MEASURES, AND STATE OR FEDERAL AID

701.404 Development of State and county agricultural conservation programs.
701.405 Practice specifications.
701.406 Selection of practices.
701.407 Adaptation of practices and rates of assistance.
701.408 Special conservation practices.
701.409 Pooling agreements.
701.410 Compliance with regulatory measures.
701.411 Practices carried out with State or Federal aid.

CONSERVATION PRACTICES AND MAXIMUM RATES OF ASSISTANCE

701.412 Conservation practices and maximum rates of assistance.

PRACTICES TO PROTECT SOIL FROM WIND AND WATER EROSION

701.413 Practice A–1: Constructing terraces to control the flow of water on sloping land.
701.414 Practice A–2: Constructing diversion terraces or ditches to collect or divert excess water.
701.415 Practice A–3: Restoring severely eroded farm land to productive use.
701.416 Practice A–4: Establishing permanent sod waterways to dispose of excess water without causing erosion.
701.417 Practice A–5: Constructing outlets for water channels or building flumes or chutes to dispose of water without gullying.
701.418 Practice A–6: Constructing erosion control dams or wire diversions to prevent or heal the gullying of farm land and to reduce runoff of water.
701.419 Practice A–7: Constructing permanent riprap or revetment.
701.420 Practice A–8: Farming on the contour to protect against washing or blowing of soil, to reduce runoff, and to conserve water.
701.421 Practice A–9: Cross-slope farming to protect against washing and blowing of soil and to reduce runoff of water in areas where contouring is impracticable.
701.422 Practice A–10: Field stripcropping to protect soil from wind or water erosion.
701.423 Practice A–11: Managing crop residues to protect soil from wind or water erosion.
701.424 Practice A–12: Bringing adequate amounts of clod-forming subsoil to the surface on sandy cropland subject to wind erosion to protect soil from blowing.
701.425 Practice A–13: Establishing a cover of adapted biennial or perennial legumes or perennial grasses, or mixtures of these legumes and grasses, in orchards and vineyards to protect against erosion.
701.426 Practice A–14: Establishing a permanent cover of perennial grasses, or a mixture of legumes and perennial grasses, on steep slopes or in waterways, or on land so subject to erosion that its use should be changed from cultivation to permanent vegetative cover.
701.427 Practice A–15: Mulching to control wind erosion or in connection with tree planting on blow land.
701.428 Practice A–16: Stream bank or shore protection, channel clearance, or constructing levees or dikes, to prevent erosion or flood damage to farm land.
701.429 Practice A–17: Emergency tillage operations to protect farm land from wind erosion.
701.430 Practice A–18: Establishing a cover of perennial grasses, perennial legumes, or shrubs on field borders to protect against erosion.

PRACTICES TO DEVELOP CROPPING SYSTEMS THAT PROTECT THE SOIL AND RESTORE, IMPROVE, AND MAINTAIN SOIL PRODUCTIVITY

701.433 Practice B–1: Growing adapted green manure or cover crops for soil protection and improvement.
701.434 Practice B–2: Establishing a cover of kudzu or perennial lespedeza for soil building or to control erosion.
701.435 Practice B–3: Establishing or improving permanent pasture by seeding, sodding, or sprigging adapted legumes and grasses of other adapted forage plants.
701.436 Practice B–4: Increasing the total farm acreage of specified biennial or perennial legumes or perennial grasses, or mixtures of these legumes and grasses.
701.437 Practice B–5: Applying mineral elements to make possible the establishment and adequate growth of soil-conserving crops.
701.438 Practice B–6: Clearing suitable land for permanent pasture or for biennial or perennial legumes or perennial grasses needed for a better soil conserving cropping system.
701.439 Practice B–7: Mulching for soil improvement and maintenance purposes.
701.440 Practice B–8: Controlling perennial weeds as a necessary step in soil or water conservation.
701.441 Practice B–9: Constructing permanent fences to permit establishment of permanent vegetative cover.

PRACTICES TO RESTORE AND MAINTAIN RANGE AND PERMANENT PASTURE

701.444 Practice C–1: Improving and maintaining a desirable vegetative cover on range land.
701.445 Practice C–2: Livestock water developments to obtain proper distribution of livestock and prevent overgrazing.
701.446 Practice C–3: Constructing stock trails through rock or other natural barriers to obtain better distribution of grazing.

Sec.
701.447 Practice C–4: Constructing or maintaining fireguards to protect grazing land.
701.448 Practice C–5: Constructing permanent fences to obtain better distribution of grazing, thereby preventing overgrazing.
701.449 Practice C–6: Managing pastures, other than range, to obtain better cover.

PRACTICES TO CONSERVE AND OBTAIN EFFICIENT USE OF AGRICULTURAL WATER

701.452 Practice D–1: Subsoiling to permit better penetration of water.
701.453 Practice D–2: Furrowing, chiseling, ripping, scarifying, pitting, or listing noncrop grazing land to retard runoff and improve water penetration.
701.454 Practice D–3: Constructing spreader ditches or dikes to collect or spread water.
701.455 Practice D–4: Reorganizing farm irrigation systems to conserve water and prevent erosion.
701.456 Practice D–5: Leveling land for more efficient use of irrigation water or to prevent erosion.
701.457 Practice D–6: Constructing or enlarging dams, pits, or ponds for irrigation water.
701.458 Practice D–7: Lining earthen reservoirs for irrigation water.
701.459 Practice D–8: Lining irrigation ditches to prevent erosion and loss of water by seepage.
701.460 Practice D–9: Installation of facilities for sprinkler irrigation for permanent pasture on rolling land.
701.461 Practice D–10: Conservation of irrigation water and prevention of soil erosion and leaching by the controlled application of irrigation water.

DRAINAGE PRACTICES TO PERMIT LAND-USE ADJUSTMENTS NEEDED IN ESTABLISHING SOIL CONSERVING CROPPING SYSTEMS OR TO PERMIT OTHER MEASURES REQUIRED TO CONSERVE SOIL AND WATER RESOURCES, WITH DUE CONSIDERATION TO THE MAINTENANCE OF WILDLIFE RESOURCES

701.464 Practice E–1: Installing or improving drainage systems.

PRACTICES TO ESTABLISH, RESTORE, AND MAINTAIN FARM WOODLAND

701.467 Practice F–1: Planting or interplanting forest trees or shrubs on farm land for forestry purposes, windbreaks, shelter belts, or erosion control.
701.468 Practice F–2: Improving a stand of forest trees.
701.469 Practice F–3: Maintaining a stand of trees or shrubs in windbreaks or shelter belts.
701.470 Practice F–4: Constructing firebreaks or fire lanes.
701.471 Practice F–5: Constructing permanent fences to protect farm woodland from grazing.
701.472 Practice F–6: Clearing land to permit planting of forest trees.
701.473 Practice F–7: Forest site preparation to facilitate natural reseeding of forest trees.

PRACTICES TO MEET SPECIAL CONSERVATION NEEDS

701.476 Practice G–1: Special conservation practices.

PAYMENTS

701.478 Division of payments.
701.479 Increase in small payments.

AUTHORITY: §§ 701.400 to 701.499 issued under sec. 4, 49 Stat. 164; 16 U. S. C. 590d. Interpret or apply secs. 7–17, 49 Stat. 1148, as amended; 16 U. S. C. 590g–590q.

INTRODUCTION

§ 701.400 *Introduction.* Assistance will be given to farmers carrying out approved conservation practices under the 1953 Agricultural Conservation Program (referred to in this subpart as the 1953 program) in accordance with the provisions contained in this subpart and such modifications thereof as may hereafter be made. The provisions of the program contained in this subpart are applicable to the continental United States.

DISTRIBUTION AND CONTROL OF FUNDS

§ 701.401 *State funds.* Funds available for conservation practices will be distributed among States on the basis of their conservation needs, but the proportion allocated to any State shall not be reduced more than 15 percent from its proportionate 1952 distribution.

§ 701.402 *Control of funds.* The State committee will allocate the funds available for conservation practices among the counties within the State, taking into consideration, to the extent practicable, the conservation needs of the counties within the State. The county committee, in accordance with the method approved by the State committee, will determine the amount of assistance to be made available for each approved practice on each farm, taking into consideration the county allocation, the conservation problems in the county and of the individual farms, and the conservation work for which assistance is most needed in 1953 to enable the farm to make the maximum contribution to production needed in the defense effort.

§ 701.403 *Adjustments.* If, in any State, the total estimated earnings under the program exceed the total funds available for assistance, assistance will be reduced equitably.

DEVELOPMENT OF STATE AND COUNTY AGRICULTURAL CONSERVATION PROGRAMS, PRACTICE SPECIFICATIONS, SELECTION OF PRACTICES, ADAPTATION OF PRACTICES AND RATES OF ASSISTANCE, SPECIAL CONSERVATION PRACTICES, POOLING AGREEMENTS, COMPLIANCE WITH REGULATORY MEASURES, AND STATE OR FEDERAL AID

§ 701.404 *Development of State and county agricultural conservation programs.* (a) A State agricultural conservation program (referred to in this subpart as State program) shall be developed in each State in accordance with the provisions contained in this subpart and such modifications thereof as may hereafter be made. The program shall be developed by the State committee, the State Conservationist of the Soil Conservation Service, and the Forest Service official having jurisdiction of farm forestry in the State. The President of the Land-Grant College and the State Director of the Farmers Home Administration shall be invited to designate representatives to counsel with the group in the formulation of the State program. The group may invite representatives of the State Agricultural Extension Service and other State and Federal agricultural agencies to participate in its deliberations on the State program. The program for the State shall be that recommended by the State committee, the State Conservationist of the Soil Conservation Service, and the Forest Service official having jurisdiction of farm forestry in the State, and approved by the Agricultural Conservation Programs Branch, Production and Marketing Administration (referred to in this subpart as the ACP Branch).

(b) A county agricultural conservation program (referred to in this subpart as county program) shall be developed in each county in accordance with the provisions of the State program and such modifications thereof as may be made. The county committee with the PMA community committeemen, the designated representative of the Soil Conservation Service in the county with the governing body of the Soil Conservation District, and the Federal Forest Service official having jurisdiction of farm forestry in the county with the farm forestry representatives of the State, working with the County Agricultural Extension Agent for the county (if he is not included in the foregoing group as ex officio member of the county committee) and the County Supervisor of the Farmers Home Administration, shall develop recommendations for the county program. The program for the county then shall be formulated by the county committee, the local Soil Conservation Service technician, and the Forest Service official having jurisdiction of farm forestry in the county, in consultation with the governing body of the Soil Conservation District on the over-all conservation problems of the county and especially on the work plans of the Soil Conservation District and of the Federal

agencies involved to assure the most effective use of the available technical and financial assistance. The program so formulated shall be recommended to the State committee for approval by the State committee, the State Conservationist of the Soil Conservation Service, and the Forest Service official having jurisdiction of farm forestry in the State and upon such approval shall become the 1953 program for the county. The program recommendation shall be signed by the chairman of the county committee, the Soil Conservation Service technician, and the Forest Service representative where present in the county, and shall state that the program was developed in consultation with the governing body of the Soil Conservation District.

(c) State and county programs shall be consistent with the Agricultural Resources Conservation Program and designed to accomplish its objective—the use of each acre of agricultural land within its capabilities and the treatment of each acre of agricultural land in accordance with its needs for protection and improvement.

§ 701.405 *Practice specifications.* Minimum specifications which practices must meet to be eligible for assistance shall be set forth in the State handbook or in the county handbook, or be incorporated therein by specific reference.

§ 701.406 *Selection of practices.* (a) Practices to be included in the State program or in the county program shall be only those which, by maintaining or increasing soil fertility, controlling and preventing soil erosion caused by wind or water, encouraging conservation and better agricultural use of water, conserving and increasing range and pasture forage, or conserving and improving farm woodland, assist in making possible the production of agricultural commodities needed in the defense effort. The practices included shall be those which will not be carried out in the desired volume on the basis of relative conservation needs, unless assistance is given therefor.

(b) It shall be the objective of the program to direct assistance to the conservation practices most needed on each farm. In furthering this objective, the community committeeman and each farm operator, working together on the farm, before the 1953 program begins, should review the conservation problems of the farm, taking into consideration any conservation plan developed by the farmer with the assistance of any State or Federal agency. After the farm operator and his community committeeman have agreed on the practices most needed to contribute to more permanent protection and improvement of the farm lands, the farm operator will be given an opportunity to request the program assistance which he and the committeeman consider necessary for those practices. The county committee, taking into consideration the farmer's request and his committeeman's recommendations thereon, shall direct the available assistance to those practices most essential to the accomplishment of increased and sustained agricultural production on the farms in the county.

§ 701.407 *Adaptation of practices and rates of assistance.* (a) The practices included in the State program must meet all conditions and requirements of the national program, but may be more limited as to number or applicability and may include restrictions and requirements in addition to those in the national program. The practices included in the county program must meet all conditions and requirements of the State program, but may be more limited as to number or applicability and may include restrictions and requirements in addition to those in the State program.

(b) Rates of assistance for practices included in the State program may be less than, but not in excess of, the maximum prescribed in the national program. The rates of assistance for practices included in the county program may be lower than the rates of assistance approved for general use in the State. The county program may specify rates of assistance for individual farms lower than the rates of assistance approved for general use in the county on the basis of the experience of the producer in performing the practices. Upon recommendation of the State and county committees and designated representatives of the Soil Conservation Service and the Forest Service at both the county and State levels, the ACP Branch may approve a rate of assistance for one practice in a county higher than the maximum rate specified for such practice in this subpart, but not higher than the cost of performing the practice, provided the increased rate of assistance is needed to introduce a new conservation practice into the county or to bring about a needed increase in the extent to which the practice otherwise would be carried out.

§ 701.408 *Special conservation practices.* To permit further local adaptation of a county program to the conservation needs of the county, the ACP Branch, upon recommendation of the State and county committees and designated representatives of the Soil Conservation Service and the Forest Service at both the county and State levels, may approve practices for the county from the practices included in this subpart which are not included in the list of practices approved for the State.

§ 701.409 *Pooling agreements.* Producers in any local area may agree in writing, with the approval of county and State committees, to perform designated amounts of practices which will conserve or improve the agricultural resources of the community. For purposes of payment, practices carried out under such an approved written agreement will be regarded as having been carried out on the farms of the producers who performed the practices.

§ 701.410 *Compliance with regulatory measures.* Producers who carry out conservation practices for assistance under the 1953 program shall be responsible for obtaining the authorities, rights, easements, or other approvals necessary to the performance and maintenance of the practices in keeping with applicable laws and regulations. The producer who receives assistance for the practice shall be responsible to the Federal Government for any losses it may sustain because the producer infringes on the rights of others or fails to comply with applicable laws.

§ 701.411 *Practices carried out with State or Federal aid.* The assistance for any practice shall not be reduced because it is carried out with materials or services furnished by the ACP Branch or by any agency of a State to another agency of the same State, or with technical advisory services furnished by a State or Federal agency. In other cases of State or Federal aid, the total assistance for any practice performed shall be reduced, for purposes of payment, by the value of the aid, as determined by the county committee. Materials or services furnished or used by a State or Federal agency for the performance of practices on its land shall not be regarded as State or Federal aid for the purposes of this section.

CONSERVATION PRACTICES AND MAXIMUM RATES OF ASSISTANCE

§ 701.412 *Conservation practices and maximum rates of assistance.* (a) This subpart contains a general description of the conservation practices of the 1953 program and the maximum rates of assistance for the practices. Prior approval of the county committee is required for all practices. Written notice of the approved practices shall be given to farm operators before performance of any of the approved practices for the farm is started. For practices for which (1) approval was given under the 1952 Agricultural Conservation Program, (2) performance was started but not completed during the 1952 program year, and (3) the county committee believes the extension of the approval to the 1953 program is justified under 1953 program regulations and provisions, the approval of the practice under the 1952 program may be regarded as meeting the prior approval requirement and the prior notice of approval requirement of the 1953 program.

(b) The assistance originally approved by the county committee for particular practices may not be changed to other practices, unless (1) the farmer establishes to the satisfaction of the county committee that it was impossible to carry out the originally approved practices because of serious illness, adverse weather conditions, inability to obtain materials or services required to carry out the practices, or (2) a necessary major change has been made in the operation of the farm which renders the first approved practices inapplicable, or (3) it is then possible to carry out more needed practices not selected originally because at that time there appeared to be no possibility of getting them carried out during the year, or (4) the practice is one for which the Soil Conservation Service or the Forest Service has been assigned technical responsibility and, after tentative county committee approval thereof, it is determined by the agency that the practice is not needed nor practical, or (5) a new practice is included in the program after it begins. Practices may be substituted under these conditions only if the farmer's reasons

(2) 50 percent of the average cost of ma-

for requesting the substitution are recorded in the county office and approved by the county committee before performance of the substituted practice is started.

(c) Of the permanent-type conservation practices authorized under this subpart, the Soil Conservation Service is responsible for the technical phases of the permanent-type practices contained in §§ 701.413 to 701.415, 701.416, 701.417 to 701.419, 701.428, 701.444 (a), 701.445 (c), 701.454 to 701.457, 701.460 to 701.461, and 701.464. In addition, the Soil Conservation Service is responsible for the technical phases of the practices contained in §§ 701.420 (a), (c), (d), (e), (f), (g) and 701.421, if guidelines must be established under the 1953 program. This responsibility shall include (1) a finding that the practice is needed and practical on the farm, (2) necessary site selection, other preliminary work, and lay-out work of the practice, (3) necessary supervision of the installation, and (4) certification of performance (or application of the practice to the land). Also, in counties where the county committee, the designated representative of the Soil Conservation Service in the county, and the Forest Service representative having jurisdiction of farm forestry in the county determine that there is need for making a prior determination that land to be cleared under § 701.438 or § 701.472 is suitable for clearing for the purpose of the practice, the Soil Conservation Service technician shall have the responsibility for such prior determination of suitability. The practices listed in this paragraph are not considered to be the only permanent-type practices in the program. However, it is hereby determined that they are the only practices in the 1953 program for which the Soil Conservation Service has been delegated responsibility for the technical phases under Secretary's Memorandum 1278.

(d) The Forest Service is responsible for the technical phases of the practices contained in §§ 701.467 to 701.473. This responsibility shall include (1) providing necessary specialized technical assistance, (2) development of specifications for forestry practices, and (3) working through State and county committees, determining compliance in meeting these specifications.

(e) Information with respect to the several practices for which assistance will be given when carried out on a particular farm, and the exact specifications and rates of assistance for such practices, may be obtained from the county committee for the county in which the farm is located, or from the State committee (11 F. R. 177A-285). Where the farmer expresses the need for, or the county committee believes that the farmer will need, technical assistance in connection with the carrying out of any practice other than those for which the responsibility for technical phases is delegated to the Soil Conservation Service or the Forest Service, the county committee shall encourage the farmer to avail himself of the technical assistance available from the Soil Conservation Service, the Forest Service, the Extension Service, or any other Federal agency or State agency in position to supply such assistance in the county.

(f) The average cost as specified under the maximum assistance for certain practices in this subpart may be the average cost for a State, a county, a part of a county, or a farm, as determined by the State committee.

(g) Assistance for the practices contained in §§ 701.416, 701.425 to 701.426, 701.433 (f), 701.434 to 701.436, and 701.444 (c), (d), may be given even though a good stand is not established, if the county committee determines, in accordance with standards approved by the State committee, that the practice was carried out in a manner which would normally result in the establishment of a good stand, and that failure to establish a good stand was due to reasons beyond the control of the producer. The county committee may require as a condition of assistance in such cases that the area be reseeded, or that other needed protective measures be carried out.

PRACTICES TO PROTECT SOIL FROM WIND AND WATER EROSION

§ 701.413 *Practice A–1: Constructing terraces to control the flow of water on sloping land.* Necessary protective outlets or waterways must be provided.

Maximum assistance. 70 percent of the average cost of construction of the terraces.

§ 701.414 *Practice A–2: Constructing diversion terraces or ditches to collect or divert excess water.* Necessary protective outlets or waterways must be provided.

Maximum assistance. 70 percent of the average cost of earth moving.

§ 701.415 *Practice A–3: Restoring severely eroded farm land to productive use.* Land on which this practice is carried out must be protected by terraces or established in permanent protective cover during the 1953 program year or not later than the spring of 1954. This practice is not applicable to land on which strip or placer mining operations have been carried out.

Maximum assistance. 50 percent of the average cost of grading, leveling, shaping, or filling.

§ 701.416 *Practice A–4: Establishing permanent sod waterways to dispose of excess water without causing erosion.* Applicable only to waterways established under the 1953 program, unless the county committee determines that an old waterway needs reshaping and reseeding or resodding.

Maximum assistance. (1) 80 percent of the cost of seeding or sodding, but not in excess of $0.75 per 1,000 square feet.

(2) 70 percent of the average cost of moving earth with dirt-moving equipment, other than normal farm tillage implements, in shaping and filling.

§ 701.417 *Practice A–5: Constructing outlets for water channels or building flumes or chutes to dispose of water without gullying.*

Maximum assistance. (1) 50 percent of the average cost of concrete or rubble masonry used, but not in excess of $12 per cubic yard of concrete or $7 per cubic yard of rubble masonry.

(2) 50 percent of the average cost of materials, other than concrete or rubble masonry, used in the permanent structure, excluding forms.

(3) 50 percent of the average cost of pipe.

(4) $0.50 per square yard of exposed surface of log dams.

(5) $0.50 per square yard of exposed surface of wire-bound mulch.

(6) $0.15 per square yard of exposed surface of wire dams.

§ 701.418 *Practice A–6: Constructing erosion control dams or wire diversions to prevent or heal the gullying of farm land and to reduce runoff of water.*

Maximum assistance. (1) 70 percent of the average cost of moving earth in the construction of dams, wings, and walls, but not in excess of $0.12 per cubic yard of earth moved.

(2) 50 percent of the average cost of concrete or rubble masonry used, but not in excess of $12 per cubic yard of concrete or $7 per cubic yard of rubble masonry.

(2) 50 percent of the average cost of materials, other than concrete or rubble masonry, used in the permanent structure, excluding forms.

(4) 50 percent of the average cost of pipe.

(5) $1.50 per cubic yard of rock used, for rock or rock-and-brush dams.

(6) 50 percent of the average cost of wire diversions.

(7) 50 percent of the average cost of fencing material and seeding or sodding the dam.

§ 701.419 *Practice A–7: Constructing permanent riprap or revetment.* Applicable only along stream banks, in gullies, on the face of dams, or in water courses, for controlling erosion. The types of materials must be specified in the State handbook.

Maximum assistance. (1) 50 percent of the average cost, but not in excess of $1 per square yard of exposed riprap or revetment surface, or

(2) 50 percent of the average cost, but not in excess of $2 per cubic yard of riprap or revetment material.

§ 701.420 *Practice A–8: Farming on the contour to protect against washing or blowing of soil, to reduce runoff, and to conserve water*—(a) *Practice A–8–a: Establishing contour stripcropping on nonterraced land.* The types of eligible protected and protective crops and uses must be specified in the State handbook. The crop stubble or crop residue must be left standing over winter, or a winter cover crop established, or necessary protective tillage operations carried out, on acreage devoted to row crops. No assistance will be given under this practice for any acreage for which assistance was given for establishing contour on cross-slope stripcropping under a previous program, or for which assistance is given under paragraph (c) or (d) of this section.

Maximum assistance. $4 per acre.

(b) *Practice A–8–b: Removing stone walls or hedgerows to permit terracing, contour farming, or cross-slope farming.* The terraces must be completed, or the contour farming or cross-slope farming system established, on or before December 31, 1954.

Maximum assistance. 50 percent of the cost of removal, as determined by the county committee, but not in excess of $5 per square rod of surface occupied by the stone wall or hedgerow before removal.

(c) *Practice A–8–c: Contour farming row crops on nonterraced land.* The crop stubble or crop residue must be left standing over winter, or a winter cover crop established, or necessary protective tillage operations carried out. No assistance will be given under this practice for any acreage for which assistance is given under paragraph (f) of this section.

Maximum assistance. (1) $1.50 per acre where all cultural operations are on the contour.

(2) $1 per acre where only the planting and cultivating are on the contour.

(d) *Practice A–8–d: Contour farming drilled or close-sown crops on nonterraced land.*

Maximum assistance. (1) $0.75 per acre where all cultural operations are on the contour.

(2) $0.50 per acre where only the seeding operation is on the contour.

(e) *Practice A–8–e: Contour listing, contour chiseling, basin listing, pit cultivation, or other approved tillage operations, to control wind or water erosion, when not a part of a seeding operation.*

Maximum assistance. (1) $0.60 per acre when used to protect summer-fallowed land.

(2) $0.30 per acre on other land.

(f) *Practice A–8–f: Planting orchards, vineyards, bush fruits, or perennial vegetables on the contour.*

Maximum assistance. (1) $5 per acre for orchards or vineyards or asparagus.

(2) $3 per acre for bush fruits or perennial vegetables other than asparagus.

(g) *Practice A–8–g: Establishing a living fence on the contour for erosion control.* The plants or shrubs used to establish the fence must be specified in the State handbook.

Maximum assistance. 50 percent of the average cost of plants or shrubs and planting, other than land preparation and cultivation, but not in excess of a maximum amount per unit specified in the State handbook.

§ 701.421 *Practice A–9: Cross-slope farming to protect against washing and blowing of soil and to reduce run-off of water in areas where contouring is impracticable*—(a) *Practice A–9–a: Establishing cross-slope stripcropping.* Guidelines must be established and all cultural operations performed as nearly as practicable on the contour. The types of eligible protected and protective crops and uses must be specified in the State handbook. The crop stubble or crop residue must be left standing over winter, or a winter cover crop established, or necessary protective tillage operations carried out, on acreage devoted to row crops. No assistance will be given under this practice for any acreage for which assistance was given for establishing contour or cross-slope stripcropping under a previous program, or for which assistance is given under paragraph (b) or (c) of this section.

Maximum assistance. $3 per acre.

(b) *Practice A–9–b: Cross-slope farming row crops.* Guidelines must be established and all cultural operations performed as nearly as practicable on the contour. The crop stubble or crop residue must be left standing over winter, or a winter cover crop established, or necessary protective tillage operations carried out.

Maximum assistance. $1 per acre.

(c) *Practice A–9–c: Cross-slope farming drilled or close-sown crops.* Guidelines must be established and all cultural operations performed as nearly as practicable on the contour.

Maximum assistance. $0.35 per acre.

§ 701.422 *Practice A–10: Field stripcropping to protect soil from wind or water erosion.* The maximum and minimum widths of the strips and the types of eligible protected and protective crops and uses must be specified in the State handbook. The crop stubble or crop residue must be left standing over winter, or a winter cover crop established, or necessary protective tillage operations carried out, on acreage devoted to row crops.

Maximum assistance. (1) $0.50 per acre for systems with strips in excess of 10 rods in width.

(2) $0.75 per acre for systems with strips not in excess of 10 rods in width.

§ 701.423 *Practice A–11: Managing crop residues to protect soil from wind or water erosion*—(a) *Practice A–11–a: Crop residue management.* Maintaining a stubble mulch on the surface soil by performing tillage operations which will partially incorporate a heavy growth of stubble or straw into the surface soil but leave adequate residue on the surface to prevent erosion. No assistance will be given if the acreage has been burned over or the straw removed. The $1-per-acre maximum to protect summer-fallowed land will apply to the total assistance under the 1952 and 1953 programs. The county committee shall specify the earliest date by which the first tillage operation may be started.

Maximum assistance. (1) $1 per acre when used to protect summer-fallowed land.

(2) $0.60 per acre on other cropland.

(3) $1 per acre in orchards or vineyards.

(b) *Practice A–11–b: Leaving stalks or stubble of sorghum, Sudan grass, millet, or broomcorn as a protection against wind erosion.* The stalks or stubble must be left on the land until spring farming operations are begun or such later date as the county committee determines is necessary to protect against seasonal wind erosion. No grazing is permitted. The stalks or stubble on broadcast or close-drilled crops must be left at least 8 inches high and at least 10 inches high on wide-drilled or row crops. Applicable only in wind erosion areas approved by the State committee and designated in the State handbook.

Maximum assistance. $0.35 per acre.

§ 701.424 *Practice A–12: Bringing adequate amounts of clod-forming subsoil to the surface on sandy cropland subject to wind erosion to protect soil from blowing.* The heavier subsoil must be brought to the surface. Applicable only in wind erosion areas approved by the State committee and designated in the State handbook. No assistance will be given on any acreage for which assistance was given for this practice under any previous program.

Maximum assistance. (1) $2 per acre for plowing 12 inches but less than 15 inches deep.

(2) $3 per acre for plowing 15 inches but less than 18 inches deep.

(3) $5 per acre for plowing 18 inches or deeper.

§ 701.425 *Practice A–13: Establishing a cover of adapted biennial or perennial legumes or perennial grasses, or mixtures of these legumes and grasses, in orchards and vineyards to protect against erosion.* Volunteer stands and acreages cut for hay are not eligible. Approved kinds of cover must be specified in the State handbook.

Maximum assistance. 70 percent of the average cost of seed.

§ 701.426 *Practice A–14: Establishing a permanent cover of perennial grasses, or a mixture of legumes and perennial grasses, on steep slopes or in waterways, or on land so subject to erosion that its use should be changed from cultivation to permanent vegetative cover.*

Maximum assistance. (1) 80 percent of the average cost of seed, or

(2) 60 percent of the average cost, other than land preparation, of sodding, crowning, or sprigging.

§ 701.427 *Practice A–15: Mulching to control wind erosion or in connection with tree planting on blow land.* The types of materials must be specified in the State handbook and cannot include manure.

Maximum assistance. $2 per ton of material used.

§ 701.428 *Practice A–16: Stream bank or shore protection, channel clearance, or constructing levees or dikes, to prevent erosion or flood damage to farm land.* Channel clearance or levee construction under this practice is limited to small watercourses. This practice shall not be approved in cases where there is any likelihood that it will create an erosion or flood hazard to other adjacent lands.

Maximum assistance. 50 percent of the cost of the clearing, shaping, and protective operations, as determined by the county committee.

§ 701.429 *Practice A–17: Emergency tillage operations to protect farm land from wind erosion.* Tillage operations in connection with preparing land for planting or as cultivation of a crop will not qualify. The conditions under which the practice will be approved and the implements to be used must be specified in the State handbook.

Maximum assistance. $0.30 per acre for each separate tillage operation approved by the county committee.

§ 701.430 *Practice A–18: Establishing a cover of perennial grasses, perennial legumes, or shrubs on field borders to protect against erosion.* The maximum width of the strips must be specified in the State handbook. Plants that benefit wildlife should be given preference wherever practicable.

Maximum assistance. (1) 80 percent of the average cost of seed.

(2) 50 percent of the average cost of plants or shrubs and planting, other than land preparation and cultivation.

PRACTICES TO DEVELOP CROPPING SYSTEMS THAT PROTECT THE SOIL AND RESTORE, IMPROVE, AND MAINTAIN SOIL PRODUCTIVITY

§ 701.433 *Practice B–1: Growing adapted green manure or cover crops for soil protection and improvement.* Pasturing consistent with good management is permitted. Volunteer stands are not eligible for assistance.

(a) *Practice B–1–a: Winter annual legumes, annual ryegrass, or fescue grass.* The practice must be carried out in keeping with technical specifications approved by the State committee and included in the State handbook, or a good stand and good growth must be obtained. Acreages of Austrian Winter peas or lupines seeded in the fall of 1952 are not eligible for assistance if harvested for seed.

Maximum assistance. 70 percent of the average cost of seed.

(b) *Practice B–1–b: Summer annual legumes.* A good stand and good growth must be obtained and left on the land or turned under. Vegetable and truck crops for sale, soybeans or mung beans for seed or oil, all peanuts, and seedings (other than crotalaria) interplanted with row crops, are not eligible for assistance.

Maximum assistance. 70 percent of the average cost of seed.

(c) *Practice B–1–c: Adapted annual nonlegumes.* A good stand and good growth must be obtained and left on the land or turned under. Small grains and acreages harvested for seed or hay are not eligible for assistance.

Maximum assistance. 70 percent of the average cost of seed.

(d) *Practice B–1–d: Small grains.* A good stand and good growth must be obtained and left on the land or turned under. Acreages harvested for hay or grain are not eligible for assistance.

Maximum assistance. (1) $2.50 per acre for rye or wheat.

(2) $1.50 per acre for oats, millet, barley, or buckwheat.

(e) *Practice B–1–e: Red clover, alsike clover, sweetclover, or alfalfa used for green manure.* A good stand and good growth must be turned under. Assistance for alfalfa is limited to first- or second-year alfalfa from which no hay, seed, or pasture is taken in 1953.

Maximum assistance. $1.50 per acre.

(f) *Practice B–1–f: Establishing biennial or perennial legumes or perennial grasses, or mixtures of such legumes with adapted grasses, for green manure.* Limited to acreages seeded in the fall of 1952 or in the spring of 1953. A good stand must be obtained and a good growth incorporated into the soil in 1953 or in the spring of 1954. Pasturing consistent with good management is permitted, but none of the growth may be harvested for hay or seed.

Maximum assistance. 70 percent of the average cost of seed.

§ 701.434 *Practice B–2: Establishing a cover of kudzu or perennial lespedeza for soil building or to control erosion.*

Maximum assistance. (1) 80 percent of the average cost of seed or crowns, or

(2) 60 percent of the average cost, other than land preparation, of crowning.

§ 701.435 *Practice B–3: Establishing or improving permanent pasture by seeding, sodding, or sprigging adapted legumes and grasses or other adapted forage plants.* Where rates of assistance are determined on an acre basis, the recommended seeding rates, kinds of seeds, and proportions of seeds in a mixture must be specified in the State handbook.

Maximum assistance. (1) 80 percent of the average cost of seed, or

(2) 60 percent of the average cost, other than land preparation, of sodding or sprigging.

§ 701.436 *Practice B–4: Increasing the total farm acreage of specified biennial or perennial legumes or perennial grasses, or mixtures of these legumes and grasses.* Assistance will be given only for the acreage of all biennial and perennial legumes and perennial grasses for which assistance is offered under this practice in the county, established in excess of the usual acreage of these grasses and legumes for the farm as determined by the county committee. The method of determining the usual acreage shall be set forth in the State handbook. In determining the acreage established and the usual acreage for a farm in the case of mixtures, only those mixtures which are predominantly of the specified grasses and legumes for the county shall be considered. Where rates of assistance are on an acre basis, the recommended seeding rates, kinds of seeds, and proportions of seeds in a mixture must be specified in the State handbook. Acreages of these grasses and legumes for which assistance for new seedings is given under another 1953 practice may not be considered in determining the increased acreage eligible for assistance under this practice.

Maximum assistance. 80 percent of the average cost of seed.

§ 701.437 *Practice B–5: Applying mineral elements to make possible the establishment and adequate growth of soil-conserving crops*—(a) *Practice B–5–a: Liming materials.* If practicable, the soil should be tested to determine the need for liming material and the amount needed.

Maximum assistance. (1) Bulk ground limestone containing at least 80 percent calcium carbonate equivalent:

(*a*) 55 percent of the average cost on a delivered-to-the-farm basis plus 30 percent of that part of such cost which is in excess of $2 per ton, or

(*b*) 45 percent of the average cost on a spread-on-the-land basis plus 30 percent of that part of such cost which is in excess of $2 per ton.

(2) The rate for other liming materials may not exceed the lower of:

(*a*) The rate for an equivalent amount of bulk ground limestone containing at least 80 percent calcium carbonate equivalent, or

(*b*) The larger of 55 percent of the average cost of the equivalent material on a delivered-to-the-farm basis plus 30 percent of that part of such cost which is in excess of $2 per ton, or 45 percent of the average cost of the equivalent material on a spread-on-the-land basis plus 30 percent of that part of such cost which is in excess of $2 per ton.

(b) *Practice B–5–b: Superphosphate, fused tricalcium phosphate, rock phosphate, colloidal phosphate, potash, or basic slag.* (1) Application of superphosphate, fused tricalcium phosphate, potash, or basic slag must be made at a time so that the eligible crop will receive the principal benefit of the material. Applicable only in connection with the following crops and uses:

(i) Legumes and grasses, excluding small grains (except as provided in subdivision (ii) of this subparagraph), vegetable and truck crops for sale, soybeans or mung beans for seed or oil, all peanuts, Sudan grass, and sorghums.

(ii) Small grains when seeded with eligible grasses or legumes or when overseeded with eligible grasses or legumes in the same seeding season, and small grains for green manure or cover crops in orchards.

(iii) Superphosphate alone when added to manure in stables or on dropping boards and applied to the above crops or to any crop on a farm using a rotation in which at least one-half of the cropland is devoted to conserving crops.

(iv) Rock or colloidal phosphate when applied to any cropland which the county committee determines is in or going into a regular rotation that includes legumes (other than vegetable and truck crops for sale, soybeans or mung beans for seed or oil, and all peanuts) or perennial grasses.

(2) Rates of assistance must be established for each of the following materials if included in the State handbook: Normal superphosphate containing 20 percent or less available phosphoric acid (P_2O_5), concentrated superphosphate containing more than 20 percent available phosphoric acid (P_2O_5), fused tricalcium phosphate, rock phosphate, colloidal phosphate, potash, and basic slag. Assistance for mixed fertilizers will be determined on the basis of rates established for normal superphosphate and potash.

Maximum assistance. (1) Superphosphate, fused tricalcium phosphate, rock phosphate containing at least 28 percent total phosphoric acid (P_2O_5), potash, or basic slag—60 percent (50 percent under subdivision (iv) of subparagraph (1) of this paragraph) of the average cost of the straight material at siding, dealer's warehouse, or plant.

(2) For colloidal phosphate or lower grade rock phosphate, the rate may not exceed the lower of:

(*a*) The rate for an equivalent amount of rock phosphate containing at least 28 percent total phosphoric acid (P_2O_5), or

(*b*) 60 percent (50 percent under subparagraph (iv) of paragraph (b) (1) of this section) of the average cost of the lower grade material at siding, dealer's warehouse, or plant.

(c) *Practice B–5–c: Minor elements.* Materials used as insecticides are not eligible for assistance. Assistance will be limited to that used with biennial or perennial legumes or perennial grasses, or with cover crops in orchards.

Maximum assistance. 60 percent of the average cost at siding, dealer's warehouse, or plant.

(d) *Practice B–5–d: Gypsum or sulfur.* Materials used as insecticides are not eligible for assistance.

Maximum assistance. 60 percent of the average cost at siding, dealer's warehouse, or plant.

§ 701.438 *Practice B–6: Clearing suitable land for permanent pasture or for biennial or perennial legumes or perennial grasses needed for a better soil conserving cropping system.* Eligible legumes or grasses must be established as soon as practicable. Temporary use of the land for other crops may be permitted where the county committee determines this is essential to establishing the eligible legumes or grasses. No assistance will be given for clearing a stand of merchantable timber or pulpwood.

Maximum assistance. 50 percent of the average cost of clearing, but not in excess of $10 per acre cleared.

§ 701.439 *Practice B–7: Mulching for soil improvement and maintenance purposes.* Assistance will be limited to mulching material hauled onto the field or area. No assistance will be given for applying mulching material containing manure.

(a) *Practice B–7–a: Applying mulching material to orchards or to vineyards.*

Maximum assistance. 60 percent of the average cost of material delivered to the farm, but not in excess of $5 per ton, air-dry weight.

(b) *Practice B–7–b: Applying mulching material to cropland.* The material must be incorporated into the soil.

Maximum assistance. 60 percent of the average cost of material delivered to the farm, but not in excess of $5 per ton, air-dry weight.

§ 701.440 *Practice B–8: Controlling perennial weeds as a necessary step in soil or water conservation.* The names of weeds, the conditions under which the practice may be approved, and the measures needed to provide effective control must be specified in the State handbook. No crop may be taken from the land where clean cultivation is used, except where a management plan approved by the State committee permits clean cultivation before and after the planting and harvesting of the crop.

Maximum assistance. (1) $7.50 per acre for continuous clean cultivation, except for Johnson grass and quackgrass.

(2) $5 per acre for continuous clean cultivation for Johnson grass and quackgrass.

(3) 50 percent of the average cost of State committee approved chemicals and 50 percent of the average cost of applying the chemicals.

(4) 50 percent of the average cost of other State committee approved methods of control.

§ 701.441 *Practice B–9: Constructing permanent fences to permit establishment of permanent vegetative cover.* The area fenced must be farm land that in 1953 is established in biennial or perennial legumes or perennial grasses. This practice is applicable only to areas that the county committee determines cannot be properly established in necessary protective cover until fenced for protection against livestock.

Maximum assistance. 50 percent of the average cost of fencing material used.

PRACTICES TO RESTORE AND MAINTAIN RANGE AND PERMANENT PASTURE

§ 701.444 *Practice C–1: Improving and maintaining a desirable vegetative cover on range land*—(a) *Practice C–1–a: Grazing land management to maintain or improve range and watershed conditions.* Assistance will be given for the conservation of grazing land by carrying out the provisions of a management plan filed with and approved by the county committee and complying with approved utilization standards on all grazing land in the ranching unit. Eligible management measures on which assistance is to be based must be specified in the State handbook.

Maximum assistance. The smaller of:

(1) The amount approved by the county committee, or

(2) $50 plus $0.04 per acre of grazing land.

(b) *Practice C–1–b: Natural reseeding of desirable range forage plants by deferred grazing.* Applicable only to seriously depleted areas of range land or to range land from which competitive plants have been removed and deferment of grazing is necessary to natural reestablishment of desirable grass cover. Assistance will not be given on more than 25 percent of the grazing land in the unit, nor for any of the deferred area which is cut for hay, except that the State committee, with the approval of the ACP Branch, may waive the percentage limitation for any local area where deferment of a larger percentage is necessary to conserve the range resources. No assistance will be given if the county committee determines that any area of the ranch is overgrazed.

Maximum assistance. $0.25 per acre deferred, except that where the carrying capacity is less than one animal unit for each 30 acres, the rate must be reduced proportionately and set forth in the State handbook.

(c) *Practice C–1–c: Artificial reseeding.* Seeding, sodding, or sprigging adapted perennial grasses, perennial legumes, or other pasture forage plants for range improvement. Where rates of assistance are determined on an acre basis, the recommended seeding rates, kinds of seeds, and proportions of seeds in a mixture must be specified in the State handbook. Seeded areas shall not be grazed until the stand is well established, and no assistance will be given if the county committee determines that the area seeded is overgrazed.

Maximum assistance. (1) 80 percent of the average cost of seed, or

(2) 60 percent of the average cost, other than land preparation, of sodding or sprigging, or

(3) $2 per acre.

(d) *Practice C–1–d: Establishing for seed production an increased acreage of perennial range and pasture grasses or pasture legumes.* Eligible grasses and legumes must be specified in the State handbook and be restricted to those not usually grown for commercial seed production or which are grown for commercial seed production only on a very limited scale as compared to the national need. The State handbook must specify the methods of seeding, cultivation, and protection. Assistance will be given only for seedings on acreage in addition to that devoted to seed production of the grass or legume in 1952.

Maximum assistance. 80 percent of the average cost of establishment, excluding fertilization.

(e) *Practice C–1–e: Controlling competitive plants and shrubs on noncropland.* Eligible plants must be specified in the State handbook. No assistance will be given if the county committee determines that the area is overgrazed. The $5-per-acre maximum will apply to the total assistance under the 1949, 1950, 1951, 1952, and 1953 programs for the control or elimination of all competitive plants and shrubs on an area. On areas where the county committee determines that the control of competitive plants will reduce the vegetative cover to such an extent as to induce erosion, the practice will not be approved unless followed by artificial reseeding.

Maximum assistance. 50 percent of the average cost, but not in excess of $5 per acre.

§ 701.445 *Practice C–2: Livestock water developments to obtain proper distribution of livestock and prevent overgrazing*—(a) *Practice C–2–a: Constructing wells for livestock water.* Adequate storage facilities must be provided. Pumping equipment must be installed, except for artesian wells. Assistance will not be given for wells constructed at or for the use of headquarters.

Maximum assistance. (1) $1 per linear foot of well with bore taking casings less than 4 inches in diameter, and all artesian wells.

(2) $2 per linear foot of well with bore taking casings 4 inches but less than 6 inches in diameter.

(3) $3 per linear foot of well with bore taking casings 6 inches or more in diameter.

(b) *Practice C–2–b: Developing springs or seeps for livestock water.*

Maximum assistance. (1) $0.50 per cubic foot of excavation in rock, and

(2) $0.30 per cubic foot of excavation in soil or gravel; or

(3) $0.50 per cubic foot of storage capacity constructed.

(c) *Practice C–2–c: Constructing dams, pits, or ponds for collecting and storing livestock water, including the enlargement of inadequate structures.* No assistance will be given for cleaning or maintaining an existing structure.

Maximum assistance. (1) 70 percent of the average cost of earth moving, but not in excess of $0.12 per cubic yard of material moved.

(2) 50 percent of the average cost of concrete or rubble masonry used, but not in excess of $12 per cubic yard of concrete or $7 per cubic yard of rubble masonry.

(3) 50 percent of the average cost of materials, other than concrete or rubble masonry, used in the permanent structure, excluding forms.

(4) 50 percent of the average cost of fencing material, pipe, and seeding or sodding the dam and filter strips.

(d) *Practice C–2–d: Installing pipe lines for livestock water.*

Maximum assistance. 50 percent of the average cost of pipe, except that the assistance for pipe in excess of 2 inches in diameter may not exceed the assistance which may be given for 2-inch pipe.

(e) *Practice C–2–e: Constructing supplemental new large water storage at wells or springs for livestock water.* No assistance will be given under this practice in connection with a spring or well for which assistance is given under the 1953 program or which has been given under previous programs, unless the minimum storage required as a condition of payment for the spring or well has been installed and maintained.

Maximum assistance. (1) 50 percent of the average cost of concrete or rubble masonry used, but not in excess of $12 per cubic yard of concrete or $7 per cubic yard of rubble masonry.

(2) 50 percent of the average cost of materials, other than concrete or rubble masonry, used in the permanent structure, excluding forms.

(f) *Practice C–2–f: Lining earthen reservoirs for livestock water.*

Maximum assistance. (1) 50 percent of the average cost of concrete or rubble masonry used, but not in excess of $12 per cubic yard of concrete or $7 per cubic yard of rubble masonry.

(2) 50 percent of the average cost of materials, other than concrete or rubble masonry, used in the permanent structure, excluding forms.

§ 701.446 *Practice C–3: Constructing stock trails through rock or other natural barriers to obtain better distribution of grazing.* No assistance will be given if the county committee determines that the grazing area thus made available is overgrazed.

Maximum assistance. 50 percent of the average cost of construction.

§ 701.447 *Practice C–4: Constructing or maintaining fireguards to protect grazing land.* The fireguards must have a minimum width of 10 feet.

Maximum assistance. $1.20 per 1,000 linear feet.

§ 701.448 *Practice C–5: Constructing permanent fences to obtain better distribution of grazing, thereby preventing overgrazing.* No assistance will be given for maintaining existing fences.

Maximum assistance. 50 percent of the average cost of fencing material used.

§ 701.449 *Practice C–6: Managing pastures, other than range, to obtain better cover.* The methods of management must be specified in the State handbook. No assistance will be given under this practice on any farm or ranch for which assistance is given under § 701.444 (a) or (b).

Maximum assistance. 50 percent of the cost of supplemental improvements specified in the State handbook, but not in excess of $100.

PRACTICES TO CONSERVE AND OBTAIN EFFICIENT USE OF AGRICULTURAL WATER

§ 701.452 *Practice D–1: Subsoiling to permit better penetration of water*—(a) *Practice D–1–a: Subsoiling to a depth which will effectively shatter the hardpan or plow sole.* Applicable only to land which the county committee determines can be benefited by subsoiling. No assistance will be given on any acreage for which assistance was given for this practice under any previous program. The State handbook must specify the minimum depth and maximum spacing interval which will qualify for assistance.

Maximum assistance. 50 percent of the average cost, but not in excess of $3 per acre.

(b) *Practice D–1–b: Rotary subsoiling.*

Maximum assistance. (1) $0.25 per acre, except in orchards. (2) $0.50 per acre in orchards.

(c) *Practice D–1–c: Deep plowing.* This practice is applicable only where needed to improve water penetration on irrigated cropland. To be eligible for assistance, the land must be plowed to a depth of at least 24 inches. No assistance will be given on any acreage for which assistance was given for this practice under any previous program.

Maximum assistance. 50 percent of the cost, but not in excess of $5 per acre.

§ 701.453 *Practice D–2: Furrowing, chiseling, ripping, scarifying, pitting, or listing noncrop grazing land to retard runoff and improve water penetration.* The operations must be as nearly as practicable on the contour. The State handbook must specify the maximum spacing interval which will qualify for assistance.

Maximum assistance. 50 percent of the average cost, but not in excess of $0.25 per 1,000 linear feet.

§ 701.454 *Practice D–3: Constructing spreader ditches or dikes to collect or spread water.*

Maximum assistance. 70 percent of the average cost of earth moving, but not in excess of $0.12 per cubic yard of earth moved.

§ 701.455 *Practice D–4: Reorganizing farm irrigation systems to conserve water and prevent erosion.* The reorganization must be carried out in accordance with a written plan approved by the county committee.

Maximum assistance. (1) 70 percent of the average cost, but not in excess of $0.12 per cubic yard of earth or gravel moved, or $1.50 per cubic yard of rock moved, in the construction or enlargement of permanent ditches, dikes, or laterals. No assistance will be given for cleaning a ditch.

(2) Constructing or installing siphons, flumes, drop boxes or chutes, weirs, diversion gates, or pipe. No assistance will be given for repairs or replacements of existing structures.

(a) 50 percent of the average cost of material used, but not in excess of $12 per cubic yard of concrete or $7 per cubic yard of rubble masonry.

(b) 50 percent of the average cost of materials, other than concrete or rubble masonry, used in the permanent structure, excluding forms.

(3) 50 percent of the average cost of pipe and fittings used for sprinkler irrigation. No assistance will be given for repairs or replacements of existing structures. The total assistance for portable pipe and fittings under this item and under § 701.460 shall not exceed $500 per farm.

§ 701.456 *Practice D–5: Leveling land for more efficient use of irrigation water or to prevent erosion*—(a) *Practice D–5–a: Leveling land.* No assistance will be given for floating or carrying out this practice on any land for which assistance for leveling, other than by benchland plowing, was given under a previous program. Not applicable in connection with any land for which water is not available.

Maximum assistance. 50 percent of the average cost of earth moving, but not in excess of a maximum amount per acre specified in the State handbook.

(b) *Practice D–5–b: Restoration of grade.* Assistance is limited to restoring the grade on a field included in the original plan for leveling, after settlement following a heavy leveling operation. At least one crop must have been grown on the land after the original leveling. Areas that can be restored by drag or float will not qualify for assistance. No assistance will be given on any acreage for which assistance was given for this practice under a previous program.

Maximum assistance. 50 percent of the average cost of earth moving, but not in excess of an amount per acre specified in the State handbook.

§ 701.457 *Practice D–6: Constructing or enlarging dams, pits, or ponds for irrigation water.* No assistance will be given for material moved in cleaning or maintaining a reservoir. No assistance will be given for repairs or maintenance of existing structures. No assistance will be given for the excavation of pits for the interception of underground water.

Maximum assistance. (1) 70 percent of the average cost of earth moving, but not in excess of $0.12 per cubic yard of material moved.

(2) 50 percent of the average cost of concrete or rubble masonry used, but not in excess of $12 per cubic yard of concrete or $7 per cubic yard of rubble masonry.

(3) 50 percent of the average cost of materials, other than concrete or rubble masonry, used in the permanent structure, excluding forms.

(4) 50 percent of the average cost of pipe, outlet gates, fencing material, and seeding or sodding the dam and filter strips.

§ 701.458 *Practice D–7: Lining earthen reservoirs for irrigation water.*

Maximum assistance. (1) 50 percent of the average cost of concrete or rubble masonry used, but not in excess of $12 per cubic yard of concrete or $7 per cubic yard of rubble masonry.

(2) 50 percent of the average cost of materials, other than concrete or rubble masonry, used in the permanent structure, excluding forms.

§ 701.459 *Practice D–8: Lining irrigation ditches to prevent erosion and loss of water by seepage.* This practice is limited to ditches that are properly located and constructed as a part of an existing irrigation system. Where turnouts, drops, gates, checks, or other structures are needed in the ditch, such structures shall be installed at the time the ditch is lined.

Maximum assistance. (1) 50 percent of the average cost of concrete or rubble masonry used, but not in excess of $12 per cubic yard of concrete or $7 per cubic yard of rubble masonry.

(2) 50 percent of the average cost of materials, other than concrete or rubble masonry, used in the permanent structure, excluding forms.

§ 701.460 *Practice D–9: Installation of facilities for sprinkler irrigation for permanent pasture on rolling land.* Installation of sprinkler irrigation facilities on rolling land with average slopes in excess of 5 percent for the irrigation of permanent pasture or land being established in permanent pasture. The installation must be in accordance with a written plan approved by the county committee. This practice is not applicable in connection with any land for which water is not available. The total assistance for this practice and for portable pipe and fittings under § 701.455 shall not exceed $500 per farm.

Maximum assistance. (1) 50 percent of the average cost of permanently installed pipe and fittings, but not in excess of $500 per farm.

(2) 50 percent of the average cost of portable pipe and fittings, but not in excess of $500 per farm.

§ 701.461 *Practice D–10: Conservation of irrigation water and prevention of soil erosion and leaching, by the controlled application of irrigation water.* Limited to counties where excess use of irrigation water is general and adequate information on water-holding capacities of general soil types, depth of rooting of crops grown in the county, and quality of irrigation water used in the county is available. Specifications shall require measurement of the amount of water applied and depth of penetration of each irrigation on each crop, and shall limit the amount of water to be applied per irrigation to not in excess of a maximum established by the county committee for the crops and soil types on the farm. The farmer shall report to the county committee for each irrigation of each crop the date of application, the amount of water applied (second-feet and length of time), and the depth of penetration determined in a manner prescribed by the county committee. Applicable only as a special conservation practice.

Maximum assistance. $4 per acre.

DRAINAGE PRACTICES TO PERMIT LAND-USE ADJUSTMENTS NEEDED IN ESTABLISHING SOIL CONSERVING CROPPING SYSTEMS OR TO PERMIT OTHER MEASURES REQUIRED TO CONSERVE SOIL AND WATER RESOURCES, WITH DUE CONSIDERATION TO THE MAINTENANCE OF WILDLIFE RESOURCES

§ 701.464 *Practice E–1: Installing or improving drainage systems*—(a) *Practice E–1–a: Open farm drainage ditches.* No assistance will be given for cleaning or maintaining a ditch. Assistance will be limited to construction, enlargement, and structural work on permanent ditches, and the establishment of vegetative cover necessary to control erosion in open ditches.

Maximum assistance. (1) 70 percent of the average cost of earth moving, but not in excess of $0.12 per cubic yard of material moved.

(2) 50 percent of the average cost of concrete or rubble masonry used, but not in excess of $12 per cubic yard of concrete or $7 per cubic yard of rubble masonry, for erosion control structures.

(3) 50 percent of the average cost of materials, other than concrete or rubble masonry, used in the permanent structure, excluding forms.

(4) 50 percent of the average cost of pipe for pipe drops.

(5) 60 percent of the average cost, other than land preparation, of sodding or sprigging earthen flumes, but not in excess of $0.75 per 1,000 square feet.

(6) 80 percent of the average cost of seed for establishing a cover on ditch banks and right-of-way or for seeding earthen flumes.

(b) *Practice E–1–b: Tile, fiber pipe, lumber box, sump well, or gate drains, and desilting boxes, surface inlets, metal pipe outlets, and head walls, for tile systems.* No assistance will be given for repairing or maintaining existing drains.

Maximum assistance. 50 percent of the average cost of material delivered to the farm and 50 percent of the average cost of installation.

(c) *Practice E–1–c: Shaping or land grading to provide permanent slopes needed for surface drainage.* Assistance will not be given on any acreage on which assistance was given for this practice under a previous program, for maintaining existing structures, nor on any acreage where assistance is given under § 701.440 for controlling weeds by continuous cultivation. Assistance will not be given on any acreage where the shaping or grading is performed by normal farm tillage equipment.

Maximum assistance. 50 percent of the average cost of earth moving, but not in excess of $5 per acre.

PRACTICES TO ESTABLISH, RESTORE, AND MAINTAIN FARM WOODLAND

§ 701.467 *Practice F–1: Planting or interplanting forest trees or shrubs on farm land for forestry purposes, windbreaks, shelter belts, or erosion control.* Plantings must be protected from fire and grazing. If shrubs are used, those that benefit wildlife should be given preference wherever practicable.

Maximum assistance. 80 percent of the average cost of trees and planting, excluding land preparation and cultivation.

§ 701.468 *Practice F–2: Improving a stand of forest trees.* Technical forestry assistance must be utilized. The minimum stand of desirable species which must be present in order for the acreage to be eligible must be specified in the State handbook. No assistance will be given for any area from which merchantable products are harvested in the process of carrying out the practice, unless the county committee determines that the primary purpose of the operation was the improvement of the residual stand of trees. Assistance may be given for the release of desirable forest tree seedlings by removing or killing competing and undesirable vegetation in areas where the representatives of the Forest Service determine that such measures are necessary to provide effective forest stand improvement. The area thus released must be protected from fire and grazing.

Maximum assistance. 70 percent of the average cost.

§ 701.469 *Practice F–3: Maintaining a stand of trees or shrubs in windbreaks or shelter belts.* Applicable only in connection with windbreaks or shelter belts planted between January 1, 1948, and January 1, 1953. Replanting is required if necessary to bring the stand up to normal. Windbreaks and shelter belts must be protected from fire and grazing. The eligible maintenance measures must be specified in the State handbook.

Maximum assistance. $3 per acre.

§ 701.470 *Practice F–4: Constructing firebreaks or fire lanes.*

Maximum assistance. (1) $0.50 per 1,000 linear feet for each foot of width for widths not in excess of 15 feet, and

(2) $0.40 per 1,000 linear feet for each foot of width in excess of 15 feet; but not in excess of $11.50 per 1,000 linear feet under (1) and (2).

§ 701.471 *Practice F–5: Constructing permanent fences to protect farm woodland from grazing.* Domestic animals must be excluded from the fenced woodland. No assistance will be given for maintaining an existing structure.

Maximum assistance. 50 percent of the average cost of fencing material used.

§ 701.472 *Practice F–6: Clearing land to permit planting of forest trees.* Assistance is limited to clearing land occupied largely by scrubby brush of no economic value to permit planting of desirable species of forest trees. The eligible clearing methods and the maximum average slope on which the practice may be carried out must be specified in the State handbook. Technical assistance must be utilized to determine the suitability of the land for clearing and the measures necessary to prevent erosion. Necessary erosion preventive measures must be carried out. The area cleared must be planted in forest trees within 1 year after clearing is completed.

Maximum assistance. 50 percent of the average cost of clearing, but not in excess of $10 per acre.

§ 701.473 *Practice F–7: Forest site preparation to facilitate natural reseeding of forest trees.* Assistance is limited to forested areas needing natural reseeding of desirable species of forest trees that will not restock unless brush, dense litter, and other materials on the forest soil is broken up or removed so that soil is exposed. Site preparation may be accomplished by controlled burning under the supervision of the authorized State forestry agency or by scarification or other mechanical means. A sufficient number of desirable seed trees must be present and left until the area is restocked. The area must be protected from wildfire and grazing. Necessary erosion preventive measures must be carried out. Technical forestry assistance must be utilized.

Maximum assistance. 50 percent of the average cost, but not in excess of $5 per acre.

PRACTICES TO MEET SPECIAL CONSERVATION NEEDS

§ 701.476 *Practice G–1: Special conservation practices.* The ACP Branch, upon recommendation of the State and county committees and designated representatives of the Soil Conservation Service and Forest Service at both the county and State levels, may approve

cases where the agency to which the debt is owed notifies the ACP Branch that it temporarily waives its rights to set-off in order to permit the furnishing of materials and services.

(b) Title to any material distributed by the ACP Branch, either directly or through purchase orders, shall vest in the ACP Branch until the material is applied or planted, or all charges for the materials are satisfied.

§ 701.482 *Cost to producer in cash.* The producer shall pay that part of the cost of the material or service, as established by the ACP Branch, which is in excess of the credit for the use of the material or service in carrying out approved practices. The small payment increase on an amount equivalent to the credit value of properly used conservation materials and services may be advanced as a credit against that part of the cost required to be paid by the producer.

§ 701.483 *Deduction.* (a) A deduction shall be made for materials or services furnished by the ACP Branch from the payment of the producer to whom materials or services are furnished. The deduction shall be the sum of the credit value of the conservation materials and services furnished and any amount of small payment increase advance to the producer, except that (1) where the cost to the ACP Branch is less than the credit rate, the deduction shall be equal to the cost; (2) where the increase in small payment was advanced to the producer under a previous program and the material or service was transferred to the 1953 program, the amount of the increase in small payment to be deducted shall be determined on the 1953 credit value; and (3) where the material or service was transferred to the 1953 program from a previous program and the practice for which furnished is not offered in the county under the 1953 program, the producer may be relieved of the above deductions upon determination by the county committee that the material or service was used in performing the practice for which the material or service was furnished. If the producer misuses any material or service furnished, an additional deduction equal to the original amount of the deduction, excluding any amount of small payment increase advanced to the producer, for the material or service misused shall be made.

(b) Materials or services will be considered as misused, for the purposes of this section, in the following instances:

(1) Where the county committee determines that any conservation material has been applied to crops which are not designated as eligible crops by the county and State committees, unless failure to properly use the material was due to conditions beyond the producer's control.

(2) Where the county committee determines that a structure, such as a terrace or dam, has been willfully or negligently destroyed by a producer in the program year in which the structure was completed.

(3) Where the county committee determines that material has been willfully or negligently destroyed, or has been rendered unusable, by the producer.

(4) Where the county committee determines that with respect to seed furnished in connection with a green manure or cover crop, the crop is harvested for grain or hay, or is too heavily grazed, and such uses are prohibited by the practice specifications.

(5) Where the county committee determines that a producer has disposed of material by sale, barter, or some other unauthorized means.

(6) Where the county committee is unable to determine the use or disposition of material because of the failure of a producer to furnish requested information by the closing date designated by the ACP Branch for filing performance reports. However, if the requested information is filed at a later date and the material was properly used, the material will not be considered as misused.

(c) If the deduction for the materials or services exceeds the payment for the producer to whom the materials or services are furnished, the amount of the difference shall be paid by the producer to the Treasurer of the United States.

(d) Any producer to whom materials are furnished shall be responsible to the ACP Branch for any damage to the materials, unless he shows that the damage was caused by circumstances beyond his control. If materials are abandoned or not used during the program year, they may, at the option of the ACP Branch, be transferred to another producer or otherwise disposed of by the ACP Branch at the expense of the producer who abandoned or failed to use the material, or be retained by the producer for use in a subsequent program year.

(e) Notwithstanding other provisions of this section and § 701.481 (b), in cases where the county committee, in accordance with standards approved by the State committee, determines (1) that due to reasons beyond his control, the producer to whom materials were furnished cannot use them to carry out the practice for which the materials were furnished, (2) that the materials cannot be used effectively by the producer to carry out other approved conservation measures on the farm before there is a likelihood of deterioration of the materials, and (3) that it is impracticable to repossess the materials or transfer the materials to another producer, title to the materials may be transferred to the producer upon payment to the Treasurer of the United States of an amount equal to the deduction determined under the provisions of paragraph (a) of this section.

GENERAL PROVISIONS RELATING TO PAYMENT

§ 701.484 *Maintenance of practices.* Any payment for the performance of approved conservation practices under the 1953 program will be subject to the condition that the person to whom the payment is made will maintain such practices in accordance with good farming practices. If the county committee determines that any conservation practice carried out under the 1953 or any previous program is not maintained in accordance with good farming practices throughout the 1953 program year or the effectiveness of any such practice is destroyed during the 1953 program year, a deduction shall be made for the extent of the practice destroyed or not maintained. The deduction rate shall be the 1953 practice rate or, if the practice is not offered in 1953, the practice rate in effect during the year the practice was performed. The deduction shall be made from the payment of the person responsible for destroying or not maintaining the practice after the payment has been increased in accordance with the provisions of § 701.479.

§ 701.485 *Practices defeating purposes of programs.* If the State committee finds that any person has adopted or participated in any practice which tends to defeat the purposes of the 1953 or any previous program, it may withhold, or require to be refunded, all or any part of any payment which has been or would otherwise be made to such person under the 1953 program.

§ 701.486 *Depriving others of payment.* If the State committee finds that any person has employed any scheme or device (including coercion, fraud, or misrepresentation), the effect of which would be or has been to deprive any other person of any payment under the program, it may withhold, in whole or in part, from the person participating in or employing such a scheme or device, or require him to refund in whole or in part, the amount of any payment which has been or would otherwise be made to him under the 1953 program

Amount of payment computed	Increase in payment	Amount of payment computed	Increase in payment
$1 to $1.99	$0.40	$20 to $21.99	$10.40
$2 to $2.99	.70	$22 to $23.99	10.40
$3 to $4.99	1.20	$24 to $25.99	10.40
$5 to $6.99	1.80	$26 to $27.99	11.20
$7 to $8.99	2.40	$28 to $29.99	11.20
$9 to $9.99	2.80	$30 to $31.99	11.97

$36 to $37.99	10.40	$100 to $199.99	(1)
$38 to $39.99	10.40	$200 and over	(2)

[1] Increase to $200.
[2] No increase.

§ 701.480 *Payments limited to $2,500.* (a) The total of all payments made in connection with the 1953 program to any person with respect to farms, ranching units, and turpentine places in the United States (including Alaska, Hawaii, Puerto Rico, and the Virgin Islands) shall not exceed the sum of $2,500.

(b) All or any part of any payment which has been or otherwise would be made to any person under the 1953 program may be withheld, or required to be refunded, if he has adopted, or participated in adopting, any scheme or device, including the dissolution, reorganization, revival, formation, or use of any corporation, partnership, estate, trust, or any other means, designed to evade, or which has the effect of evading, the provisions of this section.

CONSERVATION MATERIALS AND SERVICES

§ 701.481 *Availability.* (a) Liming materials, phosphates, seeds, and other farming materials or services may be furnished by the ACP Branch to producers for carrying out approved practices. Materials or services may not be furnished to producers who are on the register of indebtedness, except in those cases where the agency to which the debt is owed notifies the ACP Branch that it temporarily waives its rights to set-off in order to permit the furnishing of materials and services.

(b) Title to any material distributed by the ACP Branch, either directly or through purchase orders, shall vest in the ACP Branch until the material is applied or planted, or all charges for the materials are satisfied.

§ 701.482 *Cost to producer in cash.* The producer shall pay that part of the cost of the material or service, as established by the ACP Branch, which is in excess of the credit for the use of the material or service in carrying out approved practices. The small payment increase on an amount equivalent to the credit value of properly used conservation materials and services may be advanced as a credit against that part of the cost required to be paid by the producer.

§ 701.483 *Deduction.* (a) A deduction shall be made for materials or services furnished by the ACP Branch from the payment of the producer to whom materials or services are furnished. The deduction shall be the sum of the credit value of the conservation materials and services furnished and any amount of small payment increase advance to the producer, except that (1) where the cost to the ACP Branch is less than the credit rate, the deduction shall be equal to the cost; (2) where the increase in small payment was advanced to the producer under a previous program and the material or service was transferred to the 1953 program, the amount of the increase in small payment to be deducted shall be determined on the 1953 credit value; and (3) where the material or service was transferred to the 1953 program from a previous program and the practice for which furnished is not offered in the county under the 1953 program, the producer may be relieved of the above deductions upon determination by the county committee that the material or service was used in performing the practice for which the material or service was furnished. If the producer misuses any material or service furnished, an additional deduction equal to the original amount of the deduction, excluding any amount of small payment increase advanced to the producer, for the material or service misused shall be made.

(b) Materials or services will be considered as misused, for the purposes of this section, in the following instances:

(1) Where the county committee determines that any conservation material has been applied to crops which are not designated as eligible crops by the county and State committees, unless failure to properly use the material was due to conditions beyond the producer's control.

(2) Where the county committee determines that a structure, such as a terrace or dam, has been willfully or negligently destroyed by a producer in the program year in which the structure was completed.

(3) Where the county committee determines that material has been willfully or negligently destroyed, or has been rendered unusable, by the producer.

(4) Where the county committee determines that with respect to seed furnished in connection with a green manure or cover crop, the crop is harvested for grain or hay, or is too heavily grazed, and such uses are prohibited by the practice specifications.

(5) Where the county committee determines that a producer has disposed of material by sale, barter, or some other unauthorized means.

(6) Where the county committee is unable to determine the use or disposition of material because of the failure of a producer to furnish requested information by the closing date designated by the ACP Branch for filing performance reports. However, if the requested information is filed at a later date and the material was properly used, the material will not be considered as misused.

(c) If the deduction for the materials or services exceeds the payment for the producer to whom the materials or services are furnished, the amount of the difference shall be paid by the producer to the Treasurer of the United States.

(d) Any producer to whom materials are furnished shall be responsible to the ACP Branch for any damage to the materials, unless he shows that the damage was caused by circumstances beyond his control. If materials are abandoned or not used during the program year, they may, at the option of the ACP Branch, be transferred to another producer or otherwise disposed of by the ACP Branch at the expense of the producer who abandoned or failed to use the material, or be retained by the producer for use in a subsequent program year.

(e) Notwithstanding other provisions of this section and § 701.481 (b), in cases where the county committee, in accordance with standards approved by the State committee, determines (1) that due to reasons beyond his control, the producer to whom materials were furnished cannot use them to carry out the practice for which the materials were furnished, (2) that the materials cannot be used effectively by the producer to carry out other approved conservation measures on the farm before there is a likelihood of deterioration of the materials, and (3) that it is impracticable to repossess the materials or transfer the materials to another producer, title to the materials may be transferred to the producer upon payment to the Treasurer of the United States of an amount equal to the deduction determined under the provisions of paragraph (a) of this section.

GENERAL PROVISIONS RELATING TO PAYMENT

§ 701.484 *Maintenance of practices.* Any payment for the performance of approved conservation practices under the 1953 program will be subject to the condition that the person to whom the payment is made will maintain such practices in accordance with good farming practices. If the county committee determines that any conservation practice carried out under the 1953 or any previous program is not maintained in accordance with good farming practices throughout the 1953 program year or the effectiveness of any such practice is destroyed during the 1953 program year, a deduction shall be made for the extent of the practice destroyed or not maintained. The deduction rate shall be the 1953 practice rate or, if the practice is not offered in 1953, the practice rate in effect during the year the practice was performed. The deduction shall be made from the payment of the person responsible for destroying or not maintaining the practice after the payment has been increased in accordance with the provisions of § 701.479.

§ 701.485 *Practices defeating purposes of programs.* If the State committee finds that any person has adopted or participated in any practice which tends to defeat the purposes of the 1953 or any previous program, it may withhold, or require to be refunded, all or any part of any payment which has been or would otherwise be made to such person under the 1953 program.

§ 701.486 *Depriving others of payment.* If the State committee finds that any person has employed any scheme or device (including coercion, fraud, or misrepresentation), the effect of which would be or has been to deprive any other person of any payment under the program, it may withhold, in whole or in part, from the person participating in or employing such a scheme or device, or require him to refund in whole or in part, the amount of any payment which has been or would otherwise be made to him under the 1953 program

§ 701.487 *Filing of false claims.* If the State committee finds that any person has knowingly filed claim for payment under the program for practices not carried out, or for practices carried out in such a manner that they do not meet the required specifications therefor, such person shall not be eligible to receive any payment under the program and shall refund all payments that may have been made to him under the program. The withholding or refunding of payments will be in addition to and not in substitution of any other penalty or liability which might otherwise be imposed.

§ 701.488 *Misuse of purchase orders.* If the State committee finds that any person has knowingly used a purchase order issued to him for conservation materials or services for a purpose other than that for which it was issued, and that such misuse of the purchase order tends to defeat the purpose for which it was issued, such person shall not be eligible to receive any payment under the program and shall refund all payments that may have been made to him under the program. The withholding or refunding of payments will be in addition to and not in substitution of any other penalty or liability which might otherwise be imposed.

§ 701.489 *Payment computed and made without regard to claims.* Any payment or share of payment shall be computed and made without regard to questions of title under State law; without deduction of claims for advances (except as provided in § 701.490, and except for indebtedness to the United States subject to set-off under orders issued by the Secretary (Part 718 of this chapter)); and without regard to any claim or lien against any crop, or proceeds thereof, in favor of the owner or any other creditor.

§ 701.490 *Assignments.* Any person who may be entitled to any payment under the 1953 program may assign his payment, in whole or in part, as security for cash loaned or advances made for the purpose of financing the making of a crop in 1953. No assignment will be recognized unless it is made in writing on Form ACP–69 and in accordance with the instructions in ACP–70.

APPLICATION FOR PAYMENT

§ 701.492 *Persons eligible to file application.* An application for payment with respect to a farm may be made by any producer who is entitled to share in the payment determined for the farm. An application for payment need not be made by a producer if his only payment is earned with conservation materials or services furnished by the ACP Branch and the entire small payment increase, if any, earned by the use of the materials or services has been advanced to the producer.

§ 701.493 *Time and manner of filing application and information required.* Payment will be made only upon application submitted on the prescribed form to the county office. Where conservation materials or services are furnished by the ACP Branch, there need be reported on the application for payment with respect to such materials and services only the total credit and deduction value of the materials and services furnished. Payment may be withheld from any person who fails to file any form or furnish any information required with respect to any farm which such person is operating or renting to another. Any application for payment may be rejected if any form or information required of the applicant is not submitted to the county office within the time fixed by the Director, ACP Branch, which time shall be not later than December 31, 1954. At least 2 weeks' notice to the public shall be given of the expiration of a time limit for filing prescribed forms or required information, and any time limit fixed shall afford a full and fair opportunity to those elegible to file the form of information within the period prescribed. Such notice shall be given by mailing notice to the office of each county committee and making copies available to the press.

APPEALS

§ 701.494 *Appeals.* Any producer may, within 15 days after notice thereof is forwarded to or made available to him, request the county committee in writing to reconsider its recommendation or determination in any matter affecting the right to or the amount of his payment with respect to the farm. The county committee shall notify him of its decision in writing within 15 days after receipt of written request for reconsideration. If the producer is dissatisfied with the decision of the county committee, he may, within 15 days after the decision is forwarded to or made available to him, appeal in writing to the State committee. The State committee shall notify him of its decision in writing within 30 days after the submission of the appeal. If he is dissatisfied with the decision of the State committee, he may, within 15 days after its decision is forwarded to or made available to him, request the Director, ACP Branch, to review the decision of the State committee. Written notice of any decision rendered under this section by the county or State committee shall also be issued to each other producer on the farm who may be adversely affected by the decision.

STATE HANDBOOKS, BULLETINS, INSTRUCTIONS, AND FORMS

§ 701.495 *State handbooks, bulletins, instructions, and forms.* The ACP Branch is authorized to make determinations and to prepare and issue State handbooks, bulletins, instructions, and forms required in administering the 1953 program. Copies of State handbooks, bulletins, instructions, and forms containing detailed information with respect to the 1953 program as it applies to specific States, counties, areas, and farms will be available in the office of the State committee (11 F. R. 177A–285) and the office of the county committee. Producers wishing to participate in the program should obtain from the State committee or county committee all information needed in order to comply with all provisions of the program.

DEFINITIONS

§ 701.496 *Definitions.* For the purposes of the 1953 program:

(a) "Secretary" means the Secretary of Agriculture of the United States.

(b) "Director" means the Director of the Agricultural Conservation Programs Branch, Production and Marketing Administration.

(c) "State" means any one of the continental United States.

(d) "State committee" means the group of persons designated within any State to assist in the administration of the Agricultural Conservation Program in that State.

(e) "County" means parish or county.

(f) "County committee" means the group of persons elected within any county to assist in the administration of the Agricultural Conservation Program in that county.

(g) "Person" means an individual, partnership, association, corporation, estate, or trust, or other business enterprise or other legal entity, and, wherever applicable, a State, a political subdivision of a State, or any agency thereof.

(h) "Producer" means any person who, as landlord, tenant, or share cropper, participates in the operation of a farm.

(i) "Farm" means all adjacent or nearby farm or range land under the same ownership which is operated by one person, including also (1) any other adjacent or nearby farm or range land which the county committee, in accordance with instructions issued by the ACP Branch, determines is operated by the same person as part of the same unit in producing range livestock or with respect to the rotation of crops, and with work stock, farm machinery, and labor substantially separate from that for any other land; and (2) any field-rented tract (whether operated by the same or another person) which, together with any other land included in the farm, constitutes a unit with respect to the rotation of crops. A farm shall be regarded as located in the county in which the principal dwelling is situated or, if there is no dwelling thereon, it shall be regarded as located in the county in which the major portion of the farm is located.

(j) "Cropland" means farm land which in 1952 was tilled or was in regular crop rotation, excluding (1) bearing orchards and vineyards (except the acreage of cropland therein), (2) plowable noncrop open pasture, and (3) any land which constitutes or will constitute, if tillage is continued, a wind erosion hazard to the community.

(k) "Program year" means the period, designated in the State handbook, during which conservation practices must be carried out to be eligible for assistance. The program year may begin on or after September 1, 1952, and end not later than December 31, 1953.

AUTHORITY, AVAILABILITY OF FUNDS, AND APPLICABILITY

§ 701.497 *Authority.* The program contained in this subpart is approved pursuant to the authority vested in the Secretary of Agriculture under sections 7–17 of the Soil Conservation and Domestic Allotment Act, as amended (49 Stat. 1148; 16 U. S. C. 590g–590q).

§ 701.498 *Availability of funds.* (a) The provisions of the 1953 program are necessarily subject to such legislation as the Congress of the United States may hereafter enact; the making of the payments provided in this subpart is contingent upon such appropriation as the Congress may hereafter provide for such purpose; and the amounts of such payments will necessarily be within the limits finally determined by such appropriation.

(b) The funds provided for the 1953 program will not be available for the payment of applications filed in the county office after December 31, 1954.

§ 701.499 *Applicability.* (a) The provisions of the 1953 program contained in this subpart are not applicable to (1) any department or bureau of the United States Government or any corporation wholly owned by the United States; (2) grazing lands owned by the United States which were acquired or reserved for conservation purposes, or which are to be retained permanently under government ownership, including, but not limited to, grazing lands administered by the Forest Service or the Soil Conservation Service of the United States Department of Agriculture, or by the Bureau of Land Management (including lands administered under the Taylor Grazing Act) or the Fish and Wildlife Service of the United States Department of the Interior; (3) nonprivate persons for performance on any land owned by the United States or a corporation wholly owned by it; and (4) farms outside the continental United States.

(b) The program is applicable to (1) privately owned lands; (2) lands owned by a State or political subdivision or agency thereof; (3) lands owned by corporations which are partly owned by the United States, such as production credit associations; (4) lands temporarily owned by the United States or a corporation wholly owned by it, which were not acquired or reserved for conservation purposes, including lands administered by the Farmers Home Administration, the Reconstruction Finance Corporation, the Federal Farm Mortgage Corporation, the United States Department of Defense, or by any other government agency designated by the ACP Branch; (5) any cropland farmed by private persons which is owned by the United States or a corporation wholly owned by it; and (6) Indian lands, except that where grazing operations are carried out on Indian lands administered by the Department of the Interior, such lands are within the scope of the program only if covered by a written agreement approved by the Department of the Interior giving the operator an interest in the grazing and forage growing on the land and a right to occupy the land in order to carry out the grazing operations.

Done at Washington, D. C., this 28th day of July 1952.

[SEAL] K. T. HUTCHINSON,
Acting Secretary of Agriculture.

Chapter VIII—Production and Marketing Administration (Sugar Branch), Department of Agriculture

Subchapter B—Sugar Requirements and Quotas

[Sugar Reg. 814.7, Amdt. 2]

PART 814—ALLOTMENT OF SUGAR QUOTAS

PUERTO RICO, 1952

Basis and purpose. This amendment is issued under section 205 (a) of the Sugar Act of 1948 (hereinafter called the "act") for the purpose of revising § 814.7 (17 F. R. 2477, 6759) which allots the 1952 sugar quota for Puerto Rico for consumption in the continental United States (including raw sugar transferred for further processing and shipment within the direct-consumption portion of such quota) and the 1952 sugar quota for local consumption in Puerto Rico among persons (1) whose Puerto Rican raw sugar is brought into the continental United States or who transfer such sugar for further processing and shipment to the continental United States as direct-consumption sugar, and (2) who market sugar for local consumption in Puerto Rico.

The sugar quota for Puerto Rico for consumption in the continental United States is referred to herein as "mainland quota" and allotments thereof are referred to as "mainland allotments". The sugar quota for consumption in Puerto Rico and allotments thereof are referred to respectively as "local quota" and "local allotments".

Amendment 2 (17 F. R. 6758) to Sugar Regulation 813 increased the mainland quota for Puerto Rico by 45,155 short tons, raw value, to a total of 955,155 short tons, raw value, and amendment 1 to this part (17 F. R. 6759) allotted 80 percent of the increased quota to the interested persons. In amendment 1 to this part an error was made in using estimates of 1951–52 crop sugar production which were different from those used in the initial order. This amendment 2 is necessary to correct that error.

Since immediate action may be taken by a number of allottees to market the increases in allotments provided by amendment 1, it is imperative that this amendment become effective at the earliest possible date in order to permit continued orderly marketing of sugar. Accordingly, it is hereby found that compliance with the 30-day effective date requirement of the Administrative Procedure Act (60 Stat. 237), is impracticable and contrary to the public interest and, consequently, this order shall be effective when published in the FEDERAL REGISTER.

Pursuant to the authority vested in the Secretary of Agriculture by section 205 (a) of the act, paragraph (a) of § 814.7, as amended, is hereby further amended to read as follows:

§ 814.7 *Allotments of 1952 sugar quotas for Puerto Rico*—(a) *Allotments.* Eighty percent of the 1952 sugar quota for Puerto Rico for consumption in the continental United States (including raw sugar to be further processed and marketed within the direct-consumption portion of such quota), amounting to 764,124 short tons of sugar, raw value, and 80 percent of the 1952 sugar quota for local consumption in Puerto Rico, amounting to 80,000 short tons of sugar, raw value, are hereby allotted to the following processors in amounts which appear in columns opposite their respective names:

[Short tons, raw value]

Processor	Mainland allotment	Local allotment
Antonio Roig, Sucesores, S. en C.	18,515	16,554
Arturo Lluberas, (estate of) y Sobrinos (San Francisco)	3,246	1,135
Asociacion Azucarera Cooperativa (Lafayette)	23,848	460
Central Aguirre Sugar Co., a trust	81,466	1,410

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supp. 16]

PART 60—AIR TRAFFIC RULES

LONG-DISTANCE SCHEDULED AIR CARRIER OPERATIONS

The following supplement does not impose additional burdens upon interested persons. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is unnecessary and therefore is not required.

Sections 60.21–1, 60.43–1, and 60.47–1, published on August 10, 1950, in 15 F. R. 5155 and amended on September 14, 1951, in 16 F. R. 9306, are further amended by substituting "SR–382" for "SR–363".

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This supplement shall become effective upon publication in the FEDERAL REGISTER.

[SEAL] F. B. LEE,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52-8380; Filed, July 30, 1952; 8:52 a. m.]

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53056]

PART 8—LIABILITY FOR DUTIES, ENTRY OF IMPORTED MERCHANDISE

INVOICES; PAPER AND PAPER PRODUCTS

In order to assist collectors of customs in properly classifying paper and paper products (other than books, newspapers, and periodicals which are not fashion periodicals) bearing printing of any kind, whether or not the printing was done by a lithographic process, customs invoices for such products shall contain, in addition to all other information required by law or regulation, a statement of the process employed in printing the paper or paper products.

This requirement shall be effective as to certified or commercial invoices filed after the expiration of 30 days after the publication of this ruling in the weekly Treasury Decisions.

Section 8.13 (i), Customs Regulations of 1943 (19 CFR 8.13 (i)), as amended, is further amended by adding the following to the list of merchandise with respect to which additional information is required to be furnished on customs invoices, and by placing opposite such addition the number and date of this Treasury decision:

Paper and paper products (other than books, newspapers, and periodicals which are not fashion periodicals) bearing printing of any kind, whether or not the printing was done by a lithographic process.

(Secs. 481, 624, 64 Stat. 719, 759; 19 U. S. C. 1481, 1624)

[SEAL] D. B. STRUBINGER,
Acting Commissioner of Customs.

Approved: July 24, 1952.

A. N. OVERBY,
Acting Secretary of the Treasury.

[F. R. Doc. 52-8378; Filed, July 30, 1952; 8:51 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter E—Organized Reserves

PART 564—ENLISTED RESERVE CORPS

DISCHARGE FROM RESERVE DUTY STATUS

Paragraph (b) of § 564.11 is amended to read as follows:

§ 564.11 *Separation from service.*

• • •

(b) *Discharge from Reserve duty status.* Except for enlisted personnel of the Regular Army transferred to the Enlisted Reserve Corps, placed on the retired list of the Regular Army, and subsequently discharged upon completion of 30 years' service, all members of the Enlisted Reserve Corps will be discharged as follows:

(1) By direction of the President or order of the Secretary of the Army. Such authority may be given either in individual cases or by an order applicable to all cases specified in the order.

(2) By direction of area commanders or such officer or officers as may be designated by them for that purpose:

(i) Upon expiration of term of enlistment or period of service. The period of service required of a male reservist who enlisted in the Enlisted Reserve Corps subsequent to June 19, 1951 and while under 26 years of age is 8 years. A reservist of this category will not be discharged at the end of his 33-year term of enlistment but will have his period of service administratively extended to 8 years to fulfill the obligation imposed by section 4 (d) (3), Universal Military Training and Service Act, (62 Stat. 607; 50 U. S. C. Supp. IV. App. 454 (d)). A discharge certificate will not be issued to the reservist until he has completed this obligation.

(ii) To permit immediate reenlistment of reservists who apply for and are qualified for reenlistment:

(a) At any time during the last 90 days of current enlistment, or

(b) For the purpose of enlistment to meet length of service requirements for active duty tour, including active duty, active duty for training, attendance at service schools, etc.

Date of discharge will be the day immediately preceding the date of reenlistment. The discharge certificate will not be delivered to the individual until after reenlistment is effected.

(iii) Upon enlistment, induction, or acceptance of appointment in any of the Armed Forces or in the Reserve components thereof, including the National Guard of the United States. However, a member of the Enlisted Reserve Corps may be discharged upon enlistment in the Coast Guard or the Coast Guard Reserve only when the Coast Guard, in time of war or national emergency, is operating as an Armed Force under the jurisdiction of the Secretary of the Navy. Discharge upon enlistment or acceptance of appointment as provided in this subparagraph does not relieve the obligated reservist of the remainder of any obligation he may have incurred pursuant to section 4 (d) (1), (2), or (3), Universal Military Training and Service Act, as amended.

(iv) Upon acceptance of appointment as a commissioned officer or warrant officer in the Organized Reserve Corps. However, a reservist who, while serving on active duty, accepts an appointment as a commissioned or warrant officer in the Organized Reserve Corps will continue on active duty in his enlisted status and will be discharged from the Enlisted Reserve Corps upon relief from active duty or upon being ordered into the active military service as a commissioned or warrant officer, whichever occurs first.

(v) Upon appointment to the United States Military, Naval, or Coast Guard Academy.

(vi) When permanently physically disqualified for active service and ineligible for transfer to the Honorary Reserve. Certificate from physican setting forth the nature of specific physical defect or defects will be acceptable evidence, provided the defects listed are considered to be disqualifying.

(vii) Upon presentation of conclusive evidence in accordance with Army regulations that genuine personal hardship exists and discharge will be to the best interest of the Government.

(viii) Upon conviction by a civil court.

(ix) For disloyal and subversive activity.

(3) Reservists who have no Reserve obligation incurred under section 4 (d) (1), (2), or (3), Universal Military Training and Service Act, as amended, also may be discharged by direction of the area commander or such officer or officers as may be designated by him for that purpose:

(i) Upon acceptance of appointment in the Coast and Geodetic Survey or the Public Health Service.

(ii) Because of inaptitude or unsuitability.

(iii) Because of evidence of unfitness.

(iv) For fraudulent enlistment.

(v) For inability to locate after reasonable effort or failure to reply to official communications.

(vi) Upon being found not available for service. A Reservist discharged under this provision will be advised that he may apply for a new enlistment, should the cause for his not being available for service be removed.

(vii) In the case of female personnel not on active duty who have a dependent or dependents under 18 years of age, a child or children under 18 years of age, or who have any legal custody, control, care, maintenance, or support of any child or children under 18 years of age. Women who have surrendered all rights to custody and control of such children or dependents through formal adoption or final divorce proceedings will not be discharged under these provisions.

(viii) For minority.

(ix) For dependency. Upon request of reservist and upon presentation of a sworn affidavit listing four or more dependents. Only the following are considered to be dependents for discharge under these regulations: Lawful wife, unmarried legitimate children under 21 years of age, and dependent parents provided a dependent parent receives over one-half of his or her support from the reservist. No other relatives qualify as dependents for this purpose. Each parent claimed as a dependent must also submit a sworn affidavit that the enlisted applicant did in fact for at least three consecutive months immediately prior to request for discharge contribute over one-half of the support of such parent. If the applicant submits sworn affidavits as proof of dependency acceptable to the headquarters authorized to take final action, he will be discharged from his status as a member of the Enlisted Reserve Corps by reason of dependency and hardship. The failure of any eligible enlisted reservists to request discharge from the Enlisted Reserve Corps under the provisions of this option will be considered as sufficient evidence that the individual is available for being ordered into the active military service.

(x) Upon request of reservist when, in the opinion of the area commander, the discharge will be to the best interest of the Government.

[C 1, SR 140–177–1, July 11, 1952] (R. S. 161; 5 U. S. C. 22. Interpret or apply sec. 55, 39 Stat. 195, as amended; sec. 35, 41 Stat. 780; 10 U. S. C. 421, 423–427)

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[General Ceiling Price Regulation, Supplementary Regulation 95, Revision 1]

GCPR, SR 95—CEILING PRICES FOR PROCESSORS AND DISTRIBUTORS OF FLAXSEED FEED PRODUCTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161 and Economic Stabilization Agency General Order No. 2, this Revision 1 to Supplementary Regulation 95 to the General Ceiling Price Regulation is hereby issued.

STATEMENT OF CONSIDERATIONS

This revision of Supplementary Regulation 95 establishes ceiling prices for processors and distributors of flaxseed feed products.

Flaxseed feed products include linseed meal, oil cake, sized cake, pellets, cubes, flaxseed screenings oil feed and linseed feed. The most important of these is linseed meal, a high protein feed supplement used primarily in feeding dairy and beef cattle. It is also used as a feed for sheep, horses, mules, and to some extent for hogs. Pressed into pellets or cubes, it is used extensively for pasture and range feeding.

Linseed meal and other flaxseed feed products are an important part of the total feed supply. For the last four years, annual production has averaged 683,000 tons. Although production of linseed meal is considerably lower than the principal competitive oil seed meals—soybean meal and cottonseed meal—in the 1951–52 crop year linseed meal constituted about 7½ percent of the total supply of all oilseed meals.

Prices of flaxseed feed products were frozen under the General Ceiling Price Regulation (GCPR) and SR 18 to the GCPR. The level of ceiling prices under the freeze was considerably below the normal price relationship of linseed meal with competing feeds. In addition, because of the variation in ceiling prices among individual processors, some processors were placed at a considerable disadvantage as compared to the rest of the industry. The distortion of normal price relationships was increased by ceiling price increases permitted in the case of other high protein feeds—soybean meal, distiller's grains and corn gluten feed. Pending the issuance of a dollar-and-cent ceiling price at a level more representative of normal price relationships, SR 95 to the GCPR, issued on March 28, 1952, permitted producers of flaxseed feed products an interim increase of $5.50 per ton in their ceiling prices.

This revision accomplishes two purposes. On the basis of a restudy of inlining relationships, it in-lines the ceiling prices of flaxseed feed products with the ceiling prices of competing feeds. Second, it provides dollar-and-cent ceiling prices for processors and thus removes inequities and distortions occasioned by variations in ceiling prices of competing processors.

The ceiling prices for linseed meal and other flaxseed feed products as set by this regulation, are based upon the normal relationship of linseed meal to corn and the ceiling prices of other competing feeds. Corn is the principal livestock feed used in the United States, representing about 60 percent of all feed concentrates fed to livestock. An additional 30 percent of the feed concentrates is composed of other feed grains and by-product feeds whose prices are closely related to the price of corn. The remaining 10 percent is composed of high protein feed supplements whose prices, over a period of time, are determined, competitively, on the basis of their feeding value in relation to corn and other feed concentrates. Consequently, corn provides a satisfactory and reasonable standard to which the ceiling prices of high protein feeds can be related and is here used as the standard for linseed meal and other flaxseed products. The ceiling prices set by this revised regulation are based upon the relationship of linseed meal to the parity price of corn. They average $6 to $8 higher than the individual ceilings previously in effect.

This revision provides dollar-and-cent ceiling prices for processors of flaxseed feed products, f. o. b. the point of production. Prices are listed for sales and deliveries at various base points covering all of the major producing points in the United States. For deliveries at points other than the point of production, the processor may add his transportation cost from the base point at which the lot was produced to the point of delivery to the customer. The listed prices are for sales and deliveries of flaxseed feed products of guaranteed standard protein content. Methods are provided for computing ceiling prices for products on which a lower protein guarantee is given and for deliveries of lots containing less than the guaranteed protein content.

This revised regulation permits distributors to increase their GCPR ceiling prices by the dollar-and-cent amount of the increase in the ceiling price of the supplier on each particular lot. This preserves the dollar-and-cent markup which each distributor received during the GCPR base period. Dollar-and-cent markups for distributors will be provided as soon as the necessary data are available.

The ceiling price for linseed meal set by this revised regulation and the ceiling prices for linseed oil established under CPR 22 together reflect the legal minimum price for flaxseed and provide generally fair and equitable margins for processors, as required by section 402 (d) (3) of the Defense Production Act of 1950, as amended.

The specifications and standards for flaxseed feed products used in this regulation, including those used in distinguishing different kinds, classes and types of products, were, prior to the issuance of the regulation, in general use in the industry. No practicable alternative to such standardization exists in securing effective price control of these products.

In the formulation of this regulation there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

In the judgment of the Director of Price Stabilization, the provisions of this regulation are generally fair and equitable, are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended, and comply with all the applicable standards of that Act.

REGULATORY PROVISIONS

Sec.
1. What this revised supplementary regulation does.
2. Sales not covered.
3. Processors' ceiling prices for carlot sales in bulk, produced and delivered at listed base points.
4. Processors' ceiling prices for carlot sales in bulk, produced and delivered at other producing points.
5. Processors' ceiling prices for a delivery at any point other than producing point.
6. Processors' ceiling prices for 1. c. l. sales.
7. Distributors' ceiling prices.
8. Allowance for sacks and sacking.
9. Definitions.

AUTHORITY: Sections 1 to 9 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C., App. Sup. 2101–2110; E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.

SECTION 1. *What this revised supplementary regulation does*—(a) *Coverage.* This revised supplementary regulation establishes ceiling prices for sales by processors and distributors of flaxseed feed products. For the sellers and products covered, this revised supplementary regulation supersedes Supplementary Regulation (SR) 95 and SR 18 to the General Ceiling Price Regulation (GCPR) and the provisions of the GCPR that are inconsistent with the provisions of this supplementary regulation.

(b) *Geographical applicability.* This supplementary regulation applies in the 48 states of the United States and the District of Columbia.

SEC. 2. *Sales not covered.* (a) This supplementary regulation does not apply to export sales and sales for export. The ceiling prices for such sales are determined under Ceiling Price Regulation 61.

(b) This supplementary regulation does not apply to sales and deliveries of imported flaxseed feed products. The ceiling prices for such sales are determined under Ceiling Price Regulation 31.

SEC. 3. *Processors' ceiling prices for carlot sales in bulk produced and delivered at listed base points.* (a) If you are a processor and you produce a particular lot of flaxseed feed products at one of the base points listed in Table I, and you deliver such lot at the same base point, in a carload lot, carload shipment, or pool carlot, your ceiling price per ton, bulk, for such lot is as follows:

(1) *Guarantee of standard protein content.* If you guarantee, at the time of sale, that the lot will contain, at a minimum, the standard protein content set forth in Table I, and you fulfill such guarantee by delivering a lot with at least such protein content, your ceiling price is the price specified in Table I for that base point.

TABLE I

Base points	Oil meal or cake (standard protein content, 32 percent)	Sized cake, pellets or cubes (standard protein content, 32 percent)	Linseed feed (standard protein content, 30 percent)	Flaxseed screenings oil feed (standard protein content, 22 percent)
Minneapolis and Red Wing, Minn.	$78.00	$80.25	$73.00	$60.00
Chicago, Ill.	82.50	84.75	77.50	64.50
Cleveland, Ohio	87.50	85.75	78.50	65.50
Emporia and Fredonia, Kans.	83.50	85.75	78.50	65.50
Buffalo, N. Y.	83.50	85.75	78.50	65.50
New York Harbor area and Philadelphia	85.50	87.75	80.50	67.50
Texas mill points	86.50	88.75	81.50	68.50
Los Angeles and Fresno, Calif.	[1]80.00	[1]82.25	75.00	62.00
San Francisco, Calif.	[1]83.00	[1]85.25	78.00	65.00
Conrad and Great Falls, Mont.	91.00	93.25	86.00	73.00

[1] Standard protein content 28 percent up to 34 percent. For 34 percent or greater protein content, add $2.50 per ton.

(2) *Guarantee of less than standard protein content.* If you guarantee at the time of sale, that the lot will contain, at a minimum, any specified protein content lower than the standard protein content set forth in Table I, and if you fulfill such guarantee by delivering a lot with at least the minimum protein content guaranteed, your ceiling price is as follows:

(i) If you deliver linseed oil meal, oil cake, sized cake, pellets, cubes, or linseed feed, you subtract from the price listed in Table I for that commodity at that base point $2.40 per ton for each unit of protein or fraction thereof by which the guarantee you give is under the standard protein content.

(ii) If you deliver flaxseed screenings oil feed, you subtract from the price listed in Table I for flaxseed screenings oil feed at that base point $2.60 per ton for each unit of protein or fraction thereof by which the guarantee you give is under the standard protein content.

(3) *Delivery of lower than guaranteed protein content.* If, at the time of sale, you guarantee any minimum protein content and you do not fulfill such guarantee on delivery, your ceiling price, as determined under subparagraphs 1 or 2 above, must be reduced in such proportion as the deficiency bears to the guarantee.

EXAMPLE: You produce a particular lot of linseed meal at your plant at Minneapolis and deliver it to your customer at Minneapolis. At the time of sale you guarantee that the lot will contain, at a minimum, 30 percent protein. Under subparagraph 2 (i) above, if you delivered linseed meal with a protein content of 30 percent or more, your ceiling price for that lot would be $73.20 per ton ($78.00−$4.80). However, upon analysis, the lot you deliver is found to have a protein content of 28.8 percent. Your ceiling price for that lot is $70.27 per ton ($\frac{\$73.20}{30}=\$2.44$. $\$2.44\times 28.8=\$70.27$).

(4) *Sale and delivery with no protein guarantee.* If, at the time of sale, you do not guarantee any minimum protein content, on delivery you determine your ceiling price by multiplying the number of full units of protein in the lot by $2.30. However, your ceiling price for that lot may not exceed the ceiling price established in subparagraph (1) for the same commodity with standard protein guarantee, produced and delivered at the same base point.

(5) *Sale and delivery of more than standard protein content.* If you sell and deliver a flaxseed feed product of more than the standard protein content set forth in Table I, your ceiling price is the same as your ceiling price for that product of standard protein content. However, if you produce linseed oil meal, cake, sized cake, pellets or cubes at any point in California, you may add $2.50 per ton to your ceiling price for these products of standard protein content as otherwise determined under this regulation, if you guarantee that these products will contain a protein content of 34 percent or more and you fulfill such guarantee on delivery.

SEC. 4. *Processors' ceiling prices for carlot sales, in bulk, produced and delivered at other points.* If you produce a lot of flaxseed feed products at a point not listed in Table I, and you deliver such lot to your customer at the same point in a carload lot, carload shipment or pool carlot, your ceiling price per ton, bulk, for that lot is the same as that fixed under section 3 for the same commodity, produced and delivered at the base point listed in Table I nearest to the point at which the lot you are pricing was produced.

SEC. 5. *Processors' ceiling prices for a delivery at any point other than the producing point.* If you deliver a lot of flaxseed feed products to your customer at any point other than the point at which it was produced, your delivered ceiling price, per ton, bulk, in a carload lot, carload shipment, or a pool carlot, is determined by adding to your ceiling

price, as determined under either section 3 or 4, your "transportation cost." However, if you are a processor selling in carload lots from your plant at Red Wing, Minnesota, you may add, instead of your "transportation cost," the flat or proportional carload freight rate, whichever is lower, from Minneapolis to the point at which you deliver to your customer.

SEC. 6. *Processors' ceiling prices for less-than-carlot sales.* If you sell and deliver a flaxseed feed product in a less-than-carload lot, your ceiling price for such lot is your ceiling price for sales in a carload lot, carload shipment, or pool carlot, plus $1.50 per ton.

SEC. 7. *Distributors' ceiling prices—*(a) *Increases in GCPR ceiling prices.* If you are a jobber, wholesaler, car door seller, or retailer, you continue to use the ceiling price you established under either Section 3, 5, 6 or 7 of the GCPR. However, subject to the limitations in paragraph (b) of this section, you may increase your GCPR ceiling price for the sale of any particular lot as follows:

(1) If your ceiling price was determined under Section 3 of the GCPR, you may add to your Section 3 ceiling price for the sale of that particular lot, the dollar-and-cents amount by which (i) your supplier's ceiling price for that particular lot, at the point at which you receive delivery from your supplier, exceeds (ii) the highest cost to you of a customary purchase of that product in the GCPR base period (December 19, 1950 to January 25, 1951).

If you made no customary purchase during the GCPR base period, then the highest price you paid or incurred for a customary purchase during the most recent five week period prior to the base period in which you made a customary purchase shall be your highest base period cost under subdivision (ii) above.

(2) If your ceiling price was determined under either section 5, 6, or 7 of the GCPR, you may add to your ceiling price for the sale of that particular lot, the dollar-and-cent amount by which (i) your supplier's ceiling price for that particular lot at the point at which you receive delivery from your supplier exceeds (ii) the highest cost to you of a customary purchase of that product during the most recent five week period prior to the "date of calculation" of your ceiling price (as defined below).

If your ceiling price was determined under section 5 of the GCPR, the "date of calculation" of your ceiling price is the date upon which you first offer the product for delivery. If your ceiling price was determined under either section 6 or 7 of the GCPR, the "date of calculation" of your ceiling price is the date upon which you mail the report or application provided for in those sections of the GCPR.

(b) *Limitations on increases in jobber's and wholesaler's GCPR ceiling prices.* (1) If you are a jobber and you purchase a particular lot of flaxseed feed products from a wholesaler or another jobber, your ceiling price for the sale of that lot is the same as the ceiling price of your supplier.

(2) If you are a wholesaler and you purchase a particular lot of flaxseed feed products from another wholesaler, your ceiling price for the sale of that lot is the same as the ceiling price of your supplier.

SEC. 8. *Allowance for sacks and sacking.* If (a) you are a processor and you sell and deliver a lot of flaxseed feed products in sacks, or (b) you are a wholesaler or retailer and you sack any lot of a flaxseed feed product which you buy in bulk, you may add to your ceiling price for that lot in bulk, as otherwise determined under this regulation, the applicable allowance from the following table:

Type of sack used	New sacks (per ton)	Used sacks (per ton)
Cotton	$6.25	$5.25
Burlap	5.25	4.50
Paper	4.25	

SEC. 9. *Definitions*—(a) *Sellers covered by this regulation.* (1) "Processor" means a person who converts flaxseed into any of the flaxseed feed products covered by this regulation.

(2) "Distributor" means a jobber, wholesaler, car door seller or retailer.

(3) "Jobber" means, with respect to any lot, a person, other than a processor or car door seller, who sells such lot without having previously unloaded it into a warehouse or store.

(4) "Wholesaler" means, with respect to any lot:

(i) A person, other than the processor, who, after having unloaded it into a warehouse or store, sells such lot to anyone other than a feeder; or

(ii) A person, other than the processor, who does not maintain a store and who, after having unloaded it into a place of business other than a store, sells such lot to a feeder.

(5) "Car door seller" means a person other than a processor or jobber, who, with respect to any lot he has received as a carload lot or a carload shipment, resells the same to feeders in less-than-carload lots from the rail car door.

(6) "Retailer" means a person, other than the processor, who maintains a store, and who, with respect to any lot he has purchased and unloaded into that store, resells such lot to a feeder.

(b) *Products covered by this regulation.* (1) "Flaxseed feed products" means linseed oil meal, oil cake, sized cake, pellets, cubes, flaxseed screenings oil feed and linseed feed.

(2) "Linseed oil cake" means the product remaining after the commercial extraction of linseed oil from flaxseed.

(3) "Linseed oil meal" means ground linseed oil cake other than sized linseed oil cake.

(4) "Sized linseed oil cake" means ground linseed oil cake which will not pass through a ⅛-inch screen. It may include limited quantities of linseed oil meal, not in excess of 10 percent.

(5) "Linseed pellets" means the product resulting from the processing of linseed oil meal through a pelleting machine.

(6) "Linseed cubes" means the product resulting from the processing of linseed oil meal through a cubing machine.

(7) "Flaxseed screenings oil feed" means the product resulting from the grinding of oleaginous screenings (i. e., materials separated in cleaning flaxseed, such as the smaller imperfect flaxseed, weed seed, or other foreign materials having feeding value), after extracting part of the oil from such screenings either by crushing, cooking, and hydraulic or mechanical pressure or by crushing, cleaning, and the use of solvents.

(8) "Linseed feed" means a combination of linseed oil meal and either flaxseed screenings oil feed or other flaxseed by-products, or both.

(c) *Miscellaneous definitions.* (1) "Carload lot" means any quantity of 60,000 pounds or more.

(2) "Carload shipment" means any quantity which moves as a rail car shipment under the applicable railroad tariff requirements.

(3) "Feeder" means, with respect to any lot, a person who uses such lot for feeding animals or poultry.

(4) "Less-than-carload lot" means any lot of less than 60,000 pounds other than a carload shipment or a pool carlot. It includes any delivery by or into a truck.

(5) "Pool carlot" means a lot being shipped to the purchaser as part of a rail carload shipment of commodities sold by one seller to two or more persons.

(6) "Store" means a building where a regular business of selling and delivering feeds and/or grain is carried on, and where the owner or one or more of his employees works on substantially a full-time, year-round basis, in such business or in a general retail business of which such feed and grain business is a part.

(7) "Transportation cost" means:

(i) When a common carrier, contract carrier, or other carrier for hire or compensation is employed, the charges (exclusive of loading charges not customarily included in such transportation charges) which are actually incurred by the seller. This amount may include, if applicable, the three percent transportation tax.

(ii) Where the seller does his own hauling, the reasonable value of the transportation service (exclusive of loading), not exceeding the common or contract carrier rate for the same service, or any ceiling price established by the Office of Price Stabilization for such service.

(iii) When any movement involves a combination of the types of transportation included in (i) and (ii), the sum of the amounts computed separately for each portion of the movements.

(8) "New York Harbor Area," means the following points: Edgewater and Newark, New Jersey; Staten Island and Brooklyn, New York.

(9) "Texas Mill Points" means the following points in Texas: Alice, Corpus Christi, Harlingen, Houston, Kenedy, Robston, Victoria, Waco.

(10) "Unit of protein" means one percent of protein. "Each unit of protein or fraction thereof" means the number of full units, if any, plus an additional unit for any fractional unit.

Effective date. This revised supplementary regulation shall become effective July 30, 1952.

EDWARD F. PHELPS, Jr.,
Acting Director of Price Stabilization.

JULY 30, 1952.

[F. R. Doc. 52-8462; Filed, July 30, 1952; 2:00 p. m.]

[General Overriding Regulation 7, Revision 1, Amdt. 4]

GOR 7—EXEMPTIONS AND SUSPENSIONS OF CERTAIN FOOD AND RESTAURANT COMMODITIES

DECONTROL OF PROCESSED FRUITS AND VEGETABLES IN TERRITORIES AND POSSESSIONS OF THE UNITED STATES

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 4 to General Overriding Regulation 7, Revision 1, is hereby issued.

STATEMENT OF CONSIDERATIONS

General Overriding Regulation 7, Revision 1, as amended, lists certain fruits and vegetables in fresh or processed form which are exempt from price control by mandate of the Congress of the United States.

General Overriding Regulation 7 does not at present list all pertinent ceiling price regulations which apply to the territories and possessions of the United States. Carrying out the intent of Congress, this amendment is issued to include within the exemption sales of fruits and vegetables in the territories and possessions presently covered by Ceiling Price Regulations 9 and 69.

Special circumstances have made it impracticable to consult with industry representatives, including trade association representatives, before the issuance of this amendment. In the judgment of the Director of Price Stabilization, this amendment is necessary to comply with the provisions of the Defense Production Act of 1950, as amended.

AMENDATORY PROVISIONS

1. The first unnumbered paragraph of section 30 of General Overriding Regulation 7, Revision 1, is amended to read as follows:

On and after July 1, 1952, no ceiling price regulation issued by the Office of Price Stabilization shall apply to the following processed fruits and vegetables which are removed from price control in accordance with the provisions of section 402 (d) (3) of the Defense Production Act of 1950, as amended. This section applies to sales of the products listed which were heretofore subject to price control at the manufacturing or processing level under the specific ceiling price regulation listed below, the General Ceiling Price Regulation and supplementary regulations thereto, or under the Manufacturers' General Ceiling Price Regulation (CPR 22). This section also applies to all sales of the listed products at wholesale or retail governed by Ceiling Price Regulations 14, 15, or 16, the General Ceiling Price Regulation and supplementary regulations thereto. Finally, it also applies to all sales of the commodities listed below and governed by Ceiling Price Regulations 9, 31, 61, and 69.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup., 2154)

Effective date. This Amendment 4 to General Overriding Regulation 7, Revision 1, is effective July 30, 1952.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

JULY 30, 1952.

Chapter VI—National Production Authority, Department of Commerce

[NPA Order M-6A, Schedule 1 as Amended July 30, 1952]

M-6A—STEEL DISTRIBUTORS

SCHEDULE 1—EARMARKED STOCKS—AIRCRAFT QUALITY ALLOY STEEL PRODUCTS

This schedule as amended is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this schedule as amended, consultation with industry representatives has been rendered impracticable because of the need for immediate action and because the schedule affects a large number of different trades and industries.

EXPLANATORY

Schedule 1 of February 14, 1952, to NPA Order M-6A is amended by revising paragraphs (a) and (b) of section 4 are amended to relax restrictions on aircraft quality alloy steel products to the extent of permitting sales for use in military catapults, aircraft arresting gear, and for certain other programs bearing specific allotment symbols.

REGULATORY PROVISIONS

Sec.
1. What this schedule does.
2. Definitions.
3. Allotments of aircraft quality alloy steel products by producers to distributors.
4. Distributor sales.
5. Certification of orders.
6. Canadian distributor sales.
7. Communications.

AUTHORITY: Sections 1 to 7 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this schedule does.* This schedule requires steel producers to make monthly shipments of aircraft quality alloy steel products to steel distributors on the basis set out herein. It restricts sales of aircraft quality alloy steel products by steel distributors.

SEC. 2. *Definitions.* All definitions contained in NPA Order M-6A, except the definition of "base period," are applicable to this schedule. For the purposes of this schedule, "base period" means the period commencing April 1, 1951, and ending June 30, 1951.

SEC. 3. *Allotments of aircraft quality alloy steel products by producers to distributors.* Each steel producer is hereby required to accept purchase orders from his steel distributor customers for shipments of aircraft quality alloy steel products in January 1952, and in each succeeding month up to a minimum of not less than 100 percent of the base tonnage of each aircraft quality alloy steel product shipped to each steel distributor customer during the base period.

SEC. 4. *Distributor sales.* No steel distributor (except steel distributors located in the Dominion of Canada) shall deliver, nor shall any person accept delivery of, any aircraft quality alloy steel products unless:

(a) Such aircraft quality alloy steel product is required by specification and will be incorporated into aircraft, military catapults, aircraft arresting gear, guided missiles, or airborne equipment, in connection with the development, production, repair, or maintenance thereof; or

(b) Such aircraft quality alloy steel product is required under a program bearing the allotment symbol A-4, A-5, A-7, or E-2; or

(c) Such aircraft quality alloy steel product is required for use in gas turbine and aircraft-type internal combustion engines for use in naval vessels.

SEC. 5. *Certification of orders.* Any person placing an order for an aircraft quality alloy steel product with a steel distributor located in the United States shall endorse on his purchase order, or deliver with such purchase order, the following certification which shall be signed as provided in section 8 of NPA Reg. 2:

Certified under Schedule 1 to NPA Order M-6A

This certification constitutes a representation by the purchaser to the steel distributor and to NPA that the purchase order so certified calls for delivery of an aircraft quality alloy steel product to be used only as permitted in section 4 of this schedule.

SEC. 6. *Canadian distributor sales.* Sales of aircraft quality alloy steel products will be made by Canadian steel distributors pursuant to instructions issued by the Canadian Government through its Department of Defence Production.

SEC. 7. *Communications.* All communications concerning this schedule shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M-6A, Schedule 1.

This schedule as amended shall take effect July 30, 1952.

NATIONAL PRODUCTION AUTHORITY,
By JOHN B. OLVERSON,
Recording Secretary.

[F. R. Doc. 52-8456; Filed, July 30, 1952; 11:14 a. m.]

specifications will be rejected, and expenses in connection therewith will be borne by the seller.

SEC. 5. *Duration of the Program.* This Program shall terminate and be of no further force or effect when six million (6,000,000) contained long ton units of manganese have been delivered to the depots and accepted by the Government under this Program, or at the close of business June 30, 1956, whichever first occurs.

SEC. 6. *Price schedule for ore.* Payment for manganese ore delivered f. o. b. depot shall be made on the basis of the following table:

Percent of manganese in ore	To be paid for 1 long dry ton delivered f. o. b. depot, Phillipsburg	To be paid for 1 long dry ton delivered f. o. b. depot, Butte
12		$6.95
13		7.39
14		11.16
15	$6.42	11.43
16	10.75	11.43
17	12.79	19.04
18	15.03	21.46
19	17.32	25.21
20	20.50	26.80
21	21.73	28.41
22	21.73	30.17
23	24.33	31.75
24	25.95	33.54
25	27.56	35.46
26	29.18	37.11
27	30.79	38.75
28	32.41	40.42
29	34.03	42.07
30	35.64	43.73
31	37.26	45.39
32	38.87	47.04
33	40.49	48.70
34	42.11	50.35
35	43.72	51.99
36	45.34	53.64
37	46.95	55.29
38	48.57	56.95
39	50.18	58.60
40	51.80	60.25

The following premiums and penalties will be paid:

(a) For each 1 percent of iron as oxide in excess of 3 percent, a penalty of ½ of 1 percent manganese shall be imposed.

(b) For each 1 percent of calcium oxide plus magnesium oxide in excess of 9 percent, a penalty of 1 percent manganese shall be imposed.

(c) A credit of 0.25 percent manganese shall be allowed for each 1 percent of calcium oxide plus magnesium oxide below 7 percent, provided, this credit does not apply to Butte ore containing more than 15 percent manganese. In addition, payment for any gold, silver, lead, or zinc contained in the manganese ore shall be made on the basis of the following tables:

GOLD

No pay if 0.03 ounce or less (per short dry ton).
0.031 ounce to 0.05 ounce—pay for 20 percent at $30 per ounce.
0.051 ounce to 0.10 ounce—pay for 30 percent at $30 per ounce.
0.101 ounce to 0.15 ounce—pay for 40 percent at $30 per ounce.
0.151 ounce to 0.20 ounce—pay for 50 percent at $30 per ounce.
0.201 ounce to 0.25 ounce—pay for 60 percent at $30 per ounce.

SILVER

No pay if 2.0 ounces or less (per short dry ton).
2.1 ounces to 5.0 ounces—pay for 30 percent at market price.
5.1 ounces to 7.5 ounces—pay for 45 percent at market price.
7.6 ounces to 10.0 ounces—pay for 60 percent at market price.
Over 10.1 ounces—pay for 60 percent at market price.

LEAD

No pay if 1.0 percent or less (per short dry ton).
1.1 percent to 2.0 percent—pay for 40 percent at market less 2 cents.
2.1 percent to 3.0 percent—pay for 45 percent at market less 2 cents.
3.1 to 4.0 percent—pay for 50 percent at market less 2 cents.
4.1 percent to 5.0 percent—pay for 55 percent at market less 2 cents.
5.1 percent and over—pay for 60 percent at market less 2 cents.

NOTE: Payments shall be made only for lead occurring as sulfide. Oxide lead content shall be deducted from total lead content to determine sulfide lead content. Should oxide lead content exceed one-third of total lead content, no lead payment shall be made.

ZINC

No pay if 1 percent or less (per short dry ton).
1.1 percent to 2.0 percent—pay for 30 percent at ½ market price.
2.1 percent to 3.0 percent—pay for 35 percent at ½ market price.
3.1 percent to 4.0 percent—pay for 40 percent at ½ market price.
4.1 percent to 5.0 percent—pay for 45 percent at ½ market price.
5.1 percent and over—pay for 50 percent at ½ market price.

NOTE: Oxide zinc content shall be deducted from total zinc content to determine sulfide zinc content. Should oxide zinc content be 10 percent or more of total, no zinc payment shall be made.

(b) "Program" means the purchase of manganese ore as set forth in this regulation.

(c) "Depot" means the purchase depots of the Government at Butte, Montana and at Philipsburg, Montana.

(d) "Manganese ore" means crude ore from production of ore containing not less than 90 percent of the manganese as carbonate, mined in the United States, its Territories and possessions.

(e) "Long ton unit of manganese" means 22.4 pounds of manganese contained in a long dry ton of manganese ore.

SEC. 3. *Participation in the Program.* Subject to the last sentence of this section, any person may participate in the Program by notice given to the General Services Administration, Regional Office, Federal Office Building, Seattle 4, Washington, in the form of a letter, postcard or telegram postmarked or dated by the telegraph office not later than June 30, 1953. Such notice shall state that the writer desires to participate in the Program and will deliver manganese ore to either or both of the depots, giving the estimated monthly rate of delivery. Such notice must be signed and a return address given. Any person participating in the Program will promptly be sent a certificate authorizing him to deliver manganese ore meeting minimum specifications. Since the purpose of the Program is to obtain from marginal or submarginal sources manganese ore which would not otherwise be produced, the Government reserves the right to exclude presently established production of manganese ore from participation in the Program.

SEC. 4. *Deliveries.* Manganese ore to be purchased by the Government under this Program is to be delivered f. o. b. depot. Ore produced in Granite, Powell, and Ravalli Counties is to be delivered f. o. b. depot, Philipsburg, Montana, and will be paid for on on that basis, as provided in section 6 of this regulation. Delivery of less than five (5) long tons of ore at one time will not be accepted. Participants in the Program must give the Government reasonable notice with respect to deliveries of ore. Each delivery will be sampled by the Government and payment will be made in accordance with the analysis of such sample, as provided in section 6. Deliveries not conforming to the minimum

Chapter XIV—General Services Administration

[Revision 1]

MANGANESE REGULATION: PURCHASE PROGRAM FOR DOMESTIC MANGANESE ORE AT BUTTE AND PHILIPSBURG, MONTANA

This regulation, as revised, extends the time within which persons may give notice to the Government of their desire to participate in this purchase program and participate in the previous regulation, incorporates the previous regulation, dated July 19, 1951, and Amendments 1, dated November 7, 1951, and 2, dated May 19, 1952, thereto. This regulation, as revised, reads as follows:

Sec.
1. Basis and purpose.
2. Definitions.
3. Participation in the Program.
4. Deliveries.
5. Duration of the Program.
6. Price schedule for ore.

AUTHORITY: Sections 1 to 6 issued under sec. 704, 64 Stat. 816, as amended, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Supp., 2154. Interpret or apply sec. 303, 64 Stat. 801, as amended, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Supp., 2093; E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789.

SECTION 1. *Basis and purpose.* This regulation interprets and implements the authority of the Administrator of General Services to purchase manganese ore of domestic origin at Butte, Montana, and at Philipsburg, Montana, for the fiscal years 1952–56, as authorized by the Defense Production Administration on June 27, 1951, and outlines the attendant responsibilities and functions of the Administrator of General Services in purchasing such manganese ore for the Government, pursuant to delegation of authority from the Defense Materials Procurement Administrator, dated September 14, 1951. In accordance with the Program set forth in this regulation, the Administrator will buy domestically produced manganese ore. Such ore shall contain not less than 15 percent manganese in the case of manganese ore delivered at Philipsburg, or 12 percent in the case of manganese ore delivered at Butte, in accordance with the specifications contained in this regulation.

SEC. 2. *Definitions.* As used in this regulation:

(a) "Administrator" means the Administrator of General Services.

[F. R. Doc. 52-8412; Filed July 30, 1952; 8:55 a. m.]

Dated: July 25, 1952.

JESS LARSON,
Administrator.

TITLE 50—WILDLIFE

Chapter I—Fish and Wildlife Service, Department of the Interior

Subchapter B—Hunting and Possession of Wildlife

PART 6—MIGRATORY BIRDS AND CERTAIN GAME MAMMALS

Basis and purposes. Section 3 of the Migratory Bird Treaty Act of July 3, 1918, as amended (40 Stat. 755, 16 U. S. C. 704) authorizes and directs the Secretary of the Interior, from time to time, having due regard for the zones of temperature and to the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory birds to determine when, to what extent, and by what means, such birds, or any part, nest or egg thereof, may be taken, captured, killed, possessed, sold, purchased, shipped, carried, or transported.

On April 8, 1952, the public was invited to participate in the preparation of these regulations by submitting their views, data, or arguments, in writing to Albert M. Day, Director, Fish and Wildlife Service, Washington 25, D. C., on or before July 7, 1952 (17 F. R. 3355). Careful consideration has been given to the views, data and arguments received and the results of studies and investigations by personnel of the Fish and Wildlife Service and State agencies. Accordingly, it has been determined that amendments to the regulations should be issued at this time which include the establishment of seasons, bag and possession limits on those migratory birds for which seasons are to open on or about September 1, the means by which these and other migratory game birds may be taken and the revocation of certain permits. In order to give sufficient time to evaluate the results of nesting studies and late spring surveys, the regulations will be supplemented not later than September 1 to fix the seasons for migratory waterfowl, coot and woodcock not opening before October 1 and establish bag and possession limits for such birds.

After due consideration of all relevant material submitted to the said Service pursuant to notice, and under authority of said statutory provision, the regulations under the Migratory Bird Treaty Act are amended as follows:

1. Section 6.4 (b) is amended to read as follows:

(b) Waterfowl, coot, gallinules, doves, and pigeons may not be taken within one-half mile of any place where salt, or shelled, shucked, or unshucked corn, wheat, or other grains, or other feed of similar use in attracting such birds is placed, exposed, deposited, distributed, scattered, or present at any time during or within two weeks prior to the open season on such birds. In addition, such birds may not be taken under any circumstances by the aid of salt, or shelled, shucked, or unshucked corn, wheat, or other grains, or other feed similarly used to lure, attract, or entice such birds, to, on, or over the area where hunters are attempting to take them. Nothing in this section shall be construed to apply to propagating, scientific, or other operations in accordance with the terms of permits issued pursuant to this part, or to the taking of birds over properly shocked corn, standing crops (including aquatics), or grains found scattered solely as a result of normal agricultural harvesting.

2. The schedules designated as subparagraphs (1), (2), (3) and (4) in § 6.4 (e) are amended to read as follows:

(1) *Atlantic Flyway States:*

	Rails and gallinules [1]		Mourning or turtle dove
	Sora	Others	
Daily bag limits	25	[2] 15	8
Possession limits	25	[2] 15	8
Seasons in: [3]			
Connecticut [4]	Sept. 1-Oct. 15		
Delaware [5]	Sept. 1-Oct. 30		Oct. 1-Oct. 30.
Florida [6]	Sept. 15-Nov. 13 [6]		Oct. 1-Oct. 15 and Dec. 15-Dec 29.
Georgia [7]	Sept. 15-Nov. 13		Sept. 15-Sept. 29 and Dec. 25-Jan. 8.
Maine [8]			
Maryland [9]	Sept. 15-Oct. 29		Sept. 15-Sept. 29 and Nov. 15-Nov. 29.
Massachusetts [4]	Oct. 29-Oct. 30 [10]		
New Hampshire [4]	Sept. 1-Oct. 30		
New Jersey	Sept. 1-Oct. 30		
New York [4]			
North Carolina [5]	Sept. 1-Oct. 30		Oct. 1-Oct. 15 and Dec. 27-Jan. 10.
Pennsylvania [5]	Sept. 1-Oct. 30		Sept. 15-Oct. 14.
Rhode Island [4]	Sept. 1-Oct. 30		
South Carolina [11]	Oct. 1-Nov. 29		Sept. 15-Sept. 29 and Dec. 27-Jan. 10.
Vermont	Sept. 1-Oct. 30		
Virginia [5]	Sept. 1-Oct. 30		Sept. 16-Sept. 30 and Oct. 17-Oct. 31.
West Virginia	Sept. 1-Oct. 30		
Puerto Rico	Dec. 15-Feb. 12		

[1] Rails and gallinules: When permitted to be taken during the waterfowl season they may not be hunted after 1 hour before sunset.
[2] Not more than 15 in the aggregate of rails (other than sora) and gallinules.
[3] No open season in District of Columbia but migratory game birds may be possessed therein in accordance with § 6.6 (e).
[4] Scoter, eider and old-squaw ducks may be taken in open coastal waters only, beyond outer harbor lines, in Maine, Massachusetts, New Hampshire and New York from Sept. 28 to Dec. 31, inclusive, in Connecticut from Oct. 17 to Dec. 31, inclusive, and in Rhode Island from Sept. 28 to Jan. 5, inclusive. In areas other than those beyond outer harbor lines such birds may be taken during the open seasons for other ducks. In these States only, the daily bag limit is 7 scoter, eider or old-squaw ducks singly or in the aggregate, and not exceeding 14 in possession singly or in the aggregate.
[5] Shooting hours for mourning doves in States indicated—12 o'clock noon until sunset.
[6] Florida: Rails (including sora) and gallinules, daily bag and possession limit 15, singly or in aggregate of 58 kinds.
[7] Massachusetts: Starting hour for rails and gallinules on first day of season 12 noon.

NOTE: The seasons for hunting rails and gallinules in Maine and New York will conform to the waterfowl season dates to be prescribed in August.

(2) *Mississippi Flyway States:*

	Rails and gallinules [1]		Mourning or turtle dove
	Sora	Others	
Daily bag limits	25	[2] 15	8
Possession limits	25	[2] 15	8
Seasons in:			
Alabama [3]			Oct. 17-Oct. 31 and Dec. 27-Jan. 10.
Arkansas [3]	Sept. 1-Oct. 30		Sept. 15-Oct. 14.
Illinois [3]	Sept. 1-Oct. 30		Sept. 1-Sept. 30.
Indiana	Sept. 1-Oct. 30		
Iowa			
Kentucky [3]	Sept. 1-Oct. 30		Sept. 1-Sept. 30.
Louisiana [4]	Oct. 1-Nov. 30		Dec. 12-Jan. 10.
Michigan			
Minnesota	Sept. 16-Nov. 14		
Mississippi [3]	Oct. 15-Dec. 13		Oct. 15-Oct. 24 and Dec. 27-Jan. 10.
Missouri [3]	Sept. 1-Oct. 30		Sept. 1-Sept. 30.
Ohio	Sept. 1-Oct. 30		
Tennessee [3]			Sept. 15-Sept. 29 and Oct. 16-Oct. 30.
Wisconsin			

[1] Rails and Gallinules: When permitted to be taken during the waterfowl season they may not be hunted after 1 hour before sunset.
[2] Not more than 15 in the aggregate of rails (other than sora) and gallinules.
[3] Shooting hours for mourning doves in States indicated—12 o'clock noon until sunset.

NOTE: Rails and gallinules: The season for hunting these birds in Alabama, Michigan, and Wisconsin will conform to the waterfowl season dates to be prescribed during August. In Wisconsin hunting on the opening day will start at 1 p. m.

(3) *Central Flyway States:*

	Rails and gallinules [1]		Mourning or turtle dove	
	Sora	Others		
Daily bag limits	25	[2] 15		10
Possession limits	25	[2] 15		10
Seasons in:				
Colorado	Sept. 1-Oct. 30		Sept. 1-Oct. 12.	
Kansas			Sept. 1-Sept. 30.	
Montana	Sept. 1-Oct. 30		Sept. 1-Sept. 30.	
Nebraska			Sept. 1-Oct. 12.[3]	
New Mexico	Sept. 1-Oct. 30			
North Dakota			Sept. 1-Sept. 30.	
Oklahoma	Sept. 1-Oct. 30			
South Dakota	Sept. 1-Oct. 30		See footnotes 4, 5.	
Texas	Sept. 1-Oct. 30			
Wyoming				

[1] Rails and gallinules: When permitted to be taken during the waterfowl season they may not be hunted after 1 hour before sunset.

[2] Not more than 15 in the aggregate of rails (other than sora) and gallinules.

[3] New Mexico: Shooting hours for mourning doves on first day of season, 12 noon until sunset; thereafter from sunrise to sunset.

[4] Texas: Mourning doves in Val Verde, Kinney, Uvalde, Medina, Bexar, Comal, Hays, Travis, Williamson, Milam, Robertson, Leon, Houston, Cherokee, Nacogdoches, and Shelby Counties and all counties north and west thereof, Sept. 1 to Oct. 10 from 12 noon until sunset; in the rest of State (but not including Cameron, Hidalgo, Starr, Zapata, Webb, Maverick, Dimmit, La Salle, Jim Hogg, Brooks, Kenedy, and Willacy Counties), Oct. 1 to Nov. 9, from 12 noon until sunset; in these latter counties Sept. 12, 14, and 16 from 4 p. m. until sunset and from Oct. 1 to Nov. 6 from 12 noon until sunset.

[5] Texas: White-winged doves in Cameron, Hidalgo, Starr, Zapata, Webb, Maverick, Kinney, Dimmit, La Salle, Jim Hogg, Brooks, Kenedy, Willacy, Val Verde, Terrell, Brewster, Presidio, Jeff Davis, Culberson, Hudspeth and El Paso Counties, Sept. 12, 14, and 16 from 4 p. m. until sunset; daily bag and possession limit for white-winged or mourning doves is not more than 10 singly or in the aggregate of both kinds; no open season in rest of State.

NOTE: The season for hunting rails and gallinules in New Mexico will conform to the waterfowl season dates to be prescribed during August.

(4) *Pacific Flyway States:*

	Rails and gallinules [1]		Mourning or turtle dove	Band-tailed pigeons
	Sora	Others		
Daily bag limits	25	[2] 15	[2] 10	6
Possession limits	25	[2] 15	[2] 10	6
Seasons in:				
Arizona [3]	Sept. 1-Oct. 30		Sept. 1-Sept. 30.	
California [4]			Sept. 1-Sept. 30.	Sept. 16-Sept. 30 and Dec. 17-Dec 31.
			(4)	
Idaho			Sept. 1-Sept. 30.	
Nevada			Sept. 1-Sept. 15.	Sept. 1-Sept. 30.
Oregon	Sept. 1-Oct. 30		Sept. 1-Sept. 10.	
Utah			Sept. 1-Sept. 15.	Sept. 1-Sept. 30.
Washington				
Alaska [5]				

[1] Rails and gallinules: When permitted to be taken during the waterfowl season they may not be hunted after 1 hour before sunset.

[2] Not more than 15 in the aggregate of rails (other than sora) and gallinules.

[3] White-winged dove in Arizona Sept. 1 to Sept. 15, and in Imperial County, California, Sept. 1 to Sept. 30. The daily bag and possession limit for white-winged or mourning doves is not more than 10 singly or in the aggregate of both kinds.

[4] Idaho: Mourning doves, no open season in Boundary, Bonner, Benewah, Shoshone, Kootenai, Latah, Clearwater, Nez Perce, Lewis, Idaho, Bear Lake, Caribou, and Teton Counties; in rest of State, Sept. 1 to Sept. 15.

[5] Alaska: Ducks, geese, brant, and coot. In the First Judicial Division and the Kodiak-Afognak Island group and Fourth Judicial Divisions Sept. 20 to Nov. 13. In the Second, Third (except Kodiak-Afognak Island group) and Fourth Judicial Divisions Sept. 1 to Oct. 25; provided that scoter, elder and merganser ducks also may be taken in the Third Judicial Division west of 152° west longitude from Sept. 7 to Dec. 21, and in the Second and Fourth Judicial Divisions from Sept. 1 to Dec. 15. The daily bag limit for scoters and elders is 10 singly or in the aggregate of all kinds and the possession limit is not more than 20 singly or in the aggregate. The daily bag limit for American and red-breasted mergansers is 25 singly or in the aggregate of both kinds with no possession limit after the first day of the season. Limits for other ducks not over 5 a day, 10 in possession. Other limits: coot 15 a day, 15 in possession; brant 3 a day, 3 in possession; and geese 3 a day, 6 in possession of one kind or in the aggregate of all kinds.

3. Section 6.8 (d) is amended to read as follows:

(d) *Transfer and revocation.* No permit issued under this part shall be transferable. Any permits heretofore or hereafter issued under authority of the Migratory Bird Treaty Act Regulations may be terminated by the Director for violation of said regulations or failure to comply with the terms and conditions of the permit.

(40 Stat. 755; 16 U. S. C. 704)

These amendments shall become effective on September 1, 1952.

Dated: July 25, 1952.

MASTIN G. WHITE,
Acting Secretary of the Interior.

[F. R. Doc. 52-8345; Filed, July 29, 1952; 9:10 a. m.]

TITLE 36—PARKS, FORESTS, AND MEMORIALS

Chapter I—National Park Service, Department of the Interior

PART 1—GENERAL RULES AND REGULATIONS

PART 20—SPECIAL REGULATIONS

MISCELLANEOUS AMENDMENTS

1. Paragraph (a) of § 1.63, entitled *Intoxicating liquors*, is amended to read as follows:

§ 1.63 *Intoxicating liquors.* (a) In Big Bend, Crater Lake, Everglades, Glacier, Great Smoky Mountains, Hawaii, Hot Springs, Isle Royale, Lassen Volcanic, Mammoth Cave, Mesa Verde, Mount McKinley, Mount Rainier, Olympic, Platt, Rocky Mountain, Shenandoah, Sequoia and Kings Canyon, Yellowstone, and Yosemite National Parks, no alcoholic, spirituous, vinous, or fermented liquor, containing more than one percent of alcohol by weight, shall be sold on federally-owned lands unless a permit for the sale thereof has first been procured from the appropriate regional director.

2. Paragraph (b), entitled *Fishing, limit of catch and in possession*, of § 20.44, entitled *Mount McKinley National Park, Alaska*, is redesignated as paragraph (c).

3. Paragraph (c), entitled *Surface use of mineral land locations*, of § 20.44, entitled *Mount McKinley National Park, Alaska*, is redesignated as paragraph (b).

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

Issued this 24th day of July 1952.

MASTIN G. WHITE,
Acting Secretary of the Interior.

[F. R. Doc. 52-8350; Filed July 30, 1952; 8:47 a. m.]

PART 2—GENERAL RULES AND REGULATIONS; NATIONAL RECREATIONAL AREAS

MISCELLANEOUS AMENDMENTS

1. Part 2 is amended by striking from the title and sections thereof the word "Recreational" wherever it appears therein, and substituting in lieu thereof the word "Recreation".

2. Paragraph (a) of § 2.1 *General provisions*, is amended by adding a new subparagraph numbered (4) and reading as follows:

(4) Shadow Mountain National Recreation Area, Colorado, administered by the National Park Service, Department of the Interior, in cooperation with the Bureau of Reclamation, Department of the Interior, as detailed in a memorandum of agreement between the two agencies, approved June 27, 1952.

3. Paragraph (f) of § 2.2 *Definitions*, is amended by adding a new subparagraph numbered (4) and reading as follows:

(4) The term "Shadow Mountain National Recreation Area" means the property owned by the United States, including the water surface of Granby Reservoir and Shadow Mountain Lake, within that portion of the Colorado-Big Thompson Project which is administered by the National Park Service pursuant to a memorandum of understanding between the National Park Service and the Bureau of Reclamation, as shown by Drawing No. RS/SMGR-7100 B, dated April 18, 1951, attached to the memorandum of understanding as "Exhibit A,"[1] a copy of which shall be filed with the regulations in this part with the Division of the Federal Register, and a copy of which shall be kept in the office of the Superintendent for public inspection.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

Issued this 24th day of July 1952.

MASTIN G. WHITE,
Acting Secretary of the Interior.

[F. R. Doc. 52-8349; Filed, July 30, 1952; 8:47 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[7 CFR Part 51]

INSPECTION, CERTIFICATION, AND STANDARDS FOR FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS

U. S. STANDARDS FOR FLORIDA TANGERINES

Notice is hereby given that the United States Department of Agriculture is considering the issuance of proposed separate United States Standards for Florida Tangerines. This action is being taken pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1953 (Pub. Law 451, 82d Cong., approved July 5, 1952).

All persons who desire to submit written data, views or arguments for consideration in connection with the proposed standards should file the same with M. W. Baker, Deputy Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, South Building, Washington 25, D. C., not later than 5:30 p. m., e. s. t., on the thirtieth (30) day after the date of publication of this notice in the FEDERAL REGISTER.

The proposed standards are as follows:

§ 51.417 *Standards for Florida Tangerines*—(a) *Grades*—(1) *U. S. Fancy.* U. S. Fancy consists of tangerines which are mature, firm, and well formed, and which are free from soft bruises, bird pecks, unhealed skin-breaks, and decay, and free from damage caused by ammoniation, creasing, dryness, or mushy condition, green spots or oil spots, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, buckskin, melanose, scars, scab, dirt or other foreign materials, disease, insects, or mechanical or other means.

(i) Each fruit in this grade shall be reasonably well colored.

(ii) In this grade not more than two-thirds of the fruit surface, in the aggregate, may be affected with light brown discoloration, or may have the equivalent of this amount in appearance when the fruit has lighter or darker shades of discoloration. (See tolerances for defects, paragraph (c) (1) of this section.)

(2) *U. S. No. 1.* U. S. No. 1 consists of tangerines which are mature, firm, and well formed, and which are free from soft bruises, bird pecks, unhealed skin-breaks, and decay, and free from damage caused by ammoniation, creasing, dryness or mushy condition, green spots or oil spots, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, buckskin, melanose, scars, scab, dirt or other foreign materials, disease, insects, or mechanical or other means.

(i) Each fruit in this grade shall be fairly well colored.

(ii) In this grade not more than one-third of the fruit surface, in the aggregate, may have a light shade of brown discoloration caused by rust mite, or an equivalent of this amount in appearance when the fruit is discolored by any cause. (See tolerances for defects, paragraph (c) (1) of this section.)

(3) *U. S. No. 1 Bronze.* The requirements for this grade are the same as for U. S. No. 1 except for discoloration. In this grade at least 75 percent, by count, of the fruits shall show some discoloration, and more than 20 percent, by count, of the fruits shall have more than one-third of their surface affected with bronzed russeting: *Provided*, That no discoloration that exceeds the amount allowed in the U. S. No. 1 grade shall be permitted unless such discoloration is caused by thrip, wind scars, or rust mite. (See tolerances for defects, paragraph (c) (1) of this section.)

(4) *U. S. No. 1 Russet.* The requirements for this grade are the same as for U. S. No. 1 except for discoloration. In this grade at least 75 percent, by count, of the fruits shall show some discoloration, and more than 20 percent, by count, of the fruits shall have more than one-third of their surface affected with discoloration. (See tolerances for defects, paragraph (c) (1) of this section.)

(5) *U. S. No. 2.* U. S. No. 2 consists of tangerines which are mature, fairly firm, and fairly well formed, and which are free from soft bruises, bird pecks, unhealed skin-breaks, and decay, and free from serious damage caused by ammoniation, creasing, dryness or mushy condition, green spots or oil spots, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, buckskin, melanose, scars, scab, dirt or other foreign materials, disease, insects, or mechanical or other means.

(i) Each fruit in this grade shall be reasonably well colored.

(ii) In this grade not more than two-thirds of the fruit surface, in the aggregate, may be affected with light brown discoloration, or may have the equivalent of this amount in appearance when the fruit has lighter or darker shades of discoloration. (See tolerances for defects, paragraph (c) (1) of this section.)

(6) *U. S. No. 2 Russet.* The requirements for this grade are the same as for U. S. No. 2 except that more than 20 percent, by count, of the fruits shall have in excess of two-thirds of their surface, in the aggregate, affected with light brown discoloration. (See tolerances for defects, paragraph (c) (1) of this section.)

(7) *U. S. No. 3.* U. S. No. 3 consists of tangerines which are mature, not flabby and not seriously lumpy, and which are free from unhealed bird pecks, unhealed skin-breaks, and decay, and free from very serious damage caused by bruises, ammoniation, creasing, dryness or mushy conditions, pitting, scale, sprouting, sprayburn, sunburn, unsightly discoloration, melanose, scars, scab, dirt or other foreign materials, disease, insects, or mechanical or other means. (See tolerances for defects, paragraph (c) (2) of this section.)

(b) *Unclassified.* Unclassified consists of tangerines which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

(c) *Tolerances.* In order to allow for variations incident to proper grading and handling in each of the foregoing grades, the following tolerances are provided as specified:

(1) *U. S. Fancy, U. S. No. 1, U. S. No. 1 Bronze, U. S. No. 1 Russet, U. S. No. 2 and U. S. No. 2 Russet.* Not more than a toal of 10 percent, by count, of the fruits in any lot may fail to meet the requirements of the grade other than for discoloration, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage other than that caused by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. In addition, not more than a total of 10 percent, by count, of the fruits in any lot may not meet the requirements relating to discoloration but not more than 2 percent shall be allowed for serious damage by unsightly discoloration.

(2) *U. S. No. 3.* Not more than a total of 15 percent by count, of the fruits in any lot may fail to meet the requirements of this grade, but not more than one-third of this amount, or 5 percent, shall be allowed for defects other than that caused by dryness or mushy condition, and not more than one-fifteenth of the tolerance, or 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2 percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination.

(d) *Application of tolerances to individual packages.* (1) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(i) For packages which contain more than 10 pounds and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 10 pounds and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one decayed or very seriously damaged fruit may be permitted in any package.

(ii) For packages which contain 10 pounds or less, individual packages in any lot are not restricted as to the percentage of defects, except that not more than one fruit which is decayed or very

seriously damaged shall be allowed in any package.

(e) *Standard pack.* (1) The tangerines in each container shall be packed in accordance with recognized methods. Each container shall be well filled and properly marked to indicate the size of the fruit. When the figures used to indicate size of fruit vary from the actual number of tangerines in the container, as in the case of fractional parts of boxes, the figures indicating size shall be followed by the letter "s" or the word "size", as, for example, "210's", or "210 size." Containers which are not so marked shall not be regarded as meeting requirements of "standard pack."

(i) Fruit in each container shall be of a size not less than the minimum diameters specified in Table I for the various packs. Packs other than those listed shall have a minimum diameter not less than that specified for the nearest count.

TABLE I

[Diameter in inches]

Pack:	Minimum
100	$2\frac{15}{16}$
120	$2\frac{11}{16}$
150	$2\frac{5}{16}$
176	$2\frac{9}{16}$
210	$2\frac{1}{16}$
246	$2\frac{3}{16}$
294	2

(ii) In order to allow for variations incident to proper sizing, not more than 10 percent, by count, of the fruits in any lot may be below the minimum size for the count as specified in Table I of this paragraph.

(f) *Definitions.* (1) "Mature" means the same as that term is set forth for tangerines in §§ 601.21 and 601.22 chapter 26492, Florida Statutes, known as the Florida Citrus Code of 1949.

(2) "Firm" means that the flesh is not soft and the fruit is not badly puffy, and that the skin has not become materially separated from the flesh of the tangerine.

(3) "Well formed" means that the fruit has the characteristic tangerine shape and is not deformed.

(4) "Damage" means any defect which more than slightly affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(i) Ammoniation, when it is not speck-type similar to melanose, provided that no ammoniation shall be permitted that detracts from the appearance of the individual fruit to a greater extent than the amount of discoloration allowed for the grade:

(ii) Creasing, when it materially affects the appearance of shipping quality of the fruit;

(iii) Dryness or mushy condition, when mushy or distinctly dry to a depth of more than one-eighth inch in all segments at the stem end, or the equivalent of this amount, by volume, of mushy condition or dryness when occurring in any portion of the fruit;

(iv) Green spots or oil spots, when the appearance is affected to a greater extent than 10 green spots caused by scale, each of which is equivalent to the area of a circle one-eighth inch in diameter;

(v) Pitting, when materially affecting the appearance or shipping quality of the individual fruit;

(vi) Scale, when occurring as a blotch and the aggregate area exceeds the area of a circle three-eighths inch in diameter, or any scale that detracts from the appearance of the individual fruit to a greater extent than the area permitted for a blotch. "Blotch" refers to actual scale and not the discolored area caused by scale;

(vii) Sprayburn, when causing the skin to become hard or when it materially affects the appearance of the fruit;

(viii) Sunburn, when causing the skin to become hard or when it materially affects the appearance of the fruit;

(ix) Unsightly discoloration, when the color or the pattern, or a combination of color and pattern, causes the fruit to have an unattractive appearance;

(x) Buckskin, when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade;

(xi) Melanose, when not small smooth speck-type, or any speck-type that detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade. Melanose that exceeds the amount allowed in the U. S. No. 1 grade is not permitted in the U. S. No. 1 Bronze grade;

(xii) Scars, when not smooth, or when causing any noticeable depression, or when detracting from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade; and,

(xiii) Scab, when not smooth, or when it affects shape, or when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade. Scab injury that exceeds the amount allowed in the U. S. No. 1 grade is not permitted in the U. S. No. 1 Bronze grade.

(5) "Highly colored" means that the ground color of each fruit is a deep tangerine color with practically no trace of yellow color.

(6) "Discoloration" includes discoloration caused by rust mite, melanose, scars, scab, or any other means. Shades of discoloration which blend with the ground color of the fruit may be allowed on a larger area than that specified in the grade for light brown discoloration, and shades of discoloration which are more in contrast with the ground color shall be restricted to a lesser area, provided no discoloration may affect the appearance to a greater extent than the amount of light brown discoloration specified for the grade. Tangerines which show discoloration caused by melanose, scab, or any cause other than by thrip, wind scars, or by rust mite shall not be permitted in the U. S. No. 1 Bronze grade when such discoloration exceeds the amount allowed in the U. S. No. 1 grade. (See definition, "Bronzed Russeting", subparagraph (8) of this paragraph.)

(7) "Fairly well colored" means that the fruit may have green color which does not exceed the aggregate area of a circle 1 inch in diameter and that the remainder of the surface shows a good tangerine color with some portion of the surface showing a reddish tangerine blush.

(8) "Bronzed russeting" means russeting caused by thrip, wind scars, or by rust mite, or similar russeting which is not readily distinguishable from that caused by rust mite. Discoloration caused by melanose, scab, etc. are not considered as "bronzed russeting" within the meaning of these standards but are regarded as defects when they exceed the amounts permitted in the U. S. No. 1 grade and are not permitted in the U. S. No. 1 Bronze grade.

(9) "Fairly firm" means that the flesh may be slightly soft but is not bruised or badly puffy, and that the skin has not become seriously separated from the flesh of the tangerine.

(10) "Fairly well formed" means that the fruit may not have the shape characteristic of the variety but that it is not badly deformed.

(11) "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(i) Ammoniation, when scars are cracked, or when dark and the aggregate area exceeds the area of a circle one-half inch in diameter, or when light colored and the aggregate area exceeds the area of a circle 1 inch in diameter;

(ii) Creasing, when it causes the skin to be seriously weakened;

(iii) Dryness or mushy conditions, when mushy or distinctly dry to a depth of more than one-fourth inch in all segments at the stem end, or the equivalent of this amount, by volume, of mushy condition or dryness when occurring in any portion of the fruit;

(iv) Green spots or oil spots, when the appearance is affected to a greater extent than 25 green spots, caused by scale, each of which is equivalent to the area of a circle one-eighth inch in diameter;

(v) Pitting, when seriously affecting the appearance or shipping quality of the fruit;

(vi) Scale, when occurring as a blotch and the aggregate area exceeds the area of a circle one-half inch in diameter, or any scale that detracts from the appearance of the fruit to a greater extent than the area permitted for a blotch. "Blotch" refers to actual scale and not the discoloration caused by scale;

(vii) Sprayburn, when it has caused the skin to become hard, or when it seriously affects the appearance of the fruit;

(viii) Sunburn, when it has caused the skin to become hard, or when it seriously affects the appearance of the fruit;

(ix) Unsightly discoloration, when the color or the pattern, or a combination of both, causes the fruit to have a distinctly unattractive appearance;

(x) Buckskin, when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade;

(xi) Melanose, when badly caked and the aggregate area exceeds the area of a circle one-half inch in diameter, or when lightly caked and the aggregate area exceeds the area of a circle 1 inch in diameter, or when unsightly, or when it detracts from the appearance of the fruit to a greater extent than the amount of discoloration allowed for the grade;

(xii) Scars, when not fairly smooth, or when causing any materially depressed areas, or when detracting from the appearance to a greater extent than the amount of discoloration allowed for the grade. Scars which are not fairly smooth, or which are materially depressed, are not permitted in either U. S. No. 2 or U. S. No. 2 Russet grades; and,

(xiii) Scab, when not fairly smooth, or when it materially affects the shape of the fruit, or when it detracts from the appearance to a greater extent than the maximum amount of discoloration allowed for the grade.

(12) "Reasonably well colored" means that a good yellow or reddish tangerine color shall predominate over the green color on at least one-half of the fruit surface in the aggregate, and that each fruit shall show practically no lemon color.

(13) "Very serious damage" means any defect which very seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as very serious damage:

(i) Ammoniation, when scars are badly cracked, or when dark and the aggregate area exceeds the area of a circle 1 inch in diameter, or when light colored and it detracts from the appearance of the fruit to a greater extent than the area permitted for dark ammoniation:

(ii) Creasing, when causing the skin to be seriously weakened:

(iii) Dryness or mushy condition, when mushy or distinctly dry to a depth of more than one-fourth inch in all segments at the stem end, or the equivalent of this amount, by volume, of mushy condition or dryness when occurring in any portion of the fruit;

(iv) Pitting, when it very seriously affects the appearance or the shipping quality of the fruit;

(v) Scale, when it very seriously affects the appearance of the fruit;

(vi) Sprayburn, when it very seriously affects the appearance of the fruit;

(vii) Sunburn, when it very seriously affects the appearance of the fruit;

(viii) Unsightly discoloration, when the fruit has a very objectionable appearance caused by any means. The color or the pattern of the discoloration, or a combination of both, or a combination of defects may cause the fruit to have a very unsightly appearance;

(ix) Melanose, when caked to the extent that the appearance of the fruit is very seriously affected;

(x) Scars, when so deep, rough, or unsightly that the appearance of the fruit is very seriously injured; and,

(xi) Scab, when it causes the fruit to be very seriously injured.

(14) "Diameter" means the greatest dimension measured at right angles to a line from stem to blossom end of the fruit.

Done at Washington, D. C., this 25th day of July 1952.

[7 CFR Part 957]

IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

NOTICE OF PROPOSED BUDGET AND RATE OF ASSESSMENT

Notice is hereby given that the Secretary of Agriculture is considering the approval of the budget and rate of assessment hereinafter set forth, which were recommended by the Idaho-Eastern Oregon Potato Committee, established pursuant to Marketing Agreement No. 98 and Order No. 57, as amended (7 CFR Part 957), regulating the handling of Irish potatoes grown in certain designated counties in Idaho and Malheur County, Oregon, issued under the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.).

Consideration will be given to any data, views, or arguments pertaining thereto, which are filed in triplicate with the Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington, D. C., not later than 15 days following publication of this notice in the FEDERAL REGISTER. The proposals are as follows:

§ 957.205 *Budget of expenses and rate of assessment.* (a) The expenses necessary to be incurred by the Idaho-Eastern Oregon Potato Committee, established pursuant to Marketing Agreement No. 98 and Order No. 57, as amended, to enable such committee to carry out its functions pursuant to the provisions of the aforesaid marketing agreement and amended order, during the fiscal year ending May 31, 1953, will amount to $22,500.00;

(b) The rate of assessment to be paid by each handler who first ships potatoes shall be fifty cents per carload or fraction thereof, or per truckload of 5,000 pounds or more, of potatoes handled by him as the first handler thereof during said fiscal year; and

(c) The terms used in this section shall have the same meaning as when used in Marketing Agreement No. 98 and Order No. 57, as amended (7 CFR Part 957).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 25th day of July 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[7 CFR Part 930]

[Docket No. AO-72-A17]

HANDLING OF MILK IN TOLEDO, OHIO, MARKETING AREA

NOTICE OF HEARING ON PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended, (7 U. S. C. 601 et. seq.) and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of a public hearing to be held at the Hillcrest Hotel, Madison and 16th Streets, Toledo, Ohio, beginning at 10:00 a. m., e. s. t., August 11, 1952, for the purpose of receiving evidence with respect to proposed amendments hereinafter set forth, or appropriate modifications thereof, to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Toledo, Ohio, marketing area. These proposed amendments have not received the approval of the Secretary of Agriculture.

Amendments proposed by Northwestern Cooperative Sales Association, Inc.:

1. Delete paragraph (a) (1) of § 930.50 and substitute therefor the following:

(1) Except as provided in subparagraph (2) of this paragraph, add to the basic formula price the following amount for the delivery period indicated:

May, June	$0.90
March, April, July, and August	1.25
All others	1.70

2. In subdivision (iii) of § 930.50 (a) (2) change the column headings so that March and August are grouped in column 1 and September, October, November, December, January, and February are grouped in column 3. Consider the issue of correlating supply-demand formulas in neighboring markets.

3. a. In § 930.45 delete paragraphs (c) thru (e) and substitute therefor the following:

(c) Subtract from the pounds of butterfat remaining in each class in series beginning with the lowest price utilization the pounds of butterfat in other source milk other than butterfat shrinkage in other source milk substracted pursuant to paragraph (a) of this section.

b. Amend § 930.45 (a) so as to make it conform to the amendment contained in § 930.45 (c).

4. In § 930.8 delete paragraph (a) and substitute therefor "(a) any person who

operates a fluid milk plant and who receives more than half of his total receipts from producers or".

5. In § 930.74 delete the words "4 cents per cwt. or"—"lesser" so that the phrase reads "shall deduct such amount".

6. Make such other changes as are necessary to make the order conform with any amendments thereto that may result from the hearing.

Copies of this notice of hearing and of the order as now in effect may be obtained from the Market Administrator, Room 19, Old Federal Building, Toledo, Ohio, or from the Hearing Clerk, Room 1353, South Building, United States Department of Agriculture, Washington 25, D. C., or may be there inspected.

Issued at Washington, D. C., this 28th day of July 1952.

[SEAL] ROY W. LENNARTSON,
Assistant Administrator.

DEPARTMENT OF COMMERCE

Federal Maritime Board

[46 CFR Ch. II]

STEAMSHIP CONFERENCES USING CONTRACT/NON-CONTRACT RATES

NOTICE OF PROPOSED RULE OF PROCEDURE

Notice is hereby given that, pursuant to section 15 of the Shipping Act, 1916 (46 U. S. C. 814), section 204 of the Merchant Marine Act, 1936, as amended (46 U. S. C. 1114), and section 3 of the Administrative Procedure Act (5 U. S. C. 1002), the Federal Maritime Board has under consideration a proposed rule of procedure relating to steamship freight conferences using contract/non-contract rates in the export or import trade of the foreign commerce of the United States.

The purpose of the proposed rule is to obtain information with respect to the operation of contract/non-contract rate systems as more particularly set forth herein below for such action as the Board shall hereafter deem appropriate.

All persons interested in the proposed rule herein below set forth may file with the Secretary of the Federal Maritime Board, Commerce Building, Washington 25, D. C., within 30 days of the publication of this notice in the FEDERAL REGISTER written statements and comments thereon. The proposed rule of procedure, unless otherwise modified by the Board, shall be as follows:

Whereas, the Federal Maritime Board published in the FEDERAL REGISTER of ----------, 1952 (-- F. R. --) Notice of a Proposed Rule of Procedure, as hereinafter set forth, to become effective as of ----------, 1952; and

Whereas, the time and date provided in said notice for the submission to the Board of written statements and comments on the proposed rule have expired; and

Whereas, after consideration of the statements and comments submitted, the Board adopted the proposed rule of procedure as set forth in said notice,

Now, therefore, it is hereby ordered, That, pursuant to section 15 of the Shipping Act, 1916 (46 U. S. C. 814), section 204 of the Merchant Marine Act, 1936, as amended (46 U. S. C. 1114), and section 3 of the Administrative Procedure Act (5 U. S. C. 1002), the following rule of procedure shall be effective as of 12:01 a. m., e. s. t., ----------, 1952:

1. Steamship freight conferences operating in the export or import trade of the foreign commerce of the United States shall file with the Federal Maritime Board at least 60 days prior to the initiation or modification of any spread or differential between contract/non-contract rates or of practices or contractual provisions relating thereto a statement containing (a) the proposed spread or differential between contract/non-contract rates or any modification of the spread or differential between contract/non-contract rates then in effect; (b) the effective date thereof; (c) the reasons for the use of contract/non-contract rates in the particular trade involved and the basis for the spread or differential between such rates; and (d) copies of all contracts pertaining thereto.

2. Steamship freight conferences now using contract/non-contract rates shall file with the Federal Maritime Board within 60 days after the effective date of this rule a statement containing (a) the effective date such contract/non-contract rates were initiated; (b) the reasons for the use of the contract/non-contract rates in the particular trade involved and the basis for the spread or differential between such rates; and (c) copies of all contracts pertaining thereto.

3. The foregoing information shall be submitted in the form of an original statement duly executed by an authorized official of the conference, together with 15 conformed copies thereof. Such information will be made available to the public upon request. Conferences complying with this rule may from time to time amend or amplify statements submitted pursuant thereto in a manner not inconsistent with prior compliance therewith.

The rule of procedure adopted by the Board shall be published in the FEDERAL REGISTER 30 days after the date of the publication of this notice or on such later date as the Board may designate and shall become effective as of the date specified therein.

By order of the Federal Maritime Board.

Dated: July 22, 1952.

[SEAL] R. L. MCDONALD,
Acting Secretary.

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

NOTICE OF PROPOSED TRANSFER OF JURISDICTION

JULY 24, 1952.

Notice is hereby given that the Office of Territories, Department of the Interior, has made application, Anchorage 019128, for transfer of jurisdiction of interest to the Office of Territories, under section 7 of the Public Works Act of August 24, 1949 (36 Stat. 629; 48 U. S. C. 486e), in the following described lands:

SEWARD MERIDIAN

T. 8 S., R. 14 W.,
Sec. 32, S½S½NE¼NE¼, N½SE¼NE¼, N½S½SE¼NE¼
Sec. 33, W¼SW¼NW¼ (Unsurveyed)

The purpose of this notice is to give persons having bona fide objections to the transfer, the opportunity to file with the Manager, Land Office, Anchorage, Alaska, a protest within 30 days from the date of the notice, together with evidence that a copy of the protest has been served on the District Director, Office of Territories, Juneau, Alaska.

ABE BARBER,
Acting Regional Administrator.

[F. R. Doc. 52-8348; Filed, July 30, 1952; 8:46 a. m.]

[F. P. 2]

MINNESOTA

NOTICE OF FILING OF PLAT OF SURVEY

July 25, 1952.

Notice is given that the plat of original survey of the following described lands, accepted July 24, 1951, will be officially filed in the Bureau of Land Management effective at 10:00 a. m. on the 35th day after the date of this notice:

MINNESOTA

5TH PRINCIPAL MERIDIAN

T. 133 N., R. 29 W.,
Sec. 29, lots 6, 7, 8, 9, 10, 11, 12.
Sec. 32, lots 6, 7.
Sec. 33, lots 13, 14, 15.

The area described aggregates 23.68 acres.

The lots are islands in Crow Wing River and available information indicates that the land is upland in character, reaching an elevation from 4 to 8 feet above the water level of the river and supports some timber from 4 to 40 inches in diameter.

No application for these lots may be allowed under any public land law unless the land has already been classified as valuable or suitable for such type of application or shall be so classified upon consideration of an application.

At the hour and date specified above the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, or selection as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this notice shall be subject only to (1) application under the homestead laws or the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under this paragraph either at or before 10:00 a. m. on the 35th day after the date of this notice shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this notice, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this notice, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

Applicaion for these lands, which shall be filed in the Bureau of Land Management, Washington 25, D. C., shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations and Part 296 of that title, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 166 to 170, inclusive, of Title 43 of the Code of Federal Regulations, and the said Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Part 257, of that title.

Inquiries concerning these lands shall be addressed to the Regional Administrator, Region VI, Bureau of Land Management, Washington 25, D. C.

For the Director,

A. H. FURR,
Acting Regional Administrator, Region VI.

NEW MEXICO

NOTICE OF FILING OF PLAT OF SURVEY

JULY 22, 1952.

Notice is given that the plat of original survey of the following described lands, accepted August 22, 1950, will be officially filed in the Land & Survey Office, Santa Fe, New Mexico, effective at 10:30 a. m. on the 35th day after the date of this notice:

NEW MEXICO PRINCIPAL MERIDIAN

T. 15 N., R. 17 W.,
Tract 37.

The area described aggregates 100.69 acres.

The land comprises a narrow strip approximately 1.6 miles long and varying in width from 8.38 chains (approximately 555 feet) at the west end to a sharp point at the east end. The strip is bounded on the north by the right-of-way of the Atchison, Topeka and Santa Fe, and on the south by the right-of-way of U. S. Highway 66. Approximately 40 acres on the west end of the tract are level and not eroded. Approximately 5 acres on the east end of the tract are also level and not eroded. At a point which is 0.2 miles west of the extreme east end of the tract, a road takes off Highway 66 north and crosses the railroad tracks into the Indian housing project. Immediately west of this area is a deep, ragged arroyo and to the west of the arroyo there is a rather high hill which is somewhat rough and rocky. Lying between the west side of the hill and the level land first mentioned as being at the west end of the tract, there is a deeply cut and badly eroded area which is not susceptible of any particular use.

The land has been classified as suitable for disposal at public sale, and probably will not be classified as suitable for disposal under the homestead or desert land laws or the Small Tract Act of June 1, 1938 (52 Stat. 609; 43 U. S. C. 682a).

At the hour and day specified above the land shall become subject to application, petition, location, and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable law, and the 90-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended.

Information showing the periods during which and the conditions under which veterans and others may file applications for these lands may be obtained on request from Land & Survey Office, Bureau of Land Management, Santa Fe, New Mexico.

J. A. DELANY,
Manager, Land and Survey Office, Santa Fe, New Mexico.

DEPARTMENT OF COMMERCE

Federal Maritime Board

MEMBER LINES OF ATLANTIC AND GULF/WEST COAST OF CENTRAL AMERICA AND MEXICO CONFERENCE ET AL.

NOTICE OF AGREEMENTS FILED WITH THE BOARD FOR APPROVAL

Notice is hereby given that the following described agreements have been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916, as amended.

1. Agreement No. 2743-14, between the member lines of the Atlantic and Gulf/West Coast of Central America and Mexico Conference, modifies the basic agreement of that Conference (No. 2743) to provide for the establishment and maintenance of agreed rates and charges of every lawful type, and rules, regulations and practices with respect to the receiving, handling, transportation and discharge of cargo in the trade

from U. S. Atlantic and Gulf ports to West Coast ports in Panama, except Panama City, Costa Rich, Nicaragua, Honduras, Salvador, Guatemala and Mexico, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation. Agreement No. 2743 presently provides for the establishment and maintenance of agreed rates and charges, and rules, regulations and practices for or in connection with the transportation of cargo in the aforementioned trade, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation.

2. Agreement No. 2744–19, between the member lines of the Atlantic and Gulf/West Coast of South America Conference, modifies the basic agreement of that Conference (No. 2744) to provide for the establishment and maintenance of agreed rates and charges of every lawful type, and rules, regulations and practices with respect to the receiving, handling, transportation and discharge of cargo in the trade from U. S. Atlantic and/or Gulf ports to West Coast ports in Colombia, Ecuador, Peru and Chile, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation. Agreement No. 2744 presently provides for the establishment and maintenance of agreed rates and charges, and rules, regulations and practices for or in connection with the transportation of cargo in the aforementioned trade, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation.

3. Agreement No. 3868–11, between the member lines of the Atlantic and Gulf/Panama Canal Zone, Colon and Panama City Conference, modifies the basic agreement of that Conference (No. 3868) to provide for the establishment and maintenance of agreed rates and charges of every lawful type, and rules, regulations and practices with respect to the receiving, handling, transportation and discharge of cargo in the trade from U. S. Atlantic and Gulf ports to Colon, Panama City and all points in the Canal Zone, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation. Agreement No. 3868 presently provides for the establishment and maintenance of agreed rates and charges, and rules regulations and practices for or in connection with the transportation of cargo in the aforementioned trade, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation.

4. Agreement No. 4189–16, between the member lines of the Havana Steamship Conference, modifies the basic agreement of that Conference (No. 4189) to provide for the establishment and maintenance of agreed rates and charges of every lawful type, and rules, regulations and practices with respect to the receiving, handling, transportation and discharge of cargo in the trade from North Atlantic ports in the States of Maine to Virginia, inclusive, to Havana, Mariel and Matanzas, Cuba. Agreement No. 4189 presently provides for the establishment and maintenance of agreed rates and charges, classifications and practices together with rules and regulations for and in connection with the transportation of cargo in the aforementioned trade.

5. Agreement No. 4610–2, between the member lines of the U. S. Atlantic & Gulf Ports-Jamaica (B. W. I.) Steamship Conference, modifies the basic agreement of that Conference (No. 4610) to provide for the establishment and maintenance of agreed rates and charges of every lawful type, and rules, regulations and practices with respect to the receiving, handling, transportation and discharge of cargo in the trade from U. S. Atlantic and Gulf ports to Jamaica, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation. Agreement No. 4610 presently provides for the establishment and maintenance of agreed rates and charges, and rules, regulations and practices for or in connection with the transportation of cargo in the aforementioned trade; and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation.

6. Agreement No. 6190–13, between the member lines of the U. S. Atlantic & Gulf-Venezuela & Netherlands Antilles Conference, modifies the basic agreement of that Conference (No. 6190) to provide for the establishment and maintenance of agreed rates and charges of every lawful type, and rules, regulations and practices with respect to the receiving, handling, transportation and discharge of cargo in the trade between U. S. Atlantic and Gulf ports and ports in Venezuela and in the Islands of Curacao, Aruba and Bonaire, Netherlands Antilles, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation. Agreement No. 6190 presently provides for the establishment and maintenance of agreed rates and charges, and rules, regulations and practices for or in connection with the transportation of cargo in the aforementioned trade, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation.

7. Agreement No. 7540–6, between the member lines of the Leeward and Windward Islands and Guianas Conference, modifies the basic agreement of that Conference (No. 7540) to provide for the establishment and maintenance of agreed rates and charges of every lawful type, and rules, regulations and practices with respect to the receiving, handling, transportation and discharge of cargo in the trade between U. S. Atlantic and Gulf ports and ports in the Virgin Islands, Leeward and Windward Islands, Trinidad, Barbados, British, French and Netherlands Guianas. Agreement No. 7540 presently provides for the establishment and maintenance of agreed rates and charges and rules and regulations for or in connection with the transportation of cargo in the aforementioned trade.

8. Agreement No. 7590–5, between the member lines of the East Coast Colombia Conference, modifies the basic agreement of that Conference (No. 7590) to provide for the establishment and maintenance of agreed rates and charges of every lawful type, and rules, regulations and practices with respect to the receiving, handling, transportation and discharge of cargo in the trade between U. S. Atlantic and Gulf ports and the ports of Barranquilla, Cartagena and Puerto Colombia, Colombia, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation. Agreement No. 7590 presently provides for the establishment and maintenance of agreed rates and charges, and rules, regulations and practices for or in connection with the transportation of cargo in the aforementioned trade, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation.

9. Agreement No. 7650–4, between the member lines of the Santiago de Cuba Conference, modifies the basic agreement of that Conference (No. 7650) to provide for the establishment and maintenance of agreed rates and charges of every lawful type, and rules, regulations and practices with respect to the receiving, handling, transportation and discharge of cargo in the trade between U. S. Atlantic and Gulf ports and Santiago de Cuba, Cuba, and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation. Agreement No. 7650 presently provide for the establishment and maintenance of agreed rates and charges, and rules, regulations and practices for or in connection with the transportation of cargo in the aforementioned trade and charges and practices in connection with the furnishing of wharfage and other accessorial services incident to such transportation.

10. Agreement No. 7856 between the carriers comprising the Joint Service of Ivaran Lines—Far East Service and Pacific Argentine Brazil Line, Inc., and Pope & Talbot, Inc., covers the transportation of cargo under through bills of lading from Japan, Korea, Formosa, Manchuria, (Manchuko), Siberia, China, Hong Kong, Siam, Indo-China, Kwantung, and Philippine Islands to ports of San Juan, Ponce and Mayaguez, Puerto Rico, with transshipment at Seattle, Portland, San Francisco, Los Angeles Harbor, or Long Beach.

11. Agreement No. 7859 between the carriers comprising the Joint Service of Ivaran Lines—Far East Service and Waterman Steamship Corporation, covers the transportation of cargo under through bills of lading from Japan, Korea, Formosa, Manchuria (Manchuko), Siberia, China, Hong Kong, Siam, Indo-China, Kwantung, and Philippine Islands to ports of San Juan, Ponce and Mayaguez, Puerto Rico, with transshipment at Seattle, Portland, San Francisco, Los Angeles Harbor, or Long Beach.

12. Agreement No. 7900–2 between the member lines of the United States Atlantic & Gulf-Bermuda Conference, modifies the basic agreement of that Conference (No. 7900) to provide for the establishment and maintenance of agreed rates and charges of every lawful type, and rules, regulations and practices with respect to the receiving, handling, transportation and discharge of cargo in the trade between U. S. Atlantic and Gulf ports and Bermuda. Agreement No. 7900 presently provides for the establishment and maintenance of just and reasonable rates and charges and rules and regulations for or in connection with the transportation of cargo in the aforementioned trade.

Interested parties may inspect these agreements and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to any of the agreements and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: July 28, 1952.

By order of the Federal Maritime Board.

R. L. McDONALD,
Assistant Secretary.

ECONOMIC STABILIZATION AGENCY

Office of Price Stabilization

[CPR 7, Section 43; Revocation of Special Order No. 752, as amended]

RADIO CORPORATION OF AMERICA

CEILING PRICES AT RETAIL

Statement of considerations. Special Order No. 752, which was issued to the Radio Corporation of America, Camden 2, New Jersey, under section 43 of Ceiling Price Regulation 7, established uniform ceiling prices for sales at retail of television receivers, radios and record playing equipment sold under the brand "RCA Victor." On June 24, 1952, the Director of Price Stabilization revoked Special Order No. 752 to the extent that it established ceiling prices for sales at retail of "RCA Victor" branded television receivers.

The Radio Corporation of America has now requested that the Director of Price Stabilization revoke Special Order No. 752 in its entirety. Accordingly, in view of this request, it is the judgment of the Director that such an order of revocation should be granted.

Revocation. 1. For the reason set forth in the statement of considerations, Special Order No. 752, as amended, issued to the Radio Corporation of America under section 43 of Ceiling Price Regulation 7, establishing ceiling prices for sales at retail of certain articles having the brand name "RCA Victor," is hereby revoked.

2. Within 15 days after the effective date of this order of revocation, the Radio Corporation of America must send a copy of this order to all of its purchasers for resale of "RCA Victor" branded radios and record playing equipment to whom it has given notice of Special Order No. 752, as amended. Twenty days after the effective date of this order each such purchaser for resale, before selling any "RCA Victor" branded radios or record playing equipment, must (a) remove all tags which were affixed to "RCA Victor" branded radios or record playing equipment in accordance with Special Order No. 752, as amended; and (b) determine his ceiling prices for "RCA Victor" branded radios or record playing equipment under Ceiling Price Regulation 7 or whatever other ceiling price regulation is applicable to him.

Effective date. This order shall become effective on July 25, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 25, 1952.

[F. R. Doc. 52–8330; Filed, July 25, 1952; 4:37 p. m.]

[CPR 7, Section 43; Partial Revocation of Special Order 249, as amended]

HOFFMAN RADIO CORP.

CEILING PRICES AT RETAIL

Statement of considerations. Special Order 249 under section 43 of Ceiling Price Regulation 7, as amended, establishes ceiling prices for sales at retail of television receivers and other articles manufactured by the Hoffman Radio Corporation, 3761 South Hill Street, Los Angeles 7, California, having the brand name "Hoffman".

A prerequisite to an applicant's eligibility for a uniform pricing order under section 43 of Ceiling Price Regulation 7 is that the branded products for which application is made must have been sold at substantially uniform retail prices for a period immediately prior to January 26, 1951. On the basis of the evidence produced at the time of its application under section 43, it was the judgment of the Director of Price Stabilization that this criterion of eligibility had been established for all of the commodities which were the subject of the application of the Hoffman Radio Corporation. On the basis of information subsequently obtained, however, the Director now finds that certain of the branded products for which the Hoffman Radio Corporation was granted a special order under section 43 namely, "Hoffman" branded television receivers, were not in fact sold at substantially uniform retail prices for a period immediately prior to January 26, 1951.

A further opportunity has been afforded the Hoffman Radio Corporation to produce satisfactory evidence that its branded television receivers were sold at substantially uniform retail prices immediately prior to January 26, 1951, but such evidence has not been forthcoming. Therefore, it is the judgment of the Director of Price Stabilization that insofar as Special Order 249, as amended, establishes retail ceiling prices for sales of the Hoffman Radio Corporation's branded television receivers, the order must be revoked.

Revocation. 1. For the reason set forth in the Statement of Considerations, and in keeping with the provisions of section 43 of Ceiling Price Regulation 7, Special Order 249, as amended, issued to Hoffman Radio Corporation to the extent that it establishes ceiling prices for sales at retail of television receivers having the brand name "Hoffman" is hereby revoked. In all other respects Special Order 249 as amended, remains in effect.

2. Within 15 days after the effective date of this partial order of revocation, Hoffman Radio Corporation must send a copy of this order to all purchasers for resale of "Hoffman" branded television receivers to whom it has given notice of Special Order 249, as amended. Twenty days after the effective date of this order each such purchaser for resale, before selling any "Hoffman" branded television receivers, must (a) remove all tags which were affixed to "Hoffman" branded television receivers in accordance with Special Order 249, as amended; and (b) determine ceiling prices for "Hoffman" branded television receivers under Ceiling Price Regulation 7 or whatever other ceiling price regulation is applicable to him.

Effective date. This order shall become effective July 25, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 25, 1952.

[F. R. Doc. 52–8329; Filed, July 25, 1952; 4:37 p. m.]

[CPR 7, Section 43; Revocation of Special Order 160, as amended]

SCOTT RADIO LABORATORIES, INC.

CEILING PRICES AT RETAIL

Statement of considerations. Special Order 160, under section 43 of Ceiling Price Regulation 7, as amended, establishes ceiling prices for sales at retail of television receivers manufactured by Scott Radio Laboratories, Inc., 4541 Ravenswood Avenue, Chicago 40, Illinois, having the brand name "Scott."

A prerequisite to an applicant's eligibility for a uniform pricing order under section 43 of Ceiling Price Regulation 7 is that the branded products for which application is made must have been sold at substantially uniform retail prices for a period immediately prior to January 26, 1951. On the basis of evidence produced by the Scott Radio Laboratories, Inc., at the time of its application under section 43, it was the judgment of the Director of Price Stabilization that this criterion of eligibility had been established. On the basis of information subsequently obtained, however, the Director now finds that the branded products of the Scott Radio Laboratories, Inc., were not in fact sold at substantially uniform retail prices for a period immediately prior to January 26, 1951.

A further opportunity has been afforded Scott Radio Laboratories, Inc., to produce satisfactory evidence that the branded products for which it applied for a special pricing order under section 43 of Ceiling Price Regulation 7 were sold at substantially uniform retail prices immediately prior to January 26, 1951, but such evidence has not been forthcoming. Therefore, it is the judgment of the Director of Price Stabilization that Special Order 160, as amended, establishing retail ceiling prices for the sale by Scott Radio Laboratories, Inc., of its branded television receivers, must be revoked.

Revocation. 1. For the reason set forth in the statement of considerations, and in keeping with the provisions of section 43 of Ceiling Price Regulation 7, Special Order 160, issued to Scott Radio Laboratories, Inc., as amended, establishing ceiling prices for sales at retail of television receivers having the brand name "Scott," is hereby revoked.

2. Within 15 days after the effective date of this order of revocation, Scott Radio Laboratories, Inc., must send a copy of this order to all purchasers for resale to whom it has given notice of Special Order 160, as amended. Twenty days after the effective date of this order each such purchaser for resale, before selling any "Scott" branded television receivers, must (a) remove all tags which were affixed to "Scott" branded television receivers in accordance with Special Order 160, as amended; and (b) determine ceiling prices for "Scott" branded television receivers under Ceiling Price Regulation 7 or whatever other ceiling price regulation is applicable to him.

Effective date. This order of revocation shall become effective July 25, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 25, 1952.

[F. R. Doc. 52-8328; Filed, July 25, 1952; 4:37 p. m.]

[CPR 7, Section 43; Partial Revocation of Special Order 851]

BELMONT RADIO CORP.

CEILING PRICES AT RETAIL

Statement of considerations. Special Order 851 under section 43 of Ceiling Price Regulation 7, establishes ceiling prices for sales at retail of television receivers and other articles manufactured by the Belmont Radio Corporation, 5921 W. Dickens Avenue, Chicago 39, Illinois, having the brand name "Raytheon."

A prerequisite to an applicant's eligibility for a uniform pricing order under section 43 of Ceiling Price Regulation 7 is that the branded products for which application is made must have been sold at substantially uniform retail prices for a period immediately prior to January 26, 1951. On the basis of the evidence produced at the time of its application under section 43, it was the judgment of the Director of Price Stabilization that this criterion of eligibility had been established for all of the commodities which were the subject of the application of the Belmont Radio Corporation. On the basis of information subsequently obtained, however, the Director now finds that certain of the branded products for which the Belmont Radio Corporation was granted a special order under section 43 namely, "Raytheon" branded television receivers, were not in fact sold at substantially uniform retail prices for a period immediately prior to January 26, 1951.

A further opportunity has been afforded the Belmont Radio Corporation to produce satisfactory evidence that its branded television receivers were sold at substantially uniform retail prices immediately prior to January 26, 1951, but such evidence has not been forthcoming. Therefore, it is the judgment of the Director of Price Stabilization that insofar as Special Order 851, establishes retail ceiling prices for sales of the Belmont Radio Corporation's branded television receivers, the order must be revoked.

Revocation. 1. For the reason set forth in the Statement of Considerations, and in keeping with the provisions of section 43 of Ceiling Price Regulation 7, Special Order 851, issued to Belmont Radio Corporation, to the extent that it establishes ceiling prices for sales at retail of television receivers having the brand name "Raytheon," is hereby revoked. In all other respects Special Order 851 remains in effect.

2. Within 15 days after the effective date of this partial order of revocation, Belmont Radio Corporation must send a copy of this order to all purchasers for resale of "Raytheon" branded television receivers to whom it has given notice of Special Order 851. Twenty days after the effective date of this order each such purchaser for resale, before selling any "Raytheon" branded television receivers, must (a) remove all tags which were affixed to "Raytheon" branded television receivers in accordance with Special Order 851; and (b) determine ceiling prices for "Raytheon" branded television receivers under Ceiling Price Regulation 7 or whatever other ceiling price regulation is applicable to him.

Effective date. This order shall become effective July 25, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

ORDER APPROVING PLAN

JULY 24, 1952.

Standard Gas and Electric Company ("Standard"), a registered holding company and a subsidiary of Standard Power and Light Corporation, also a registered holding company, and Philadelphia Company ("Philadelphia"), a registered holding company and a subsidiary of Standard, having filed an application for approval of a plan under section 11 (e) of the act, providing, among other things, for the partial liquidation of Philadelphia by the distribution of a portion of its holdings of the common stock of Duquesne Light Company ("Duquesne"), a public utility company all of whose common stock is held by Philadelphia, to the common stockholders of Philadelphia;

A public hearing having been duly held after appropriate notice, at which hearing all interested persons were afforded an opportunity to be heard;

The applicants having requested the Commission to enter an order reciting that the transactions proposed in the plan are necessary to effectuate the provisions of section 11 (b) of the act and are fair and equitable to the persons affected thereby, and that such order contain recitals in accordance with the requirements of the Internal Revenue Code, as amended, including section 1808 (f) and Supplement R thereof;

The Commission having considered the record in the matter and having filed its findings and opinion herein, finding that the plan is necessary to effectuate the provisions of section 11 (b) of the act and fair and equitable to all persons affected thereby;

It is ordered, on the basis of the record herein and the said findings and opinion, pursuant to section 11 (e) and other applicable provisions of the act, That the said plan be, and it hereby is, approved, subject to the terms and conditions contained in Rule U-24 and to the following additional terms and conditions:

1. That jurisdiction be, and it hereby is, specifically reserved to determine the reasonableness and appropriate allocation of all fees and expenses and other remuneration incurred or to be incurred in connection with the plan and the transactions incident thereto;

2. That jurisdiction be, and it hereby is, specifically reserved to take such further action as the Commission may deem appropriate to effectuate the provisions of the plan concerning efforts to locate persons entitled to securities or cash by reason of their holdings of common stock of Philadelphia;

3. That jurisdiction be, and it hereby is, specifically reserved over the accounting treatment proposed by both Philadelphia and Standard in connection with the proposed transactions;

4. That jurisdiction be, and it hereby is, specifically reserved to entertain such further proceedings, to make such supplemental findings, and to take such further action as may be necessary in connection with the plan, the transactions incident thereto, and the consummation thereof.

It is further ordered and recited, That all steps and transactions involved in the consummation of said plan, as amended, including particularly the transfers, conveyances, issuances, exchanges, expenditures, distributions and receipts hereinafter described and recited in subparagraphs I through IV below, are hereby authorized and approved and are necessary and appropriate to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935, all in accordance with the meaning and requirements of Supplement R of the Internal Revenue Code, as amended, and section 1808 (f) thereof, the stock and securities and other property to be transferred, conveyed, issued, exchanged, distributed and received upon such transactions, and the expenditures to be made, being specified and itemized as follows:

I. The transfer and distribution by Philadelphia to the holders of its common stock (including Standard), without the surrender by the holders of such common stock of Philadelphia of any of their shares of such common stock of Philadelphia, of an aggregate of 1,038,171 shares of common stock of Duquesne held by Philadelphia, in the ratio of 1 share of common stock of Duquesne for each 5 shares of common stock of Philadelphia held by such stockholders; 1,004,958 of such shares of common stock of Duquesne, to be transferred and distributed to Standard, being represented by Certificate No. 9 for that number of shares registered in the name of Philadelphia; and the remaining 33,213 of such shares of common stock of Duquesne being represented by Certificate No. 10 for that number of shares registered in the name of Philadelphia, which, in accordance with said plan, are to be transferred to Mellon National Bank and Trust Company, the Distribution and Scrip Agent under said plan, and held in the form of a certificate or certificates registered in the name of "Mellon National Bank and Trust Company for the benefit of holders of Common Stock of Philadelphia Company other than Standard Gas and Electric Company", the shares to be transferred and distributed by said Agent to holders of common stock of Philadelphia other than Standard to be represented by certificates issued against, and upon transfer by said Agent of part of the shares represented by, such certificate or certificates so to be issued in the name of said Agent, any fraction of a share of common stock of Duquesne distributable to any holder of common stock of Philadelphia to be represented by a scrip certificate as provided in said plan.

II. The transfer of said certificate for said 1,004,958 shares of common stock of Duquesne to and the registration thereof in the name of Standard and the transfer of said certificate for 33,213 shares of common stock of Duquesne to and the registration thereof in the name of said Distribution and Scrip Agent as above provided in subparagraph I, and the delivery of said certificates for said entire 1,038,171 shares of Duquesne common stock to said Distribution and Scrip Agent as provided in said plan.

III. The transfer and delivery by said Distribution and Scrip Agent to the holders of common stock of Philadelphia, subject to acknowledgment by them of receipt of notice as provided in the plan, of said common stock of Duquesne in the ratio of 1 share of Duquesne common stock for each 5 shares of common stock of Philadelphia held of record on the distribution record date provided for by said plan, the issuance and delivery by said Agent to such holders of common stock of Philadelphia, in lieu of any fractional shares of common stock of Duquesne to which they would otherwise be entitled, of scrip certificates for fractional shares of Duquesne common stock as provided in said plan, the transfer of such scrip certificates upon the sale thereof by said Agent for the account of the holders of said scrip certificates, the transfer and delivery by said Agent to holders of such scrip certificates of shares of Duquesne common stock to which they are entitled upon presentation (within the period provided in the plan and said scrip cer-

tificates) of scrip certificates aggregating one or more full shares, the transfer and delivery to said Agent of scrip certificates by the holders thereof in exchange for shares of common stock of Duquesne, and the payment by said Agent to such holders of Philadelphia common stock and/or scrip certificates, at the time of delivery and transfer by it of Duquesne common stock as above provided, of any amounts received by said Agent as dividends upon the shares so delivered, less any taxes which may have been imposed or paid thereon.

IV. The transfer and delivery by said Distribution and Scrip Agent to Duquesne, at the cut-off date provided in said plan, of all certificates for shares of common stock of Duquesne which are then held by said Distribution and Scrip Agent under said plan (1) in respect of shares of common stock of Philadelphia whose holders of record on the distribution record date have not theretofore filed with such Agent acknowledgment of receipt of the notice provided for in said plan and (2) in respect of all scrip certificates issued in lieu of fractional shares of common stock of Duquesne and not by that date combined into full share lots and exchanged for full shares of common stock of Duquesne, together with all amounts received by such Agent as dividends upon such shares of stock of Duquesne then held by it.

It is further ordered, That this order shall be effective forthwith upon issuance.

By the Commisison.

ATTLEBORO STEAM AND ELECTRIC CO. ET AL.

ORDER AUTHORIZING ISSUANCE BY SUBSIDIARIES TO PARENT COMPANY OF PROMISSORY NOTES

JULY 25, 1952.

In the matter of Attleboro Steam and Electric Company, Beverly Gas and Electric Company, Gloucester Electric Company, Northern Berkshire Gas Company, Norwood Gas Company, Quincy Electric Light and Power Company, Southern Berkshire Power & Electric Company, Weymouth Light and Power Company, Worcester County Electric Company, New England Electric System; File No. 70-2896.

New England Electric System ("NEES"), a registered holding company, and its above named public-utility subsidiary companies, hereinafter individually referred to as "Attleboro," "Beverly," "Gloucester," "Northern Berkshire," "Norwood," "Quincy," "Southern Berkshire," "Weymouth" and "Worcester County" and collectively referred to as "the borrowing companies," having filed applications-declarations, pursuant to sections 6 (a), 7, 9 (a), 10 and 12 (f) of the Public Utility Holding Company Act of 1935 and Rules U-23, U-43 (a) and U-45 (a) thereunder in respect to the following proposed transactions:

The borrowing companies propose to issue to NEES, from time to time but not later than September 30, 1952, additional unsecured promissory notes in an aggregate amount up to but not exceeding $1,540,000. Said notes will mature December 1, 1952, and will bear interest at the prime interest rate charged by banks on similar notes at the time said notes are issued to NEES. It is stated in the applications-declarations that at the present time the prime interest rate paid by banks on notes similar to those proposed to be issued is 3 percent per annum. It is further stated that if said prime interest rate is in excess of 3¼ percent at the time the proposed notes are to be issued, NEES and the borrowing company will file an amendment to this filing at least five days prior to the proposed issue date of such note. Such amendment will set forth the amount of the note proposed to be issued and the proposed rate of interest thereof. NEES and the borrowing companies request that unless the Commission notifies it and the applicable borrowing company or companies to the contrary within said five day period, the amendment shall become effective at the end of such period. The applications-declarations further state that the proposed notes may be prepaid, in whole or in part, without premium.

The following table shows for each of the borrowing companies the notes payable to NEES at June 30, 1952, and the aggregate maximum amount of such notes proposed to be issued during the period from July 1, 1952 to September 30, 1952:

Company	Notes payable to NEES at June 30, 1952	Aggregate maximum borrowings during period July 1, 1952, to Sept. 30, 1952
Attleboro	$25,000	$100,000
Beverly	2,[illegible],000	150,000
Gloucester	55,000	100,000
Northern Berkshire	1,[illegible],000	150,000
Norwood	340,000	50,000
Quincy	660,000	100,000
Southern Berkshire	935,000	50,000
Weymouth	650,000	100,000
Worcester	900,000	700,000
	6,[illegible],000	1,540,000

The applications-declarations further state that the proceeds of the notes proposed to be issued are to be used by the borrowing companies for construction costs, cost of conversion to natural gas and to reimburse their treasuries for prior construction expenditures. The applications-declarations further state that incidental services in connection with the proposed note issues will be performed, at cost, by New England Power Service Company, an affiliated service company, such cost being estimated not to exceed $200 for NEES and each of the borrowing companies, or an aggregate of $2,000. The applications-declarations further state that no state commission or Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

NEES and the borrowing companies request that the Commission's order herein become effective forthwith upon issuance.

Due notice of said filing having been given, and the Commission not having received a request for a hearing with respect to said applications-declarations, as amended, within the period specified in said notice, or otherwise, and not having ordered a hearing thereon; and

The Commission finding with respect to said applications-declarations, as amended, that the requirements of the applicable provisions of the act and rules thereunder are satisfied, and deeming it appropriate in the public interest and in the interest of investors and consumers that said applications-declarations, as amended, be granted and permitted to become effective forthwith:

It is hereby ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that the applications-declarations, as amended, be and the same hereby are, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-2897]

NEW ENGLAND POWER CO.

ORDER AUTHORIZING PROPOSED NOTE ISSUES

JULY 25, 1952.

New England Power Company ("NEPCO"), a public-utility subsidiary company of New England Electric System, a registered holding company, having filed a declaration, pursuant to sections 6 (a) and 7 of the Public Utility Holding Company Act of 1935 and Rule U-23 thereunder, in respect to the following proposed transactions:

The declaration indicates that NEPCO presently has outstanding $5,400,000 principal amount of promissory notes, due April 1, 1953, issued pursuant to a bank loan agreement with five banks, namely, the First National Bank of Boston ($2,970,000), the Chase National Bank of the City of New York ($702,000), the Hanover Bank ($702,000), Irving Trust Company ($702,000) and the New York Trust Company ($324,000). Under its bank loan agreement, NEPCO proposes to issue to the above mentioned banks, from time to time, but not later than December 31, 1952, $6,000,000 of additional unsecured promissory notes all of which will mature April 1, 1953. The proceeds of the new notes will be used for construction expenditures during the period from July 1, 1952, to December 31, 1952, and to reimburse NEPCO's treasury for prior construction expenditures.

The declaration states that each new note issued prior to October 1, 1952, will bear interest to that date at the six month prime commercial rate generally being charged by banks in Boston on the fifth business day prior to the issuance thereof, but in no event less than 3 percent per annum nor more than 3¼ percent per annum and will bear interest from October 1, 1952, to April 1, 1953, at said rate on October 1, 1952, but in no event less than 3 percent nor more than 3½ percent per annum. The declaration further states that each new note issued after October 1, 1952, will bear interest to April 1, 1953, at said rate on the fifth business day prior to the issuance thereof, but in no event less than 3 percent per annum nor more than 3½ percent per annum. The bank loan agreement under which the proposed notes will be issued provides for the payment of a commitment fee of ¼ percent per annum from the effective date of the agreement to December 31, 1952, on the average daily difference between $7,000,000, the amount of the banks' unborrowed commitment, and the additional amount borrowed under the agreement. Subject to certain restrictions, the proposed notes may be prepaid, in whole or in part, without premium.

According to the declaration, NEPCO expects that its note indebtedness will be financed through the issuance of capital stock and first mortgage bonds in approximately equal amounts late in 1952 or early in 1953 and, in this connection, NEPCO proposes that the proceeds of any permanent financing, except financing (including the assumption of indebtedness of Connecticut River Power Company) for the acquisition of properties of Connecticut River Power Company, done before the maturity of the notes proposed to be issued, will be applied in reduction of, or in total payment of notes then outstanding, and the amount of authorized but unissued notes, if any, will be reduced by the amount, if any, by which such permanent financing exceeds the notes at the time outstanding.

The declaration states that incidental services in connection with the proposed note issues, will be performed, at cost, by New England Power Service Company, an affiliated service company, such cost being estimated not to exceed $1,000. The bank loan agreement provides that NEPCO will reimburse the First National Bank of Boston, as Agent for the five lending banks, for out-of-pocket expenses and NEPCO expects such expenses to be nominal.

The declaration indicates that the New Hampshire Public Utilities Commission has approved the proposed issuance and sale of the additional notes and that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

NEPCO requests that the Commission's order herein become effective forthwith upon issuance.

Notice of the filing of the declaration having been given in the manner and form provided by Rule U-23 of the rules and regulations promulgated under the act, and a hearing not having been requested and the Commission finding that the applicable provisions of the act and the rules and regulations promulgated thereunder are satisfied, and deeming it appropriate in the public interest and in the interest of investors and consumers that said declaration be permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that said declaration be, and hereby is, permitted to become effective, subject to the terms and conditions perscribed in Rule U-24, and that this order shall become effective upon its issuance.

By the Commission.

[File No. 70-2904]

PHILADELPHIA CO.

NOTICE OF FILING FOR AUTHORITY TO RENEW BANK LOAN NOTES

JULY 25, 1952.

Notice is hereby given that a declaration has been filed with this Commission by Philadelphia Company ("Philadelphia"), a registered holding company and a subsidiary of Standard Gas and Electric Company and Standard Power and Light Corporation, both registered holding companies. Declarant has designated sections 6 (a) and 7 of the act as applicable to the proposed transactions, which are summarized as follows:

On August 21, 1950, the Commission issued its findings, opinion, and order (Holding Company Act Release No. 10044), which among other things permitted Philadelphia to issue bank loan notes, aggregating $17,500,000 to Mellon National Bank and Trust Co. of Pittsburgh, Pennsylvania, Chase National Bank of the City of New York, New York, Continental Illinois National Bank and Trust Company of Chicago, Illinois, and Harris Trust and Savings Bank of Chicago, Illinois. The notes, which were issued on August 23, 1950, provide for maturity one year after issuance, with an option on Philadelphia's part to renew them for two further periods of one year each, and for an interest rate of 2 percent per annum for the first year and, if renewed, 2⅛ percent thereafter. Said order of August 21, 1950, prohibited Philadelphia from extending the maturity of any of the bank loan notes without securing a further order of this Commission permitting such extension.

On July 31, 1951, Philadelphia prepaid $1,500,000 of said bank loan notes. On August 23, 1951, it renewed the remainder of said notes, in accordance with an order of this Commission, dated August 10, 1951 (Holding Company Act Release No. 10718), in the aggregate amount of $16,000,000, for a further period of one year from August 23, 1951. Philadelphia now proposes to renew such notes, in accordance with their terms, for another period of one year from August 23, 1952.

Philadelphia states that the expenses in connection with the proposed transactions will be nominal. It requests that the Commission's order herein become effective upon issuance.

Notice is further given that any interested person may, not later than August 6, 1952, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said declaration which he desires to controvert or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after August 6, 1952, said declaration, as filed or as amended, may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

GENERAL SERVICES ADMINISTRATION

SECRETARY OF DEFENSE

DELEGATION OF AUTHORITY TO REPRESENT GOVERNMENT IN THE MATTER OF SOUTHERN PACIFIC-MISSOURI PACIFIC REQUEST FOR INCREASED PASSENGER FARES

1. Pursuant to the provisions of sections 201 (a) (4) and 205 (d) and (e) of the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, authority to represent the interests of the executive agencies of the Federal Government in the matter of So. Pac.—Mo. Pac.; Increased Passenger Fares, Docket No. 31050, before the Interstate Commerce Commission, is hereby delegated to the Secretary of Defense.

2. The Secretary of Defense is hereby authorized to redelegate any of the authority contained herein to any officer, official or employee of the Department of Defense.

3. The authority conferred herein shall be exercised in accordance with the policies, procedures and controls prescribed by the General Services Administration and shall further be exercised in cooperation with the responsible officers, officials and employees of such Administration.

4. This delegation of authority shall be effective as of June 24, 1952.

Dated: July 25, 1952.

HOUSING AND HOME FINANCE AGENCY

Office of the Administrator

NOTICE OF HOUSING PROGRAMS AND RELAXATION OF CREDIT CONTROLS IN CRITICAL DEFENSE HOUSING AREAS

PART II—DEFENSE HOUSING PROGRAMS

Appearing below are amendments to previously published defense housing programs and also additional new defense housing programs and supplemental programs to area programs previ-

ously published. These amendments are published herein as amendments to Part II (Defense Housing Programs) of the Notice of Housing Programs and Relaxation of Credit Controls in Critical Defense Housing Areas initially published in the FEDERAL REGISTER on October 27, 1951 (16 F. R. 10962).

With respect to the needed housing set out in the additional new defense housing programs and the supplemental programs to area programs previously published, the aids authorized by the Defense Housing and Community Facilities and Services Act of 1951 (Pub. Law 139, 82d Cong., 1st sess.) including a new and more liberal form of Federal Housing Administration mortgage insurance under Title IX of the National Housing Act, as amended, are available. The approval of an application under Housing and Home Finance Agency Regulation CR 3 is required as a condition to the approval by the Federal Housing Administration of an application for mortgage insurance under the provisions of Title IX of the National Housing Act, as amended. The requirements and restrictions imposed by or pursuant to CR 3 are in addition to all applicable requirements, conditions and restrictions imposed by or pursuant to said Title IX.

With respect to any application approved under HHFA Regulation CR 3 for an exception from residential real estate credit restrictions as being within the additional defense housing programs appearing below, residential real estate credit restrictions are suspended.

For the purpose of additional defense housing programs appearing below preference will be given to locations (within the geographical boundaries of the critical defense housing areas) in established communities nearest the defense activities, with consideration to be given to the availability of adequate community facilities and services.

AMENDMENTS TO DEFENSE HOUSING PROGRAMS PREVIOUSLY PUBLISHED

Amendment 1. The critical defense housing area in the defense housing program numbered 26 and designated as Columbus, Indiana, published at 16 F. R. 10962 (October 27, 1951), is amended to read as follows:

26. Camp Atterbury, Indiana, Area. (Bartholomew, Brown, Johnson, Morgan, Shelby, and Jackson Counties; the Townships of Clay, Washington, Marion, Sand Creek, and Jackson in Decatur County.)

Amendment 2. Area Program numbered 11 (Norfolk-Portsmouth, Virginia) appearing in the FEDERAL REGISTER of October 27, 1951 (16 F. R. 10962), is hereby amended by deleting from the program the 500 three or more bedroom rental units authorized therein, and by reducing the number of 2 bedroom rental units from 2,000 units to 1,525 units, and the maximum rents on 225 of such 1,525 two bedroom rental units is reduced from $70.00 to $50.00. The area program is further amended by requiring that 75 of said 225 two bedroom rental units at rents of $50.00 are to be located on the Portsmouth side of the Elizabeth River and 150 of said 225 two bedroom rental units at rents of $50.00 are to be situated on the Norfolk side of that river. A total of 1,300 of the 2,000 two bedroom rental units and all 500 sale units originally authorized in Program 11 as well as the 300 rental units authorized in Program 11-A are not affected by this amendment in any manner whatsoever.

Amendment 3. Area Program numbered 69 (Fort Knox, Kentucky) appearing in the FEDERAL REGISTER of November 28, 1951 (16 F. R. 11980) is hereby amended by reducing the number of 1 bedroom rental units from 25 to 11; by reducing the number of 2 bedroom rental units from 225 to 100; by reducing the number of 3 or more bedroom rental units from 50 to 20; by reducing the number of 2 bedroom sales units from 175 to 75; and by deleting from the program entirely the 25 three or more bedroom sales units previously authorized. The effect of this amendment is to reduce the total number of all rental units from 300 to 131 and the total number of sales units from 200 to 75 units.

[Docket No. G-1998]

EL PASO NATURAL GAS CO.

NOTICE OF APPLICATION

JULY 25, 1952.

Take notice that El Paso Natural Gas Company (Applicant), a Delaware corporation, address El Paso, Texas, filed on July 11, 1952 an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing it to acquire from West Texas Gas Company certain transmission pipeline facilities hereinafter described.

The facilities Applicant proposes to purchase consist of (1) an 8⅝-inch pipeline approximately 361,233 feet in length, extending from a point where said pipeline meets Applicant's 24-inch Dumas to Jal pipeline, near Umbarger, Texas, to and including the metering and delivery station through which gas is delivered to Southern Union Gas Company near Farwell, Texas; (2) approximately 22,055 feet of 8⅝-inch, 213,018 feet of 6⅜-inch, and 1,053 feet of 4½-inch pipeline extending from its intersection with Applicant's 24-inch Dumas to Jal pipeline near Amherst, Texas, to the intersection with the pipeline described in (1) above in Parmer County, Texas; and (3) appurtenances to the above described facilities.

Through these facilities, Applicant proposes to deliver an estimated maximum volume of 17,010 Mcf per day to Southern Union Gas Company in the third year of operation, and 5,496 Mcf per day to West Texas Gas Company in the third year for distribution to towns located along the route of the pipeline.

Estimated cost of the facilities is $308,000 and financing is proposed to be out of current working funds without additional financing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 13th day of August 1952. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY.
Secretary.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27254]

DRUMS, SHEET STEEL, FROM BIRMINGHAM, ALA., TO THE SOUTH

APPLICATION FOR RELIEF

JULY 25, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 920.

Commodities involved: Drums, sheet steel, galvanized or plain, shipping, consisting of sides in rolls with side seams not closed and tops and bottoms nested, carloads.

From: Birmingham, Ala.

To: points in southern territory.

Grounds for relief: Competition with rail and motor carriers and circuitous routes.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 920, Supp. 255.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] W. P. BARTEL,
Secretary.

CEMENT FROM POINTS IN COLORADO AND WYOMING TO TEXAS

APPLICATION FOR RELIEF

JULY 28, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to his tariff I. C. C. No. 3904.

Commodities involved: Cement and related articles, carloads.

From: Boettcher and Portland, Colo., and Laramie, Wyo.

To: Points in Texas.

Grounds for relief: Competition with rail carriers, circuitous routes, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3904, Supp. 81.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of

the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 27256]

SUPERPHOSPHATE FROM POINTS IN SOUTHERN TERRITORY TO TRENTON, MO.

APPLICATION FOR RELIEF

JULY 28, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1180.

Commodities involved: Superphosphate (acid phosphate), other than ammoniated, carloads.

From: Points in southern territory.

To: Trenton, Mo.

Grounds for relief: Circuitous routes and to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates; C. A. Spaninger, Agent, I. C. C. No. 1180, Supp. 20.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. [No. 31066]

RAILWAY EXPRESS AGENCY, INC.

INVESTIGATION OF AND HEARING ON NORTH DAKOTA INTRASTATE EXPRESS RATES AND CHARGES

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 23d day of July A. D. 1952.

It appearing, that a petition, dated June 6, 1952, has been filed by the Railway Express Agency, Incorporated, an express company transporting express matter as a common carrier in interstate commerce operating to, from, and between points in the State of North Dakota, averring that in Ex Parte No. 169, Increased Express Rates and Charges, 1949, 277 I. C. C. 249, and Ex Parte No. 177, Increased Express Rates and Charges, 1951, 283 I. C. C. 431, this Commission authorized certain increases in interstate express rates and charges, and revisions in classifications provisions, throughout the United States, that increases under such authorizations have been made; that by order dated January 24, 1952, in Ex Parte No. 177, the Commission authorized an additional charge of 6 cents per shipment on all less-than-carload rail express shipments moving at first-class rates and multiples thereof and at second-class rates and charges, which was established February 28, 1952; and that the Public Service Commission, State of North Dakota, by various orders issued on or before April 29, 1952, has refused to authorize or permit said petitioner to apply to the transportation of express, moving intrastate by railroad in North Dakota, increases in rates and charges corresponding to those approved for interstate application in the proceedings above cited, particularly to (1) bakery goods, (2) returned empty egg cases, and (3) class rates, such refusal being in the manner and to the extent alleged in the said petition of June 6, 1952, herein referred to:

It further appearing, that the said petition brings in issue express rates and charges made or imposed by authority of the State of North Dakota;

It further appearing, that said petitioner alleges that the intrastate express rates which it is required to maintain for the transportation of property moving intrastate by railroad in North Dakota as a result of such refusal by the Public Service Commission, State of North Dakota, cause undue and unreasonable advantage, preference, and prejudice as between persons and localities in intrastate commerce, on the one hand, and interstate commerce on the other hand, and undue, unreasonable, and unjust discrimination against interstate and foreign commerce;

It is ordered, That in response to the said petition, an investigation be, and it is hereby, instituted, and that a hearing be held therein for the purpose of receiving evidence from the respondent hereinafter designated and any other persons interested, to determine whether the express rates and charges of the Railway Express Agency, Incorporated, between points in North Dakota made or imposed by authority of the State of North Dakota cause undue or unreasonable advantage, preference, or prejudice between persons or localities in intrastate commerce, on the one hand, and interstate or foreign commerce, on the other hand, or any undue, unreasonable, or unjust discrimination against interstate or foreign commerce, and to determine what express rates and charges, if any, or what maximum or minimum or maximum and minimum express rates and charges shall be prescribed to remove the unlawful advantage, preference, or discrimination, if any, that may be found to exist;

It is further ordered, That the Railway Express Agency, Incorporated, be, and it is hereby, made respondent to this proceeding; that a copy of this order be served upon said respondent; and that the State of North Dakota be notified of this proceeding by sending copies of this order and of said petition by registered mail to the Governor of the said State and to the Public Service Commission, State of North Dakota, at Bismarck, N. Dak.;

It is further ordered, That notice of this proceeding be given to the public by depositing a copy of this order in the office of the Secretary of the Commission at Washington, D. C., and by filing a copy with the Director, Division of the Federal Register, Washington, D. C.;

And it is further ordered, That this proceeding be assigned for hearing at such time and place as the Commission may hereafter designate.

By the Commission, Division 1.

[SEAL] W. P. BARTEL, *Secretary.*

DEPARTMENT OF JUSTICE

Office of Alien Property

[Vesting Order 18961]

FREDERICK E. BRUHL

In re: Trust under will of Frederick E. Bruhl, deceased. D-28-6415.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That Charlotte Elizabeth Schmidt Schwarzbach and Johanna Margaret Prescher Kloss, whose last known address is Germany, on or since December 11, 1941, and prior to January 1, 1947, were residents of Germany and are and prior to January 1, 1947, were nationals of a designated enemy country (Germany);

2. That the children, names unknown, of Charlotte Elizabeth Schmidt Schwarzbach and the children, names unknown, of Johanna Margaret Prescher Kloss, who there is reasonable cause to believe on or since December 11, 1941, and prior to January 1, 1947, were residents of Germany, are and prior to January 1, 1947, were nationals of a designated enemy country (Germany);

3. That all right, title, interest and claim of any kind or character whatsoever of the persons identified in subparagraphs 1 and 2 hereof, and each of them, in and to the trust created under the will of Frederick E. Bruhl, deceased, is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by the aforesaid nationals of a designated enemy country (Germany);

4. That such property is in the process of administration by R. L. Anderson, 404 First National Bank Building, Macon, Georgia, Administrator, c. t. a., and Trustee, acting under the judicial supervision of the Court of the Ordinary of Bibb County, Georgia;

and it is hereby determined:

5. That the national interest of the United States requires that such persons be treated as persons who are and prior to January 1, 1947, were nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 25, 1952.

For the Attorney General.

LAURA M. H. WINKEL

In re: Estate of Laura M. H. Winkel, deceased. File F-28-31864.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That Emmi Wilhelmi, nee Winkel, and Anne Fresenius, whose last known address is Germany, on or since December 11, 1941, and prior to January 1, 1947, were residents of Germany and are, and prior to January 1, 1947, were nationals of a designated enemy country (Germany);

2. That the property described as follows: An undivided one-half interest in $8,960 on deposit with the Bank of New York and Fifth Avenue Bank, New York, New York, to the credit of Laura M. H. Winkel (deceased) pursuant to a judgment of the Supreme Court of New York County, New York, dated August 22, 1934, in the matter of Moscow Fire Insurance Company, of Moscow, Russia, and Paul Lucke, as sole surviving director of Moscow Fire Insurance Company, of Moscow, Russia, and conservator of its property, Plaintiffs, against Bank of New York and Trust Company, as agent or depositary of said Moscow Fire Insurance Company, of Moscow, Russia, and of the said Paul Lucke, as surviving director and conservator et al., Defendants, subject to any and all valid conservatory expenses, is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, and which is evidence of ownership or control by, the aforesaid nationals of a designated enemy country (Germany);

3. That such property is in the process of administration by Bank of New York and Fifth Avenue Bank, successor to Bank of New York and Trust Company, as agent or depositary of the Moscow Fire Insurance Company of Moscow, Russia, acting under the judicial supervision of the Supreme Court of New York County, New York;

and it is hereby determined:

4. That the national interest of the United States requires that the persons

identified in subparagraph 1 hereof be treated as persons who are and prior to January 1, 1947, were nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 25, 1952.

For the Attorney General.

ANNA L. SCHUTZE

In re: Estate of Anna L. Schutze, also known as Anna L. Blaes, nee Schutze, deceased. File No. D 66-1593.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.); and pursuant to law, after investigation, it is hereby found:

1. That Gustav August Schuetze, a/k/a August Gustav Schuetze, a/k/a August Schuetze; Friedrich August Schuetze, a/k/a Friedrich Schuetze; Martha Minna Niemann, nee Schuetze, a/k/a Martha Niemann; Otto Schuetze; Minna Frieda Banse, nee Schuetze, a/k/a Frieda Banse; Minna Schmidt, nee Schuetze; Emma Kopp, nee Schuetze; and Bertha Dorothea Jung, nee Schuetze, a/k/a Berta Jung, a/k/a Bertha Jung; whose last known address is Germany, on or since December 11, 1941, and prior to January 1, 1947, were residents of Germany and are, and prior to January 1, 1947, were nationals of a designated enemy country (Germany);

2. That all right, title, interest and claim of any kind or character whatsoever of the persons named in subparagraph 1 hereof in and to the estate of Anna L. Schutze, deceased, which is in the process of administration by Francis J. Mulligan, Public Administrator of New York County, New York, administrator, acting under the judicial supervision of the Surrogate's Court, New York City, New York, is property which is, and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by the aforesaid nationals of a designated enemy country (Germany);

and it is hereby determined:

3. That the national interest of the United States requires that such persons be treated as persons who are and prior to January 1, 1947, were nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 25, 1952.

For the Attorney General.

[SEAL] ROWLAND F. KIRKS,
Acting Director,
Office of Alien Property.

[Vesting Order 18964]

KATHERINA STARCHL

In re: Estate of Katherina Starchl, deceased. File No. D 28-13101.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That Stefania Olejniszak, nee Starchl, a/k/a Stefania Olejniczak, a/k/a Steffi Olejniszak, a/k/a Steffi Olejniczak, a/k/a Stephanie Olejniszak, a/k/a Stephanie Olejniczak, whose last known address is Germany, on or since December 11, 1941, and prior to January 1, 1947, was a resident of Germany and is, and prior to January 1, 1947, was a national of a designated enemy country (Germany);

2. That all right, title, interest and claim of any kind or character whatsoever of the person named in subparagraph 1 hereof in and to the estate of Katherina Starchl, deceased, which is in the process of administration by Sheldon Brandenburger, administrator, acting under the judicial supervision of the Superior Court of the State of California in and for the City and County of San Francisco, is property which is, and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That the national interest of the United States requires that such person be treated as a person who is and prior to January 1, 1947, was a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on July 25, 1952.

For the Attorney General.

[SEAL] ROWLAND F. KIRKS,
Acting Director,
Office of Alien Property.

CIVIL AERONAUTICS ADMINISTRATION—Con. Page
Washington National Airport; aircraft rules, landing and take-off 7181

CIVIL AERONAUTICS BOARD:
Accidents and missing aircraft:
Investigation of accident occurring at International Airport, Miami, Fla 7438
Report of aircraft accident 7111
Air carriers:
Accidents and missing aircraft, investigation of. *See* Accidents and missing aircraft.
Irregular:
See also Irregular air carrier and off-route rules.
Investigation of air services by large irregular carriers and irregular transport carriers 7438
Air taxi operators; classification and exemption. *See* Economic regulations.
Air traffic rules; traffic patterns:
Juneau (Alaska) Airport (CAA rules) 7533
Washington National Airport (CAA rules) 7178
Economic regulations:
See also Procedural regulations.
Certificates of public convenience:
Foreign air transportation; business name of air carrier 7810
Interstate and overseas air transportation; business name of air carrier 7809
Classification and exemption:
Air freight forwarders:
See also International air freight forwarders.
Business name of air carrier 7812
Air taxi operators:
Business name of air carrier 7814
Scope of service; repeal or modification of provisions respecting operations over certificated helicopter routes, proposed rule making:
Correction 7209
Extension of time for submitting comments 7549
Alaskan air carriers, business name 7811
Large irregular air carriers; business name 7811
International air freight forwarders, limitations and conditions; business name of air carrier 7813
Operations pursuant to exemption authority 7137
Correction of serial number and part headnote 7209
Exemption authority. *See* Economic regulations.
Hearings, investigations, etc.:
Accidents, aircraft and missing aircraft; investigation and report of. *See* Accidents and missing aircraft.
Companies and cases, list of. *See list at end of this agency.*
Helicopter routes, scope of service of air taxi operators over. *See* Economic regulations.
Irregular air carrier and off-route rules:
Aircraft requirements; limitations for IFR operations, dual controls 7071
Definition, crew member; proposed 7096
Flight time limitations for pilots on large aircraft, deadhead transportation to be computed as "on duty" and not as "time aloft"; proposed 7096
Mail rate proceedings; rules of practice. *See* Procedural regulations.
Operation rules, general:
Aircraft requirements (CAA rules):
ICAO modifications of identification marks; deletion 7419
Identification marks and airworthiness classification marks; deletion 7419
Operating limitations 7419
Maintenance (CAA rules); inspections:
Annual 7675
Periodic 7676
Organization, central and field; Bureau of Safety Regulation 7825
Procedural regulations:
Economic regulations. *See* Economic regulations, *above.*
Rules of practice in economic proceedings, revision:
Consolidation or contemporaneous consideration of proceedings; filing of motion 7420
Hearings, participation of persons not parties 7040, 7041
Mail, procedure for fixing temporary rates 7040
Memoranda in opposition or support, deletion 7420

CIVIL AERONAUTICS BOARD—Continued — Page
- Reports, aircraft accidents. *See* Accidents and missing aircraft.
- Rules of practice. *See* Procedural regulations.
- Scheduled air carriers:
  - Certification, operating. *See* Interstate air carrier certification and operation rules.
  - Interstate air carrier certification and operation rules; proposed:
    - Flight altitudes; establishment of lower "over-the-top" flight operations — 7187
    - Flight time limitations for long distance operations — 7949
  - Operations outside continental limits of United States, flight time limitations for pilots not regularly assigned; extension of special air regulation (SR–381), proposed — 7790
  - Operations within continental limits of United States; flight altitudes, establishment of lower "over-the-top" operations, proposed — 7187

Hearings, investigations, etc.:
- Aerovias Interamericanas de Panama; service from Panama to Florida — 7128
- Air freight rate investigation; directional rates — 7681, 7755
- Braniff Airways, Inc — 7255
- Canada, Province of Saskatchewan; Department of Public Health Air Ambulance Service — 7681
- Lake Central Airlines, Inc — 7708
- Mid-Continent Airlines — 7400
- Nationwide Airlines, Inc — 7708
- North Central Route investigation case — 7400, 7681, 7755
- Ozark Airlines — 7400
- Northwest Airlines, Inc.; Trans-Pacific Operations — 7308
- Pan American-Grace Airways, Inc — 7255
- U. S. Airlines, Inc.; enforcement proceeding — 7794

CIVIL DEFENSE ADMINISTRATION. *See* Federal Civil Defense Administration.

CIVIL SERVICE COMMISSION:
- Appointment:
  - Reappointment after reduction in force. *See* Reductions in force.
  - To positions excepted from competitive service. *See* Exceptions from competitive service.
- Exceptions from competitive service; positions excepted from examination (Schedule A):
  - Air Force Department; librarian, recreation leader and recreation supervisor, until December 31, 1956 — 7570
  - Defense Manpower Administration. *See* Labor Department.
  - Justice Department, United States Marshal in Virgin Islands — 7713
  - Labor Department, Defense Manpower Administration; Labor Management Manpower Policy Committee:
    - One administrative officer to be executive assistant to Labor members of Committee — 7067
    - One administrative officer to be executive assistant to Management members of Committee — 7067
- Holiday pay regulations. *See* Pay regulations.
- Hospitals, Government:
  - Exclusion from provisions of Federal Employees Pay Act and Classification Act:
    - Chaplain intern — 7441
    - Chaplain resident — 7441
    - Chaplain student intern — 7441
  - Stipends, maximum:
    - Chaplain intern, St. Elizabeths Hospital — 7441
    - Chaplain resident, St. Elizabeths Hospital — 7441
    - Chaplain student intern, St. Elizabeths Hospital — 7441
- Night pay differential. *See* Pay regulations, general compensation rules.
- Overtime pay. *See* Pay regulations; general compensation rules.
- Pay regulations:
  - General compensation rules:
    - Longevity step increases, effect on rate of grade for employee who is reemployed, transferred, reassigned or demoted — 7109
    - Night pay; computation of night pay differential — 7381
    - Overtime employment, computation of; leave with pay — 7381
    - Reduction in grade by reason of post audit by Commission, effect on rate of grade — 7109

CIVIL SERVICE COMMISSION—Continued — Page
- Pay regulations—Continued
  - Government hospitals; stipends for trainees. *See* Hospitals, Government.
  - Holiday pay; identification of holidays — 7381
- Permanent employees, status after reappointment; retention preference regulations for use in reductions in force — 7685
- Reductions in force, retention preference regulations for use in; reappointment priority, status after reappointment — 7685
- Travel and transportation expenses of civilian personnel when transferred from one official station to another for permanent duty; means of shipment (Executive Order 10381) — 7205

COAST GUARD:
- Authority, delegation from Secretary of the Treasury to Commandant, United States Coast Guard; with respect to physical disability retirement cases — 7399
- Commandant, United States Coast Guard, delegation of authority to, from Secretary of the Treasury, with respect to physical disability retirement cases — 7399
- Emergency, regulations applicable to certain vessels:
  - Licensed officers and certificated men; revocation — 7495
  - Waivers of navigation and inspection laws; employment of aliens as watch officers on United States merchant vessels, revocation — 7495
- Load lines, subdivision for passenger vessels engaged on foreign and coastwise voyages; auxiliary steering apparatus, cancellation — 7628
- Marine engineering:
  - Boilers:
    - Construction of. *See* Construction (boilers).
    - Low pressure heating boilers:
      - Cast iron heating boilers:
        - Fittings and appliances — 7652
        - Hydrostatic tests, inspections and stamping — 7652
      - Steel plate heating boilers:
        - Areas to be stayed — 7650
        - Computation and design; maximum allowable pressure and minimum thickness of cylindrical shell and dished heads — 7650
        - Fittings and appliances — 7651
        - Hydrostatic tests, inspection and stamping — 7651
        - Valves, safety and relief; installation of — 7651
        - Welded boilers — 7650
  - Construction (boilers):
    - Combustion chambers and tube sheets of fire-tube boilers; detail requirements — 7646
    - Cylindrical shells:
      - Castings, steel; quality factors for — 7636
      - Computations — 7634
      - Materials — 7633
      - Maximum allowable stress — 7635
      - Pipe shells:
        - Electric-resistance-welded — 7636
        - Seamless — 7636
      - Shells, cylindrical; pierced for tubes, cancellation — 7636
    - Domes and steam chimneys — 7637
    - Furnaces and flues:
      - Materials — 7646
      - Plain or corrugated furnaces; detailed requirements — 7646
    - Heads:
      - Dished — 7638
      - Flat — 7639
    - Mountings and attachments, boiler — 7648
    - Openings:
      - Access and inspection — 7640
      - Nozzle and reinforcements — 7641
    - Procedure and general requirements:
      - Boilers:
        - Approval, conditions for — 7633
        - Auxiliary, donkey, and low-pressure — 7633
        - Packaged, automatically controlled — 7633
        - Plans — 7633
      - Definitions — 7633
    - Shell joints — 7636
    - Stays and reinforcements:
      - Definitions; staybolt — 7643
      - Materials — 7644
      - Requirements, detail — 7644

COAST GUARD—Continued — Page
- Marine engineering—Continued
  - Construction (boilers)—Continued
    - Stays and reinforcements—Continued
      - Workmanship; holes for screw staybolts — 7644
      - Superheaters, headers, water walls, and economizers — 7648
      - Surfaces required to be stayed or reinforced; definitions — 7643
      - Tube sheets or water-tube boilers — 7645
      - Tubes, boiler and superheater:
        - Computations — 7647
        - Definitions — 7647
        - Materials and workmanship — 7647
    - Installations, tests, inspections, repairs, etc.; steering apparatus — 7672
    - Materials; plate, bars, shapes, castings, forgings, pipe, tubes, etc., of iron, steel, copper, aluminum and alloys — 7628
    - Piping systems, pumps, refrigeration machinery, and fuel tanks:
      - Pumping arrangements and piping systems — 7665
      - Fuel oil service systems; pumps — 7667
      - Lubricating oil system — 7667
      - Pipes, sounding — 7667
      - Piping:
        - Bilge and ballast — 7665
        - Blow off; maximum allowable pressure — 7665
        - Boiler feed — 7665
        - Pumps, bilge — 7666
      - Refrigeration systems:
        - Design pressure — 7667
        - Scope — 7667
        - Small portable self-contained units, cancellation — 7667
      - Requirements, detail:
        - Design pressures and thickness of pipes — 7658
        - Expansion and flexibility — 7659
        - Installation — 7663
        - Joints and flange connections — 7660
        - Material — 7657
        - Pressures and temperatures, variations in — 7660
        - Valves and fittings — 7660
    - Unfired pressure vessels; design and construction, pressure-relief devices, etc — 7652
    - Welding, arc and gas, and brazing:
      - Tests and inspection; spot examination of welded joints — 7671
      - Welding, arc and gas:
        - Arc welding, submerged; procedure qualification — 7668
        - Definitions — 7668
        - Detail requirements; types of joints for material of unequal thickness — 7668
        - Joints; longitudinal joints of Class III welded pressure vessels — 7668
        - Nozzle connections, welded — 7669
        - Piping, welded — 7670
        - Plan approval — 7668
        - Preheating and stress relieving — 7669
        - Scope — 7668
        - Seal welding and tack welding — 7669
- Merchant marine officers and seamen:
  - Aliens, employment of, as watch officers on United States merchant vessels. *See* Waivers of navigation and vessel inspection laws and regulations during emergency.
  - Licensed officers and certificated men regulations during emergency; revocation — 7495
- Seamen. *See* Merchant marine officers and seamen.
- Specifications, engineering equipment; boilers, auxiliary, automatically controlled, packaged for merchant vessels — 7673
- Tank vessels, machinery, main and auxiliary; steering apparatus — 7627
- Vessels in various waters (bays, sounds, lakes, Great Lakes, rivers, ocean and along coast):
  - Bays, sounds and lakes other than the Great Lakes, boats, rafts, bulkheads, and lifesaving appliances; steering apparatus, existing and new installations, cancellation — 7673
  - Great Lakes, boats, rafts, bulkheads, and lifesaving appliances; steering apparatus, existing and new installations, cancellation — 7672

COAST GUARD—Continued — Page

  - Ocean and coastwise, boats, rafts, bulkheads, and lifesaving appliances; steering apparatus, existing and new installations, cancellation — 7672
  - Rivers, boats, rafts, bulkheads, and lifesaving appliances; steering apparatus, existing and new installations, cancellation — 7673
- Waivers of navigation and vessel inspection laws and regulations during emergency; aliens, employment of, as watch officers on United States merchant vessels, revocation — 7495

COMMERCE DEPARTMENT:
- *See Census Bureau.*
- *Civil Aeronautics Administration.*
- *Civil Aeronautics Board.*
- *Foreign and Domestic Commerce Bureau.*
- *Maritime Board*
- *National Production Authority.*
- *Patent Office.*
- *Public Roads Bureau.*
- Organization and functions:
  - Administrative Officer:
    - Director of Office of Administrative Services, authorization to sign certain documents as Administrative Officer for Commerce Department — 7910
    - Documents and papers relating or referring to Chief Clerk and Superintendent shall be deemed to relate or refer to Administrative Officer — 7910
    - General Counsel; substitution of term "General Counsel" for "Solicitor" — 7910

COMMITTEES, BOARDS, ETC.:
- Army Ordnance Integration Committees; voluntary plans for formation of. *See* Defense Production Administration.
- International Joint Commission; hearings on matters affecting Lake Ontario and St. Lawrence River. *See* International Joint Commission.
- Patent Compensation Board, Atomic Energy Commission; hearings. *See* Atomic Energy Commission.
- Whaling Commission, International. *See* International Whaling Commission.

COMMODITY CREDIT CORPORATION:
- Authority, delegation of, to chairmen and acting chairmen of PMA county committees as contracting officers with respect to purchase of hay under the Drought Emergency Program—1952 — 7866
- Barley, loan and purchase agreement program, 1952-crop; support rates for approved warehouse-storage at other than designated terminal markets — 7405
- Cotton:
  - American-Egyptian purchase program, 1952; purchase rates for Amsak and Pima 32 varieties — 7109
  - Price support program, 1952; schedules of basic loan and purchase rates:
    - For farm-stored cotton, by counties — 7532
    - For warehouse-stored cotton, by warehouse locations — 7527
- Flaxseed, loan and purchase agreement program, 1952-crop; support rates for flaxseed in approved warehouse-storage at other than designated terminal markets — 7525
- Food commodities acquired through price support programs; sales of certain commodities at fixed prices:
  - Domestic price list, for August — 7513
  - Export price list, for August — 7513
- Grains, handling and storage of, under Uniform Grain Storage Agreement; price control regulation. *See main heading* Price Stabilization, Office of.
- Hay; Drought Emergency Program—1952, authority with respect to purchase under — 7866
- Rice, loan and purchase agreement program, 1952-crop; support rates for various classes of rough rice — 7323
- Wheat, loan and purchase agreement program, 1952; support rates:
  - At designated terminal markets — 7363
  - For approved warehouse storage at other than designated terminal markets — 7363

COMMODITY CREDIT CORPORATION—Continued Page
Wool; price support program, 1952:
Pulled wool 7267
Shorn wool 7261

COMMODITY EXCHANGE AUTHORITY (including Commodity Exchange Commission):
General regulations under Commodity Exchange Act; contract market record keeping, execution of transactions (proposed rule making):
Competitive execution required; exception 7905
"Transfer" or "office trades", and exchange of futures; requirements 7905

CONSTRUCTION:
Controlled Materials Plan. *See* National Production Authority.
Farm ownership and farm housing programs respecting construction and repair. *See* Farmers Home Administation.
Power development in St. Lawrence River. *See* International Joint Commission.
Priority orders, etc. *See* National Production Authority.
Ships, construction, reconditioning, or reconstruction, determination of profit in contracts for. *See* Maritime Administration.

CONTRACTS, GOVERNMENT:
See also Procurement.
Renegotiation of. *See* Renegotiation Board.
Ships, determination of profit in contracts for construction, reconditioning, or reconstruction of. *See* Maritime Administration.

CONTROLLED MATERIALS PLAN. *See* National Production Authority.

CUBA; radio regulations respecting. *See* Federal Communications Commission.

CUSTOMS BUREAU:
Air commerce regulations; international airports, listed:
Florida, Fort Lauderdale; Broward County Airport, designation 7594
Minnesota, Duluth; Sky Harbor Seaplane Base, revocation 7594
Canada, customs relations with; joint usage of customs seals for carload shipments of merchandise between ports of one country via territory of the other 7042
Chlorophyll and chlorophyll derivatives, in water-soluble forms; change in tariff classification 7754
Chopping blocks, Chinese; prospective change in tariff classification 7706
Contiguous foreign territory, customs relations with; customs seals for carload shipments of in-transit merchandise between United States and Canada:
Between ports in United States through Canada; procedure 7042
Through United States between ports of Canada; procedure 7042
Cork parts of artificial bait; prospective change in tariff classification 7754
Dowels, rough dowels and rough rounds; prospective change in tariff classification 7551
Duties, liquidation of. *See* Liquidation of duties.
Entry of imported merchandise:
Invoices, contents of; additional information required on certain classes of merchandise:
Fur products and furs 7139
Glassware and glass articles 7625
Release of merchandise; blanket release order, for shipments covered by blanket carrier's certificate 7835
Requirements on entry; separate entries, provision for, on importations arriving under consolidated immediate transportation without appraisement entry 7885
Right to make entry, evidence of; blanket carrier's certificate for shipments arriving at port during time specified therein 7885
Financial and accounting procedure respecting procurement and kind of car, compartment and package seals; green and yellow seals for carload shipments of merchandise in transit between United States and Canada 7043

CUSTOMS BUREAU—Continued Page
Furs and fur products, imported:
Invoices; additional information required concerning origin, composition, etc 7139
Marking requirements; labeling to indicate composition 7140
Glassware and glass articles, certain imported; additional information required on customs invoices respecting 7625
International airports. *See* Air commerce regulations.
Invoices for certain imported merchandise. *See* Entry of imported merchandise.
Liquidation of duties:
Procedure for computation of duties; ad valorem rates applied to values in even dollars for mail and baggage entries, as with all formal entries 7111
Tariff classification of certain imports:
Chlorophyll and chlorophyll derivatives, in water-soluble forms; change in classification 7754
Chopping blocks, Chinese; prospective change in classification 7706
Cork parts of artificial bait; prospective change in classification 7754
Dowels, rough dowels and rough rounds; prospective change in classification 7551
Repliqued articles; change in classification 7512
Marking of imported articles; fur products, labeling to indicate composition 7140
Repliqued articles; change in tariff classification 7512
Seals, customs, for carload shipments of merchandise between United States and Canada; kind, procurement, procedure for use, etc 7042
Transportation in bond and mechandise in transit:
Baggage, domestic, shipment in bond through foreign territory; forwarding in sealed car or compartment, seals for 7043
Sealing conveyances and compartments, general; reference to provisions for carload shipments in transit through United States between ports of Canada 7043

D

DAYS OF OBSERVANCE, proclamations respecting. *See* Presidential documents.

DEFENSE DEPARTMENT:

EUROPE, SPECIAL REPRESENTATIVE FOR; Germany, United States High Commissioner to act as representative of Special Representative for Europe (Executive Order 10380) 7107

EXECUTIVE ORDERS. *See* Presidential documents.

EXPLOSIVES, transportation of. *See* Interstate Commerce Commission.

F

FARM CREDIT ADMINISTRATION:
- Administrative officers, functions of:
  - Governor; authority of Deputy Governor and other designated officials to act in absence of 7607
  - Production Credit Commissioner; authority and order of precedence of Deputy Commissioner and Assistant Deputy Commissioners to act in absence of Commissioner 7438
- Banks for cooperatives; loan interest rates and security:
  - "Escalator" clause in loan agreements with respect to interest rates 7177
  - Renewals and extensions; interest rates 7175, 7177

FARMERS HOME ADMINISTRATION:
- Disaster loan program:
  - Eligibility and certifications; certification by applicant and County Committee 7877
  - Forms and routines for loans; application and certifications 7877
- Farm housing loans and grants, respecting construction and repair:
  - Performing farm development. *See under* Farm ownership loans.
  - Revocation 7441
- Farm ownership loans:
  - Basic regulations, respecting loans; loan limitations, average values of farms and investment limits for purposes of Title I of Bankhead-Jones Farm Tenant Act:
    - Colorado 7570
    - Idaho 7570
    - Kansas 7570
    - North Carolina 7570
    - Ohio 7570
    - Pennsylvania 7570
  - Construction and repair respecting farm ownership and farm housing programs; performing farm development 7441
    - Borrower method, farm development performed by 7445
    - Changes in farm development plan, on Form FHA-643, effecting of 7445
    - Contract method, farm development performed by 7444
    - General provisions 7444
    - Inspection of farm development work 7445
- Production and subsistence loans:
  - Approval authority, of State Directors, etc 7801
  - Policies; eligibility for loans, purposes, etc 7801
    - Annual loans, provisions for making 7805
    - Applicants, selection of 7802
    - General provisions 7802
    - Requirements and limitations 7804
    - Security policies 7804
    - Terms of loans 7803
    - Use of loan funds 7802
  - Processing of loans 7805
    - Approval or rejection of loans 7806
    - Closing loans, provisions for 7806
    - Definitions 7805
    - Forms and routines for loans 7805
    - General 7805
    - Use of loan funds, provisions for revision 7807
- Water facilities loans; approval authority 7807
  - Authority of State Directors 7807
  - Redelegation of loan approval authority by State Directors 7807

FEDERAL BUREAU OF INVESTIGATION. *See* Justice Department.

FEDERAL CIVIL DEFENSE ADMINISTRATION:
- Seal, official; description and uses 7390

FEDERAL COMMUNICATIONS COMMISSION:
- Aeronautical services:
  - Aircraft stations:
    - Air carrier aircraft stations; frequency 3023.5 kc available to air carrier aircraft only where VHF is not available or service is suspended, proposed rule making 7511
    - 3105 kc available until March 15, 1953 7512
    - Authorized frequencies in band 415 to 490 kc for, and use of, aircraft stations using telegraphy 7370
    - Distress, frequencies 405 to 535 for use in case of, by aircraft stations 7370
    - Private aircraft stations, frequencies available; 3023.5 kc (or 3105 kc until March 15, 1953) assigned as calling and working frequency, proposed rule making 7512
  - Airdrome control stations, service to be rendered; maintenance of listening watch during hours of operation, aircraft calling and working frequencies to be used for, proposed rule making 7512
  - Civil aviation (including listening ground watches) use of frequency 3105 kc by, to be discontinued; proposed rule making 7512
  - Meteorological broadcasts; reassignment of certain frequencies to provide for use of certain aeronautical mobile (R) service frequencies for, proposed 7511
  - Mobile aeronautical (OR) and (R) services:
    - Definition of frequencies in bands allocated to OR and R services 7511
    - Frequencies in listed bands to be assigned only in accordance with Atlantic City table of frequency allocations, proposed rule making:
      - OR aeronautical mobile bands, certain, frequencies in, from 3025 kc to 18,030 kc, effective August 15, 1952 7127, 7152
      - R aeronautical mobile bands, certain, frequencies from 2850 kc to 17,970 kc, effective March 15, 1953 7549
    - Frequency 3023.5 kc in R and OR bands, use of, by aircraft and for communication with airdrome control stations; proposed rule making 7511
    - Use of certain aeronautical mobile (R) service frequencies for meteorological broadcasts, proposed 7511
- Alaska; radio stations other than amateur and broadcast:
  - Fixed public service:
    - Communication from non-Government to Government and between non-Government stations, frequencies for 7370
      - Rescission of prior provisions respecting 7370
    - Communication from non-Government to Government stations, frequencies for; rescission 7370
    - Non-Government stations, frequencies for; rescission 7370
  - Public coastal service; communication with ship station, calling and working frequencies for, use of frequencies 416 to 438 kc 7370
- Amateur radio service:
  - Canada and United States, convention between, relating to radio operation. *See* United States.
  - Emergencies, operation in; proposed rule making 7097
    - Communication bands for use in emergencies 7098
  - Frequencies and emissions, allocation of frequencies; proposed rule making:
    - Amateur emergency communications bands 7098
    - Exclusive calling and answering frequencies; list of band segments reserved for, and prescribed use of 7097
  - Portable and mobile stations; requirements for portable and mobile operation within areas under jurisdiction of foreign governments 7819
  - Special conditions; operation in emergencies, proposed rule making 7097
  - United States and Canada, convention between, relating to operation by citizens of either country of certain radio equipment or stations, effective May 15, 1952, (Appendix 4) 7820
- Authority, delegation of. *See* Organization.
- Canada:
  - Assignment of frequencies to broadcast stations in; changes in list modifying appendix to North American Regional Broadcasting Agreement 7826

FEDERAL COMMUNICATIONS COMMISSION—Con. Page
- Canada—Continued
  - Convention between United States and Canada, (Article III), relating to operation by citizens of either country of certain radio equipment or stations (effective May 15, 1952) 7820
- Civil aviation, use of frequency 3105 kc by, to be discontinued; proposed rule making 7512
- Civil defense. *See* Emergencies.
- Coastal stations. *See* Maritime radio services: land stations.
- Common carrier regulations for telephone and telegraph companies. *See* Telephone and telegraph companies.
- Cuba, Havana, leased facilities service to; hearing respecting increased charges for tickers furnished by Western Union Telegraph Co., in connection with service 7316
- Delegation of authority. *See* Organization.
- Educational broadcast stations. *See* Radio broadcast services.
- Emergencies:
  - Communications emergency; delegation of authority to Regional Managers, and Chiefs of Field Engineering and Monitoring Bureau and Field Operating Division to declare state of general communications emergency 7099
  - Operation of amateur stations in emergencies and participation of amateurs 7097
- FM broadcast stations. *See* Radio broadcast services.

      - R frequency bands, certain, from 2850 kc to 17,970 kc, effective March 15, 1952, to be assigned only in accordance with Atlantic City table; proposed rule making 7549
    - Coast stations operating on frequencies 4140, 6210, 8280, 12,420, and 16,560 kc, deletion of authority for, effective June 3, 1953; proposed rule making 7351

FEDERAL COMMUNICATIONS COMMISSION—Con. Page

Frequency allocations and radio treaty matters; allocation assignment and use of radio frequencies, table of frequency allocations—Continued
Atlantic City (1947) frequency allocations table and radio regulations, allocations in accordance with—Continued
Coast telegraph station assignments, non-government, transfer of, to bands between 4 and 20 mc stipulated in Geneva agreement; proposed rule making ---- 7354
Deletion of existing coast telegraph assignments not in accordance with Geneva agreement, proposed ---- 7355
International frequency list (new); tentative list of assignments for frequencies in (proposed) ---- 7355
Temporary authorizations, conditions for issuance of, proposed ---- 7355
Frequencies listed (Cairo-Atlantic City-FIAR-FCC table of frequency allocations); changes in assignments, proposed ---- 7510
Maritime mobile service, stations in; availability of certain frequencies in bands from 4238 kc to 17,290 kc, October 1, 1952, for use only in accordance with Atlantic City table, proposed rule making ---- 7096
Ship radiotelephone stations; frequencies in certain bands from 4115 kc to 16,530 kc to be available only for use of, in accordance with Atlantic City table, June 3, 1953, proposed rule making ---- 7127
Ship telegraph service:
Authorization of use by ship telegraph stations for calling, of frequencies between 2089 and 2093 kc; proposed rule making ---- 7510
Frequencies in certain bands from 4177 kc to 16,748 kc, to be available only for use as ship telegraph calling frequencies, in accordance with Atlantic City table, effective June 3, 1953; proposed rule making ---- 7096
Hawaii, common carrier fixed stations; allocation of frequency bands 76–88 mc and 98–108 mc for use of, in inter-island communication ---- 7150
International frequency list (new); tentative list of assignments for frequencies in, proposed ---- 7355
Hawaii, Territory of:
Allocation of frequency bands 76–88 mc and 98–108 mc to fixed services, for inter-island communications only ---- 7150
Frequencies 472 kc and 22,509 kc available for assignment to coast stations in ---- 7370
Hearings, orders, etc.; list of names of companies and stations, *see list at end of this agency.*
Industrial, scientific, and medical service, operation without license:
Industrial heating equipment:
Field intensity, measurement of ---- 7092
Maximum field intensity at one mile; measurements made along radials ---- 7093
Operation outside of assigned frequency bands ---- 7092
Location of industrial heating equipment; defining of ---- 7092
Miscellaneous equipment ---- 7093
International agreements relating to radio in which United States participates:
Frequencies, North America; assignment of frequencies to foreign broadcasting stations in. *See* North American Regional Broadcasting Agreement.
New international frequency list, tentative list of assignments for frequencies in ---- 7355
Leased facilities services, including interstate and to Havana, Cuba; hearing respecting increased charges for tickers furnished by Western Union Telegraph Co ---- 7316
Lifeboats, liferafts, etc., radio equipment for; exception with respect to operating controls requirements, proposed ---- 7154
Maritime radio services:
Land stations, coastal:
Assignment of frequencies to coast and ship stations in accordance with Geneva Agreement (1951), in bands 14–150, 150–200, and 200–535 kc and between 10 kc and 25,000 kc ---- 7369

FEDERAL COMMUNICATIONS COMMISSION—Con. Page

Maritime radio services—Continued
Land stations, coastal—Continued
Coast stations on inland waterways. *See* Inland waterways.
Inland waterways:
Coast or ship telegraph stations on inland waterways; deletion of certain currently assignable frequencies, proposed ---- 7153
Modification of licenses of certain coast stations serving inland waterways, to delete authorization of use of coast telegraph frequencies between 2.2–12 mc, effective November 1, 1952, proposed ---- 7164
List of licensees affected ---- 7164
Operating requirements, general; radio telegraph watch by coast stations, use of frequencies 405 to 535 kc and 90 to 160 kc ---- 7369
Station requirements, general; facilities required for public coast stations, assignment of frequencies 405 to 435 kc for use of coast stations employing telegraphy ---- 7369
Telegraphy, use of, by coast stations:
Coast stations on inland waterways; modification of licenses of, and deletion of certain currently assignable frequencies, proposed ---- 7153, 7164
Deletion of authority for operation of coast stations on frequencies 4140, 6210, 8280, 12,420, and 16,560 kc, effective June 3, 1953; proposed rule making ---- 7351
Frequencies assignable:
Consideration of assignment of frequencies 448, 452, 454, and 462 kc in relation to interference to operation of superheterodyne type of radio receiver; deletion ---- 7370
Frequencies 161 kc–454 kc assignable only if previously included in assigned frequencies of coast stations; deletion of provisions respecting ---- 7370
Great Lakes or inland waters, communication with ship stations on:
Exclusive use of frequency 2274 kc; proposed deletion ---- 7154
Restriction respecting use of frequency 410 kc; deletion ---- 7370
List of assigned frequencies:
Available for assignment:
Frequencies 472 kc and 22,509 kc for use in Hawaii ---- 7370
Frequencies 486 kc and 128.95 kc, for use in Puerto Rico ---- 7370
Frequency 482 kc for use in Great Lakes area ---- 7370
Various frequencies between 112.85 and 22,569 kc to coast stations located in seacoast area (Atlantic, Pacific, and Gulf of Mexico) of continental United States ---- 7370
Deletion of certain frequencies from list:
Between 2274 and 11,040 kc; proposed rule making ---- 7154
Frequencies 5555, 5560 and 5565 kc, proposed deletion ---- 7511
From 105 to 484 kc, and notes respecting ---- 7370
Mississippi River area, coast stations located in, exclusive use of frequency 3030 kc by; proposed deletion ---- 7154
Temporary authorization of assignment of additional frequencies within bands 10 kc and 25,000 kc ---- 7370, 7548
Use of frequency 8570 kc by coast stations under certain prescribed conditions; proposed deletion ---- 7154
Frequencies for calling; use of frequencies 405 to 535 kc and 90 to 160 kc ---- 7370
Frequencies for working; transmission on telegraph working channels within bands 110 to 150 kc and 415 to 490 kc ---- 7370
International frequency list (new), tentative list of assignments for frequencies in ---- 7355

Watches, general purpose:
Watch on 143 kc; use of frequencies in band 90 to 160 kc 7370
Watch on 500 kc; use of frequencies in band 405 to 535 kc 7370
Meteorological broadcasts; reassignment of certain aeronautical mobile (R) service frequencies for, proposed 7511
North American Regional Broadcasting Agreement; lists of changes in assignments for stations in Canada 7826
Organization and delegations of authority:
Authority, delegation of, to Regional Managers and Chiefs of Field Engineering and Monitoring Bureau and Field Operating Division to declare state of general communications emergency 7099
Public information; certified copies, requests for, and costs, treatment of requests from foreign governments and residents of foreign countries 7758
Practice and procedure:
Applications of cities for television channels, list of, arranged according to priorities in temporary processing procedure supplements 7556
Radio licenses, applications and proceedings affecting:
Action on applications:
Renewal applications, operation pending action on 7290
Temporary extension of station licenses; supersedure 7290
Filing of applications and description of forms:
Application for license following construction permit:
Form 341 (Noncommercial educational FM broadcast station license) 7601
Redesignation 7601
Application for station license where no construction permit is required:
Form 341 (Noncommercial educational FM broadcast station license, application for), when it must be used 7601
Redesignations 7601
Authority to construct a new station or make changes in existing station, broadcast services; Form 340 (Noncommercial educational FM broadcast station) 7601
Modification of license, broadcast and nonbroadcast, application for:
Form 301 (Application for authority to construct new broadcast station or make changes in existing station, revised March 21, 1952); paragraph 10, section IV, deleted 7495
Form 340 (Application for authority to construct or make changes in noncommercial educational FM broadcast station), when used 7601
Redesignations 7601
Renewal of license, broadcast and nonbroadcast, application for:
Form 303 (Application for renewal of broadcast station license); instruction respecting completion of form and deletion of paragraph 10, section IV 7495
Form 311 (Renewal of international facsimile, or experimental broadcast station license, application for); use of 7601
Form 342 (Renewal of noncommercial educational FM broadcast station license) 7601
Redesignations 7601
Voluntary assignment or transfer of control, broadcast, application for:
Form 314 (Application for consent to assignment of radio broadcast station construction permit or license); instruction respecting completion of form and deletion of paragraph 10, section IV 7495

Pencils and pens, mechanical; sales of 7045

INTERNATIONAL TRADE, OFFICE OF—Continued Page
Export control—Continued
Licenses—Continued
Individual licenses; how to file an application for export license, information required:
Availability of material to be exported 7719
Inquiries and correspondence 7448
Project licenses; special (SP):
Commodity requirements for other than petroleum projects or programs 7720
Commodity requirements for petroleum projects or programs 7720
Licensing policies and related special provisions:
Commodities, certain, special provisions for; evidence of availability 7719
Export licensing general policy, commodities subject to; deletion of cattle, calf, and kip skins, dry 7719
Ferrous or nonferrous commodities:
Copper refinery shapes 7448
Zinc scrap, renumbered 7448
Machinery and parts, special provisions for; automotive replacement parts, additional application requirements 7719
Past participation in exports for certain commodities; cobalt-chromium dental alloys 7448
Time schedules, supplement 1, for submission of applications for export licenses 7448, 7720
Positive List of Commodities and related matters:
Appendix A, Positive List of Commodities 7182, 7451, 7571, 7927
Additions, deletions, or changes of commodities in listed categories:
Calf skins, dry 7720
Castor oil, sulfonated 7182
Cattle skins, dry 7720
Chains, brass and bronze 7571
Cooking, kitchen, and hospital utensils, of copper, brass, bronze, etc 7571
Copper-armored sisalkraft 7720
Hardware, basic; screws, hinges, furniture, car, and marine hardware, etc 7571
Hollow ware, solid or plated, of platinum, copper, brass, etc 7571
Industrial chemicals; selenium dioxide 7451
Kip skins, dry 7720
Molasses, inedible 7182
Naval stores; pine oil and pine tar 7453
Pine oil and pine tar 7453
Pipe fittings 7571
Plumbing fixtures, zinc 7571
Signs, metal, except electric 7571
Sugar 7182
Table flatware and parts, of platinum, aluminum, copper, brass, etc 7571
Tanning and textile specialty compounds; castor oil, sulfonated 7182
Tools, n. e. c.; die stocks, brass and bronze 7720
Woodpulp; sulphate and sulphite 7720
Woodpulp screenings 7720
Column title, revision 7721
General notes; definitions 7720
Priority ratings and supply assistance assigned by OIT:
Aircraft, foreign, DO (priority) ratings and allotment symbols (CMP) for 7449
Foreign enterprises, large; supply assistance for 7450
Mining operations, foreign, supply assistance for; MRO and capital additions over $5 000 7450
Petroleum operations, foreign; supply assistance for, instructions for form PAD–26A and IT–824 7450
Scope of export control; shipments entering foreign trade zones, shipments originating in Canada 7718
Suspension of license privilege; table of compliance orders currently in effect denying export privileges 7448

NATIONAL PRODUCTION AUTHORITY—Continued Page

Priorities system operation; regulations:
See also Priority orders.
Basic rules respecting DO ratings (Regulation 2); steel industry, work stoppage in, rescheduling of deliveries under NPA directives affected by (Direction 5) 7395
Canada; extent to which contracts and orders required to support defense programs of United States and Canada may have benefit of priorities system (Regulation 3) 7693
Controlled Materials Plan:
Basic rules; authorization of production schedules for manufacturing operations, and procurement of materials (CMP Regulation 1):
Carbon conversion steel; ex-allotment acquisition and use for Class A and B products (Direction 19) 7589, 7933
Foreign and used steel; acquisition and use without allotment (Direction 4) 7784
Producers of class B products:
Automatic allotment procedure (Direction 18) 7340, 7937
Procedure for obtaining minimum quantities of materials (Direction 1); termination date, provisions respecting 7339
Self-authorization procedure (Direction 17) 7339
Restrictions on placing authorized orders (Direction 3) 7429
Third and fourth quarter authorized controlled material orders, certain; placement and acceptance (Direction 16) 7936
Construction; rules limiting construction, methods for obtaining schedules and allotments, and procedure for use of foreign and used steel (CMP Regulation 6):
Carbon conversion steel; ex-allotment acquisition and use with respect to authorized construction schedules (Direction 7) 7590, 7935
Categories of construction and quantities of materials for which purchase orders may be self-authorized (Table II) 7116
Conservation; limitations on use of controlled materials 7116
Delivery orders, preference status of, for controlled and other materials (CMP Regulation 3); special preference status of DO rated orders for Class A and B products containing steel (Direction 4) 7692
Inventories of controlled materials (CMP Regulation 2) 7938
Copper and aluminum, temporary suspension of inventory limitations on (Direction 1); revocation 7940
Priority orders:
Aluminum:
Construction, residential, use in. *See* Construction.
Consumer durable goods, use in. *See* Metals.
Electric utilities, use by. *See* Electric utilities.
Inventory limitations on; temporary suspension (CMP Regulation 2, Direction 1), revocation 7940
Brass mill products. *See* Copper and copper-base alloy.
Cans, tin plate, terneplate and blackplate; restrictions upon acceptance, delivery and uses of cans and specifications for listed products (M–25); exceptions respecting cans made from certain specified materials 7489
Carbon electrodes. *See* Graphite, artificial, and carbon electrodes.
Chemicals:
Allocation of chemicals and allied products (M–45), Appendix B materials; polyethylene (Schedule 5), revocation 7368
Sulfuric acid, distribution by producers (M–94); revocation 7547
Columbium and tantalum; alloying materials. *See* Iron and steel.
Communications; rules for procurement and use of materials for MRO and operating construction by operators of systems (M–77):
Definitions, "operating construction"; quantities of controlled materials allowed for building alterations 7118
Limitation on use of controlled materials; deletion 7118

NATIONAL PRODUCTION AUTHORITY—Continued Page

Priority orders—Continued
Construction:
Controlled Materials Plan. *See* Priorities system operation.
Materials; copper and copper-base alloy, conservation of, and list of items in which use is prohibited (M–74), revocation 7118
Use of copper and copper base alloy in inventory as of July 1, 1951 (Direction 1); revocation 7118
Residential construction; limitations on construction or alteration of residential structures and restrictions on use of controlled materials (M–100):
Construction, alteration, etc., commenced prior to March 6, 1952; 1- through 4-family residences 7118
Limitations on use of controlled materials for certain purposes in residential construction; revocation 7118
Scope; provisions for use of copper and aluminum, deleted 7118
Self-authorization for 1- through 4- family residential structures; continuance of construction, alterations, additions, or extensions 7118
Types and quantities of materials which may be obtained (Schedule I) 7118
Types and quantities of materials which may be obtained for construction, alteration, etc., commenced prior to March 6, 1952 (Schedule II); revocation 7118
Consumer durable goods, use of controlled materials in. *See* Metals.
Copper and copper-base alloy:
Brass mill products; distribution to distributors (M–82); placement of orders by distributors for additional products prior to Oct. 1, 1952 (Direction 1) 7603
Inventory limitations on; temporary suspension (CMP Regulation 2, Direction 1), revocation 7940
Raw materials, distribution of; limitation on toll agreements covering scrap, and prohibitions on undue scrap accumulation (M–16):
Definitions; brass mill products 7143
Records and reports; scrap dealer or broker, requirements for filing Form NPAF–125 7148
Use as construction materials. *See* Construction.
Use by electric utilities. *See* Electric utilities.
Use in consumer durable goods. *See* Metals.
Electrical utilities; procurement and use of materials by (M–50) 7489
Aluminum (Appendix A); third and fourth quarter quotas and advance allotments for future quarters 7492
Copper (Appendix B); third and fourth quarter quotas and advance allotments for future quarters 7492
Inventory limitations:
Aluminum and copper; temporary suspension of limitations (Direction 1), revocation 7941
Steel; maximum limitations, temporary reduction of (Direction 2) 7493
Steel, carbon, alloy, and stainless (Appendix C, D, E); third and fourth quarter quotas and advance allotments for future quarters 7492
Gas industries. *See* Petroleum and gas industries.
Graphite, artificial, and carbon electrodes; conservation and distribution of (M–66); allocation authorizations for fourth quarter (Direction 1) 7942
Iron and steel:
Alloying materials and alloy products; requirements for melters and processors of, and authorization of melting or processing schedules (M–80):
Columbian and tantalum (Schedule 5) 7705
Quantities of contained metals in alloying materials exempted per month (List II); zirconium, increased allowance in 7705
Controlled Materials Plan respecting acquisition, deliveries and use of steel. *See* Priorities system operation, *above*.

NATIONAL PRODUCTION AUTHORITY—Continued Page

Priority orders—Continued
Iron and steel—Continued
Distributors, steel; requirements regarding shipments, and identification and acceptance of purchase orders (M–6A):
Earmarked stocks—aircraft quality alloy steel products (Schedule 1) 7692
Earmarked stocks—oil country casing, oil country tubing, and oil country drill pipe (Schedule 2); additional restrictions on delivery of oil country casing and tubing (Direction 1), revocation 7693
Supplemental shipments by producers and limitations on distributors' deliveries (Direction 3) 7114
Requirements concerning production, authorization for production and certain reports, and provisions respecting orders and deliveries (M–1):
Acceptance or rejection of orders by producers; provisions respecting 7087
Authorized production; respecting steel mill products derived from rerolling of rails and axles 7087
Fourth quarter; acceptance of defense orders in reserved space (Direction 6) 7088, 7185
Lead time 7088
Percentage of carbon and alloy steel to be applied against planned monthly production for listed products derived from rerolling of rails and axles (Table II) 7088
Scrap, allocation and inventory limitation (M–20); alloy scrap segregation (Direction 1) 7429
Steel industry, work stoppage in; rescheduling of deliveries under NPA directives affected by (Regulation 2, Direction 5) 7395
Use in consumer durable goods. *See* Metals.
Use of steel by electric utilities. *See* Electric utilities.
Machines, metalworking, finishes for; limitations on preparation for painting and application of paint on new machines (M–104), revocation 7051
Metals (iron, steel, copper, and aluminum), use of, in certain consumer durable goods:
To prohibit use of copper and aluminum for certain ornamental, decorative, nonfunctional and nonoperational purposes (M–47A); prohibited use 7116
To provide for flexibility in production and to prohibit use of copper and aluminum for certain ornamental and decorative purposes (M–47B) 7116
Furniture, fixtures, domestic appliances, lamps, fans, lawnmowers, silverware, fabricated products, musical instruments, jewelry, smokers' articles, etc. (Schedule 1) 7117
Metalworking machines. *See* Machines and machinery.
Paper; rules for placing, accepting, and scheduling Government orders (M–36) 7090
Petroleum and gas industries:
Foreign petroleum operations, priorities assistance for obtaining material for construction operations, maintenance, repair, operating supplies, and laboratory equipment (M–46A); oil country tubular goods, third quarter authorized controlled material orders for (Direction 2) 7854
United States and Canada, petroleum operations in; priorities assistance for obtaining MRO material for maintenance and repair purposes, as operating supplies, or laboratory equipment (M–46):
Filing date, for Form PAD–26LP 7050
Oil country tubular goods; third quarter authorized controlled material orders for (Direction 4) 7854
Platinum; limitations on distribution and use (M–54) 7430
Jewelry and miscellaneous items, use in, prohibited (List A) 7431
Polyethylene. *See* Chemicals.
Railroad transportation equipment; information pertaining to production or delivery (M–95) 7592

NATIONAL PRODUCTION AUTHORITY—Continued Page

Priority orders—Continued
Rubber, natural crepe; restrictions applicable to (M–2) 7940
Steel. *See* Iron and steel.
Sulfur, conservation of; restrictions on use and prohibitions on deliveries (M–69) 7591
Sulfuric acid. *See* Chemicals.
Tin, use in civilian economy (M–8):
Allocation of pig tin 7089
Certification that purchase of tin will not cause receipts to exceed purchaser's authorized allocation 7090
Importation of pig tin, restrictions on; revocation 7090
Scope; termination of restriction on private importation of pig tin 7089
Tin plate and terneplate:
Permitted uses (M–24); provisions respecting 7368
Use in cans. *See* Cans.
Transportation equipment, railroad. *See* Railroad transportation equipment.
Zirconium; alloying material. *See* Iron and steel.
Suspension orders, issuance of, to various firms, after hearings on noncompliance with regulations and orders. *See* Hearings.

NATIONAL SHIPPING AUTHORITY:
Organization and functions; Office of Ship Requirements and Allocations, redesignation of divisions within 7910

NAVY DEPARTMENT:
Aircraft danger areas over military installations, designation in coordination with Navy. *See main heading* Civil Aeronautics Administration.
Authority, delegation of, from Secretary to Chief, Bureau of Supplies and Accounts; elimination of excessive profits under Renegotiation Act of 1948 7791
Organization; Bureau of Supplies and Accounts 7677
Palmyra Island; revocation of order placing Island under control and jurisdiction of Secretary of Navy (Executive Order 10388) 7877

O

OIL AND GAS. *See* Petroleum and petroleum products.
OVERTIME, pay regulations respecting. *See* Civil Service Commission.

P

PATENT COMPENSATION BOARD, ATOMIC ENERGY COMMISSION; hearings. *See* Atomic Energy Commission.

PATENT OFFICE:
Rules of practice in patent cases:
Allowance and issue of patent, proposed rule 314 7824
Appeals:
Action following decision, proposed rule 197 7824
Appeal to Board of Appeals, proposed rule 191 7824
Appeal to United States Court of Customs and Patent Appeals, notice and reason of appeal; proposed rule 302 7824
Time for filing appeal, proposed rule 304 7824
Application for patents:
Serial number and filing date of application, proposed rule 55 7822
Signatures, proposed rule 57 7822
Single signature form, proposed deletion 7822
Civil action under 35 U. S. C. 145, 146, redesignation, proposed rule 303 7824
Time for appeal or civil action, proposed rule 304 7824
Correction of errors in patent:
Certificate of correction, proposed rule 322 7825
Certificate of correction of applicants mistake, proposed rule 323 7825
Correction of error in joining inventor, proposed rule 324 7825
Other mistakes not corrected, proposed rule 325 7825
Disclaimer, statutory disclaimer in patent; proposed rule 321 7824
Drawings:
Signature to drawing, proposed rule 84 7823
Standards for drawings, proposed rule 83 7823

PATENT OFFICE—Continued Page

Rules of practice in patent cases—Continued
- Fees and payment of money; charges, proposed rule 21 — 7822
- General information and correspondence:
  - Receipt of letters and papers proposed rule 6 — 7822
  - Times for taking action, expiration on Sunday or holiday, proposed rule 7 — 7822
- Interferences:
  - Motions to amend, proposed rule 233 — 7824
  - Preliminary statement:
    - Effect of statement, proposed rule 223 — 7824
    - Notice and access to applications, proposed rule 226 — 7824
    - Reliance on prior application, proposed rule 224 — 7824
  - Termination; statutory disclaimer by patentee, proposed rule 263 — 7824
  - Trial:
    - Assignment of times for taking testimony, proposed rule 251 — 7824
    - Final hearing, proposed rule 256 — 7824
- Joinder of inventions in one application, division:
  - Appeal from requirement for division, proposed rule 144 — 7823
  - Different inventions in one application, proposed rule 141 — 7823
  - Reconsideration of requirement, proposed rule 143 — 7823
  - Requirement for division, proposed rule 142 — 7823
  - Subsequent presentation of claims for different invention, proposed rule 145 — 7823
- Miscellaneous changes in citations, references, etc.; proposed changes in various rules — 7825
- Oath:
  - Oath of applicant, proposed rule 65 — 7823
  - Officers authorized to administer oaths, proposed rule 66 — 7823
- Petition; proposed rule 61 — 7823
- Reissues:
  - Applicants, assignees; proposed rule 172 — 7823
  - Reissue oath; proposed rule 175 — 7823
- Specifications:
  - Cross references to other applications, proposed rule 78 — 7823
  - Signature to specification, proposed rule 76 — 7823
- Specimens required, proposed rule 93 — 7823
- Who may apply for patent:
  - Applicant for patent, proposed rule 47 — 7822
  - Assigned inventions and patents, proposed rule 47 — 7822
  - Filing by other than inventor, proposed rule 47 — 7822
  - Joint inventors, proposed rule 45 — 7822
  - Proof of authority, proposed rule 44 — 7822
  - When inventor is insane, or legally incapacitated, proposed rule 43 — 7822

Rules of practice in trade-mark cases:
- Appeals:
  - Appeal to Commissioner from decision of Examiner of Interferences, proposed rule 26.3 — 7825
  - Appeal to Court, proposed changes in rule 24.4 — 7825
  - Time and manner of ex parte appeals, proposed trade-mark rule 26.2 — 7825
- Attorneys and representation by attorneys, suspension or exclusion from practice; proposed rule 46 — 7825
- Times for taking action, expiration on Saturday, Sunday or holidays; proposed rule 1.6 — 7825

PAY, COMPENSATION, ALLOWANCES, ETC.:

Area No. 1 7095
Area No. 2 7254
Area No. 3 7254
Idaho (certain designated counties); budget of expenses and rate of assessment for fiscal year ending May 31, 1953 7920
Oregon:
Crook, Deschutes, Jefferson, Klamath and Lake Counties; limitation of shipments 7447
Malheur County; budget of expenses and rate of assessment for fiscal year ending May 31, 1953 7920
South Dakota (Eastern); marketing agreement and order, etc., recodification (correction) 7275
Washington; budget of expenses and rate of assessment for fiscal year ending May 31, 1953 7208
Prices, support, for various agricultural commodities. *See main heading* Commodity Credit Corporation.

AGRICULTURE DEPARTMENT—Continued Page

Puerto Rico, Special Agricultural Conservation Program, 1953 7829
Rodenticides. *See* Insecticides, etc.
Special conservation program for Territories and possessions. *See* Puerto Rico; *and* Virgin Islands.
Standards, for various agricultural commodities. *See* Almonds; Citrus fruits; Corn; Cotton; Cottonseed; Meats; Molasses; *and* Pecans.
Stockyards; orders, etc., respecting. *See* Packers and Stockyards Division.
Sugar; requirements and quotas:
Hawaii; local consumption requirements and quotas, 1952, revised 7273
Puerto Rico; consumption requirements and quotas:
Allotment of sugar quotas, 1952 7366
Local consumption requirements and quotas, 1952; revised 7273
Support prices, for agricultural commodities. *See main heading* Commodity Credit Corporation.
Tobacco, marketing quota; proclamation of results of flue-cured tobacco referendum for marketing year beginning July 1, 1953, and three-year period beginning July 1, 1953 7613
Vegetables. *See* Fruits and vegetables.
Virgin Islands, Special Agricultural Conservation Program, 1953 7836
Warehouses; regulations:
Cotton:
Bonds required 7254, 7918
Fees:
License fees 7254, 7918
Warehouse inspection fee 7254, 7918
Warehouse bonds; amount of bond, additional amounts 7253, 7917
Warehouse licenses:
Facilities, licensed or exempted 7253, 7915
Grounds for not issuing license 7253, 7915
Net assets 7253, 7917
Suspension or revocation 7253, 7917
Warehouse receipts; forms 7254, 7918
Grain:
Bonds required, respecting State warehouse 7768
Duties of warehouseman; grades and weights, bulk grain 7768
Fees:
License fee 7768
Warehouse inspection fee 7768
Grain appeals:
Appeal:
Freedom 7768
Not to be refused 7768
Procedure 7768
Contents of complaint 7768
Determination of appeals; samples 7768
Disposal of samples 7768
Fees; grain grade appeal fees 7768
Grade certificates; issuance 7768
Proof of agent's authority 7768
Representative samples 7768
Hearings, procedure 7768
Warehouse bond; amount of bond, additional amounts 7768
Warehouse licenses:
Facilities, licensed or exempted 7767
Ground for not issuing license 7767
Net assets, increase in 7767
Suspension and revocation 7767
Warehouse receipts; form 7768

AIR FORCE DEPARTMENT:

Aircraft danger areas over military installations, designation in coordination with Air Force. *See main heading* Civil Aeronautics Administration.
Civil Service Rules; certain positions excepted from competitive service (Schedule A) 7570
Lands, public, withdrawn for use of Department in New Mexico. *See main heading* Land Management Bureau.
Officer Personnel Act of 1947; suspension during emergency of operation of certain provisions applicable to retirement of colonels of Regular Air Force (Executive Order 10379) 7107

AIR FORCE DEPARTMENT—Continued Page

Retirement of colonels of Regular Air Force; suspension during emergency of operation of certain provisions of Officer Personnel Act of 1947 applicable to retirement of colonels (Executive Order 10379) 7107

AIR TRANSPORTATION, FACILITIES, ETC.:
Accidents, hearings respecting. *See* Civil Aeronautics
Washington National Airport, regulations respecting. *See* Civil Aeronautics Administration.
ALASKA:
Administration.
Air-navigation sites; withdrawal of lands for. *See* Land Management Bureau.
Civil airways, etc., designation of. *See* Civil Aeronautics Administration.
Danger areas; airspace restricted areas over military installations, designation as danger areas. *See* Civil Aeronautics Administration.
International airports, air commerce regulations. *See* Customs Bureau.
Commercial fisheries. *See* Fish and Wildlife Service.
Price control regulations affecting commodities sold in. *See* Price Stabilization, Office of.
Public lands in. *See* Land Management Bureau.

ALIEN PROPERTY, OFFICE OF:

Copyrights, vesting orders respecting. *See* Vesting orders.
Germany; copyrights of certain German nationals, names unknown 7203
Netherlands; certain nationals of, names unknown, securities owned by 7174
Return of vested property; orders for. *See* Vesting orders.
Vesting orders, etc.:
See also Netherlands, *above*.
Copyrights; of certain German nationals, names unknown 7203

ALIENS:
Head tax, exemption for aliens connected with designated international organizations. *See* Immigration and Naturalization Service.
Merchant marine officers and seamen. *See* Coast Guard.
Property of, vesting orders, etc. *See* Alien Property, Office of.

ANCHORAGE REGULATIONS. *See* Engineers, Corps of.

ANIMAL INDUSTRY BUREAU:
Animals and poultry, interstate transportation of; vesicular exanthema, restricting interstate transportation of swine and certain swine products because of 7070, 7367
Changes in areas quarantined 7570, 7927
Exportation and importation of animals and animal products:
Export and import of livestock, other animals, and poultry to and from Mexico, special regulations governing; revocation, proposed rule making 7342, 7700
Importation of certain animals and poultry and certain animal and poultry products; providing for importations from Mexico, proposed rule making 7342
Inspection and handling of livestock for exportation; notice of proposed rule making 7700
Rinderpest and foot-and-mouth disease, prohibited and restricted importation; determination of nonexistence of rinderpest and foot-and-mouth disease in Mexico, proposed rule making 7742
Meat inspection regulations:
Carcasses and parts, disposal of; when found to be affected with certain disease conditions:
Anaplasmosis 7137
Anthrax, bacillary hemoglobinuria in cattle, blackleg, etc 7137
Leptospirosis 7137
Listerellosis 7137
Identifying products; labeling products, false or deceptive names, established trade names, etc 7137
Inspection, ante-mortem:
Anaplasmosis, leptospirosis, listerellosis, parturient paresis, rabies, etc., animals showing symptoms of; disposal of 7135
Condemned animals, disposition of 7135
Labeling products. *See* Identifying products.

ARMY DEPARTMENT: Page
See Engineers, Corps of.
Aircraft danger areas over military installations, designation in coordination with Army. *See main heading* Civil Aeronautics Administration.
Claims and accounts; gratuity upon death:
Beneficiaries, classes of; revocation 7724
Special determination, absent without leave:
Determination of status 7724
Expiration of normal enlistment period prior to date of death 7724
Death gratuity. *See* Claims and accounts.
Discharge or separation from service; discharge because of dependency or hardship, definition of "members of family" 7535
Information, safeguarding of; revision 7140
Lands, public, withdrawn for use of Department in Alaska. *See main heading* Land Management Bureau.
Officer Personnel Act of 1947; suspension during emergency of operation of certain provisions applicable to retirement of colonels of Regular Army (Executive Order 10379) 7107
Range regulations for firing ammunition for training and target practice; revocation 7677
Retirement of colonels of Regular Army; suspension during emergency of operation of certain provisions of Officer Personnel Act of 1947 applicable to retirement of colonels (Executive Order 10379) 7107
Security, safeguarding information; revision 7140
Target practice, range regulations for firing ammunition for training and; revocation 7677

ATOMIC ENERGY COMMISSION:
Housing in critical defense areas; residential credit controls. *See main heading* Housing and Home Finance Agency.
Patent Compensation Board; hearings on applications for just compensation:
Giannini, G. M., & Co., Inc 7357
Kerner, Edward H 7357

B

BANKS:
Designation of Export-Import Bank of Washington as agent for State Department. *See* State Department.
Farm credit institutions. *See* Farm Credit Administration.

BLIND PERSONS:
Business enterprises for. *See* Vocational Rehabilitation, Office of.
Employment of. *See* Wage and Hour Division.

BURMA; certain functions performed in, under Act for International Development, exemption from act governing use of Government vehicles (Executive Order 10387) 7793

C

CANADA:
Customs relations with. *See* Customs Bureau.
International Joint Commission; hearings on matters affecting Lake Ontario and St. Lawrence River. *See* International Joint Commission.
Petroleum and gas industries in, priority order respecting. *See* National Production Authority.
Priorities systems, operations of, between Canada and United States in support of defense programs. *See* National Production Authority.
Radio regulations respecting. *See* Federal Communications Commission.
Securities of, certain, registration under Securities Act of 1933; proposed exemption. *See* Securities and Exchange Commission.

CANAL ZONE GOVERNMENT:
Military reservations, Fort Kobbe Army Reservation, and Howard Air Force base; setting apart of reservation (CZO 28):
Boundaries 7942
Conditions and limitations as to access by personnel and equipment of Canal Zone Government, Panama Canal Company, and others 7944

CENSUS BUREAU: Page
Foreign trade statistics; weekly reports of vessel entrances and clearances 7139

CIVIL AERONAUTICS ADMINISTRATION:
Aeronautical fixed communications. *See* Communications.
Civil airways, designation of:
Colored civil airways (amber, blue):
Amber civil airways; South Carolina, Charleston to New York, N. Y 7323
Blue civil airways:
Alabama; Montgomery to Erie, Pa 7384
North Carolina; Elizabeth City to Washington, D. C 7323
VOR civil airways:
California:
Long Beach to Washington, D. C 7384
Los Angeles to Nashville, Tenn 7384
Oakland to New York, N. Y 7384
South Carolina; Charleston to Minneapolis, Minnesota 7384
Virginia; Gordonsville to Boston, Mass.
Communications, aeronautical fixed; assessment of fees 7385
Control areas, zones, and reporting points; designation of:
Control areas:
Extension of control areas:
Massachusetts:
Falmouth 7815
Nantucket 7815
Oregon; Portland 7384
Washington; Everett 7384
VOR civil airways:
South Carolina; Charleston to Minneapolis, Minn 7384
Virginia; Gordonsville to Boston, Mass 7384
Reporting points:
Colored civil airways (green, red):
Green civil airways; Texas, Laredo to Norfolk, Va 7384
Red civil airways:
Missouri; St. Louis to Baltimore, Md 7384
Pennsylvania; Butler to Washington, D. C 7384
VOR reporting points:
California; Sacramento omnirange station 7384
Nevada; Reno omnirange station 7384
Danger areas over Army, Navy and Air Force installations in various States, Territories and possessions; designation of areas, alterations:
Alaska; Chiniak Bay 7072
California, Knoxville 7072
Massachusetts; Boston, correction 7072
Instrument approach procedure; use of radio ranges requiring flight check 7384, 7385
Organization and functions:
Administrator, Office of; principal officers 7909
Program Staff Offices:
Aviation Defense Requirements, Office of; Aviation Resources Division 7305
Aviation Safety, Office of 7304
Federal Airways, Office of:
Air Traffic Control Division, deletion 7305
Airways Operations Division 7305
Communications Division, deletion 7305
Regional offices:
Administrator of Regional offices:
Airways Operations Division, functions and subordinate offices 7305
Aviation Safety Division 7305
Facilities Division; Region 9 functions to be performed by Facilities and Flight Inspection Division 7305
Region 9:
See also Facilities Division.
Transportation and supply functions to be performed by Budget and Management Division, Personnel Division, and General Services Division 7305
Safety Operations Division:
Alaska Air Terminals Division, Region 8 7307
Safety Operations Division; redesignation 7307
International Region; location of district offices 7307
Location of Region 3 and Region 9 headquarters offices 7305

CIVIL AERONAUTICS ADMINISTRATION—Con. Page
Washington National Airport; aircraft rules, landing and take-off 7181

CIVIL AERONAUTICS BOARD:
Accidents and missing aircraft:
Investigation of accident occurring at International Airport, Miami, Fla 7438
Report of aircraft accident 7111
Air carriers:
Accidents and missing aircraft, investigation of. *See* Accidents and missing aircraft.
Irregular:
See also Irregular air carrier and off-route rules.
Investigation of air services by large irregular carriers and irregular transport carriers 7438
Air taxi operators; classification and exemption. *See* Economic regulations.
Air traffic rules; traffic patterns:
Juneau (Alaska) Airport (CAA rules) 7533
Washington National Airport (CAA rules) 7178
Economic regulations:
See also Procedural regulations.
Certificates of public convenience:
Foreign air transportation; business name of air carrier 7810
Interstate and overseas air transportation; business name of air carrier 7809
Classification and exemption:
Air freight forwarders:
See also International air freight forwarders.
Business name of air carrier 7812
Air taxi operators:
Business name of air carrier 7814
Scope of service; repeal or modification of provisions respecting operations over certificated helicopter routes, proposed rule making:
Correction 7209
Extension of time for submitting comments 7549
Alaskan air carriers, business name 7811
Large irregular air carriers; business name 7811
International air freight forwarders, limitations and conditions; business name of air carrier 7813
Operations pursuant to exemption authority 7137
Correction of serial number and part headnote 7209
Exemption authority. *See* Economic regulations.
Hearings, investigations, etc.:
Accidents, aircraft and missing aircraft; investigation and report of. *See* Accidents and missing aircraft.
Companies and cases, list of. *See list at end of this agency.*
Helicopter routes, scope of service of air taxi operators over. *See* Economic regulations.
Irregular air carrier and off-route rules:
Aircraft requirements; limitations for IFR operations, dual controls 7071
Definition, crew member; proposed 7096
Flight time limtations for pilots on large aircraft, deadhead transportation to be computed as "on duty" and not as "time aloft"; proposed 7096
Mail rate proceedings; rules of practice. *See* Procedural regulations.
Operation rules, general:
Aircraft requirements (CAA rules):
ICAO modifications of identification marks; deletion 7419
Identification marks and airworthiness classification marks; deletion 7419
Operating limitations 7419
Maintenance (CAA rules); inspections:
Annual 7675
Periodic 7676
Organization, central and field; Bureau of Safety Regulation 7825
Procedural regulations:
Economic regulations. *See* Economic regulations, *above.*
Rules of practice in economic proceedings, revision:
Consolidation or contemporaneous consideration of proceedings; filing of motion 7420
Hearings, participation of persons not parties 7040, 7041
Mail, procedure for fixing temporary rates 7040
Memoranda in opposition or support, deletion 7420

CIVIL AERONAUTICS BOARD—Continued Page
- Reports, aircraft accidents. *See* Accidents and missing aircraft.
- Rules of practice. *See* Procedural regulations.
- Scheduled air carriers:
  - Certification, operating. *See* Interstate air carrier certification and operation rules.
  - Interstate air carrier certification and operation rules; proposed:
    - Flight altitudes; establishment of lower "over-the-top" flight operations 7187
    - Flight time limitations for long distance operations 7949
  - Operations outside continental limits of United States, flight time limitations for pilots not regularly assigned; extension of special air regulation (SR–381), proposed 7790
  - Operations within continental limits of United States; flight altitudes, establishment of lower "over-the-top" operations, proposed 7187
- **Hearings, investigations, etc.:**
  - Aerovias Interamericanas de Panama; service from Panama to Florida 7128
  - Air freight rate investigation; directional rates 7681, 7755
  - Braniff Airways, Inc 7255
  - Canada, Province of Saskatchewan; Department of Public Health Air Ambulance Service 7681
  - Lake Central Airlines, Inc 7708
  - Mid-Continent Airlines 7400
  - Nationwide Airlines, Inc 7708
  - North Central Route investigation case 7400, 7681, 7755
  - Ozark Airlines 7400
  - Northwest Airlines, Inc.; Trans-Pacific Operations 7308
  - Pan American-Grace Airways, Inc 7255
  - U. S. Airlines, Inc.; enforcement proceeding 7794

CIVIL DEFENSE ADMINISTRATION. *See* Federal Civil Defense Administration.

CIVIL SERVICE COMMISSION:
- Appointment:
  - Reappointment after reduction in force. *See* Reductions in force.
  - To positions excepted from competitive service. *See* Exceptions from competitive service.
- Exceptions from competitive service; positions excepted from examination (Schedule A):
  - Air Force Department; librarian, recreation leader and recreation supervisor, until December 31, 1956 7570
  - Defense Manpower Administration. *See* Labor Department.
  - Justice Department, United States Marshal in Virgin Islands 7713
  - Labor Department, Defense Manpower Administration; Labor Management Manpower Policy Committee:
    - One administrative officer to be executive assistant to Labor members of Committee 7067
    - One administrative officer to be executive assistant to Management members of Committee 7067
- Holiday pay regulations. *See* Pay regulations.
- Hospitals, Government:
  - Exclusion from provisions of Federal Employees Pay Act and Classification Act:
    - Chaplain intern 7441
    - Chaplain resident 7441
    - Chaplain student intern 7441
  - Stipends, maximum:
    - Chaplain intern, St. Elizabeths Hospital 7441
    - Chaplain resident, St. Elizabeths Hospital 7441
    - Chaplain student intern, St. Elizabeths Hospital 7441
- Night pay differential. *See* Pay regulations, general compensation rules.
- Overtime pay. *See* Pay regulations; general compensation rules.
- Pay regulations:
  - General compensation rules:
    - Longevity step increases, effect on rate of grade for employee who is reemployed, transferred, reassigned or demoted 7109
    - Night pay; computation of night pay differential 7381
    - Overtime employment, computation of; leave with pay 7381
    - Reduction in grade by reason of post audit by Commission, effect on rate of grade 7109

CIVIL SERVICE COMMISSION—Continued Page
- Pay regulations—Continued
  - Government hospitals; stipends for trainees. *See* Hospitals, Government.
  - Holiday pay; identification of holidays 7381
- Permanent employees, status after reappointment; retention preference regulations for use in reductions in force 7685
- Reductions in force, retention preference regulations for use in; reappointment priority, status after reappointment 7685
- Travel and transportation expenses of civilian personnel when transferred from one official station to another for permanent duty; means of shipment (Executive Order 10381) 7205

COAST GUARD:
- Authority, delegation from Secretary of the Treasury to Commandant, United States Coast Guard; with respect to physical disability retirement cases 7399
- Commandant, United States Coast Guard, delegation of authority to, from Secretary of the Treasury, with respect to physical disability retirement cases 7399
- Emergency, regulations applicable to certain vessels:
  - Licensed officers and certificated men; revocation 7495
  - Waivers of navigation and inspection laws; employment of aliens as watch officers on United States merchant vessels, revocation 7495
- Load lines, subdivision for passenger vessels engaged on foreign and coastwise voyages; auxiliary steering apparatus, cancellation 7628
- Marine engineering:
  - Boilers:
    - Construction of. *See* Construction (boilers).
    - Low pressure heating boilers:
      - Cast iron heating boilers:
        - Fittings and appliances 7652
        - Hydrostatic tests, inspections and stamping 7652
      - Steel plate heating boilers:
        - Areas to be stayed 7650
        - Computation and design; maximum allowable pressure and minimum thickness of cylindrical shell and dished heads 7650
        - Fittings and appliances 7651
        - Hydrostatic tests, inspection and stamping 7651
        - Valves, safety and relief; installation of 7651
        - Welded boilers 7650
  - Construction (boilers):
    - Combustion chambers and tube sheets of fire-tube boilers; detail requirements 7646
    - Cylindrical shells:
      - Castings, steel; quality factors for 7636
      - Computations 7634
      - Materials 7633
      - Maximum allowable stress 7635
      - Pipe shells:
        - Electric-resistance-welded 7636
        - Seamless 7636
      - Shells, cylindrical; pierced for tubes, cancellation 7636
    - Domes and steam chimneys 7637
    - Furnaces and flues:
      - Materials 7646
      - Plain or corrugated furnaces; detailed requirements 7646
    - Heads:
      - Dished 7638
      - Flat 7639
    - Mountings and attachments, boiler 7648
    - Openings:
      - Access and inspection 7640
      - Nozzle and reinforcements 7641
    - Procedure and general requirements:
      - Boilers:
        - Approval, conditions for 7633
        - Auxiliary, donkey, and low-pressure 7633
        - Packaged, automatically controlled 7633
        - Plans 7633
      - Definitions 7633
    - Shell joints 7636

      - Revised tentative allocations plan — 7153, 7510
    - Industrial, scientific and medical service — 7092
    - Maritime radio services — 7096, 7127, 7153, 7154, 7164, 7351, 7354, 7369, 7370, 7510, 7511, 7548, 7906
    - Public radio communication services (other than maritime mobile); Hawaii, inter-Island communications — 7150
    - Television broadcast stations — 7349, 7496, 7510
      - In Hawaii — 7150
- Frequency allocations and radio treaty matters; allocation assignment and use of radio frequencies, table of frequency allocations:
  - Atlantic City (1947) frequency allocations table and radio regulations, allocations in accordance with:
    - Aeronautical mobile bands:
      - OR frequency bands, certain, from 3025 kc to 18,030 kc to be available for use only in accordance with Atlantic City table; proposed rule making — 7127, 7152
      - R frequency bands, certain, from 2850 kc to 17,970 kc, effective March 15, 1952, to be assigned only in accordance with Atlantic City table; proposed rule making — 7549
    - Coast stations operating on frequencies 4140, 6210, 8280, 12,420, and 16,560 kc, deletion of authority for, effective June 3, 1953; proposed rule making — 7351

FEDERAL COMMUNICATIONS COMMISSION—Con. Page

Frequency allocations and radio treaty matters; allocation assignment and use of radio frequencies, table of frequency allocations—Continued
Atlantic City (1947) frequency allocations table and radio regulations, allocations in accordance with—Continued
Coast telegraph station assignments, non-government, transfer of, to bands between 4 and 20 mc stipulated in Geneva agreement; proposed rule making 7354
Deletion of existing coast telegraph assignments not in accordance with Geneva agreement, proposed 7355
International frequency list (new); tentative list of assignments for frequencies in (proposed) 7355
Temporary authorizations, conditions for issuance of, proposed 7355
Frequencies listed (Cairo-Atlantic City-FIAR-FCC table of frequency allocations); changes in assignments, proposed 7510
Maritime mobile service, stations in; availability of certain frequencies in bands from 4238 kc to 17,290 kc, October 1, 1952, for use only in accordance with Atlantic City table, proposed rule making 7096
Ship radiotelephone stations; frequencies in certain bands from 4115 kc to 16,530 kc to be available only for use of, in accordance with Atlantic City table, June 3, 1953, proposed rule making 7127
Ship telegraph service:
Authorization of use by ship telegraph stations for calling, of frequencies between 2089 and 2093 kc; proposed rule making 7510
Frequencies in certain bands from 4177 kc to 16,748 kc, to be available only for use as ship telegraph calling frequencies, in accordance with Atlantic City table, effective June 3, 1953; proposed rule making 7096
Hawaii, common carrier fixed stations; allocation of frequency bands 76–88 mc and 98–108 mc for use of, in inter-island communication 7150
International frequency list (new); tentative list of assignments for frequencies in, proposed 7355
Hawaii, Territory of:
Allocation of frequency bands 76–88 mc and 98–108 mc to fixed services, for inter-island communications only 7150
Frequencies 472 kc and 22,509 kc available for assignment to coast stations in 7370
Hearings, orders, etc.; list of names of companies and stations, *see list at end of this agency.*
Industrial, scientific, and medical service, operation without license:
Industrial heating equipment:
Field intensity, measurement of 7092
Maximum field intensity at one mile; measurements made along radials 7093
Operation outside of assigned frequency bands 7092
Location of industrial heating equipment; defining of 7092
Miscellaneous equipment 7093
International agreements relating to radio in which United States participates:
Frequencies, North America; assignment of frequencies to foreign broadcasting stations in. *See* North American Regional Broadcasting Agreement.
New international frequency list, tentative list of assignments for frequencies in 7355
Leased facilities services, including interstate and to Havana, Cuba; hearing respecting increased charges for tickers furnished by Western Union Telegraph Co 7316
Lifeboats, liferafts, etc., radio equipment for; exception with respect to operating controls requirements, proposed 7154
Maritime radio services:
Land stations, coastal:
Assignment of frequencies to coast and ship stations in accordance with Geneva Agreement (1951), in bands 14–150, 150–200, and 200–535 kc and between 10 kc and 25,000 kc 7369

FEDERAL COMMUNICATIONS COMMISSION—Con. Page

Maritime radio services—Continued
Land stations, coastal—Continued
Coast stations on inland waterways. *See* Inland waterways.
Inland waterways:
Coast or ship telegraph stations on inland waterways; deletion of certain currently assignable frequencies, proposed 7153
Modification of licenses of certain coast stations serving inland waterways, to delete authorization of use of coast telegraph frequencies between 2.2–12 mc, effective November 1, 1952, proposed 7164
List of licensees affected 7164
Operating requirements, general; radio telegraph watch by coast stations, use of frequencies 405 to 535 kc and 90 to 160 kc 7369
Station requirements, general; facilities required for public coast stations, assignment of frequencies 405 to 435 kc for use of coast stations employing telegraphy 7369
Telegraphy, use of, by coast stations:
Coast stations on inland waterways; modification of licenses of, and deletion of certain currently assignable frequencies, proposed 7153, 7164
Deletion of authority for operation of coast stations on frequencies 4140, 6210, 8280, 12,420, and 16,560 kc, effective June 3, 1953; proposed rule making 7351
Frequencies assignable:
Consideration of assignment of frequencies 448, 452, 454, and 462 kc in relation to interference to operation of superheterodyne type of radio receiver; deletion 7370
Frequencies 161 kc–454 kc assignable only if previously included in assigned frequencies of coast stations; deletion of provisions respecting 7370
Great Lakes or inland waters, communication with ship stations on:
Exclusive use of frequency 2274 kc; proposed deletion 7154
Restriction respecting use of frequency 410 kc; deletion 7370
List of assigned frequencies:
Available for assignment:
Frequencies 472 kc and 22,509 kc for use in Hawaii 7370
Frequencies 486 kc and 128.95 kc, for use in Puerto Rico 7370
Frequency 482 kc for use in Great Lakes area 7370
Various frequencies between 112.85 and 22,569 kc to coast stations located in seacoast area (Atlantic, Pacific, and Gulf of Mexico) of continental United States 7370
Deletion of certain frequencies from list:
Between 2274 and 11,040 kc; proposed rule making 7154
Frequencies 5555, 5560 and 5565 kc, proposed deletion 7511
From 105 to 484 kc, and notes respecting 7370
Mississippi River area, coast stations located in, exclusive use of frequency 3030 kc by; proposed deletion 7154
Temporary authorization of assignment of additional frequencies within bands 10 kc and 25,000 kc 7370, 7548
Use of frequency 8570 kc by coast stations under certain prescribed conditions; proposed deletion 7154
Frequencies for calling; use of frequencies 405 to 535 kc and 90 to 160 kc 7370
Frequencies for working; transmission on telegraph working channels within bands 110 to 150 kc and 415 to 490 kc 7370
International frequency list (new), tentative list of assignments for frequencies in 7355

FEDERAL COMMUNICATIONS COMMISSION—Con. Page

Maritime radio services—Continued
Land stations—Continued
Telegraphy, use of, by coast stations—Continued
Non-government coast telegraph station assignments, transfer of, to bands between 4 and 20 mc stipulated in Geneva agreement; proposed rule making 7354
Deletion of existing coast telegraph assignments not in accordance with Geneva agreement 7355
List of assignments, tentative, for frequencies in new international frequency list 7355
Temporary authorizations, conditions for issuance of 7355
Testing procedure; test emission frequencies within band 405–535 kc 7370
Unavailability of certain frequencies for assignment to coast stations to provide for meteorological broadcasts on certain aeronautical mobile (R) service frequencies, proposed 7511
Mobile maritime service, stations in; availability of certain frequencies in bands from 4238 to 17,290 kc, October 1, 1952, for use only in accordance with Atlantic City table of frequency allocations, proposed 7096
Shipboard stations:
Assignment of frequencies to ship and coast stations in accordance with Geneva Agreement (1951), in bands 14–150, 150–200, and 200–535 kc and between 10 kc and 25,000 kc 7369
Call sign block assignment scheme for ships using telegraphy, alternative for; proposed 7906
High radiotelegraph and radiotelephone ship frequencies, tables of, (Appendix III); proposed 7908
Inland waterways, ship or coast telegraph stations on; deletion of certain currently assignable frequencies, proposed 7153
Radiolocation by cable repair ship; operation of radio transmitting equipment on authorized radio channels within band 285–325 kc, with certain limitations 7370
Radiotelegraphy, use of:
Distress, frequencies for use in; ship or aircraft stations requesting assistance, use of frequencies 405 to 535 kc 7370
Frequencies assignable:
Authorization of use of radio channels, of which 480 kc is assigned frequency, in European coastal regions; deletion 7370
Direction-finding stations, communication by radiotelegraphy with; use of 410 kc 7370
Government stations, frequencies assigned for communication with; effective date of discontinuance of use of 355 kc assigned frequency radio channel by ship stations 7370
Great Lakes or inland waters:
Restriction respecting use of radio channels, of which 394, 400, and 410 kc are assigned frequencies, not applicable 7370
Use of frequency 2274 kc; proposed deletion 7154
List of assigned frequencies:
Addition of frequency 448 kc (Region 2) 7370
Deletions from list:
Frequencies 160, 355, 375, 394, and 400 kc deleted 7370
Frequencies 2274 and 3030 kc; proposed deletion 7154
Frequency 8260 kc; proposed deletion 7511
Special conditions and limitation not applicable to frequency 480 kc 7370
Mississippi River and tributaries, use of frequency 3030 kc; proposed deletion 7154
Frequencies for calling:
Availability of certain frequencies for use as ship telegraph calling frequencies, June 3, 1953, in accordance with Atlantic City table, proposed 7096, 7510
Call sign block assignment scheme for ships using telegraphy, alternative for; proposed 7906
Table of ship radiotelegraph calling frequencies (Appendix III); proposed 7907

Radiotelegraphy, use of—Continued
Frequencies for calling—Continued
Use of frequencies 405 and 535 kc and 90 to 160 kc 7370
Frequencies for working:
Cargo ship working frequencies, table of, (Appendix III), proposed 7908
Communication with coast stations; transmission on telegraphy working channels within bands 110 to 150 kc and 415 to 490 kc 7370
Passenger ship radiotelegraph working frequencies, table of, (Appendix III); proposed 7907
Ship and aircraft stations using telegraphy and working on frequencies within band 415 to 490 kc; authorized frequencies and use 7370
High radiotelegraph frequencies for ship station applicants; table, (Appendix III), proposed 7908
Inland waterways, ship telegraph stations on; deletion of certain currently assignable frequencies, proposed 7153
Station records; ship stations using frequencies within band 90 to 535 kc 7370
Testing procedure; test emission frequencies within band 405–535 kc 7370
Radiotelephony, use of; proposed rule making:
Availability of frequencies in certain bands from 4115 to 16,530 kc for use of ship radiotelephone stations only, in accordance with Atlantic City table, June 3, 1953; proposed rule making 7127
Frequencies assignable; list of authorized carrier frequencies:
Addition of frequency 8262.3 kc 7511
Deletion of frequency 8830 kc from list 7511
Frequencies from 5000 kc to 30 mc for public correspondence; list of frequencies authorized for use by ship stations on ocean-going vessels:
Addition of frequency 8262.3 kc 7511
Deletion of frequency 8830 kc from list 7511
High (long-distance) radiotelephone ship frequencies between 4 and 22 mc; table, (Appendix III) 7908
Ship radiotelegraph frequencies from 2000 to 23,000 kc and radiotelephone frequencies from 4000 to 23,000 kc, tables of (Appendix III); proposed rule making 7907
Ship stations on inland waterways. *See* Inland waterways.
Station requirements, general:
Operating controls, requirements; ship stations using multi-channel installation for telegraphy, proposed rule making:
Effective date of requirements with respect to:
Frequencies in bands 4000 and 23,000 kc and radio channels in frequency band 2065–2107 kc 7154
Radio-channels within frequency band 2000 to 25,000 kc; supersedure 7154
Equipment used in emergencies on frequencies below 515 kc or on lifeboats and survival craft only, exception with respect to 7154
Telegraphy, required radiochannels for:
Ship stations using telegraphy (except on lifeboats, etc.), operating on frequencies in bands 4000 to 23,000 kc, transmitting requirements for, proposed rule making 7154
Use of frequencies within bands 405 to 535 kc and 90 to 160 kc 7370
Unavailability and reassignment of certain frequencies to ship telephone and telegraph stations, proposed 7511
Watch required by International Radio Regulations; use of frequencies in band 405 and 535 kc 7370

FEDERAL COMMUNICATIONS COMMISSION—Con. Page

On freight cars loaded at ports 7945
Ferry cars. *See* Trap and ferry cars.
Freight cars to be stopped to complete loading 7371
Import ores, restriction on movement of; appointment of agent 7126, 7371
Iron ore, restriction on movement of; appointment of agent 7125, 7371
Lumber, cars loaded with; to be stopped to complete loading 7371, 7496
Trap and ferry cars, restrictions on 7945
Consolidation, finance, and reorganization:
Recordation of documents evidencing mortgage, lease, conditional sale, or bailment of railroad rolling stock 7093
Eligibility of documents 7903
Securities, applications for authority to sell without competitive bidding 7699
Contracts, agreements, etc., filing of, by common carriers subject to Part I of Interstate Commerce Act 7548
Explosives and other dangerous articles (corrosive liquids, gases, flammable liquids and solids, poisons, etc.), packing and transportation of:
Commodity list of explosives and other dangerous articles, containing shipping name or description of all dangerous articles; changes, additions and deletions 7279
Common and contract carriers by public highway. *See* Motor carriers.
Export shipments by domestic carriers by rail and motor vehicles 7279
General information and regulations; export shipments by domestic carriers by rail and motor vehicles 7279
Motor carriers, common or contract; regulations applying to:
Export shipments 7283
Import shipments 7283
Loading and unloading; explosives vehicles, floors tight and lined 7283
Rail freight carriers; unloading from cars, "dangerous-empty" placard 7283
Shippers, regulations applying to; preparation of explosives and other dangerous articles for transportation (packing, labeling, loading, slaying, etc.):
Acids and other corrosive liquids, certain; definition and preparation of 7281
Compressed gases; definition and preparation:
Compressed gases in cargo tanks and portable tank containers 7282
Compressed gases in cylinders 7282
Explosives; definitions and preparation:
Class B explosives, definition 7280
Class C explosives, definition 7280
Detonating fuzes, boosters, etc 7280
High explosives with no liquid explosive ingredient 7280
Export shipments. *See* Import and export.
Flammable liquids, certain, definition and preparation; pressurized flammable liquids 7280
Flammable solids and oxidizing materials, certain; definition and preparation 7281
Import and export shipments 7279
Marking and labeling explosives and other dangerous articles; radioactive materials 7283
Poisonous articles, certain; definition and preparation 7282
Preparation of articles for transportation by carriers by rail freight, rail express, highway, or water:
Cargo tanks; qualification, maintenance, and use of 7280
Cylinders; qualification, maintenance, and use of 7280
Shipping container specifications:
Carboys, jugs in tubs, and rubber drums 7283
Cargo tanks. *See* Containers.
Containers for motor vehicle transportation; steel cargo tanks, requirements for design and construction 7290
Cylinders 7284

Hay, reduced rates to disaster areas 7202
Increased parcel post rates, 1953 7165
Joint rates applicable to railway fuel, divisions of 7549
Long- and short-haul charges. *See* Tariffs and schedules.
Mail transportation, terminal service in connection with; hearing 7106
Recordation of certain documents respecting railroad rolling stock. *See* Railroads.
Routing and rerouting of traffic; authority and direction to carriers to reroute or divert certain traffic:
Ann Arbor Railroad Co 7202, 7955
Chicago area, railroads serving 7946
Tennessee Central Railway Co 7066
Rules of practice; notice of proposed revision 7374
Safety regulations:
Motor carrier. *See* Motor carriers.
Railroad. *See* Railroads.
Securities, applications for authority to sell without competitive bidding 7699

INTERSTATE COMMERCE COMMISSION—Con. Page

Tariffs and schedules:
See also Rates and charges.
Long-and-short-haul charges provisions of section 4 (1), Interstate Commerce Act; applications for relief from, respecting listed commodities:
Acid, sulphuric:
From Birmingham and Exum, Ala., to Tupelo, Miss 7259
From Mobile, Ala., to Saddle Creek, Fla 7320
From Norco, La., to Moultrie, Ga 7876
Alcohol; from Kansas City, Mo.-Kans., to Portland, Me., Berlin, N. H., Boston, Mass., New York, N. Y., Philadelphia, Pa., Baltimore, Md., Norfolk and Richmond, Va 7711
All and/or various commodities. *See* Merchandise in mixed carloads.
Alumina, calcined or hydrated:
From Baton Rouge and North Baton Rouge, La., to points in official and Illinois territories 7522
From Bauxite, Ark., to Michigan City, Ind 7874
Ammonia, anhydrous:
From points in Arkansas, Texas, Kansas and Louisiana, to Linder, Ga 7105
From Vicksburg, Miss., to points in Texas 7105
Ammunition boxes; from Jackson and Vicksburg, Miss., to Edgewood, Md., and Picatinny, N. J. 7106
Asphalt; from Norfolk and Newport News, Va., to Selma, N. C 7375
Asphalt filler; from Murphy, N. C., to East St. Louis, Ill 7374
Automobiles; from St. Louis, Mo., to points in Louisiana and Mississippi 7360
Blackstrap molasses. *See* Molasses.
Building and roofing materials; from points in official and Illinois territories, to points in southern territory 7565
Canned foodstuffs; between points in official territory 7612
Cans, iron, steel, or tin; from Dade City, Fla., to points in Georgia 7259
Carbon dioxide; from Memphis, Tenn., to Louisville, Ky 7522
Cement:
From Birmingham, Ala., to Dougherty, Ga 7762
From Chanute and other points in Kansas and Dewey, Okla., to Port Orange, Fla 7956
From Fort Scott, Fredonia, Humboldt, Independence, and Iola, Kans., and Dewey, Okla., to points in official territory 7611
From Giant, S. C.:
To Fayetteville, N. C 7762
To New Bern, N. C 7762
Coal:
From Danville, Catlin, and Ryan, Ill., to Fort Wayne, Ind 7711
From Lake Superior docks in Wisconsin, to points in Minnesota 7875
From mines in Alabama, on St. Louis-San Francisco Railway, to Boykin, Fla 7523
Coal tar, crude; from Ashland, Ky., and Ironton, Ohio, to Birmingham and Alabama City, Ala 7321
Cryolite; from Natrona, Pa., to New Orleans and Chalmette, La 7321
Feed, animal and poultry:
From Kansas, Oklahoma, and Texas, to Arizona and New Mexico 7104
From points in Florida, to Surgoinsville, Tenn 7762
Fertilizer:
From points in Arkansas, Kansas, Louisiana, and Texas, to Reserve, La., and points taking same rates 7565
From points in Arkansas, Louisiana, and Texas, to points in Virginia 7684
Furfural; from Memphis, Tenn., to specified points in official territory 7874
Gasoline. *See* Petroleum and petroleum products.
Glass containers; from Alton, East St. Louis, and Streator, Ill., to Algoma, Green Bay, Kawaunee, and Sturgeon Bay, Wis 7103

INTERSTATE COMMERCE COMMISSION—Con. Page

Tariffs and schedules—Continued
Long-and-short-haul charges provisions of section 4 (1), Interstate Commerce Act; applications for relief from, respecting listed commodities—Continued
Glassware; between Baltimore, Md., and points in North Carolina, Kentucky, southern Virginia, and northeastern Tennessee 7612
Grain and grain products:
Between Pacific coast territory and Memphis and Dyersburg, Tenn 7104
From Missouri River crossings, Albright, Nebr., Minneapolis, Minnesota Transfer, St. Paul, and South St. Paul, Minn., to Cairo and East St. Louis, Ill 7956
From points in Arkansas, Illinois, Missouri, and Memphis, Tenn., to points in Texas 7375
From points in Colorado, Kansas, and Oklahoma, to points in Texas 7105
Houses, prefabricated. *See* Prefabricated houses.
Iron and steel:
Articles; from Cincinnati and Portsmouth, Ohio, and Limeville, Ky., to Orangeburg, S. C 7612
Pig iron:
From Daingerfield, Lone Star, and McCrossin, Tex., to Sidney, Ohio 7761
From Rockwood, Tenn., to points in official and Illinois territories 7523
Pipe:
From Galveston, Houston, and Orange, Tex.:
To Anabel, Durham, Hunnewell, Macon, Maywood, and Shelbina, Mo 7375
To Havana and Quincy, Ill 7875
From Illinois territory, to southern territory 7612
From points in official, southern, western trunk-line, and southwestern territories, to points in Texas 7374
Scrap; from Chicago, Ill., to Hamilton, Ontario 7201
Limestone:
From Inwood, W. Va., to Pittsburgh, Pa 7763
From Pembroke, Va., to points in trunk-line and central territories 7913
Lumber:
See also Woods, foreign.
Logs; from Bowling Green and Scottsville, Ky., to Altavista, Va 7874
Pine lumber, imported; from New Orleans, La., to Memphis, Tenn 7565
Machinery; from Nashville, Tenn., to New Orleans, La., Gulfport, Miss., Mobile, Ala., Pensacola and Panama City, Fla 7201
Magazines; from Louisville, Ky., to Charlotte, N. C 7320
Magnesium metal or alloy; from Velasco, Tex., to Bay City and Midland, Mich 7875
Malt liquors; from Peoria, Ill., to points in Texas 7321
Meats, cured; from Brownsville, Eagle Pass, El Paso, Hidalgo, Laredo, and Presidio, Texas, to Chicago, Ill., Kansas City and St. Louis, Mo 7440
Merchandise, in mixed carloads:
From Ashboro, N. C., to Chicago and East St. Louis, Ill., and St. Louis, Mo 7404
From Cincinnati, Ohio, to Jacksonville, Fla 7710
From Memphis and Millington, Tenn., to St. Louis, Mo., and East St. Louis, Ill 7710
From Memphis, Tenn., to Brooklyn, N. Y 7710
From Norfolk and Richmond, Va., to Jacksonville, Fla., and Albany, Ga 7710
From Washington, D. C., to Albany, Ga 7710
Onions; from Racine, Wis., to points in Mississippi Valley territory 7522
Paper and paper articles:
Between Galveston, Houston, and Texas City, Tex., and points in southwestern territory 7104
From Colby, Wis., to Illinois and western trunk-line territories 7106
Newsprint; from points in Ontario and Quebec, Canada, to Omaha, Nebr., and Hiawatha, Kans 7404

INTERSTATE COMMERCE COMMISSION—Con. Page

NATIONAL PRODUCTION AUTHORITY—Continued Page

Priorities system operation; regulations:
See also Priority orders.
Basic rules respecting DO ratings (Regulation 2); steel industry, work stoppage in, rescheduling of deliveries under NPA directives affected by (Direction 5) 7395
Canada; extent to which contracts and orders required to support defense programs of United States and Canada may have benefit of priorities system (Regulation 3) 7693
Controlled Materials Plan:
Basic rules; authorization of production schedules for manufacturing operations, and procurement of materials (CMP Regulation 1):
Carbon conversion steel; ex-allotment acquisition and use for Class A and B products (Direction 19) 7589, 7933
Foreign and used steel; acquisition and use without allotment (Direction 4) 7784
Producers of class B products:
Automatic allotment procedure (Direction 18) 7340, 7937
Procedure for obtaining minimum quantities of materials (Direction 1); termination date, provisions respecting 7339
Self-authorization procedure (Direction 17) 7339
Restrictions on placing authorized orders (Direction 3) 7429
Third and fourth quarter authorized controlled material orders, certain; placement and acceptance (Direction 16) 7936
Construction; rules limiting construction, methods for obtaining schedules and allotments, and procedure for use of foreign and used steel (CMP Regulation 6):
Carbon conversion steel; ex-allotment acquisition and use with respect to authorized construction schedules (Direction 7) 7590, 7935
Categories of construction and quantities of materials for which purchase orders may be self-authorized (Table II) 7116
Conservation; limitations on use of controlled materials 7116
Delivery orders, preference status of, for controlled and other materials (CMP Regulation 3); special preference status of DO rated orders for Class A and B products containing steel (Direction 4) 7692
Inventories of controlled materials (CMP Regulation 2) 7938
Copper and aluminum, temporary suspension of inventory limitations on (Direction 1); revocation 7940
Priority orders:
Aluminum:
Construction, residential, use in. *See* Construction.
Consumer durable goods, use in. *See* Metals.
Electric utilities, use by. *See* Electric utilities.
Inventory limitations on; temporary suspension (CMP Regulation 2, Direction 1), revocation 7940
Brass mill products. *See* Copper and copper-base alloy.
Cans, tin plate, terneplate and blackplate; restrictions upon acceptance, delivery and uses of cans and specifications for listed products (M–25); exceptions respecting cans made from certain specified materials 7489
Carbon electrodes. *See* Graphite, artificial, and carbon electrodes.
Chemicals:
Allocation of chemicals and allied products (M–45), Appendix B materials; polyethylene (Schedule 5), revocation 7368
Sulfuric acid, distribution by producers (M–94); revocation 7547
Columbium and tantalum; alloying materials. *See* Iron and steel.
Communications; rules for procurement and use of materials for MRO and operating construction by operators of systems (M–77):
Definitions, "operating construction"; quantities of controlled materials allowed for building alterations 7118
Limitation on use of controlled materials; deletion 7118

NATIONAL PRODUCTION AUTHORITY—Continued Page

Priority orders—Continued
Construction:
Controlled Materials Plan. *See* Priorities system operation.
Materials; copper and copper-base alloy, conservation of, and list of items in which use is prohibited (M–74), revocation 7118
Use of copper and copper base alloy in inventory as of July 1, 1951 (Direction 1); revocation 7118
Residential construction; limitations on construction or alteration of residential structures and restrictions on use of controlled materials (M–100):
Construction, alteration, etc., commenced prior to March 6, 1952; 1- through 4-family residences 7118
Limitations on use of controlled materials for certain purposes in residential construction; revocation 7118
Scope; provisions for use of copper and aluminum, deleted 7118
Self-authorization for 1- through 4-family residential structures; continuance of construction, alterations, additions, or extensions 7118
Types and quantities of materials which may be obtained (Schedule I) 7118
Types and quantities of materials which may be obtained for construction, alteration, etc., commenced prior to March 6, 1952 (Schedule II); revocation 7118
Consumer durable goods, use of controlled materials in. *See* Metals.
Copper and copper-base alloy:
Brass mill products; distribution to distributors (M–82); placement of orders by distributors for additional products prior to Oct. 1, 1952 (Direction 1) 7603
Inventory limitations on; temporary suspension (CMP Regulation 2, Direction 1), revocation 7940
Raw materials, distribution of; limitation on toll agreements covering scrap, and prohibitions on undue scrap accumulation (M–16):
Definitions; brass mill products 7143
Records and reports; scrap dealer or broker, requirements for filing Form NPAF–125 7148
Use as construction materials. *See* Construction.
Use by electric utilities. *See* Electric utilities.
Use in consumer durable goods. *See* Metals.
Electrical utilities; procurement and use of materials by (M–50) 7439
Aluminum (Appendix A); third and fourth quarter quotas and advance allotments for future quarters 7492
Copper (Appendix B); third and fourth quarter quotas and advance allotments for future quarters 7492
Inventory limitations:
Aluminum and copper; temporary suspension of limitations (Direction 1), revocation 7941
Steel; maximum limitations, temporary reduction of (Direction 2) 7493
Steel, carbon, alloy, and stainless (Appendix C, D, E); third and fourth quarter quotas and advance allotments for future quarters 7492
Gas industries. *See* Petroleum and gas industries.
Graphite, artificial, and carbon electrodes; conservation and distribution of (M–66); allocation authorizations for fourth quarter (Direction 1) 7012
Iron and steel:
Alloying materials and alloy products; requirements for melters and processors of, and authorization of melting or processing schedules (M–80):
Columbian and tantalum (Schedule 5) 7735
Quantities of contained metals in alloying materials exempted per month (List II); zirconium, increased allowance in 7735
Controlled Materials Plan respecting acquisition, deliveries and use of steel. *See* Priorities system operation, *above*.

NATIONAL PRODUCTION AUTHORITY—Continued Page

Priority orders—Continued
Iron and steel—Continued
Distributors, steel; requirements regarding shipments, and identification and acceptance of purchase orders (M–6A):
Earmarked stocks—aircraft quality alloy steel products (Schedule 1) 7692
Earmarked stocks—oil country casing, oil country tubing, and oil country drill pipe (Schedule 2); additional restrictions on delivery of oil country casing and tubing (Direction 1), revocation 7693
Supplemental shipments by producers and limitations on distributors' deliveries (Direction 3) 7114
Requirements concerning production, authorization for production and certain reports, and provisions respecting orders and deliveries (M–1):
Acceptance or rejection of orders by producers; provisions respecting 7087
Authorized production; respecting steel mill products derived from rerolling of rails and axles 7087
Fourth quarter; acceptance of defense orders in reserved space (Direction 6) 7088, 7185
Lead time 7088
Percentage of carbon and alloy steel to be applied against planned monthly production for listed products derived from rerolling of rails and axles (Table II) 7088
Scrap, allocation and inventory limitation (M–20); alloy scrap segregation (Direction 1) 7429
Steel industry, work stoppage in; rescheduling of deliveries under NPA directives affected by (Regulation 2, Direction 5) 7395
Use in consumer durable goods. *See* Metals.
Use of steel by electric utilities. *See* Electric utilities.
Machines, metalworking, finishes for; limitations on preparation for painting and application of paint on new machines (M–104), revocation 7051
Metals (iron, steel, copper, and aluminum), use of, in certain consumer durable goods:
To prohibit use of copper and aluminum for certain ornamental, decorative, nonfunctional and nonoperational purposes (M–47A); prohibited use 7116
To provide for flexibility in production and to prohibit use of copper and aluminum for certain ornamental and decorative purposes (M–47B) 7116
Furniture, fixtures, domestic appliances, lamps, fans, lawnmowers, silverware, fabricated products, musical instruments, jewelry, smokers' articles, etc. (Schedule 1) 7117
Metalworking machines. *See* Machines and machinery.
Paper; rules for placing, accepting, and scheduling Government orders (M–36) 7090
Petroleum and gas industries:
Foreign petroleum operations, priorities assistance for obtaining material for construction operations, maintenance, repair, operating supplies, and laboratory equipment (M–46A); oil country tubular goods, third quarter authorized controlled material orders for (Direction 2) 7854
United States and Canada, petroleum operations in; priorities assistance for obtaining MRO material for maintenance and repair purposes, as operating supplies, or laboratory equipment (M–46):
Filing date, for Form PAD–26LP 7050
Oil country tubular goods; third quarter authorized controlled material orders for (Direction 4) 7854
Platinum; limitations on distribution and use (M–54) 7430
Jewelry and miscellaneous items, use in, prohibited (List A) 7431
Polyethylene. *See* Chemicals.
Railroad transportation equipment; information pertaining to production or delivery (M–95) 7592

NATIONAL PRODUCTION AUTHORITY—Continued Page

Priority orders—Continued
Rubber, natural crepe; restrictions applicable to (M–2) 7940
Steel. *See* Iron and steel.
Sulfur, conservation of; restrictions on use and prohibitions on deliveries (M–69) 7591
Sulfuric acid. *See* Chemicals.
Tin, use in civilian economy (M–8):
Allocation of pig tin 7089
Certification that purchase of tin will not cause receipts to exceed purchaser's authorized allocation 7090
Importation of pig tin, restrictions on; revocation 7090
Scope; termination of restriction on private importation of pig tin 7089
Tin plate and terneplate:
Permitted uses (M–24); provisions respecting 7368
Use in cans. *See* Cans.
Transportation equipment, railroad. *See* Railroad transportation equipment.
Zirconium; alloying material. *See* Iron and steel.
Suspension orders, issuance of, to various firms, after hearings on noncompliance with regulations and orders. *See* Hearings.

NATIONAL SHIPPING AUTHORITY:
Organization and functions; Office of Ship Requirements and Allocations, redesignation of divisions within 7910

NAVY DEPARTMENT:
Aircraft danger areas over military installations, designation in coordination with Navy. *See main heading* Civil Aeronautics Administration.
Authority, delegation of, from Secretary to Chief, Bureau of Supplies and Accounts; elimination of excessive profits under Renegotiation Act of 1948 7791
Organization; Bureau of Supplies and Accounts 7677
Palmyra Island; revocation of order placing Island under control and jurisdiction of Secretary of Navy (Executive Order 10388) 7877

O

OIL AND GAS. *See* Petroleum and petroleum products.
OVERTIME, pay regulations respecting. *See* Civil Service Commission.

P

PATENT COMPENSATION BOARD, ATOMIC ENERGY COMMISSION; hearings. *See* Atomic Energy Commission.

PATENT OFFICE:
Rules of practice in patent cases:
Allowance and issue of patent, proposed rule 314 7824
Appeals:
Action following decision, proposed rule 197 7824
Appeal to Board of Appeals, proposed rule 191 7824
Appeal to United States Court of Customs and Patent Appeals, notice and reason of appeal; proposed rule 302 7824
Time for filing appeal, proposed rule 304 7824
Application for patents:
Serial number and filing date of application, proposed rule 55 7822
Signatures, proposed rule 57 7822
Single signature form, proposed deletion 7822
Civil action under 35 U. S. C. 145, 146, redesignation, proposed rule 303 7824
Time for appeal or civil action, proposed rule 304 7824
Correction of errors in patent:
Certificate of correction, proposed rule 322 7825
Certificate of correction of applicants mistake, proposed rule 323 7825
Correction of error in joining inventor, proposed rule 324 7825
Other mistakes not corrected, proposed rule 325 7825
Disclaimer, statutory disclaimer in patent; proposed rule 321 7824
Drawings:
Signature to drawing, proposed rule 84 7823
Standards for drawings, proposed rule 83 7823

PATENT OFFICE—Continued Page

Rules of practice in patent cases—Continued
- Fees and payment of money; charges, proposed rule 21 — 7822
- General information and correspondence:
  - Receipt of letters and papers proposed rule 6 — 7822
  - Times for taking action, expiration on Sunday or holiday, proposed rule 7 — 7822
- Interferences:
  - Motions to amend, proposed rule 233 — 7824
  - Preliminary statement:
    - Effect of statement, proposed rule 223 — 7824
    - Notice and access to applications, proposed rule 226 — 7824
    - Reliance on prior application, proposed rule 224 — 7824
  - Termination; statutory disclaimer by patentee, proposed rule 263 — 7824
  - Trial:
    - Assignment of times for taking testimony, proposed rule 251 — 7824
    - Final hearing, proposed rule 256 — 7824
- Joinder of inventions in one application, division:
  - Appeal from requirement for division, proposed rule 144 — 7823
  - Different inventions in one application, proposed rule 141 — 7823
  - Reconsideration of requirement, proposed rule 143 — 7823
  - Requirement for division, proposed rule 142 — 7823
  - Subsequent presentation of claims for different invention, proposed rule 145 — 7823
- Miscellaneous changes in citations, references, etc.; proposed changes in various rules — 7825
- Oath:
  - Oath of applicant, proposed rule 65 — 7823
  - Officers authorized to administer oaths, proposed rule 66 — 7823
- Petition; proposed rule 61 — 7823
- Reissues:
  - Applicants, assignees; proposed rule 172 — 7823
  - Reissue oath; proposed rule 175 — 7823
- Specifications:
  - Cross references to other applications, proposed rule 78 — 7823
  - Signature to specification, proposed rule 76 — 7823
- Specimens required, proposed rule 93 — 7823
- Who may apply for patent:
  - Applicant for patent, proposed rule 47 — 7822
  - Assigned inventions and patents, proposed rule 47 — 7822
  - Filing by other than inventor, proposed rule 47 — 7822
  - Joint inventors, proposed rule 45 — 7822
  - Proof of authority, proposed rule 44 — 7822
  - When inventor is insane, or legally incapacitated, proposed rule 43 — 7822

Rules of practice in trade-mark cases:
- Appeals:
  - Appeal to Commissioner from decision of Examiner of Interferences, proposed rule 26.3 — 7825
  - Appeal to Court, proposed changes in rule 24.4 — 7825
  - Time and manner of ex parte appeals, proposed trade-mark rule 26.2 — 7825
- Attorneys and representation by attorneys, suspension or exclusion from practice; proposed rule 46 — 7825
- Times for taking action, expiration on Saturday, Sunday or holidays; proposed rule 1.6 — 7825

PAY, COMPENSATION, ALLOWANCES, ETC.:
- *See also* Wages and hours.
- Civil service pay regulations. *See* Civil Service Commission.
- Foreign duty of Federal employees, compensation for. *See* State Department.
- Hospitals, Government, stipends for certain positions in. *See* Civil Service Commission.
- Salary and wage stabilization. *See* National Enforcement Commission; Salary Stabilization Board; *and* Wage Stabilization Board.
- Seaman discharged from United States vessel in foreign port, medium of payment. *See* State Department.

PETROLEUM ADMINISTRATION FOR DEFENSE:
- Natural gas, limitation on delivery for space heating and large volume use — 7786

PETROLEUM AND PETROLEUM PRODUCTS: Page
- Oil and gas leases. *See* Land Management Bureau.
- Producing oil and gas fields. *See* Geological Survey.

PHYSICALLY HANDICAPPED PERSONS. *See* Handicapped persons.

POST OFFICE DEPARTMENT:
- Delivery service, special delivery mail; registered, insured or sent c. o. d., treatment of — 7572
- Department and Postal Service; orders, contracts and bonds, employees interested in mail contracts:
  - Mail-messenger service, exception for, deletion of — 7818
  - Prohibition, note — 7818
- Domestic mail matter; provisions applicable to the several classes of mail matter, nonmailable articles and compositions, provisions of law — 7818
- Holidays. *See* Post offices, general provisions relating to.
- International postal service:
  - Miscellaneous; vessels to deliver letters at post offices before entry — 7819
  - Postage rates, service available, and instructions for mailing:
    - Insurance. *See* Registry, insurance.
    - Parcel post, parcels for foreign countries:
      - Group shipments, Australia — 7494
      - Recall and change of address; deletion of Australia — 7494
      - Sealing, insured parcels for Australia — 7494
      - Unpaid and insufficiently prepaid treatment at exchange offices — 7149
    - Registry, insurance, c. o. d., and certain ordinary services:
      - Insurance; special provisions applicable to Australia — 7494
      - Registry service; special provisions applicable to:
        - Further information, redesignation — 7698
        - Indemnity, redesignation — 7698
        - Restricted delivery by senders — 7698
    - Regular (Postal Union) mails:
      - Articles for foreign countries, Australia; recall and change of address — 7494
      - Small packets:
        - Acceptable; addition to list of countries — 7278
        - Not acceptable; deletion from list of countries — 7278
    - Special delivery (Exprés) service; Canada, exceptions respecting — 7149
- Various countries, conditions applicable to service in:
  - Angola *See* Portuguese West Africa.
  - Australia (States of New South Wales, Queensland, South Australia, Tasmania, Victoria and Western Australia; also Lord Howe Island, Thursday Island, and Norfolk Island):
    - Parcel post:
      - Indemnity, redesignation — 7494
      - Insurance:
        - Limit of indemnity — 7494
        - Return receipt — 7494
      - Observations:
        - Marking of insured packages — 7494
        - Parcels containing securities, precious stones, or other precious articles, insurance of — 7494
        - Redesignation — 7494
      - Prohibitions; redesignation — 7494
      - Tables of rates, air parcels:
        - Group shipments — 7494
        - Insurance — 7494
        - Insured and ordinary, sealing of — 7494
    - Regular mails; recall and change of address — 7494
  - Barbados:
    - Parcel post, tables of rates; air parcel rates — 7278
    - Regular mails, air mail service; postage rates — 7278
  - Ceylon, regular mails; air mail service, postage rates — 7278
  - Germany; parcel post:
    - Dimensions — 7699
    - Table of rates:
      - Air parcels for all Germany; weight limit, insurance, etc — 7699
      - Surface parcel rates for certain zones — 7699

Torquay Protocol to General Agreement on Tariffs and Trade, modification with respect to tariff concessions on dried figs (Proc. 2986) 7567
Travel and transportation expenses, of civilian personnel when transferred from one official station to another for permanent duty; means of shipment (EO 10381) 7205
United States High Commissioner for Germany:
Chief of Special Mission to assist High Commissioner and to have rank of Minister (EO 10380) 7107
Functions (EO 10380) 7107

PRICE STABILIZATION, OFFICE OF:
Adjustments:
Ceiling price adjustment for commodities or services governed by specific regulations. *See specific commodities.*
Manufacturers' prices. *See* Manufacturers' prices.
Wholesalers and retailers, adjustments for, under section 402 (k) of the Act; procedure for applications (GOR 33) 7852
Agricultural commodities:
Grains, services respecting handling and storage of, for Commodity Credit Corporation. *See under* Services.
Manufacturers' prices. *See* Manufacturers' prices.
Wooden containers for. *See* Containers and closures.
Alaska. *See* Territories and possessions of United States.
Aluminum mill products, ceiling prices for:
Producers' sales (GCPR, SR 113) 7224
Resellers' prices. *See* Machines and machinery.
Apparel. *See* Consumer goods.
Authority, delegations of, to various officials:
Chief Counsel; authority to act as Acting Director of Price Stabilization, in absence of certain officials (Delegation of Authority 2) 7555
Consumer Goods Division, redelegation to Chiefs of Branches of; authority to request further information concerning ceiling prices, proposed under any ceiling price regulation (Delegation of Authority 6, Supp. 3) 7681
Deputy Director; authority to act as Acting Director of Price Stabilization, in absence of Director (Delegation of Authority 2) 7555
Director of Price Operations; authority to act as Acting Director of Price Stabilization, in absence of certain officials (Delegation of Authority 2) 7555
Directors, District, in various regions (authority respecting price action or price adjustment for specific commodities under various price regulations):
Region I Directors:
Beef, kosher, sold at retail; under CPR 26 (Redeleg. 45) 7309
Cattle, live; under CPR 23 (Redeleg. 44) 7309
Community pricing; issuance of adopting orders and reclassification, under GOR 24 (Redeleg. 47) 7949
Consumer goods; alternative pricing method for certain retailers, under CPR 7, SR 6 (Redeleg. 43) 7309
Contract motor carrier rates; adjustments, under GCPR, SR 39 (Redeleg. 15) 7756
Eating and drinking establishments; under CPR 134 (Redeleg. 38) 7403
Iron and steel, resellers' prices for; under CPR 98 (Redeleg. 29) 7308
Livestock and meat distribution; certain actions during epidemic conditions, under DR 1 (Redeleg. 36) 7553
Malt beverages, under CPR 117 (Redeleg. 28) 7308
Petroleum products; final pricing method and adjustment provisions, under CPR 13 (Redeleg. 46) 7404
Pork sold at wholesale, under CPR 74 (Redeleg. 33) 7309
Region II Directors:
Beef, kosher, sold at retail; under CPR 26 (Redeleg. 40) 7257
Cattle, live; under CPR 23 (Redeleg. 35) 7257

TITLE 7—AGRICULTURE

Chapter I—Production and Marketing Administration (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 51—FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS (INSPECTION, CERTIFICATION, AND STANDARDS)

SUBPART B—UNITED STATES STANDARDS FOR FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS

PERSIAN (TAHITI) LIMES

On June 18, 1952, a notice of proposed rule making was published in the FEDERAL REGISTER (17 F. R. 5467) regarding proposed United States Standards for Persian (Tahiti) Limes. A period of thirty days was allowed for submitting written data, views and arguments for consideration in connection with the proposed standards. After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice of rule making, the following United States Standards for Persian (Tahiti) Limes are hereby promulgated under the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1953 (Pub. Law 451, 82d Cong., approved July 5, 1952).

§ 51.272 *Standards for Persian (Tahiti) limes*—(a) *Grades*—(1) *U. S. No. 1.* U. S. No. 1 consists of Persian Limes which are firm, fairly well formed, of fairly smooth texture, which are free from decay, stylar end breakdown or other internal discoloration, broken skins which are not healed, bruises (except those incident to proper handling and packing), hard or dry skins, and free from damage caused by freezing, dryness or mushy condition, sprayburn, exanthema (ammoniation), scars, thorn scratches, scale, sunburn, scab, blanching, discoloration, buckskin, dirt or other foreign material, disease, insects or mechanical or other means.

(i) The limes shall have a good green color: *Provided*, That lots of limes which meet all the requirements of this grade except as to color shall be designated as "U. S. No. 1 Turning" if the limes in each container have started to show yellow color, or as "U. S. No. 1 Mixed Color" if the limes in each container fail to meet the color requirements of either U. S. No. 1 or U. S. No. 1 Turning.

(ii) The fruit shall have a juice content of not less than 42 percent, by volume.

(iii) In order to allow for variations incident to proper grading and handling, not more than 10 percent, by count, of the fruit in any lot may fail to meet the color requirements. In addition, not more than 10 percent, by count, of the fruit in any lot may be below the remaining requirements of this grade, but not more than one-half of this amount, or 5 percent, shall be allowed for decay, stylar end breakdown, broken skins which are not healed, or defects causing serious damage, including not more than one-half of 1 percent for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination.

(2) *U. S. No. 2.* U. S. No. 2 consists of Persian Limes which are fairly firm, which are not badly deformed, and not of excessively rough texture, which are free from decay, stylar end breakdown or other internal discoloration, broken skins which are not healed, bruises (except those incident to proper handling and packing), and hard or dry skins, and free from serious damage caused by freezing, dryness or mushy condition, sprayburn, exanthema (ammoniation), scars, thorn scratches, scale, sunburn, scab, discoloration, buckskin, dirt or other foreign material, disease, insects or mechanical or other means.

(i) The limes shall have good green color: *Provided*, That lots of limes which meet all the requirements of this grade except as to color shall be designated as "U. S. No. 2 Turning" if the limes in each container have started to show yellow color, or as "U. S. No. 2 Mixed Color" if the limes in each container fail to meet the color requirements of either U. S. No. 2 or U. S. No. 2 Turning.

(ii) The fruit shall have a juice content of not less than 42 percent, by volume.

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended June 19, 1937.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

REVISED BOOKS

TITLE 32
of the
Code of Federal Regulations

Title 32, containing the regulations of the Department of Defense and other related agencies, has been completely revised. Originally a single book, Title 32 is being reissued as two books as follows:

Parts 1–699 ($5.00)
Part 700 to end (to be announced)

These books contain the full text of regulations in effect on December 31, 1951

Order from
Superintendent of Documents, Government Printing Office, Washington 25, D. C.

(iii) In order to allow for variations incident to proper grading and handling, not more than 10 percent, by count, of the fruit in any lot may fail to meet the color requirements. In addition, not more than 10 percent, by count, of the fruit in any lot may be below the remaining requirements of this grade, but not more than one-half of this amount, or 5 percent, shall be allowed for decay, stylar end breakdown, and broken skins which are not healed, including not more than one-half of 1 percent for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination.

(3) *U. S. Combination grade.* A lot of limes may be designated "U. S. Combination" when not less than 75 percent, by count, of the limes in each container meet the requirements of U. S. No. 1 grade and the remainder U. S. No. 2 grade.

(i) The limes shall have good green color: *Provided*, That lots of limes which meet all the requirements of this grade except as to color shall be designated as "U. S. Combination Turning" if the limes in each container have started to show yellow color, or as "U. S. Combination Mixed Color" if the limes in each container fail to meet the color requirements of either U. S. Combination or U. S. Combination Turning.

(ii) In order to allow for variations incident to proper grading and handling, not more than 10 percent, by count, of the fruit in any lot may fail to meet the color requirements. In addition, not more than 10 percent, by count, of the fruit in any lot may be below the remaining requirements of the lower grade in the combination, but not more than one-half of this amount, or 5 percent, shall be allowed for limes affected by decay, stylar end breakdown, and broken skins which are not healed, including not more than one-half of 1 percent for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay enroute or at destination.

(iii) No part of the above tolerances shall be allowed to reduce for the lot as a whole, the 75 percent of U. S. No. 1 limes required in the U. S. Combination Grade, but individual containers may have not less than 65 percent of the higher grade.

(b) *Unclassified.* Unclassified consists of Persian Limes which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

(c) *Application of tolerances to individual packages.* (1) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(i) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified, except that when the package contains 15 specimens or less, individual packages may contain not more than double the tolerance specified.

(ii) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, provided at least one specimen which does not meet the requirements shall be allowed in any one package.

(d) *Definitions.* (1) "Firm" means that the fruit is not soft or flabby.

(2) "Fairly well formed" means that the fruit shows normal characteristic shape for the Persian variety and is not materially flattened on one side.

(3) "Fairly smooth texture" means that the fruit is comparatively free from lumpiness and that pebbling is not abnormally coarse. Coarse pebbling is not objectionable as it is indicative of good keeping quality and is characteristic of the fruit, especially that from young trees.

(4) "Stylar end breakdown" is a physiological breakdown starting as a sunken area at the base of the nipple. A brownish discoloration develops in the rind. As it progresses the color of the affected area becomes light drab to drab but the area remains firm unless infected with secondary organisms that cause soft decay.

(5) "Damage" means any defect that materially affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(i) Dryness or mushy condition which extends into all segments more than one-eighth of an inch at the stem end, or more than the equivalent of this amount, by volume, when occurring in other portions of the fruit;

(ii) Sprayburn which changes the color to such an extent that the appearance of the fruit is materially affected, or which causes scarring that in the aggregate exceeds the area of a circle one-fourth inch in diameter;

(iii) Exanthema (ammoniation) which materially detracts from the appearance of the fruit, or which occurs as small, thinly scattered spots over more than 10 percent of the fruit surface, or as solid scarring (not cracked), or depressions which in the aggregate exceed the area of a circle one-half inch in diameter;

(iv) Scars which are dark, rough, or deep and in the aggregate exceed the area of a circle one-fourth inch in diameter, or scars which are fairly light in color, slightly rough, or of slight depth and in the aggregate exceed the area of a circle one-half inch in diameter, or scars which are light colored, fairly smooth, with no depth and aggregate more than 10 percent of the fruit surface;

(v) Thorn scratches, when the injury is not well healed, or when dark colored, rough or deep and in the aggregate exceeds the area of a circle one-fourth inch in diameter, or when light colored, fairly smooth and concentrated and in the aggregate exceeds the area of a circle one-half inch in diameter, or light colored and scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the aggregate area of one-half inch permitted for light colored concentrated injury;

(vi) Scale, when more than ten medium to large California red or purple scale adjacent to button at stem end, or scattered over the fruit, or any scale which affects the appearance of the fruit to a greater extent;

(vii) Sunburn which causes appreciable flattening of the fruit, drying of the skin, material change in the color of the skin, appreciable drying of the flesh underneath the affected area or affects more than 5 percent of the fruit surface;

(viii) Scab which materially affects the shape or texture;

(ix) Blanching, when more than 10 percent of the surface of the fruit shows a whitish area owing to shading, resting on the surface of the ground, or contact with other fruits on the tree. These whitish areas are not to be confused with fruit that is turning, the color of which is more of a greenish yellow;

(x) Discoloration caused by rust mite, melanose or other means, when fairly smooth and more than 10 percent of the fruit surface is affected, or when slightly rough and in the aggregate exceeds the area of a circle one-half inch in diameter; and,

(xi) Buckskin, when more unsightly than the maximum of discoloration allowed, or the fruit texture is materially affected.

(6) "Good green color" means that the skin of that part of the lime free from permissible injury shall be of a good green color characteristic of the Persian variety.

(7) "Fairly firm" means that the fruit is not soft or excessively flabby.

(8) "Badly deformed" means that the fruit is seriously misshapen from any cause.

(9) "Excessively rough texture" means that the skin is badly ridged or very decidedly lumpy.

(10) "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(i) Dryness or mushy condition which extends into all segments more than one-fourth of an inch at the stem end, or more than the equivalent of this amount, by volume, when occurring in other portions of the fruit;

(ii) Sprayburn which changes the color to such an extent that the appearance of the fruit is seriously injured or which causes scarring that in the aggregate exceeds the area of a circle one-half inch in diameter;

(iii) Exanthema (ammoniation) which occurs as small spots over more than 25 percent of the fruit surface, or as solid scarring (not cracked), or depressions which aggregate more than 10 percent of the fruit surface;

(iv) Scars which are dark, rough, or deep and aggregate more than 5 percent of the fruit surface, or scars which are fairly light in color, slightly rough, or of slight depth and aggregate more than 10 percent of the fruit surface, or scars which are light colored, fairly smooth, with no depth and aggregate more than 25 percent of the fruit surface;

(v) Thorn scratches, when the injury is not well healed, or when dark colored, rough or deep and aggregates more than 5 percent of the fruit surface, or when light colored, fairly smooth and concentrated and aggregates more than 10 percent of the fruit surface, or light colored and scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the 10 percent light colored concentrated injury;

(vi) Scale, California red or purple scale concentrated as a ring or blotch when the average outside diameter exceeds one-half inch, or more than the equivalent of this amount when scattered over the fruit surface;

(vii) Sunburn which causes decided flattening of the fruit, marked drying or dark discoloration of the skin, material drying of the flesh underneath the affected area, or which affects more than 10 percent of the fruit surface;

(viii) Scab which seriously affects shape or texture;

(ix) Discoloration caused by rust mite, melanose or other means, when fairly smooth and more than 50 percent of the fruit surface is affected, or when slightly rough and more than 25 percent of the fruit surface is affected; and,

(x) Buckskin, when more unsightly than the maximum of discoloration allowed or the fruit texture is seriously affected.

(e) *Effective time.* The United States Standards for Persian (Tahiti) Limes contained in this section and which supersede the United States Standards for Persian (Tahiti) Limes effective May 1, 1939, shall become effective thirty (30) days after the date of publication in the FEDERAL REGISTER.

(60 Stat. 1087, Pub. Law 451, 82d Cong.; 7 U. S. C. 1624)

Done at Washington, D. C. this 28th day of July 1952.

[SEAL] GEORGE A. DICE,
Acting Assistant Administrator, Production and Marketing Administration.

[F. R. Doc. 52-8417; Filed, July 31, 1952; 8:48 a. m.]

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

SUBPART B—UNITED STATES STANDARDS FOR GRADES OF PROCESSED FRUITS, VEGETABLES, AND OTHER PRODUCTS [1]

GRADES OF FROZEN WHOLE KERNEL (OR WHOLE GRAIN) CORN

A notice of proposed rule making was published on May 24, 1952, in the FEDERAL REGISTER (17 F. R. 4770) regarding proposed United States Standards for Grades of Frozen Whole Kernel (or Whole Grain) Corn. After considering all relevant matters presented, including the proposals set forth in the aforesaid notice, the following United States Standards for Grades of Frozen Whole Kernel (or Whole Grain) Corn are hereby promulgated under the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621, et seq.) and the Department of Agriculture Appropriation Act, 1953 (Pub. Law 451, 82d Cong., approved July 5, 1952).

The Department finds that it is unnecessary and contrary to the public interest to give a 30-day notice of the effective date of the standards herewith published for the reasons that:

(1) The packing season for frozen corn is about to begin;

(2) The industry has been properly apprised through rule making of the revisions;

(3) No additional preparation on the part of industry is required;

(4) The revisions create no hardships; therefore, the effective date of the standards issued will be the date of publication in the FEDERAL REGISTER.

§ 52.271 *Frozen whole kernel (or whole grain) corn.* Frozen whole kernel (or whole grain) corn means the frozen product prepared from fresh, clean, sound, succulent kernels of sweet corn of either the white or golden (or yellow) varieties by removing husk and silk; by sorting, trimming, and washing; and by blanching before or after removal from the cob. The frozen whole kernel (or whole grain) corn is frozen in accordance with good commercial practice and maintained at temperatures necessary for the preservation of the product.

(a) *Color of frozen whole kernel (or whole grain) corn.* (1) Golden (or Yellow).

(2) White.

(b) *Grades of frozen whole kernel (or whole grain) corn.* (1) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen whole kernel (or whole grain) corn that possesses similar varietal characteristics; that possesses a good flavor and odor; that is tender; that possesses a good color; that is practically free from defects; and that for those factors which are scored in accordance with the scoring system outlined in this section the total score is not less than 90 points: *Provided*, That the frozen whole kernel (or whole grain) corn may possess a reasonably good color if the total score is not less than 90 points.

(2) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen whole kernel (or whole grain) corn that possesses similar varietal characteristics; that possesses a good flavor and odor; that is reasonably tender; that possesses a reasonably good color; that is reasonably free from defects; and that for those factors which are scored in accordance with the scoring system outlined in this section the total score is not less than 80 points: *Provided*, That frozen whole kernel (or whole grain) corn may possess a fairly good color, scoring not less than 7 points if the total score is not less than 80 points.

(3) "U. S. Grade C" or "U. S. Standard" is the quality of frozen whole kernel (or whole grain) corn that possesses similar varietal characteristics; that possesses a fairly good flavor and odor; that is fairly tender; that possesses a fairly good color; that is fairly free from defects; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this section.

(4) "Substandard" is the quality of frozen whole kernel (or whole grain) corn that fails to meet the requirements of "U. S. Grade C" or "U. S. Standard."

(c) *Ascertaining the grade.* (1) The grade of frozen whole kernel (or whole grain) corn may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and tenderness and maturity.

(2) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

Factors:	Points
(i) Color	10
(ii) Absence of defects	40
(iii) Tenderness and maturity	50
Total score	100

(3) The grade of frozen whole kernel (or whole grain) corn is determined immediately after thawing to the extent that the product is substantially free from ice crystals. The product is cooked to determine flavor and odor.

(4) "Good flavor and odor" means that the product, after cooking, has a good characteristic normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(5) "Fairly good flavor and odor" means that the product, after cooking, may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

(d) *Ascertaining the rating of the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for such factors and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "36 to 40 points" means 36, 37, 38, 39, or 40 points).

(1) *Color.* (i) Frozen whole kernel (or whole grain) corn that possesses a good color may be given a score of 9 to 10 points. "Good color" means that the kernels possess a practically uniform color typical of tender sweet corn and that the product is bright and is practically free from "off-variety" kernels.

(ii) If the frozen whole kernel (or whole grain) corn possesses a reasonably good color a score of 8 points may be given. "Reasonably good color" means that the kernels possess a reasonably uniform color typical of reasonably tender sweet corn and that the product is reasonably bright and reasonably free from "off-variety" kernels.

(iii) Frozen whole kernel (or whole grain) corn that possesses a fairly good color may be given a score of 6 or 7 points. Frozen whole kernel (or whole grain) corn that scores 6 points in this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a partial limiting rule). "Fairly good color" means that the kernels possess a fairly uniform color typical of fairly tender sweet corn and that the product may be dull but not to the extent that the appearance is seriously affected, and is fairly free from "off-variety" kernels.

(iv) Frozen whole kernel (or whole grain) corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 5 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(2) *Absence of defects.* (i) The factor of absence of defects refers to the degree of freedom from pieces of cob, husk, silk, or other harmless extraneous vegetable matter, from pulled kernels, ragged kernels, crushed kernels, loose skins, and from damaged or seriously damaged kernels.

(a) "Damaged kernel" means any kernel affected by insect injury or damaged by discoloration, pathological injury, or by other means to the extent that the appearance or eating quality is materially affected.

(b) "Seriously damaged kernel" means damaged to such an extent that the appearance or eating quality is seriously affected.

(ii) Frozen whole kernel (or whole grain) corn that is practically free from defects may be given a score of 36 to 40 points. "Practically free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels may be present that do not more than slightly affect the appearance or eating quality of the product.

(iii) If the frozen whole kernel (or whole grain) corn is reasonably free from defects a score of 32 to 35 points may be given. Frozen whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels may be present that do not materially affect the appearance or eating quality of the product.

(iv) Frozen whole kernel (or whole grain) corn that is fairly free from defects may be given a score of 28 to 31 points. Frozen whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels may be present that do not seriously affect the appearance or eating quality of the product.

(v) Frozen whole kernel (or whole grain) corn that fails to meet the requirements of subdivision (iv) of this subparagraph may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(3) *Tenderness and maturity.* (i) Frozen whole kernel (or whole grain) corn that is tender may be given a score of 45 to 50 points. "Tender" means that the kernels are in the milk or early cream stage of maturity and have a tender texture.

(ii) If the frozen whole kernel (or whole grain) corn is reasonably tender a score of 40 to 44 points may be given. Frozen whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably tender" means that the kernels are in the cream stage of maturity and have a reasonably tender texture.

(iii) Frozen whole kernel (or whole grain) corn that is fairly tender may be given a score of 36 to 39 points. Frozen whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly tender" means that the kernels are in the early dough or dough stage and have a fairly tender texture.

(iv) Frozen whole kernel (or whole grain) corn that fails to meet the requirements of subdivision (iii) of this subparagraph may be given a score of 0 to 35 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

(e) *Tolerances for certification of officially drawn samples.* (1) When certifying samples that have been officially drawn and which represent a specific lot of frozen whole kernel (or whole grain) corn, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(i) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor subject to such limiting rule, is within the range for the grade indicated;

(ii) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(iii) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

(f) *Score sheet for frozen whole kernel (or whole grain) corn.*

Number, size, and kind of container .....
Containers marks or identification .....
Label .....
Net weight (ounces) .....

Factors		Score points	
I. Color	10	(A)	9-10
		(B)	8
		(C)	6-7
		(Substd.) [2]	0-5
II. Absence of defects	40	(A)	36-40
		(B)	32-35
		(C)	28-31
		(Substd.) [2]	0-27
III. Tenderness and maturity	50	(A)	45-50
		(B)	40-44
		(C)	36-39
		(Substd.) [2]	0-35
Total score	100		

Grade .....
Flavor and odor .....

[1] Indicates partial limiting rule.
[2] Indicates limiting rule.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(g) *Effective time and supersedure.* The revised United States Standards for Grades of Frozen Whole Kernel (or Whole Grain) Corn (which are the fourth issue) contained in this section will become effective on date of publication in the FEDERAL REGISTER and will thereupon supersede the United States Standards for Grades of Frozen Whole Kernel (or Whole Grain) Corn which have been in effect since December 1, 1932.

(60 Stat. 1087, Pub. Law 451, 82d Cong.; 7 U. S. C. 1624)

Issued at Washington, D. C., this 28th day of July 1952.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter C—Procedural Regulations

[Regs., Serial No. PR-15]

PART 302—RULES OF PRACTICE IN ECONOMIC PROCEEDINGS

PROCEDURES FOR FIXING TEMPORARY MAIL RATES

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 28th day of July 1952.

On May 5, 1952, the Board gave notice of a proposed revision of § 302.310 of the Procedural Regulations (14 CFR Part 302), relating to the procedure to be followed by the Board in the fixing of temporary mail rates.

The notice of proposed rule making pointed out that the principal effects of the revision were (1) to cut the time for filing objections and answers to the Board's show cause order from 10 and 20 days respectively to 5 and 10 days; (2) to provide in all hearing cases for certification of the record to the Board and a tentative Board decision, which will become final unless exceptions and supporting reasons are filed within 10 days; (3) the elimination of proposed findings and conclusions, supporting briefs and oral argument, except at Board request; (4) to provide for limiting of cross-examination to essential issues. Interested persons were invited to participate in the proposed rule making by submitting such written data, views, or arguments as they might desire. Five air carriers responded to this invitation by the submission of written comments.

It was suggested on behalf of west coast carriers that the 5 and 10 day rule for the filing of objections and answers to a Board show cause order worked an undue hardship on such carriers by reason of their distance from Washington. In the light of this comment, we have concluded to modify the proposed rule to provide an 8 and 15 day period for filing objections and answers to a show cause order.

Two carriers objected to the provisions of the regulation with respect to the elimination of examiners reports and other procedural steps prior to the issuance of a tentative opinion by the Board. While it was recognized that there is a strong interest in expediting temporary mail rate cases, it was argued that there is no need for the proposed rule to accomplish that result. In cases where a proposed temporary mail rate is not contested, it is argued that expedition can be accomplished by the waiver of the parties. In cases where a proposed temporary mail rate is contested, it is argued that fairness to the carrier involved dictates the retention of all procedural steps. It is further contended that greater expedition will result if there is a report by the examiner familiar with the case. A suggestion has been made that in any event the proposed procedure should not be applicable to service mail rate cases.

We have given careful consideration to these comments and must conclude that they do not outweigh the need for unusual speed in the fixing of temporary mail rates. In uncontested cases, it is clearly not a sound procedure for the Board to be forced to rely on the obtaining of formal waivers from the parties. In the case of objections to a proposed temporary mail rate, the utilization of all the procedures suggested would seriously delay the fixing of the proposed temporary rate. This is not sound for either the carriers or the public interest generally since it would handicap the Board in meeting emergency situations and make more likely drastic adjustments in the determination of the final rate. The Board should be able to proceed with dispatch in meeting emergency situations and in revising a temporary mail rate where changes in a carrier's operating picture dictate such revisions.

Bearing in mind the fact that the final rate will fully compensate the air carrier for any deficiency in the temporary rate, we believe that the proposed regulation meets the needs of fairness under the circumstances. A procedure is set up to permit objections to a tentative decision. This gives a carrier an opportunity to seek correction of any proposed temporary rate. We do not believe that more is necessary when it is considered that the final rate may be adjusted up or down after hearings involving all of the usual procedural steps. Finally, we conclude that adequate grounds do not exist for making the regulation not applicable to service rate cases.

Since this is not a substantive rule but one of agency procedure and practice, it may be made effective on less than 30 days' notice.

In consideration of the foregoing and the reasons set forth in the notice of proposed rule-making of May 5, 1952, the Civil Aeronautics Board hereby amends § 302.310 of the Procedural Regulations (14 CFR 302.310) as follows, effective July 28, 1952:

1. By striking § 302.310 of the Procedural Regulations and substituting therefor a new § 302.310 of the Procedural Regulations to read as follows:

§ 302.310 *Procedure for fixing temporary mail rates.* (a) At any time during the pendency of a proceeding for the determination of final mail rates, the Board, upon its own initiative, or on petition by the carrier whose rates are in issue or the Postmaster General, may fix temporary rates of compensation for the transportation of mail subject to downward or upward adjustment upon the determination of final mail rates.

(b) The procedure for determining temporary mail rates shall be the same as for the determination of final mail rates, except that:

(1) Notice of objections to the Board's show cause order proposing temporary mail rates must be filed by any party or petitioner for intervention within 8 days, and an answer within 15 days, of the time such order is served;

(2) Failure to file notice of objections within the 8-day period shall be deemed to be a waiver of all further procedural steps before final decision, including hearing and a tentative decision, and the proceeding will stand submitted to the Board for final decision;

(3) Upon the conclusion of the hearing after objections and answer have been filed, the examiner shall immediately certify the entire record to the Board for a tentative decision;

(4) Neither proposed findings and conclusions and supporting briefs nor oral argument will be permitted, except upon the Board's request.

(5) After the issuance by the Board of a tentative decision, the parties shall have 10 days in which to file exceptions and supporting reasons. If no exceptions are filed within the prescribed time, the tentative decision shall without further proceedings become the final decision of the Board. If exceptions are duly filed, the proceeding will stand submitted to the Board for final decision as of the time of such filing.

(c) In absence of a convincing showing that it will result in substantial prejudice to any party or delay the proceeding, the examiner shall require the parties to submit all their testimony in writing and shall closely limit cross-examination to the essential issues (bearing in mind the purpose and urgency of fixing temporary mail rates together with the fact that such temporary rates are subject to downward or upward adjustment upon the fixing of final rates), and shall in all other respects urgently expedite the proceeding.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425; Interprets or applies sec. 1001, 52 Stat. 1017; 49 U. S. C. 641)

By the Civil Aeronautics Board.

[SEAL] FRED A. TOOMBS,
Acting Secretary.

[Regs., Serial No. PR-16]

PART 302—RULES OF PRACTICE IN ECONOMIC PROCEEDINGS

PARTICIPATION IN HEARINGS BY PERSONS NOT PARTIES

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 28th day of July 1952.

The present § 302.14 of the Procedural Regulations provides for participation in hearings in economic proceedings by persons not parties by appearance at a hearing and the presentation of evidence relevant to the issues. However, the section does not now contain any provision which specifically permits persons not parties to file with the Board a written statement of their position. The Port of New York Authority has requested the Board to include such a provision in § 302.14. It is asserted that the inclusion of such a revision would relieve many parties from the burdens of formal intervention and could also result in a saving of time to the Board. Upon consideration of the application, we concur in these views. Although the act now gives a statutory right to file a protest or memorandum of opposition in a proceeding under section 401, this right does not extend to all Board proceedings. Consequently, some procedural regulation is necessary to make clear that a written statement in lieu of intervention may be filed in any Board economic proceeding.

Since this amendment is not a substantive rule but one of agency procedure, notice and public procedures hereon are unnecessary, and the amendment may be made effective upon less than 30 days' notice.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 302 of the Procedural Regulations (14 CFR Part 302) as follows, effective August 1, 1952:

1. By amending § 302.14 to read as follows:

§ 302.14 *Participation in hearings by persons not parties.* Any person, including any state, political division thereof, state aviation commission, or other public body, may appear at any hearing, other than in an enforcement proceeding, and present any evidence which is relevant to the issues. With the consent of the Examiner or the Board, if the hearing is held by the Board, such person may also cross-examine witnesses directly. In addition, such persons may present to both the Examiner and the Board an oral or written statement on the issues involved in the proceeding. Such statement shall conform to the requirements of these rules as to form, content, service, and time of filing of briefs to the Examiner and the Board.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interprets or applies sec. 1001, 52 Stat. 1017; 49 U. S. C. 641)

By the Civil Aeronautics Board.

[SEAL] FRED A. TOOMBS,
Acting Secretary.

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 5884]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

HOME MACHINE SUPPLY, INC., ET AL.

Subpart—*Advertising falsely or misleadingly:* § 3.70 *Fictitious or misleading guarantees;* § 3.235 *Source or origin—Maker;* § 3.260 *Terms and conditions.* Subpart—*Concealing or obliterating law required and informative marking:* § 3.515 *Foreign source.* Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 3.1860 *Imported product or parts as domestic;* § 3.1905 *Terms and conditions.* Subpart—*Offering unfair, improper and deceptive inducements to purchase or deal:* § 3.1980 *Guarantee, in general;* § 3.2080 *Terms and conditions.* In connection with the offering for sale, sale or distribution of sewing machine heads or sewing machines in commerce, (1) offering for sale, selling or distributing foreign made sewing machine heads, or sewing machines of which foreign made heads are a part, without clearly and conspicuously disclosing on the heads, in such a manner that it will not be hidden or obliterated, the country of origin thereof; or, (2) representing, directly or by implication, that respondents' sewing machine heads or sewing machines are fully guaranteed, or that they are otherwise guaranteed, unless the nature and extent of the guarantee, and the manner in which the guarantor will perform thereunder are clearly and conspicuously disclosed; prohibited.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Home Machine Supply, Inc., et al., New York, N. Y., Docket 5884, April 24, 1952]

In the Matter of Home Machine Supply, Inc., a Corporation, and Max Lippman and Max Albin, Individually and as Officers of Said Corporation

This proceeding was heard by James A. Purcell, hearing examiner, upon the complaint of the Commission, respondents' answer, and a hearing at which, in response to motion so to do and the granting thereof, respondents filed a substituted answer which admitted all of the material allegations of facts set forth in the complaint, but reserved to respondents the right and privilege to submit proposed findings and conclusions, and made certain other reservations also.

Thereafter the proceeding regularly came on for final consideration by said examiner, theretofore duly designated by the Commission, upon said complaint and answer, no proposed findings and conclusions having been submitted in behalf of any part to the proceeding, and said examiner, having duly considered the record, with the exception, in view of the filing of the admission answer, of certain testimony which had theretofore been received, and having found that the proceeding was in the interest of the public, made his initial decision comprising certain findings as to the facts,[1] conclusion drawn therefrom,[1] and order to cease and desist.

No appeal having been filed from said initial decision of said trial examiner as provided for in Rule XXII, nor any other action taken as thereby provided to prevent said initial decision becoming the decision of the Commission thirty days from service thereof upon the parties, said initial decision, including said order to cease and desist, accordingly, under the provisions of said Rule XXII became the decision of the Commission on April 24, 1952.

The said order to cease and desist is as follows:

It is ordered, That the respondents, Home Machine Supply, Inc., a corporation, and its officers, and Max Lippman and Max Albin, individually and as officers of said corporation, and said respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution of sewing machine heads or sewing machines in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Offering for sale, selling or distributing foreign made sewing machine heads, or sewing machines of which foreign made heads are a part, without clearly and conspicuously disclosing on the heads, in such a manner that it will not be hidden or obliterated, the country of origin thereof.

2. Representing, directly or by implication, that their sewing machine heads or sewing machines are fully guaranteed, or that they are otherwise guaranteed, unless the nature and extent of the guarantee, and the manner in which the guarantor will perform thereunder are clearly and conspicuously disclosed.

By "Decision of the Commission and order to file report of compliance", Docket 5884, April 24, 1952, which announced and decreed fruition of said initial decision, report of compliance with the said order was required as follows:

It is ordered, That the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: April 24, 1952.

By the Commission.

[SEAL] D. C. DANIEL,
Secretary.

[F. R. Doc. 52-8432; Filed, July 31, 1952; 8:52 a. m.]

[Docket 5886]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

ROMAN-RAICHERT COMPANY, INC., ET AL.

Subpart—*Advertising falsely or misleadingly:* § 3.70 *Fictitious or misleading guarantees;* § 3.235 *Source or origin—Maker;* § 3.260 *Terms and conditions.* Subpart—*Concealing or obliterating law required and informative marking:* § 3.515 *Foreign source.* Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 3.1860 *Imported product or parts as domestic;* § 3.1905 *Terms and conditions.* Subpart—*Offering unfair, improper and deceptive inducements to purchase or deal:* § 3.1980 *Guarantee, in general;* § 3.2080 *Terms and conditions.* Subpart—*Using misleading name—Goods:* § 3.2345 *Source or origin—Maker.* In connection with

[1] Filed as part of the original Document.

the offering for sale, sale or distribution of sewing machine heads or sewing machines in commerce, (1) offering for sale, selling or distributing foreign made sewing machine heads, or sewing machines of which foreign made heads are a part, without clearly and conspicuously disclosing on the heads, in such a manner that it will not be hidden or obliterated, the country of origin thereof; (2) using the words "Cadillac", or "Zenith", or any simulations thereof, as brand or trade names to designate, describe or refer to respondents' sewing machines or sewing machine heads; or representing through the use of any other words or in any other manner that their sewing machines or sewing machine heads are made by anyone other than the actual manufacturers; or, (3) representing, directly or by implication, that their sewing machine heads or sewing machines are guaranteed for twenty years, or for any other period of time, or that they are otherwise guaranteed, unless the nature and extent of the guarantee and the manner in which the guarantor will perform thereunder are clearly and conspicuously disclosed; prohibited.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Roman-Raichert Company, Inc., et al., Chicago, Ill., Docket 5886, April 24, 1952]

In the Matter of Roman-Raichert Company, Inc., a Corporation, and Roman Raichert, Leonard Raichert and Edward Raichert, Individually and as Officers of Said Corporation

This proceeding was heard by James A. Purcell, hearing examiner, upon the complaint of the Commission, respondents' answer, and a hearing at which, in response to motion so to do and the granting thereof, respondents filed a substitute answer which admitted all of the material allegations of fact set forth in the complaint, but reserved to respondents the privilege to submit proposed findings and conclusions, and made certain other reservations also.

Thereafter the proceeding regularly came on for final consideration by said examiner, theretofore duly designated by the Commission, upon said complaint and answer, and proposed findings and conclusions on behalf of respondents, none having been filed by the attorney in support of the complaint, and said examiner, having duly considered the record in the matter and having found that the proceeding was in the interest of the public, made his initial decision, comprising certain findings as to the facts,[1] conclusion drawn therefrom,[1] and order to cease and desist.

No appeal having been filed from said initial decision of said trial examiner as provided for in Rule XXII, nor any other action taken as thereby provided to prevent said initial decision becoming the decision of the Commission thirty days from service thereof upon the parties, said initial decision, including said order to cease and desist, accordingly, under the provisions of said Rule XXII became the decision of the Commission on April 24, 1952.

[1] Filed as part of the original document.

The said order to cease and desist is as follows:

It is ordered, That the respondents, Roman-Raichert Company, Inc., a corporation, and its officers, and Roman Raichert, Leonard Raichert and Edward Raichert, individually and as officers of said corporation, and said respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution of sewing machine heads or sewing machines in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Offering for sale, selling or distributing foreign made sewing machine heads, or sewing machines of which foreign made heads are a part, without clearly and conspicuously disclosing on the heads, in such a manner that it will not be hidden or obliterated, the country of origin thereof.

2. Using the words "Cadillac", or "Zenith", or any simulations thereof, as brand or trade names to designate, describe or refer to their sewing machines or sewing machine heads; or representing through the use of any other words or in any other manner that their sewing machines or sewing machine heads are made by anyone other than the actual manufacturers.

3. Representing, directly or by implication, that their sewing machine heads or sewing machines are guaranteed for twenty years, or for any other period of time, or that they are otherwise guaranteed, unless the nature and extent of the guarantee and the manner in which the guarantor will perform thereunder are clearly and conspicuously disclosed.

By "Decision of the Commission and order to file report of compliance", Docket 5886, April 24, 1952, which announced and decreed fruition of said initial decision, report of compliance with the said order was required as follows:

It is ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: April 24, 1952.

By the Commission.

[SEAL] D. C. DANIEL, *Secretary.*

[F. R. Doc. 52-8433; Filed, July 31, 1952; 8:53 a. m.]

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53057]

PART 5—CUSTOMS RELATIONS WITH CONTIGUOUS FOREIGN TERRITORY

PART 18—TRANSPORTATION IN BOND AND MERCHANDISE IN TRANSIT

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

IN-TRANSIT SHIPMENTS

The Customs Services of Canada and the United States have agreed on a plan for the joint usage by the two Services on carload shipments of merchandise moving between ports of one country via territory of the other of customs seals applied in the country of departure without further sealing of the cars with customs seals in the country through which they are transported in bond. The adoption of the plan will serve to reduce the work of railroad carriers engaged in the transportation of such shipments and will facilitate the movement of the shipments.

Under the plan, yellow Tyden seals stamped {U. S. Customs / Can. Transit} will be placed on carloads of in-transit merchandise at United States ports of exit to Canada and bright green Tyden seals stamped {Can. Customs / U. S. Transit} will be placed on carloads of in-transit merchandise at Canadian ports of exit to the United States.

It is also desirable to permit the use of the same kind of in-transit manifest for such shipments, whether they are being moved in transit between ports of the United States via Canada or in transit between ports of Canada via the United States.

Accordingly, the following changes are made in the Customs Regulations of 1943:

1. Sections 5.8 (g) and 5.11, Customs Regulations of 1943 (19 CFR 5.8 (g), 5.11), as amended, are hereby further amended as follows:

a. The first sentence of § 5.8 (g) is deleted and the following matter substituted therefor: "It shall be the duty of the carrier to affix blue in-transit seals to all openings of conveyances and compartments containing in-transit merchandise, except that on the Canadian border yellow in-transit seals shall be affixed to carload shipments of in-transit merchandise, whether or not the cars are already sealed with United States customs red in-bond seals, and except that in all other instances conveyances or compartments already secured by United States customs red in-bond seals may go forward without having blue or yellow in-transit seals affixed thereto and without in-transit manifests. The collector may relieve the carrier of the responsibility of affixing in-transit seals by notifying it in writing that customs inspectors will assume it."

(Sec. 554, 46 Stat. 743; 19 U. S. C. 1554)

b. The present paragraph of § 5.11 is designated (a) and the first sentence is amended to read: "Whenever merchandise (including baggage), whether in carload or less-than-carload lots, arrives at a frontier port from Mexico and whenever merchandise arrives at a frontier port from Canada by vessel or in less-than-carload lots in transit through the United States to the same country from which it arrived, the same procedure shall be followed as that prescribed for merchandise in transit through the United States to other foreign countries (§§ 18.14 and 18.20–18.24 of this chapter), except that only three copies of customs Form 7512 or 7520 shall be required, and except that, when the route is such that the train and cars will remain intact while proceeding through the United States, a consolidated train manifest containing the same information as is required on customs Form 7512 or 7520 may be used."

c. The parenthetical matter at the end of redesignated paragraph (a) of § 5.11 is deleted and the following new paragraph (b) is added:

(b) When carload shipments of merchandise arrive at Canadian frontier ports for in-transit movement through the United States in bond and return to Canada, bright green in-transit seals will be placed on the cars and the sealing thereof verified by Canadian customs officers before the cars depart from Canada. No other in-transit seals shall be required to be placed on such cars before their movement in bond through the United States provided the seals placed on the cars in Canada are found to be locked and properly attached. In-transit manifest forms of the kind referred to in § 5.8 (b) may be used in lieu of customs Form 7512 or 7520, as the case may be, for such sealed carload shipments of in-transit merchandise. In-transit manifest forms so used in lieu of customs Form 7512 or 7520 shall be serially numbered in a separate series of numbers.

(Sec. 553, 46 Stat. 742, sec. 21, 52 Stat. 1087; 19 U. S. C. 1553)

2. a. Section 18.4 (a), Customs Regulations of 1943 (19 CFR 18.4 (a)), as amended is further amended by inserting "(except as otherwise provided for by § 5.11 (b) of this chapter)" after the word "seals" where it first appears in the first sentence.

(Sec. 551, 46 Stat. 742, 59 Stat. 667, sec. 624, 46 Stat. 759; 19 U. S. C. 1551, 1624)

b. Section 18.15 (b), Customs Regulations of 1943 (19 CFR 18.15 (b)), is amended to read:

(b) In lieu of cording and sealing, the baggage may be forwarded in a car or compartment sealed with in-transit seals in harmony with § 5.8 (g) of this chapter and manifested as in the case of other merchandise in transit through foreign territory.

(Secs. 554, 624, 46 Stat. 743, 759; 19 U. S. C. 1554, 1624)

3. Section 24.13, Customs Regulations of 1943 (19 CFR 24.13), as amended, is further amended as follows:

a. Paragraph (b) is amended by changing the period at the end of the first sentence to a comma and adding the following: "except that bright green seals stamped {Can. Customs / U. S. Transit} shall be used to seal carload shipments of merchandise moving in transit between Canadian ports through the United States in bond as provided for by § 5.11 (b) of this chapter."

b. Paragraph (b) is further amended by changing the period at the end of the second sentence to a comma and adding the following: "except that in-transit seals used on carload shipments of merchandise moving in transit between United States ports via Canada shall be colored yellow and stamped {U. S. Customs / Can. Transit},"

c. Paragraph (c) is amended by inserting "(except the aforesaid green seals)" after "said seals" in the first sentence, and by inserting the following new matter after the last sentence: "An order for green Tyden in-bond seals shall be submitted to the office of the Director of Customs-Excise Inspection, Ottawa, Canada, for approval and forwarding to the manufacturer. An order for green Tyden in-bond seals must stipulate that the seals are to be consigned to the collector of customs and excise in Canada at the port indicated on the seals for entry purposes and storage under customs lock and key."

(R. S. 251, sec. 624, 46 Stat. 759; 19 U. S. C. 66, 1624)

The new procedure herein authorized shall be made effective in the various border districts at the earliest practicable date, the effective date to be determined locally as agreed upon by the collector and the collector of customs of the adjacent customs district of Canada. In fixing such date, the local collector shall give due consideration to carriers' stocks of unused customs seals as well as to the dates of delivery of the new in-transit seals above mentioned.

[SEAL] D. B. STRUBINGER, *Acting Commissioner of Customs.*

Approved: July 24, 1952.

A. N. OVERBY, *Acting Secretary of the Treasury.*

[F. R. Doc. 52-8434; Filed, July 31, 1952; 8:54 a. m.]

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Federal Security Agency

PART 141—TESTS AND METHODS OF ASSAY FOR ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

PART 146—CERTIFICATION OF BATCHES OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

MISCELLANEOUS AMENDMENTS

By virtue of the authority vested in the Federal Security Administrator by the provisions of section 507 of the Federal Food, Drug, and Cosmetic Act (52 Stat. 1040, 1055, as amended by 59 Stat. 463, 61 Stat. 11, 63 Stat. 409; 21 U. S. C. 357), the regulations for tests and methods of assay for antibiotic and antibiotic-containing drugs (21 CFR 1951 Supp., Part 141) and certification of batches of antibiotic and antibiotic-containing drugs (21 CFR 1951 Supp., Part 146; 17 F. R. 3230) are amended as indicated below:

1. Section 141.47 (a) is amended to read as follows:

§ 141.47 *Dibenzylethylenediamine dipenicillin G—(a) Potency.* Proceed as directed in § 141.1, except if the bioassay method is used dissolve the sample to be tested in sufficient dimethyl formamide or formamide prior to diluting with phosphate buffer solution. If the iodometric method is used proceed as directed in § 141.5 (d), except in preparing the blank solution weigh 30–60 milligrams of the sample and make a suspension of 2 milligrams per milliliter in 1-percent phosphate buffer at pH 6.0. Shake well, pipette 2.0 milliliters into a 125-milliliter glass-stoppered Erlenmeyer flask, add 10 milliliters 0.01N iodine and immediately titrate with 0.01N $Na_2S_2O_3$. In preparing the solution for inactivation dissolve a weighed sample (30–60 milligrams) in sufficient 1N NaOH to give 2.0 milligrams per milliliter. Pipette a 2.0-milliliter aliquot into a 125-milliliter glass-stoppered Erlenmeyer flask, and after 15 minutes add 2.0 milliliters 1.2N HCl and 10 milliliters 0.01N iodine. Allow to stand for 15 minutes and titrate the excess iodine with 0.01N $Na_2S_2O_3$. In calculating the results regard the difference in titers multiplied by 661.8, divided by 4, as the units per milligram.

2. Part 141 is amended by adding the following new section:

§ 141.55 *Dibenzylethylenediamine dipenicillin G and buffered crystalline penicillin for aqueous injection—(a) Total potency (except in simple-dose containers).* Proceed as directed in § 141.1, except if the bioassay method is used prepare the sample by diluting 1.0 milliliter of the drug suspension with sufficient dimethyl formamide or formamide to dissolve the dibenzylethylenediamine dipenicillin G. Make to 100 milliliters with buffer. Shake well and dilute to 1.0 unit per milliliter. If the iodometric method is used, proceed as directed in § 141.47, except in preparing the blank solution dilute 1.0 milliliter of the drug suspension to 250 milliliters with 1-percent phosphate buffer at pH 6.0. In preparing the solution for inactivation dissolve 1.0 milliliter of the drug suspension in approximately 20 milliliters of 0.5N NaOH. Allow to stand for 15 minutes. Dilute to 250 milliliters with distilled water. Pipette a 2.0-milliliter aliquot into a 125-milliliter glass-stoppered Erlenmeyer flask and add 2.0 milliliters 1.2N HCl and 10 milliliters 0.01N iodine.

(b) *Buffered crystalline penicillin content.* Place 1.0 milliliter of the drug suspension in a 10-milliliter volumetric flask and add 20 percent sodium sulfate to make 10 milliliters. Shake well and centrifuge to obtain a clear, or reasonably clear, solution. Dilute a 5.0-milliliter aliquot to 50 milliliters with buffer and proceed as directed in § 141.1 to determine the number of units per milliliter of this solution, and from this value calculate the number of units per milliliter of the drug. The content of buffered crystalline penicillin is satisfactory if it is not less than 85 percent of that which it is represented to contain.

(c) *Dibenzylethylenediamine dipenicillin G content.* The dibenzylethylenediamine dipenicillin G content of the batch is the difference between the total potency as described in paragraph (a) or (d) of this section and the content of buffered crystalline penicillin determined by the method prescribed in paragraph (b) of this section. The content of dibenzylethylenediamine dipenicillin G is satisfactory if it is not less than 85 percent of that which it is represented to contain.

(d) *Total potency of a single-dose container.* Add sufficient distilled water to the material remaining in the 10-milliliter volumetric flask referred to in paragraph (b) of this section to bring the volume back to 10 milliliters and determine the number of units per milliliter of this suspension. If the iodometric method is used, 2.0-milliliter aliquots are placed in 50-milliliter volumetric flasks (one blank and one to be inactivated). Obtain the total potency by adding the number of units found in the 10-milliliter volumetric flask to one-half the content of buffered crystalline penicillin found in paragraph (b) of this section.

(e) *Sterility.* Proceed as directed in § 141.2.

(f) *Moisture.* Proceed as directed in § 141.26 (e).

(g) *Pyrogens.* Proceed as directed in § 141.47 (d).

(h) *Toxicity.* Proceed as directed in § 141.47 (c).

(i) *pH.* Proceed as directed in § 141.47 (f).

3. Section 141.401 (d) is amended to read as follows:

§ 141.401 *Bacitracin.* • • •

(d) *Toxicity.* Inject intravenously each of five mice within the weight range of 18–25 grams with 0.5 milliliter of a solution of the sample prepared by diluting with sterile physiological salt solution to 200 units per milliliter. The injection should be made over a period of not more than 5 seconds. If no animal dies within 48 hours, the sample is nontoxic. If one or more animals die within 48 hours, repeat the test with five unused mice weighing 20 grams (±0.5 gram) each. If all animals survive the repeat test the sample is nontoxic.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Interprets or applies sec. 507, 59 Stat. 463, as amended; 21 U. S. C. 357)

4. In § 146.66 *l-Ephenamine penicillin G for aqueous injection,* subparagraph (2) of paragraph (c) *Labeling* is amended by changing the period at the end thereof to a comma and by adding the following clause: "unless the person who requests certification has submitted to the Commissioner results of tests and assays showing that such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section after having been stored at room temperature."

5. Part 146 is amended by adding the following new section:

§ 146.78 *Dibenzylethylenediamine dipenicillin G and buffered crystalline penicillin for aqueous injection.* (a) Dibenzylethylenediamine dipenicillin G and buffered crystalline penicillin for aqueous injection conforms to all requirements prescribed by § 146.77 for the dry mixture of dibenzylethylenediamine dipenicillin G for aqueous injection, and is subject to all procedures prescribed by § 146.77 for the dry mixture of dibenzylethylenediamine dipenicillin G for aqueous injection, except that:

(1) Each immediate container shall contain not less than 50,000 units of buffered crystalline penicillin for each 300,000 units of dibenzylethylenediamine dipenicillin G. The buffered crystalline penicillin conforms to the requirements prescribed therefor by § 146.37.

(2) In lieu of the labeling prescribed for dibenzylethylenediamine dipenicillin G for aqueous injection by § 146.77 (c) (1) (ii), each package shall bear, on the outside wrapper or container and the immediate container, the number of units of dibenzylethylenediamine dipenicillin G and the number of units of buffered crystalline penicillin in the immediate container. The circular or other labeling within or attached to the package, if it is packaged for dispensing, shall bear, in lieu of the statement prescribed by § 146.77 (c) (3) (iii), the statement "Sterile suspension may be kept in refrigerator for 1 week without significant loss of potency."

(3) In addition to complying with the requirements of § 146.77 (d), a person who requests certification of a batch of dibenzylethylenediamine dipenicillin G and buffered crystalline penicillin for aqueous injection shall submit with his request a statement showing the batch mark and (unless it was previously submitted) the results and date of the latest tests and assays of the buffered crystalline penicillin used in making the batch for potency, crystallinity, heat stability, penicillin K content (unless it is buffered crystalline penicillin G) and the penicillin G content if it is buffered crystalline penicillin G, the number of units of dibenzylethylenediamine dipenicillin G and the number of units of buffered crystalline penicillin in each immediate container of the batch. He shall also submit in connection with his request a sample consisting of three packages containing approximately equal portions of not less than 250 milligrams each of the buffered crystalline penicillin used in making the batch. If such batch is packaged for repacking, each portion in the sample required by § 146.77 (d) (4) shall consist of approximately 400 milligrams in lieu of 300 milligrams.

(b) The fee for the services rendered with respect to each immediate container in the sample of buffered crystalline penicillin submitted in accordance with the requirements prescribed therefor by this section shall be $4.00.

6. In § 146.108 *Streptomycin syrup* • • •, subparagraph (1) (ii) of paragraph (c) *Labeling,* change the figure "12" to read "18".

7. a. Section 146.401 (a) (1) is amended to read as follows:

§ 146.401 *Bacitracin*—(a) *Standards of identity, strength, quality, and purity.* • • •

(1) Its potency is not less than 40 units per milligram, except that if it is packaged for dispensing and it is intended for systemic medication its potency is not less than 50 units per milligram;

b. In § 146.401, the second sentence of paragraph (b) *Packaging,* change the figure "50,000" to read "60,000".

c. In § 146.401, subparagraph (1) (iv) of paragraph (c) *Labeling* is amended by deleting the semicolon and the word "and" at the end thereof and adding the following clause: ", except if it is packaged for dispensing and it is intended for systemic medication the blank shall be filled in with the date which is 24 months after the month during which the batch was certified; and".

d. Section 146.401 (c) (2) is amended by adding the following new subdivision:

(iii) If it is packaged for dispensing and it is intended for systemic medication the statement "Store in refrigerator not above 15° C. (59° F.)" or "Store below 15° C. (59° F.)."

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Interprets or applies sec. 507, 59 Stat. 463, as amended; 21 U. S. C. 357)

Those parts of this order which provide for an alternative method of assay for dibenzylethylenediamine dipenicillin G; for a change in the toxicity test for bacitracin; for the deletion of the requirement that the labels for *l*-ephenamine penicillin G for aqueous injection bear the refrigeration storage statement if the person who requests certification has proved his drug to be stable when stored at room temperature; for a change in the expiration date for streptomycin syrup from 12 to 18 months; and for tests and methods of assay and certification of dibenzylethylenediamine dipenicillin G and buffered crystalline penicillin for aqueous injection shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

That part of this order which provides for a change in the potency for bacitracin packaged for dispensing that is intended for systemic medication from a minimum of 40 units per milligram to a minimum of 50 units per milligram for a change in the maximum-size container of bacitracin packaged for dispensing from 50,000 units to 60,000 units, for a change in the expiration date for bacitracin packaged for dispensing and intended for systemic medication from 18 to 24 months, and for a requirement that the labels of bacitracin packaged for dispensing and intended for systemic medication bear the refrigeration storage statement shall become effective 120 days after publication in the FEDERAL REGISTER.

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for an alternative method of assay for dibenzylethylenediamine dipenicillin G; for a change in the toxicity test for bacitracin; for the deletion of the requirement that the labels for *l*-ephenamine penicillin G for aqueous injection bear the refrigeration storage statement if the person who requests certification has proved his drug to be stable when stored at room temperature; for a change in the expiration date for streptomycin syrup from 12 to 18 months; and for tests and methods of assay and certification of dibenzylethylenediamine dipenicillin G and buffered crystalline penicillin for aqueous injection.

Dated: July 28, 1952.

[SEAL] OSCAR R. EWING, *Administrator.*

[F. R. Doc. 52-8414; Filed, July 31, 1952, 8:47 a. m.]

TITLE 26—INTERNAL REVENUE

Chapter I—Bureau of Internal Revenue, Department of the Treasury

Subchapter C—Miscellaneous Excise Taxes

[Regs. 51, T. D. 5922]

PART 320—RETAILERS' EXCISE TAXES

MISCELLANEOUS AMENDMENTS

In order to conform Regulations 51 (26 CFR Part 320), relating to the retailers' excise taxes on sales of jewelry, furs, toilet preparations, and luggage under the Internal Revenue Code, to sections 431, 432, and 487, of the Revenue Act of 1951, approved October 20, 1951, such regulations are further amended as follows:

PARAGRAPH 1. The first paragraph of § 320.0, as amended by Treasury Decision 5819, approved December 7, 1950 (26 CFR 320.0), is further amended as follows:

§ 320.0 *Scope of part.* The regulations contained in this part deal with excise taxes imposed by Chapter 19 and Chapter 9A of the Internal Revenue Code, as amended, on sales by the retailer of:

(a) Jewelry.
(b) Furs.
(c) Toilet preparations.
(d) Luggage.

PAR. 2. Immediately preceding § 320.2 there is inserted the following:

SEC. 432. EFFECTIVE DATE OF PART III (REVIEW ACT OF 1951, APPROVED OCTOBER 20, 1951).

The amendments made by this part shall apply only to articles sold on or after the first day of the first month which begins more than ten days after the date of the enactment of this act.

PAR. 3. Section 320.2, as amended by Treasury Decision 5819 is further amended by adding at the end thereof the following: "The provisions of section 431 of the Revenue Act of 1951, relating to sales at retail of lotions, oils, powders, or other articles intended to be used or applied only in the care of babies; sales of taxable articles to persons operating a barber shop, beauty parlor, or similar establishment for use in the operation thereof; and the sale of miniature samples of any such article for demonstration use only to a house-to-house salesman by the manufacturer or distributor become effective November 1, 1951."

PAR. 4. The parenthetical material at the end of § 320.31 (b), as amended by Treasury Decision 5353, approved March 31, 1944, is amended by adding after "etc." the following: "See § 320.75a for credit and refund provisions relating to mechanical pencils, fountain and ball point pens, and mechanical lighters for cigarettes, cigars and pipes."

PAR. 5. Section 320.33, as amended by Treasury Decision 5479, approved September 24, 1945, is further amended by adding at the end thereof the following: "(See § 320.75a for credit and refund provisions relating to mechanical pencils, fountain and ball point pens and mechanical lighters for cigarettes, cigars, and pipes.)"

PAR. 6. There is inserted immediately preceding § 320.50 the following:

SEC. 431. RETAILERS' EXCISE TAX ON TOILET PREPARATIONS (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Baby oils, etc.* Section 2402 (a) is hereby amended by adding at the end thereof the following new sentence: "The tax imposed by this subsection shall not apply to lotion, oil, powder, or other article intended to be used or applied only in the care of babies."

• • • • •

PAR. 7. Section 320.50, as amended by Treasury Decision 5353 is further amended as follows:

(A) By striking the words "baby oils and baby powders;" in the second sentence of paragraph (b).

(B) By adding at the end thereof the following new paragraph (c):

(c) Under the specific provisions of section 431 of the Revenue Act of 1951 the tax does not apply to the sale on and after November 1, 1951, of lotions, oils, powders or other articles intended to be used or applied only in the care of babies. The determination of whether toilet articles are intended to be used or applied only in the care of babies will be made only by reference to the advertising with respect to, and the labeling contained on, the article. If an article is advertised and labeled as being for use in the care of babies and is not advertised or labeled as usable by persons other than babies the article is exempt from tax even though the particular purchaser buys it for adult use. On the other hand, an article which is represented by advertising or labeling as fit for adult use, in addition to use in the care of babies, will not be exempt from tax even though sold to a purchaser who intends to use the article only in the care of babies.

PAR. 8. Immediately preceding § 320.52 there is inserted the following:

SEC. 431. RETAILERS' EXCISE TAX ON TOILET PREPARATIONS (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

• • • • • •

(b) *Sales to barber shops, etc.* Section 2402 (b) is hereby amended to read as follows:

(b) *Beauty parlors, etc.* For the purposes of subsection (a), the sale of any article described in such subsection to any person operating a barber shop, beauty parlor, or similar establishment for use in the operation thereof, or for resale, and the sale of miniature samples of any such article for demonstration use only to a house-to-house salesman by the manufacturer or distributor, shall not be considered as a sale at retail. The resale of such article at retail by such person, or the resale of such sample at retail by such house-to-house salesman, shall be subject to the provisions of subsection (a).

PAR. 9. Section 320.52, as amended by Treasury Decision 5191, approved December 3, 1942, is further amended as follows:

(A) By striking out the headnote of paragraph (b) and inserting in lieu thereof the following:

(b) ***Sales made during the period November 1, 1942, through October 31, 1951, both dates inclusive.***

(B) By striking out the words "on and after November 1, 1942" wherever they appear in paragraph (b) and inserting in lieu thereof the words "during the period November 1, 1942, through October 31, 1951".

(C) By adding at the end thereof the following paragraph (c):

(c) *Sales made on and after November 1, 1951.* (1) The sale on and after November 1, 1951, of any article taxable under section 2402 (a) to another person operating a barber shop, beauty parlor, or similar establishment, whether for use in the operation thereof or for resale purposes, shall not be considered as a sale at retail and the tax imposed by section 2402 (a) shall not be applicable to such sale. It will not be necessary for the operator of a barber shop, beauty parlor, or similar establishment to furnish any type of exemption certificate to his vendor with respect to such sale.

(2) In any case where the operator of a barber shop, beauty parlor, or similar establishment sells such article at retail, he is liable for the tax imposed by section 2402 (a). See § 320.51.

PAR. 10. Immediately following § 320.52, there is inserted the following new section:

§ 320.53 *Sales of miniature samples.* The sale on and after November 1, 1951, by the manufacturer or distributor of miniature samples of any article taxable under section 2402 (a) to a house-to-house salesman for demonstration use only shall not be considered as a sale at retail and the tax imposed by section 2402 (a) shall not be applicable to such sale. In any case where the house-to-house salesman sells at retail any of the miniature samples purchased from the manufacturer or distributor for demonstration use, he is liable for the tax imposed by section 2402 (a). See § 320.51.

PAR. 11. Immediately preceding § 320.74 there is inserted the following:

SEC. 487. IMPOSITION OF TAX ON MECHANICAL PENCILS, FOUNTAIN AND BALL POINT PENS, AND MECHANICAL LIGHTERS FOR CIGARETTES, CIGARS, AND PIPES (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Chapter 29 (relating to manufacturers' excise and import taxes) is hereby amended by adding after section 3407 the following new section:

SEC. 3408. TAX ON MECHANICAL PENCILS, FOUNTAIN AND BALL POINT PENS, AND MECHANICAL LIGHTERS FOR CIGARETTES, CIGARS, AND PIPES.

• • • • • •

(b) *Exemption if article taxable as jewelry.* No tax shall be imposed under this section on any article taxable under section 2400 (relating to jewelry tax). If any article, on the sale of which tax has been paid under this section, is further manufactured or processed resulting in an article taxable under section 2400, the person who sells such article at retail shall, in the computation of the retailers' excise tax due on such sale, be entitled to a credit or refund in an amount equal to the tax paid under this section.

PAR. 12. Immediately following § 320.75, as renumbered by Treasury Decision 5353, there is inserted the following new section:

§ 320.75a *Sales of mechanical pencils, pens, and lighters.* (a) Section 3408 (a) of the Code imposes a tax on the sale on and after November 1, 1951, by the manufacturer, producer or importer of mechanical pencils, fountain and ball point pens and mechanical lighters for cigarettes, cigars, and pipes. Under the specific provisions of section 3408 (b), the tax on the sale by the manufacturer does not apply if such pencil, pen, or lighter when sold by the manufacturer is subject to the retailers' tax imposed by section 2400. (See §§ 320.31 and 320.33.)

(b) Where an article (i. e., mechanical pencil, fountain or ball point pen or mechanical lighter for cigarettes, cigars, and pipes) subject to tax under section 3408 is sold by the manufacturer thereof and thereafter such article is further manufactured or processed so as to subject it to the tax under section 2400 when sold at retail, the retail dealer upon the sale of the article is entitled to a credit or refund in an amount equal to the tax paid by the original manufacturer of such article.

(c) Where a claim for refund is filed, it shall be supported by evidence showing (1) the name and address of the person who paid to the United States the manufacturers' excise tax refund of which is claimed, (2) the amount of such tax and the date of payment thereof, (3) that the article has been further manfactured or processed subsequent to the sale thereof by the original manufacturer, and (4) that the article has been sold at retail and that the retailers' excise tax has been paid thereon without benefit of any adjustment for the manufacturers' tax paid on such article.

(d) A credit taken on a return shall be supported by the same evidence, except that, if the credit is taken on the return for the month in which the article is sold at retail, the statement under paragraph (c) (4) of this section, shall show that the tax due on such article against which the credit is taken, has been computed without benefit of any adjustment for the manufacturers' tax paid on such article. If it is impossible to furnish all of such evidence with the return, a statement to that effect must be submitted with the return. The evidence supporting such credit shall be filed with the collector within thirty days after the date on which the return is filed. If the required evidence is not so filed the credit will be disallowed and assessment of the tax resulting from the disallowance will be made on the current assessment list.

Because of the short period of time between the date of approval of the Revenue Act of 1951, and November 1, 1951, the date on which, pursuant to such act, the amendments to Chapter 19 and Chapter 29 became effective, and because of the technical nature of such amendments, it is found that it is impracticable and unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date of limitation of section 4 (c) of said act.

(55 Stat. 720, 53 Stat. 419, 467; 26 U. S. C. 2410, 3450, 3791)

[SEAL] JOHN B. DUNLAP,
Commissioner of Internal Revenue.

Approved: July 28, 1952.

THOMAS J. LYNCH,
Acting Secretary of the Treasury.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[General Overriding Regulation 14, Amdt. 20]

GOR 14—EXCEPTED AND SUSPENDED SERVICES

HANDLING AND STORAGE OF COTTON

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this amendment to General Overriding Regulation 14, is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment adds to the lists of services suspended from price control those services involved in the handling and storage of raw cotton.

The reasons for taking this action are (1) the large percentage of operators rendering such services who are presently under control either by other federal or state agencies and (2) the small use of total capacity of such facilities with a consequent self-controlling influence. On the basis of information presented to this office, it was found that the rates for approximately 75 percent of the total storage capacity for raw cotton are presently being controlled by the United States Department of Agriculture under the authority granted by the United States Warehouse Act, as amended, or by state regulatory commissions upon whom devolves the duty to keep storage and handling rates at a reasonable level. Secondly, during the storage year 1951–52, it was found that less than 35 percent of the total storage capacity for cotton was utilized at any one time, which fact is significant inasmuch as the cotton crop for that period was the third largest on record. This latter circumstance has had a restraining effect upon increases in such rates and, moreover, no change in this situation is contemplated in the near future.

In the judgment of the Director, the continuance of controls over the services suspended by this amendment are not required at this time in order to carry out the purposes of the Defense Production Act of 1950, as amended. Should sudden unwarranted increases result from this relaxation of control, this suspension may be terminated or modified at any time. Further, if controls are reactivated on raw cotton, this suspension will be automatically terminated.

In the formulation of this amendment the convening of a formal Industry Advisory Committee was deemed impracticable. However, there has been consultation with industry representatives including trade association representatives to the extent practicable, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

General Overriding Regulation 14, as amended, is further amended by adding at the end of paragraph (b) of section 4 a new subparagraph (2), as follows:

(2) The handling and storage of raw cotton and other warehousing services incident thereto, so long as price controls over raw cotton are in suspension.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This Amendment 20 to General Overriding Regulation 14 shall become effective July 30, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 30, 1952.

[F. R. Doc. 52-8483; Filed, July 30, 1952; 4:39 p. m.]

[Steel Special Order 1]

STEEL SO 1—ADJUSTABLE PRICING ORDER FOR STEEL MILL PRODUCTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Steel Special Order is issued.

STATEMENT OF CONSIDERATION

This steel special order is issued in compliance with the official directive of July 24, 1952 issued by the Acting Director of the Office of Defense Mobilization to the Administrator of the Economic Stabilization Agency permitting producers of steel mill products to adjust their prices upward upon resumption of steel production. The said directive having been transmitted to the Office of Price Stabilization by the Administrator of the Economic Stabilization Agency deprives the Office of Price Stabilization and the Director thereof of any independent discretion or authority in connection with steel prices and removes from the Office of Price Stabilization and the Director thereof any policy, control, jurisdiction or determination over the said subject matter. Since it is not possible at this time to allocate the increase required by the directive among the various products, in the interim this order permits the steel mill producers to deliver their products at prices to be adjusted upward at a later date in accordance with the said official directive from the Acting Director of the Office of Defense Mobilization.

SPECIAL PROVISIONS

Sec.
1. Persons and products covered.
2. Adjustable pricing provisions.

AUTHORITY: Sections 1 and 2 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154.

SECTION 1. *Persons and products covered.* This Steel Special Order applies to all steel mill producers which have signed the Voluntary Price Agreement and to all steel producers subject to the General Ceiling Price Regulation for those steel mill products listed in Supplementary Regulation 100 to the General Ceiling Price Regulation.

SEC. 2. *Adjustable pricing provisions.* On and after July 26, 1952 all steel mill producers subject to this order are authorized to deliver their steel mill products which are subject to this order at prices to be adjusted upwards in accordance with such future order or orders which the Director of Price Stabilization may be required to issue by reason of the said official and mandatory directive of the Acting Director of the Office of Defense Mobilization.

Effective date. This Steel Special Order shall become effective July 30, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 30, 1952.

[F. R. Doc. 52-8484; Filed, July 30, 1952; 4:39 p. m.]

[Ceiling Price Regulation 15, Interpretation 3]

CPR 15—RETAIL FOOD

INT. 3—APPLICABILITY OF CPR 15 TO 5 AND 10 CENT STORES AND DEPARTMENT STORES (SECS. 2 AND 30 (a))

Section 2 of Ceiling Price Regulation 15 provides that this regulation applies to sales by retailers of food products where these are bought and resold, generally without materially changing their form, for the most part to ultimate consumers who are not commercial, industrial or institutional users. This section applies without distinction to retail sellers of the commodities covered by the regulation regardless of whether or not other commodities are also sold by the food retailer. Hence, any 5 and 10 cent store or department store which sells at retail the "dry" grocery and "perishable" food items listed in the tables contained in CPR 15 must calculate the ceiling prices of such items under CPR 15 if it is a Group 3 or 4 store, or under CPR 16 if it is a Group 1 or 2 store.

In determining the group in which the store falls, section 30 (a) of CPR 15 provides that only the "annual gross sales" of the food department or departments of a department store, that is, a store in which the greater volume of sales is general merchandise and not foods, be used. In addition, all the other requirements of the regulation must be observed, including the posting of a store group sign and the filing of OPS Public Form 5.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

HERBERT N. MALETZ,
Chief Counsel,
Office of Price Stabilization.

[Ceiling Price Regulation 22, Amdt. 52]

CPR 22—MANUFACTURERS' GENERAL CEILING PRICE REGULATION

REPORTS UNDER SECTION 32, CLARIFICATIONS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 52 to Ceiling Price Regulation 22 is hereby issued.

STATEMENT OF CONSIDERATIONS

Amendment 43 to Ceiling Price Regulation 22 removed the requirement that manufacturers of certain commodities file OPS Public Forms No. 128 in connection with the establishment of ceiling prices under section 32. Amendment 47 made certain corrections in the list of these commodities. This amendment adds another exception, certain air-conditioning equipment, which was inadvertently omitted in Amendment 43, and also makes it clear that water heaters are included in heating equipment previously listed. Finally, this amendment requires that a description of the differences between the comparison and new commodities be reported for certain of the items listed.

In view of the nature of this amendment, special circumstances have rendered consultation with industry representatives, including trade association representatives, impracticable.

AMENDATORY PROVISIONS

1. Subparagraph (2) of paragraph (g) of section 32 is amended to read as follows:

(2) *For certain products.* Your report for the commodities listed at the end of this subparagraph should state the name and address of your company; a description of the commodity being priced; a description of the comparison commodity and an explanation why you have selected the comparison commodity as such; an identification of the category in which the commodity being priced and the comparison commodity fall; your ceiling price to the largest buying class of purchaser of your comparison commodity, or if you are not now manufacturing it what this ceiling price would be; a detailed breakdown of the current unit direct cost of the comparison commodity, or what it would be; the gross margin, and the percentage markup over current unit direct cost for the comparison commodity; a detailed breakdown of the current unit direct cost of the commodity being priced; the proposed ceiling price of the commodity being priced; delivery, discount, guaranty and servicing terms and conditions and differentials in effect for sales to all classes of purchasers with respect to the comparison commodity.

Your report for any air-conditioning equipment, automatic temperature controls, heating equipment, refrigeration equipment, plumbing fixtures or valves listed in this subparagraph must include in detail a description of how the commodity being priced differs from the comparison commodity.

The commodities covered by this subparagraph are:

Air conditioning equipment (except window and console self-contained units).
Automatic temperature controls, domestic and commercial.
Certain rubber products and chemicals, as defined in subparagraph (3) of this paragraph.
Food products.
Heating equipment (including water heaters), except the following: vented and unvented circulating space heaters, oil, gas, electric, and coal fire; gas logs; portable utility room heaters; portable radiant heaters, gas or electric.
Plumbing fixtures, fittings, valves and equipment.
Refrigeration equipment, except household refrigerators and home and farm freezers.
Textiles, yarns, threads, twines, cordage, nets, laces and fabrics.
Valves, except tire valves.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment shall become effective on August 5, 1952.

NOTE: The reporting requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 31, 1952.

[F. R. Doc. 52-8509; Filed, July 31, 1952; 4:00 p. m.]

[Ceiling Price Regulation 74, Interpretation 1]

CPR 74—CEILING PRICES OF PORK SOLD AT WHOLESALE

INT. 1—APPLICATION FOR CEILING PRICE (SEC. 5)

OPS has been asked whether the filing of Public Form 94 pursuant to section 5 of CPR 74 entitles a producer of a pork product to sell that product at his proposed price upon filing of that form.

A producer of a pork product, which he sold in 1950 and which comes within the coverage of section 5 (a) of CPR 74, may sell this product at his GCPR price upon filing of his Form 94. Such producer need not wait for approval of his price by the Director of Price Stabilization. Section 5 (a) merely reserves to the Director the right to issue orders forbidding the sale of the product or revising the ceiling price thereof.

A person, however, who wishes to produce and sell a pork product, which comes within the coverage of section 5 (b) and which he did not produce and sell in 1950, cannot sell such product until the Director has established a ceiling price for sales of that product by him. Section 5 (b) does not permit the producer to sell upon submission of the required application and Form 94. Until the Director has specifically established a ceiling price for sales by that producer, he does not have a ceiling price. This is true even though the producer may, prior to the effective date of CPR 74, have established a ceiling price for that product under the GCPR. CPR 74 superseded the ceiling prices established under the GCPR and, consequently, such a producer is left in the same position as a person who has never, prior to

applying under section 5 (b), sold such product.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

HERBERT N. MALETZ,
Chief Counsel,
Office of Price Stabilization.

JULY 30, 1952.

[F. R. Doc. 52-8459; Filed, July 30, 1952; 11:20 a. m.]

[Ceiling Price Regulation 94, Interpretation 2]

CPR 94—SALES OF USED PASSENGER AUTOMOBILES

INT. 2—TRADE-INS (SEC. 2 (g))

Inquiries received from various dealers in used automobiles indicate that there is some uncertainty as to whether section 2 (g) of CPR 94 prohibits a dealer from taking in trade a car with a higher ceiling price than the car being sold by him. An additional question raised concerning the effect of this section is whether dealers may make overallowances on a car being traded in by a customer, that is, allow more for the trade-in than the ceiling price established in CPR 94 for that car on a straight sale of the car.

Section 2 (g) reads as follows:

You may disregard the ceiling prices established in Appendix A to this regulation on an automobile traded in for a new or used automobile, except that you may not allow a sum greater than the ceiling price of the new or used automobile for which it is being traded in.

Section 2 (g) does not prohibit "trading down", this being the transaction in which the owner of an automobile trades his vehicle for a car which has a lesser ceiling price; nor does this section prohibit a dealer from making an allowance, up to the ceiling price of the car the dealer sells, for a car being traded in, which has a lesser ceiling price than the car the dealer is selling. However, in no case may the ceiling price of the vehicle with a higher ceiling price be disregarded.

Section 2 (g), while permitting a dealer to allow more for a traded in car than the ceiling price for that car on a straight sale, prohibits the ceiling price of the higher priced vehicle from being exceeded when a trade in is involved. The purpose of this restriction is to prevent evasion of this regulation as to the ceiling price established for the vehicle with the higher ceiling price. Of course, the car accepted in trade may not be resold by the dealer at a price in excess of the ceiling price established for that vehicle even though the dealer has allowed a trade in value for the car in excess of its ceiling price for a straight sale.

An example of how section 2 (g) operates is as follows: On December 1, 1951, a dealer in Region "A" had a 1942 Ford Special 4-Door Six. The ceiling price of that vehicle in that region on that date was $385.00. The owner of a 1950 Buick, Special Sedan, 4-Door Six with a ceiling price of $1775.00 desired to make a deal with the dealer. Applying the basic rule set forth above, that is, that the vehicle with the higher ceiling price may not be sold at a price in excess of its ceiling price, the dealer was prohibited from offering the owner of the Buick more than $1775.00 if a straight purchase was involved. However, if the owner of the Buick was willing to accept the 1942 Ford in trade, he is not prohibited by section 2 (g) from allowing any amount he desired for the Ford, in disregard of the $385.00 ceiling price, up to the $1775.00 ceiling price of the Buick. The Ford could not be resold thereafter by its new owner, however, at a price in excess of its ceiling price under CPR 94.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

HERBERT N. MALETZ,
Chief Counsel,
Office of Price Stabilization.

JULY 30, 1952.

[F. R. Doc. 52-8460; Filed, July 30, 1952; 11:21 a. m.]

[Ceiling Price Regulation 94, Amdt. 5]

CPR 94—SALES OF USED PASSENGER AUTOMOBILES

CHEVROLET AND GMC SUBURBANS AND GRAHAM REMOVAL FROM CPR 94 COVERAGE

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Amendment 5 to Ceiling Price Regulation 94 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment removes from coverage under CPR 94 the Chevrolet Suburban and the GMC Suburban. CPR 94 covers used passenger automobiles which are defined in the regulation as vehicles "designed primarily for the carriage of passengers." The Chevrolet Suburban and the GMC Suburban which were designed primarily for the hauling of freight were erroneously listed in Appendix "A". They are properly trucks and their ceiling prices will be determined under the GCPR together with other used trucks.

This amendment also removes the listing of the Graham automobile from Appendix "A". The Graham is no longer being manufactured and has been exempted along with other "orphan" vehicles from price control by Amendment 20 to GOR 9.

In the formulation of this amendment there has been consultation with industry representatives, including trade association representatives, to the extent practicable, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

CPR 94 is amended in the following respect:

Appendix "A" is amended by striking out therefrom the listing of the Chevrolet Suburban, the GMC Suburban, and the Graham.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment shall become effective July 31, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 31, 1952.

[F. R. Doc. 52-8503; Filed, July 31, 1952; 11:59 a. m.]

[General Ceiling Price Regulation, Amdt. 10 to Supplementary Regulation 13]

GCPR, SR 13—COKE, COAL CHEMICALS AND COKE OVEN GAS

SUCCESSOR LONG-TERM CONTRACTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 10 to Supplementary Regulation No. 13 to the General Ceiling Price Regulation is hereby issued.

STATEMENT OF CONSIDERATIONS

Supplementary Regulation 13 to the GCPR recognizes the long established use of long-term contracts in the purchase and sale of coke, coal chemicals and coke oven gas which normally provide for selling prices which are below spot market prices for the commodities covered by the regulation. It is a normal practice, for example, for a gas producer to enter into a long-term contract with a gas distributing utility providing for the supply of gas over a long period, thus assuring the amortization of the investment in coke ovens. Since the principal cost in the operation of a coke oven is the cost of coal, these contracts usually contain provisions for adjustment with changes in coal costs. Owing to their long-term nature and careful negotiations, however, these contracts usually provide for prices below spot prices.

The use of long-term contracts in the purchase and sale of coke and coal chemicals is also long established, and similarly provide prices lower than those in the spot market.

But under Supplementary Regulation 13, only long-term contracts entered into prior to December 19, 1950 are exempted from ceiling price control. The same reasons for exempting the original contract likewise apply to successor contracts which replace the original contracts. This amendment to Supplementary Regulation 13, therefore, provides for the exemption of successor long-term contracts between the same parties which replace the original contracts on terms no less favorable to the purchaser. Under this amendment successor contracts are exempt if they are the same as the original contract or if the terms are such that the successor contract is no less favorable to the purchaser.

It appears that the exemption of these successor long-term contracts from price control will not result in increased ceiling prices to the consumer and will tend to encourage production of commodities which are still inadequate to meet the defense needs.

In the formulation of this amendment, there has been consultation with industry representatives, including trade association representatives, to the extent practicable, and consideration has been given to their recommendations.

So far as practicable the Director of Price Stabilization gave due consideration to the national effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950, as amended, and to relevant factors of general applicability.

In the judgment of the Director of Price Stabilization, the provisions of this amendment to Supplementary Regulation 13 to the General Ceiling Price Regulation are generally fair and equitable and are necessary to effectuate the purpose of Title IV of the Defense Production Act of 1950, as amended.

AMENDATORY PROVISIONS

Supplementary Regulation 13 to the GCPR, as amended, is further amended in the following respect:

Section 2 (f) is amended by adding the words "or a successor contract between the parties of such expired long-term contract which it replaces on terms no less favorable to the purchaser", after "December 19, 1950", so that the paragraph will read as follows:

(f) A "long-term contract" is a bona fide written contract of two years or longer entered into prior to December 19, 1950, or a successor contract between the parties of such expired contract which it replaces on terms no less favorable to the purchaser.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This Amendment 10 to Supplementary Regulation 13 to the General Ceiling Price Regulation shall become effective August 5, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 31, 1952.

[F. R. Doc. 52-8510; Filed, July 31, 1952; 4:00 p. m.]

[General Ceiling Price Regulation, Supplementary Regulation 111]

GCPR, SR 111—CEILING PRICES FOR PULPWOOD PRODUCED AND SOLD FOR USE IN CERTAIN COUNTIES OF THE STATE OF NEW JERSEY

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Supplementary Regulation No. 111 to the General Ceiling Price Regulation, is hereby issued.

STATEMENT OF CONSIDERATIONS

This supplementary regulation to the General Ceiling Price Regulation establishes dollar-and-cent ceiling prices for sales of rough pulpwood produced in the New Jersey Counties of Camden, Gloucester, Salem, Cumberland, Atlantic, Cape May, Ocean and Burlington when such pulpwood is sold to consumers located in any one of the foregoing counties.

There are approximately six principal consumers of pulpwood in the State of New Jersey. Four of these are located in the northern part of the State and two are located in the area covered by this regulation. Mills in the north historically have paid about $4.00 per long cord (160 cubic ft.) more than the southern mills to compensate the seller for the long haul to the mills. This price relationship was disturbed when, prior to the general freeze in January, 1951, the producers affected, who supplied these northern mills, increased their prices by approximately $5.00 per long cord. The resultant distorted price relationship diverted an abnormal amount of wood to the northern mills and made it impossible for the southern mills to procure the approximately 35,000 cords they had annually purchased in the past.

This regulation is issued, therefore, to correct the foregoing situation, which threatens the continued operation of the southern mills, by properly relating the ceiling prices for pulpwood and restoring the normal flow of wood in the two areas concerned. The ceiling prices established are quoted in terms of tons, the unit of measurement customarily used by the sellers and buyers affected. The ceiling prices set by this regulation, when stated in terms of cords, are directly related to those established for the same species produced in the adjacent area in Pennsylvania which is covered by CPR 102, and the mileage differentials herein are also correspondingly related to those established for that area. These prices are on the average 30 percent higher than those which were in effect in June, 1950, and have continued in effect prior to the issuance of this regulation.

The Director of Price Stabilization has consulted with representatives of the industry, including trade association representatives, insofar as practicable and has considered their recommendations. In the judgment of the Director of Price Stabilization this supplementary regulation is generally fair and equitable and is necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950.

REGULATORY PROVISIONS

Sec.
1. What this supplementary regulation does.
2. Ceiling prices for pulpwood.
3. Applicability of General Ceiling Price Regulation provisions.
4. Definitions.

AUTHORITY: Sections 1 through 4 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101-2110. E. O. 10151, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.

SECTION 1. *What this supplementary regulation does.* This supplementary regulation supersedes sections 3 through 7 (pricing provisions) of the General Ceiling Price Regulation with respect to rough pulpwood produced in the Counties of Camden, Gloucester, Salem, Cumberland, Atlantic, Cape May, Ocean and Burlington in the State of New Jersey when such pulpwood is delivered to consumers located in any one of the foregoing Counties. For the sales and commodities covered, this supplementary regulation establishes dollar-and-cent ceiling prices on a per ton basis.

SEC. 2. *Ceiling prices for pulpwood.* (a) The ceiling prices per ton (2,000 lbs.) for pulpwood produced in the New Jersey Counties of Camden, Gloucester, Salem, Cumberland, Atlantic, Cape May, Ocean and Burlington when sold to consumers located in any one of these Counties are the following, delivered to the mill by truck at the seller's expense (up to 25 mile truck haul):

Species	Rough
Pine	$8.00
Hardwoods	6.60

(b) *Mileage differentials.* When you deliver pulpwood by truck to the consumer's mill and the haul from the point of shipment (as defined in section 4) exceeds 25 miles, you may add to the appropriate ceiling price in the above table a sum not over the appropriate differential provided below:

Distance (miles)	Rough pine or hardwood
25 to 45	$0.70
45 to 65	1.40
65 to 85	2.10
Over 85	2.80

SEC. 3. *Applicability of General Ceiling Price Regulation provisions.* Sellers covered by this supplementary regulation shall be subject to all the provisions of the General Ceiling Price Regulation not specifically superseded.

SEC. 4. *Definitions.* (a) When used in this supplementary regulation the term:

(1) "Delivered mill" means pulpwood delivered to a yard or piling area adjacent or contiguous to a consumer's mill.

(2) "Hardwood" includes the wood of all broadleaf, deciduous trees.

(3) "Pine" includes longleaf pine (Pinus palustris), shortleaf pine (Pinus echinata), loblolly pine (Pinus taeda), slash pine (Pinus caribaea), Pond pine (Pinus serotina), sand pine (Pinus clausa), spruce pine (Pinus glabra), white pine (Pinus strobus), and any other species of the genus pinus.

(4) "Point of shipment" means the point at which pulpwood is loaded on the vehicle by which it is to be delivered to the consumer's mill.

(5) "Pulpwood" means any species of wood covered by this supplementary regulation sold for manufacture into wood pulp or defibered wood products.

(6) "Rough pulpwood" means pulpwood from which the bark has not been removed.

Effective date. This supplementary regulation shall become effective August 5, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 31, 1952.

[F. R. Doc. 52-8512; Filed, July 31, 1952; 4:00 p. m.]

[General Overriding Regulation 9, Amdt. 23]

GOR 9—Exemptions of Certain Industrial Materials and Manufactured Goods

Imported Ores and Concentrates Purchased Between May 8 and June 16, 1952, Miscellaneous Amendments

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this amendment to General Overriding Regulation 9, is hereby issued.

STATEMENT OF CONSIDERATIONS

Amendment 21 to GOR 9 in effect exempted from price control certain imported copper and copper made from imported raw materials purchased after June 16, 1952. This amendment extends that exemption to copper refined from raw materials purchased or received after May 8, 1952. It also clarifies an ambiguity that has appeared in the wording of Amendment 21 and adds a definition of a "copper refiner."

On May 8, 1952, the Chilean government terminated its agreement to sell to the United States part of its copper output at 27½ cents per pound. Pursuant to a directive of the Office of Defense Mobilization, Amendment 21 to GOR 9 was issued which in effect exempted from price control certain refined copper and copper made from imported copper bearing materials, and that permitted Chilean and other foreign copper to be purchased and sold at prices in excess of 27½ cents per pound.

The directive from the Office of Defense Mobilization indicated that any changes should be effective June 16, 1952, and Amendment 21 to GOR 9 exempted imported copper purchased subsequent to that date.

It appears, however, that certain refiners and custom smelters have traditionally purchased copper bearing materials in accordance with contract commitments under which refiners are obligated to pay a price for the copper content of the imported materials on the basis of the published price appearing in the Engineering and Mining Journal for the month following the month in which the copper bearing materials are received. Accordingly, these copper refiners and custom smelters are required to pay the prices published in the Engineering and Mining Journal for the end of June for materials received between May 8 and the end of May and the price appearing in the Engineering and Mining Journal for July for materials received between June 1 and June 16. The impact of the termination of the Chilean agreement has been a rise in the published prices and it appears that the published prices for July will be at least as high as those published for the month of June. The result, therefore, has been that these refiners and custom smelters under their commitments are required to pay for the ores and concentrates received between May 8 and June 16, 1952 an amount in excess of the 27½ cents per pound upon which their ceiling prices had been previously based. It was not the intention of this Agency nor the spirit of the Directive to require any absorption of this increased cost by these refiners and custom smelters.

In view of these considerations and in order to insure that the copper refined from raw materials thus purchased will be disposed of and not held in inventory, this amendment extends the exemption heretofore granted so as to include copper refined from such materials.

Amendment 21 also states that certain materials "purchased" after June 16, 1952, shall be exempt. It appears there is an ambiguity in the regulation where materials may have been "purchased" prior to the date specified—but are received thereafter. This amendment also clarifies this ambiguity by indicating that raw material "purchased by or delivered to" a refiner after the date specified is intended to be included in determining the quantity of refined copper exempted from price control.

In view of the nature of this amendment, special circumstances have rendered consultation with industry representatives, including trade association representatives, impracticable.

AMENDATORY PROVISIONS

Subparagraph 27 (i) of section 2 (a) of GOR 9 is amended to read as follows:

(27) *Certain sales of copper by refiners using imported raw materials.* (i) Sales by a copper refiner who purchases and uses imported raw materials of a quantity of refined copper equivalent to the recoverable copper content of the imported raw materials purchased by or delivered to such refiner after May 8, 1952, and for which such refiner makes payment to the seller on the basis of a price for copper in excess of 27½ cents per pound, provided that the records specified in subdivision (ii) of this subparagraph are kept. "Imported raw materials" means ore, concentrates and other copper bearing materials (including scrap) produced outside the United States, its territories and possessions. "Copper Refiner" includes any person whose business consists in whole or in part of smelting, refining, melting or otherwise processing ores, concentrates and other copper bearing materials (including scrap) into refined copper and any person who has such materials so processed for his account by another person under a toll or conversion agreement.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment to General Overriding Regulation 9 shall become effective July 31, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

JULY 31, 1952.

[F. R. Doc. 52-8504; Filed, July 31, 1952; 12:00 m.]

[General Overriding Regulation 23, Amdt. 3]

GOR 23—Territorial Exemptions

Exemption of Fresh Fruits and Vegetables

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 3 to General Overriding Regulation 23 is hereby issued.

STATEMENT OF CONSIDERATIONS

General Overriding Regulation 23, as amended, lists curtain sales, in the territories and possessions of the United States, which are exempt from price control. This amendment adds to those exemptions the sale of fresh fruits and vegetables.

Although the sale of locally produced fresh fruits and vegetables have been exempted from price control by the General Ceiling Price Regulation, certain territorial ceiling price regulations have applied to the sale of fresh fruits and vegetables.

Carrying out the mandate of the Congress of the United States in the Harrison Amendment to the Defense Production Act this amendment removes the sale of fresh fruits and vegetables in the territories and possessions of the United States from the coverage of any ceiling price regulation now or hereafter issued by the Office of Price Stabilization.

In the judgment of the Director of Price Stabilization, this amendment is necessary to comply with the provisions of the Defense Production Act of 1950, as amended.

AMENDATORY PROVISIONS

General Overriding Regulation 23 is amended by adding the following new Article III:

ARTICLE III—FRESH FRUITS AND VEGETABLES

SEC. 3.1 *What this article does.* This article exempts the sale, in the territories and possessions of the United States, of fresh fruits and vegetables, from the provisions of any ceiling price regulation of the Office of Price Stabilization issued now or to be issued in the future.

SEC. 3.2 *Exemption of fresh fruits and vegetables.* No ceiling price regulation now or hereafter issued by the Office of Price Stabilization shall apply to sales, in the territories and possessions of the United States, of fresh fruits and vegetables.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This Amendment 3 to General Overriding Regulation 23 is effective as of July 1, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

Chapter XIV—General Services Administration

[Revision 1]

Tungsten Regulation: Domestic Tungsten Program

This regulation, as revised, extends the time within which persons may give notice to the Government of their desire to participate in this purchase program and incorporates the previous regulation, dated May 10, 1951, and five amendments thereto, dated respectively, June 18, 1951, July 21, 1951, November 7, 1951, December 26, 1951, and March 31, 1952. This regulation, as revised, reads as follows:

Sec.
1. Basis and purpose.
2. Definitions.
3. Participation in the Program.
4. Deliveries.
5. Duration of the Program.
6. Specifications and penalties.

AUTHORITY: Sections 1 to 6 issued under sec. 704, 64 Stat. 816, as amended, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 303, 64 Stat. 801, as amended; Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2093; E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789.

SECTION 1. *Basis and purpose.* This regulation interprets and implements the authority of the Administrator of General Services to purchase tungsten concentrates of domestic origin for the fiscal years 1951–1956 as authorized by the Defense Production Administration on March 30, 1951, and outlines the attendant responsibilities and functions of the Administrator of General Services in purchasing such tungsten concentrates for Government use and resale, pursuant to delegation of authority from the Defense Materials Procurement Administrator, dated September 14, 1951. In accordance with the Program set forth herein, the Administrator will buy domestically produced tungsten concentrates, at a base price of $63 per short ton unit of contained tungsten trioxide (WO_3), less penalties.

SEC. 2. *Definitions.* As used in this regulation:

(a) "Administrator" means the Administrator of General Services.

(b) "Program" means the program as set forth in this regulation.

(c) "Milling point" means plant where ores are processed into specification grade tungsten concentrates.

(d) "Tungsten concentrates" means tungsten concentrates produced in the United States, its Territories and possessions from ores mined in the United States, its Territories and possessions.

(e) "Short ton unit" means one percent of 2,000 pounds avoirdupois dry weight.

(f) "Ferberite" means concentrates containing tungsten primarily as $FeWO_4$ with not more than 20 percent of the tungsten as $MnWO_4$.

(g) "Hubnerite" means concentrates containing tungsten primarily as $MnWO_4$ with not more than 20 percent of the tungsten as $FeWO_4$.

(h) "Wolframite" means concentrates containing tungsten as both $FeWO_4$ and $MnWO_4$ in any proportions from 80 percent $FeWO_4$ and 20 percent $MnWO_4$ to 20 percent $FeWO_4$ and 80 percent $MnWO_4$.

(i) "Scheelite" means concentrates containing, in nature, tungsten as $CaWO_4$.

(j) "Synthetic Scheelite" means chemically precipitated scheelite produced from any natural type of ore, and shall be chemically precipitated scheelite produced from any original type of ore, further processed so that not over ten percent of any lot shall pass a 35-mesh Tyler Standard Screen.

SEC. 3. *Participation in the Program.* (a) Any person may participate in the Program by notice given to the nearest General Services Administration regional office, in the form of a letter, postcard or telegram postmarked or dated by the telegraph office not later than June 30, 1953. Such notice shall state that the writer desires to participate in the Program and will either prospect for or produce tungsten, but the giving of such notice will not permit the participant to deliver material in any form other than that of concentrates meeting minimum specifications. Such notification must be signed and a return address given. Any person participating in the Program will promptly be sent a certificate authorizing him to deliver concentrates meeting minimum specifications f. o. b. carriers conveyance, milling point. Miners holding certificates but who do not operate concentrating facilities may participate in this Program to the extent of the ore produced by them, as follows:

(1) By selling such ore to operators of concentrating plants, in which event the resulting concentrates meeting specifications may be sold by such operators to the Administrator under this Program; or

(2) By having such ore treated on a toll basis and selling the resulting concentrates meeting specifications to the Administrator under this Program.

(b) Any operator of a concentrating plant by agreeing to participate in this Program also agrees to purchase or process suitable tungsten contained ores offered to him by independent miners to the limit of the capacity of his plant in excess of that required for his own production and on fair and equitable terms and conditions (including prices). Each operator of a concentrating plant participating in this Program shall promptly establish a schedule setting forth his terms and conditions (including prices) for the purchase and processing of crude tungsten ores. Each such operator shall promptly submit a copy of such schedule to the Administrator, and shall also submit promptly any changes made in such schedule thereafter.

SEC. 4. *Deliveries.* Tungsten concentrates purchased under the Program are to be delivered f. o. b. carriers conveyance any milling point designated by the Administrator. Delivery of less than one short ton of concentrates will not be accepted. Each delivery will be analyzed by the Government after beneficiation at the milling point, and payment will be made in accordance with such analysis. Deliveries not conforming to minimum specifications will be rejected and any expenses in connection therewith will be borne by the seller.

SEC. 5. *Duration of the Program.* The Program shall terminate and be of no further force or effect when 3,000,000 short ton units of tungsten have been delivered to and accepted by the Government under this Program, or on July 1, 1956, whichever occurs first.

SEC. 6. *Specifications and penalties.* (a) The specifications for tungsten concentrates and penalties applicable to deliveries of such concentrates appear below:

(1) Percentage of tungsten trioxide (WO_3) required with respect to each of the following:

	Ferberite	Huebnerite	Wolframite	Scheelite and/or synthetic scheelite
	Percent	*Percent*	*Percent*	*Percent*
Standard	60	60	65	60
Minimum	55	55	60	55

(2) Maximum percentage allowances of the following elements without penalty:

	Ferberite	Huebnerite	Wolframite	Scheelite and/or synthetic scheelite
	Percent	*Percent*	*Percent*	*Percent*
Tin (Sn) max	0.20	0.25	1.50	0.10
Copper (Cu) max	.10	.10	.05	.05
Arsenic (As) max	.15	.10	.25	.10
Antimony (Sb) max	.10	.10	.10	.10
Bismuth (Bi) max	1.00	1.00	1.00	.25
Molybdenum (Mo) max	.50	.50	.40	2.75
Phosphorus (P) max	.07	.05	.05	.05
Sulphur (S) max	.50	.50	.50	.50
Manganese (Mn) max	1.00	(1)	(1)	1.00
Lead (Pb) max	.20	.20	.20	.10
Zinc (Zn) max	.10	.40	.10	.10

[1] Not specified.

(b) The minimum base price shall be subject to the following adjustments:

(1) For each short ton unit of delivered tungsten trioxide (WO_3) the sum of twenty cents ($0.20) shall be deducted from the base price for each one percent of tungsten trioxide (WO_3) below the standard requirements set forth in paragraph (a) of this section. No tungsten concentrates not meeting the minimum requirements set forth in said paragraph (a) of this section will be accepted.

(2) For each short ton unit of delivered tungsten trioxide (WO_3) a deduction of twenty-five cents ($0.25) shall be made for each of the following increments in excess of the maximum allowances (paragraph (a) of this section), as to each of the following elements:

	Percent
Copper (Cu)	0.01
Phosphorus (P)	.01
Arsenic (As)	.10
Bismuth (Bi)	.50
Molybdenum (Mo)	.10
Tin (Sn)	.10
Sulphur (S)	.10
Antimony (Sb)	.10
Manganese (Mn)	1.00
Lead (Pb)	.10
Zinc (Zn)	.10

Dated: July 28, 1952.

JESS LARSON,
Administrator.

[F. R. Doc. 52-8475; Filed, July 31, 1952; 8:56 a. m.]

[Revision 1]

MICA REGULATION: PURCHASE PROGRAMS FOR DOMESTIC MICA

This regulation, as revised, extends the time within which persons may give notice to the Government of their desire to participate in this purchase program and announces the establishment of a purchase depot at Franklin, New Hampshire. This regulation, as revised, incorporates the previous regulation, dated March 12, 1952, and Amendment 1 thereto, dated May 5, 1952, and reads as follows:

Sec.
1. Basis and purpose.
2. Definitions.
3. Duration of Programs A and B.
4. Program A.
5. Program B.

AUTHORITY: Sections 1 to 5 issued under sec. 704, 64 Stat. 816, as amended, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 303, 64 Stat. 801, as amended, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2093; E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789.

SECTION 1. *Basis and purpose.* This regulation interprets and implements the authority of the Administrator of General Services to purchase, pursuant to delegation of authority from the Defense Materials Procurement Administrator, dated March 12, 1952, hand-cobbed muscovite ruby crude mica and processed muscovite ruby block and film mica, all of domestic origin, as authorized by the Defense Production Administration on February 5, 1952, and outlines the attendant responsibilities and functions of the Administrator in purchasing such mica for Government use and resale. In accordance with Programs A and B set forth herein, the Administrator will buy domestically produced mica conforming to the requirements, at the price, and under the other terms and conditions of this regulation.

SEC. 2. *Definitions.* As used in this regulation:

(a) "Administrator" means the Administrator of General Services.

(b) "Government depot" means the purchase depots of the Government at Franklin, New Hampshire, Spruce Pine, North Carolina, Custer, South Dakota, or any other such depots established hereafter.

(c) "Domestic origin" means mined within the United States (the forty-eight States and the District of Columbia).

(d) "Block mica" means processed muscovite ruby block mica which conforms with the requirements of section 4 (b) of this regulation.

(e) "Film mica" means processed muscovite ruby film mica which conforms with the requirements of section 4 (b) of this regulation.

(f) "Hand-cobbed mica" means run-of-the-mine muscovite ruby mica crystal which is free from dirt, rock and mine run scrap and which conforms with the requirements of section 5 (b) of this regulation.

(g) "Program A" means the Program for purchase by the Government of processed block and film mica of domestic origin.

(h) "Program B" means the Program for purchase by the Government of hand-cobbed mica of domestic origin.

(i) "Regional Director" means the Director of any one of the following General Services Administration regional offices having jurisdiction as indicated below:

Region No.	Address	Government depots over which jurisdiction is exercised
1	Regional Director, General Services Administration, 620 Post Office and Courthouse, Boston 9, Mass.	Franklin, N. H.
4	Regional Director, General Services Administration, 50 Whitehall St., SW., Atlanta 3, Ga.	Spruce Pine, N. C.
6	Regional Director, General Services Administration, 1800 Federal Office Bldg., 911 Walnut St., Kansas City 6, Mo.	Custer, S. Dak.

SEC. 3. *Duration of Programs A and B.* Programs A and B shall terminate and be of no further force or effect at the close of business June 30, 1955, or when the total block, film and hand-cobbed mica delivered to and accepted by the Government under said Programs reaches the equivalent of 25,000 short tons of hand-cobbed mica, whichever first occurs. For the purpose of computing said 25,000 short tons of hand-cobbed mica, 90 pounds of block or film mica shall be deemed to be the equivalent of one (1) short ton of hand-cobbed mica.

SEC. 4. *Program A—(a) Participation in Program.* Any person may participate in Program A by giving notice to the Regional Director having jurisdiction over the Government depot nearest to the location of his mica processing plant. Such notice shall be in the form of a letter, postcard or telegram, postmarked or dated by the telegraph office not later than June 30, 1953, and shall state: (1) That the applicant has read this regulation and accepts its terms and conditions, and (2) that he desires to participate in "Mica Program A" and will offer mica to the Government pursuant thereto. Such notice must be signed and a return address given. Any person giving notice in the form required above will promptly be sent a certificate authorizing him to deliver block or film mica which conforms with the requirements set forth in paragraph (b) of this section. A person participating in Program A may not participate simultaneously in Program B.

(b) *Requirements.* (1) All block and film mica purchased under Program A shall in every respect conform to the requirements of American Society for Testing Materials Specification D-351, latest revision as of the date of acceptance of each lot of block or film mica by the Government. The qualities which will be accepted are good stained and batter, stained and heavy stained. Ruby mica only will be accepted.

(2) The following grades will be accepted:

Grades	Area of minimum rectangle (square inches)	Minimum dimension of 1 side (inches)
No. 6	1	¾
No. 5½	2¼	1½
No. 5	3	1
No. 4	6	1½
No. 3 and larger	10	2

(3) Each lot of block or film mica must contain not less than 20 percent good stained or better quality.

(4) All block and film mica must be full-trimmed.

(5) The Government reserves the right, at any time during Program A, to utilize electrical inspection in addition to visual inspection as the basis for acceptance of mica and to add to the kind, qualities and grades of mica set forth above.

(c) *Deliveries.* Block and film mica offered to the Government under Program A shall be delivered f. o. b. the Government depot nearest to the participant's processing plant. Delivery of less than forty-five (45) pounds of block or film mica at one time will not be accepted. Prior to delivery a participant must give the Superintendent of the Government depot to which he is shipping, reasonable advance notice with respect to the quantity to be delivered and the proposed delivery date. The Superintendent of the Government depot will then establish a delivery schedule with each participant. The Government reserves the right to reject any deliveries that have not been so scheduled.

(d) *Inspection and acceptance.* Each delivery will be inspected by the Government at the Government depot. Deliveries not conforming to the minimum requirements set forth in paragraph (b) of this section will be rejected and all costs to the Government except inspection costs in connection therewith will be borne by the owner of the mica. The decision of the Government with regard to acceptance (including quality, grade and other requirements) or rejection will be final.

(e) *Price schedule.* The following prices per pound will be paid for processed block and film mica delivered f. o. b. Government depot and accepted by the Government:

PRICE SCHEDULE
[Per pound]

Grades	Qualities		
	Good stained and better	Stained	Heavy stained
No. 3 and larger	$70.00	$18.00	$13.00
No. 4 and No. 5	40.00	8.00	6.00
No. 5½ and No. 6	15.00	5.00	3.00

SEC. 5. *Program B—(a) Participation in Program.* Any person may participate in Program B by giving notice to the Regional Director having jurisdiction over the Government depot nearest to the location of his mine or deposit. Such notice shall be in the form of a letter, postcard or telegram, postmarked or dated by the telegraph office not later than June 30, 1953, and shall state: (1) That the applicant has read this regulation and accepts its terms and conditions; (2) that he desires to participate in "Mica Program B" and will offer mica to the Government pursuant thereto; (3) the location of his mine or deposit; (4) the point at which he desires to have his hand-cobbed mica inspected, in accordance with paragraph (c) of this section; (5) the name, if any, of such mine or deposit; (6) the monthly rate of production of hand-cobbed mica which it is estimated may be obtained from such mine or deposit. Such notice must be signed and a return address given. Any person giving notice in the form required above will promptly be sent a certificate authorizing him to deliver hand-cobbed mica which conforms with the requirements of paragraph (b) of this section. A person participating in Program B may not participate simultaneously in Program A.

(b) *Requirements.* (1) The requirements for hand-cobbed mica under Program B are that it must yield four and one-half (4½) percent block or film mica, grade six (6) or larger and heavy stained or better quality, of which at least eighteen (18) percent must be good stained or better quality and at least twenty-seven (27) percent must be stained or better quality. The block and film mica to be processed from this hand-cobbed mica shall conform in all other respects with the requirements of American Society for Testing Materials Specification D-351, latest revision as of the date of acceptance of each lot of hand-cobbed mica by the Government. Ruby mica only will be accepted.

(2) The Government reserves the right, at any time during Program B, to utilize electrical inspection in addition to visual inspection as the basis for acceptance of mica and to add to the kind, qualities and grade of mica set forth above.

(c) *Inspection and acceptance.* The participant shall give reasonable advance notice to the Superintendent of the Government depot to which he will ship the hand-cobbed mica, stating the quantity he proposes to offer for sale to the Government under Program B. Offerings of quantities that are less than one thousand (1,000) pounds will not be considered by the Government. Upon such notification, the Government shall arrange for inspection of the hand-cobbed mica offered at the point of production or at such other points as is mutually agreed upon between the participant and the Government: *Provided, however,* That such inspection shall not be made beyond a three hundred (300) mile radius of the Government depot to which the participant will ship. After inspection by a Government inspector the hand-cobbed mica will be accepted by the Government if in the judgment of the Government inspector the offered hand-cobbed mica will conform to the requirements of paragraph (b) of this section, and will be rejected by the Government if in his judgment it will not conform to such requirements. Such acceptance or rejection shall be final. If, after processing, the Government determines that any such accepted lot or lots of hand-cobbed mica delivered from a specific mine or deposit fail to yield block or film mica in accordance with the requirements of paragraph (b) of this section, the Government reserves the right to refuse to consider or accept further offerings of hand-cobbed mica from the particular mine or deposit from which such lot or lots were produced.

(d) *Deliveries.* Hand-cobbed mica accepted by the Government under Program B is to be delivered as follows: (1) If shipped by rail, f. o. b. common carrier's conveyance at a railroad delivery point designated by the Government which will be as close as possible to the Government depot; or (2) if shipped by motor truck, f. o. b. Government depot. Hand-cobbed mica accepted by the Government under paragraph (c) of this section shall not be delivered in shipments of less than one thousand (1,000) pounds. Prior to shipment the shipper must give the Superintendent of the Government depot to which he is shipping reasonable advance notice with respect to the quantity to be shipped and the proposed shipping date. The Superintendent of the Government depot will then establish a shipping schedule with each shipper and will instruct the shipper how to prepare the hand-cobbed mica for shipment. The Government reserves the right to reject any hand-cobbed mica which has not been so scheduled and prepared.

(e) *Price.* The price to be paid for hand-cobbed mica accepted by and delivered to the Government in accordance with paragraphs (c) and (d) of this section will be $600 per short ton (2,000 pounds).

Dated: July 28, 1952.

JESS LARSON,
Administrator.

Chapter XXIII—Defense Materials Procurement Agency

[Revision 1]

COLUMBIUM-TANTALUM PURCHASE PROGRAM

Section 6 of this regulation is rewritten in its entirety. All other sections remain unchanged.

Sec.
1. Basis and purpose.
2. Definitions.
3. Duration of the program.
4. Participation under the program.
5. Specifications and price.
6. Purchase agents.
7. Deliveries and certification.
8. Weighing, sampling and analysis.

AUTHORITY: Sections 1 to 8 issued under sec. 704, 64 Stat. 816, as amended, Pub. Law 96, 82d Cong., 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 303, 64 Stat. 801, as amended, Pub. Law 96, 82d Cong., 50 U. S. C. App. Sup. 2093; E. O. 10281, Aug. 28, 1951, 16 F. R. 8789, 3 CFR, 1951 Supp.

SECTION 1. *Basis and purpose.* The purpose of this regulation is to establish a guaranteed purchase program designed to encourage the expansion of the production of columbium-tantalum bearing ores and concentrates of both domestic and foreign origin. The program was authorized by the Defense Production Administration on January 1, 1952. Under the program the Government agrees to purchase a minimum of 15,000,000 pounds of contained combined pentoxide (Cb_2O_5 plus Ta_2O_5).

SEC. 2. *Definitions.* (a) "Administrator" means the Administrator of the Defense Materials Procurement Agency.

(b) "Program" means the terms and conditions under which the Administrator will purchase columbium-tantalum bearing ores and concentrates.

(c) "Lot" means shipments of columbium-tantalum bearing ores and concentrates of not less than 2,000 pounds, dry weight.

(d) "Seller" means any individual or firm having title to columbium-tantalum bearing ores and concentrates.

SEC. 3. *Duration of the program.* The program shall terminate and be of no further force or effect as of the close of business on December 31, 1956: *Provided, however,* That the Administrator may terminate the program as of the date when the Government has purchased 15,000,000 pounds of contained combined pentoxides (Cb_2O_5 plus Ta_2O_5).

SEC. 4. *Participation under the program.* Any seller may offer for sale to the Government columbium-tantalum bearing ores and concentrates of either domestic or foreign origin which meet the specifications provided in section 5 of this regulation by delivering and offering such material to the Government in accordance with the terms and conditions as set forth in this regulation, at any time prior to the termination of the program.

SEC. 5. *Specifications and price.* The Government shall pay the following price for columbium-tantalum bearing ores and concentrates meeting the following specifications, determined on a dry weight basis:

(a) For columbium ores and concentrates containing not less than 35 percent combined Cb_2O_5 and Ta_2O_5, and having a Cb_2O_5 and Ta_2O_5 ratio of not less than one to one; impurities not to exceed the following maximum limits:

	Percent
TiO_2	8
SnO_2	8
FeO	25
NnO	13

$1.40 per pound of combined contained pentoxide, plus 2 cents per pound for each additional full percent of combined contained pentoxide above 35 percent.

(b) For tantalum ores and concentrates containing not less than 25 percent Ta_2O_5 and less than 20 percent Cb_2O_5, and containing not in excess of the following maximum impurities:

	Percent
TiO_2	4
SnO_2	4

$3 per pound of contained Ta_2O_5 in ores and concentrates containing 30–40 percent Ta_2O_5, plus 3 cents per pound for each additional full percent of contained Ta_2O_5 above 40 percent, plus an additional 4 cents per pound for each full percent of contained Ta_2O_5 above 50 percent.

PENALTY: For tantalum ores and concentrates containing between 25 and 30 percent of Ta_2O_5, 6.0 cents per pound will be deducted for each full percent of contained Ta_2O_5 under 30 percent.

(c) For columbium-tantalum ores and concentrates containing 25 percent or more of Ta_2O_5 and 20 percent or more of Cb_2O_5, and containing not in excess of the following maximum impurities:

	Percent
TiO_2	4
SnO_2	4

$1.60 per pound of combined contained pentoxide in ores or concentrates containing a minimum of 45 percent combined pentoxide, plus 2 cents per pound for each additional full percent of combined pentoxide above 45 percent.

(d) Columbium-tantalum bearing ores and concentrates failing to meet the specifications set forth in paragraphs (a), (b) and (c) of this section will be considered for purchase by the Government provided the seller bears the cost of upgrading to the minimum specifications.

(e) Bonus: For lots meeting the above specifications, an incentive bonus amounting to 100 percent of the price specified in paragraphs (a), (b) and (c) of this section will be paid on all accepted deliveries, except that no bonus shall be paid on any lot previously owned by the Government.

SEC. 6. *Purchase agents.* The Fansteel Metallurgical Corporation, North Chicago, Illinois, the Wah Chang Corporation, New York, New York, and the Emergency Procurement Service of the General Services Administration, shall act as purchase agents for and on behalf of the Government under this program. Offers of ores to the Government under this program shall be made to such agents. Purchases made hereunder by the Emergency Procurement Service shall be for the national stockpile.

SEC. 7. *Deliveries and certification.* Deliveries of all purchases made under this program shall be in lots of not less than 2,000 pounds, and shall be (a) in the case of materials of foreign origin, c. i. f. Atlantic ports, and (b) in the case of materials of domestic source, f. o. b. depot of purchasing agent. Each lot offered to the Government hereunder shall be accompanied by a certificate disclosing the identity of the actual producer. In the event the seller is not the actual producer of the ore, the seller shall receive payment only in the amount of the base purchase price and the bonus payment shall be paid by the Government direct to the actual producer.

SEC. 8. *Weighing, sampling and analysis.* All deliveries shall be subject to weight, sampling, moisture determination and analysis by the Government at its own expense prior to acceptance. The seller may, at his own expense, have a representative present at the weighing and sampling. Each shipment shall be sampled at the time of unloading at the receiving point by a sampler designated by the Administrator. Each sample shall be analyzed by a recognized commercial laboratory selected by the Administrator. All shipments found not to meet the specifications provided herein shall be rejected. The seller shall be accorded fifteen (15) days to remove the shipment from the unloading site. Upon failure to remove the shipment within fifteen (15) days of due notice, the Administrator may, at his discretion, remove such shipment and the costs of such removal shall be for the account of the seller; or the Administrator may, at his option, otherwise dispose of such shipment without liability therefor.

Dated: July 28, 1952.

JESS LARSON,
Defense Materials Procurement Administrator.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 3—VETERANS CLAIMS

PROVISIONAL REGULATIONS

A new § 3.1516 is added as follows:

§ 3.1516 *Instructions relating to increases in statutory awards and the granting thereof to veterans suffering the anatomical loss or loss of use of a creative organ or suffering from arrested tuberculosis.* (a) Public Law 427, 82d Congress reads as follows:

That (A) subparagraph (k), paragraph II, part I, Veterans Regulation Numbered 1 (a), as amended, is hereby amended to read as follows:

(k) If the disabled person, as the result of service-incurred disability, has suffered the anatomical loss or loss of use of a creative organ, or one foot, or one hand, or blindness of one eye, having only light perception, the rate of compensation therefor shall be $47 per month independent of any other compensation provided in part I, paragraph II, subparagraphs (a) to (j); and in the event of anatomical loss or loss of use of a creative organ, or one foot, or one hand, or blindness of one eye, having only light perception, in addition to the requirement for any of the rates specified in subparagraphs (l) to (n), inclusive, of part I, paragraph II, the rate of compensation shall be increased by $47 per month for each such loss or loss of use, but in no event to exceed $400 per month.

(B) The rate of compensation provided under subparagraph (l), paragraph II, part I, Veterans Regulation Numbered 1 (a), as amended, is hereby increased to $266.

(C) The rate of compensation provided under subparagraph (m), paragraph II, part I, Veterans Regulation Numbered 1 (a), as amended, is hereby increased to $313.

(D) The rate of compensation provided under subparagraph (n), paragraph II, part I, Veterans Regulation Number 1 (a), as amended, is hereby increased to $353.

(E) The rates of compensation provided by subparagraphs (o) and (p), paragraph II, part I, Veterans Regulation Numbered 1 (a), as amended, are hereby increased to $400.

SEC. 2. Paragraph II, part I, Veterans Regulation Numbered 1 (a), as amended, is hereby amended by adding a new subparagraph (q) to read as follows:

(q) If the disabled person is shown to have had a service-incurred disability resulting from an active tuberculosis disease, which disease in the judgment of the Administrator of Veterans' Affairs has reached a condition of complete arrest, the monthly compensation shall be not less than $67.

SEC. 3. The rate of compensation provided by the last paragraph of section 202 (3) of the World War Veterans' Act, 1924, as amended (38 U. S. C. 473), for the loss of the use of a creative organ or one or more feet or hands is hereby increased to $47.

SEC. 4. The rate of compensation provided in section 202 (7) of the World War Veterans' Act, 1924, as amended (38 U. S. C. 480), for arrested tuberculosis is hereby increased to $67.

SEC. 5. All rates of compensation provided by the last two provisos of the first paragraph of section 202 (3) of the World War Veterans' Act, 1924, as amended (38 U. S. C. 473), are hereby increased 11 per centum: *Provided,* That in any case the rate of compensation, is increased, shall be further adjusted upward or downward to the nearest dollar.

SEC. 6. The maximum additional sum authorized by section 202 (5), World War Veterans' Act, 1924, as amended (38 U. S. C. 478), for the need of a nurse or attendant is hereby increased to $67.

SEC. 7. The rates of compensation authorized by this act shall be effective from the first day of the second calendar month following the date of approval of this act.

(b) The principles of § 3.131 will be followed in determining entitlement to special monthly compensation under subparagraph (k), Veterans Regulation 1 (a), Part I (or Part II), Paragraph II, as amended (38 U. S. C. ch. 12). As to § 3.131 (b), the word trauma includes disease in all applications of § 3.131; for the particular purpose of subparagraph (k) the requirements of line of duty, incurrence (or aggravation) between specified dates, and requirement of direct service connection as contrasted with service connection by statutory presumption do not apply. The non-application of these three requirements under subparagraph (k) brings it about that a number of World War I veterans having lost the use of a creative organ with additional compensation denied under section 202 (3) by reason of noncompliance with one or more of these requirements may be entitled under subparagraph (k) as well as veterans of World War II, peacetime service, and service within the purview of Public Law 28, 82d Congress. Examinations with proper diagnostic methods may be ordered when avulsion or complete atrophy of an organ is not established. The advice of the Chief Medical Officer should be secured in doubtful cases. As to § 3.131 (f), the cases of women veterans will not be routinely referred to Central Office but will be adjudicated locally.

(c) By virtue of the increases provided by this Act it will be possible to prospectively effect apportionments under subparagraphs (l) through (p) of Veterans Regulation 1 (a), Part I, paragraph II, as amended, or the corresponding peacetime rate, on the current rate for total disability, $172.50 monthly, rather than on the basis of $138 as presently provided by § 3.312 (g).

(d) Section 7 of Public Law 427, 82d Congress, provides that "The rates of compensation authorized by this act shall be effective from the first day of the second calendar month following the date of approval of this act". The effective dates of awards, will be in accordance with the provisions of controlling regulations provided that in no event will benefits under Public Law 427, 82d Congress be awarded for any period prior to August 1, 1952. The increases provided shall be effective August 1, 1952 as to those cases in which no claim is required and as to claims pending or in an appellate status on June 30, 1952. In new claims filed on or after June 30, 1952 and prior to August 1, 1952, the increased rate or new benefit will be effective August 1, 1952. (Instruction No. 1, Pub. Law 427, 82d Cong.)

(Sec. 5, 43 Stat. 608, as amended, sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9; 38 U. S. C. 11a, 426, 707)

This regulation is effective August 1, 1952.

[SEAL] H. V. STIRLING,
Deputy Administrator.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 858]

MONTANA

MODIFICATION OF WITHDRAWAL OF LANDS ON FORT PECK RESERVATION

By virtue of the authority vested in the President of the United States and delegated to the Secretary of the Interior in Executive Order 10355 (May 26, 1952; 17 F. R. 4831), it is ordered as follows:

The order of the Secretary of the Interior dated September 19, 1934 (54 I. D. 559, 563), temporarily withdrawing from disposal the undisposed-of lands on certain Indian reservations, including the Fort Peck Reservation in Montana, that had theretofore been "opened", or authorized to be "opened", to disposal under the public-land laws, or which were subject to mineral entry and disposal under the mining laws of the United States, and the order of the Assistant Secretary of the Interior dated November 5, 1935, continuing the temporary withdrawal of the undisposed-of "opened" lands on certain Indian reservations, including the Fort Peck Reservation in Montana, are hereby modified to the extent of permitting, where otherwise authorized by existing law, the allotment of such lands on the Fort Peck Reservation in Montana to individual Indians of that reservation.

MASTIN G. WHITE,
Acting Secretary of the Interior.

JULY 25, 1952.

TITLE 45—PUBLIC WELFARE

Chapter IV—Office of Vocational Rehabilitation, Federal Security Agency

PART 402—BUSINESS ENTERPRISES PROGRAM FOR THE BLIND

TERMS

Pursuant to the authority conferred by the Labor-Federal Security Appropriation Act 1953, Public Law 452, approved July 5, 1952, governing Federal reimbursement for one-half of necessary expenditures for acquisition of vending stands and other equipment to be controlled by the State Agency for the use of blind persons, the regulations prescribed pursuant to the Labor-Federal Security Appropriation Act 1943, approved July 8, 1947 (12 F. R. 4644), as revised by the regulations relating to the same subject prescribed pursuant to the Omnibus Appropriation Act 1951, Public Law 759, approved September 6, 1950 (15 F. R. 6449), are hereby adopted and prescribed as the regulations under the Labor-Federal Security Appropriation Act 1953, with the following change:

Section 402.2 (a) is hereby changed to read as follows:

§ 402.2 *Terms.* • • •

(a) "Act" means Title II of Public Law 452, approved July 5, 1952, known officially as the "Federal Security Agency Appropriation Act 1953."

(Pub. Law 452, 82d Cong.)

[SEAL] OSCAR R. EWING,
Federal Security Administrator.

PROPOSED RULE MAKING

DEPARTMENT OF THE TREASURY

Bureau of Internal Revenue

[26 CFR Part 324]

EXCISE TAX ON DIESEL FUEL

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Commissioner of Internal Revenue, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 2455 and 3791 of the Internal Revenue Code (65 Stat. 452, 53 Stat. 467; 26 U. S. C. 2455, 3791).

[SEAL] NORMAN A. SUGARMAN,
Acting Commissioner of Internal Revenue.

PART 324—EXCISE TAX ON DIESEL FUEL

SUBPART A—INTRODUCTORY PROVISIONS

Sec.
324.0 Scope of part.

SUBPART B—DEFINITIONS

324.10 Meaning of terms.

SUBPART C—TAX ON DIESEL FUEL

324.20 Effective period.
324.21 Application of the tax on sale of taxable liquid.
324.22 Application of the tax on use of taxable liquid.
324.23 Rate of tax.

SUBPART D—GENERAL EXEMPTIONS

324.30 Sales to States or political subdivisions thereof.
324.31 Sales for export.
324.32 Proof of exportation.
324.33 Shipments to possessions of the United States.

SUBPART E—ADMINISTRATIVE PROVISIONS

324.40 Returns.
324.41 Payment of taxes.
324.42 Records.
324.43 Jeopardy assessments.
324.44 Nontaxable use or sale by vendee.
324.45 Credit or refund generally.
324.46 Penalties and interest.
324.47 Promulgation of regulations.

AUTHORITY: §§ 324.0 to 324.47 issued under 53 Stat. 467, 65 Stat. 452; 26 U. S. C. 3791, 2455.

SUBPART A—INTRODUCTORY PROVISIONS

§ 324.0 *Scope of part.* (a) Sections 324.0 to 324.47, inclusive, apply to the excise tax imposed by Chapter 20 of the Internal Revenue Code, relating to diesel fuel. These sections deal with the determination of tax liability, the computation of the tax, the manner of its application, the collection and return of tax, the imposition of penalties, credits and refunds, tax-free sales, and related matters.

(b) The statutory references are to the Internal Revenue Code, unless otherwise stated.

SUBPART B—DEFINITIONS

SEC. 3797. DEFINITIONS.

(a) When used in this title, where not otherwise distinctly expressed or manifestly incompatible with the intent thereof—

(1) *Person.* The term "person" shall be construed to mean and include an individual, a trust, estate, partnership, company, or corporation.

(2) *Partnership and partner.* The term "partnership" includes a syndicate, group, pool, joint venture, or other unincorporated organization, through or by means of which any business, financial operation, or venture is carried on, and which is not, within the meaning of this title, a trust or estate or a corporation; and the term "partner" includes a member in such a syndicate, group, pool, joint venture, or organization. • • •

(3) *Corporation.* The term "corporation" includes associations, joint-stock companies, and insurance companies.

• • • • • • •

(9) *United States.* The term "United States" when used in a geographical sense includes only the States, the Territories of Alaska and Hawaii, and the District of Columbia.

(10) *State.* The word "State" shall be construed to include the Territories and the District of Columbia, where such construction is necessary to carry out provisions of this title.

(11) *Secretary.* The term "Secretary" means the Secretary of the Treasury.

(12) *Commissioner.* The term "Commissioner" means the Commissioner of Internal Revenue.

(13) *Collector.* The term "collector" means collector of internal revenue.

(14) *Taxpayer.* The term "taxpayer" means any person subject to a tax imposed by this title.

• • • • • • •

(b) Includes and including. The terms "includes" and "including" when used in a definition contained in this title shall not be deemed to exclude other things otherwise within the meaning of the term defined.

§ 324.10 *Meaning of terms.* (a) As used in this part the terms defined in the applicable provisions of law shall have the meanings so assigned to them.

(b) The term "sale" includes any agreement whereby the seller transfers the property (that is, the title or the substantial incidents of ownership) in goods to the buyer for a consideration called the price, which may consist of money, services or other things.

(c) The term "diesel-powered highway vehicle" includes any vehicle powered or propelled by a diesel motor or engine and of the type which would be licensed by the various States as a highway vehicle. However, the term does not include equipment of the type designed primarily for use in road building, farming, coal mining, lumbering, oil production, etc., which because of its dimensions, weight, or other specifications is not designed for use as a highway vehicle and may not legally move over the highway, except under special permit.

(d) The term "taxable liquid" includes any liquid which is sold or used as a fuel in a diesel-powered highway vehicle but does not include a product taxable under the provisions of section 3412 of the Code, relating to the tax on gasoline.

(e) The term "Territory of the United States" means the territories of Alaska and Hawaii.

SUBPART C—TAX ON DIESEL FUEL

SEC. 2450. TAX ON DIESEL FUEL (AS ADDED BY SECTION 441 (A) OF THE REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

There is hereby imposed a tax of 2 cents a gallon upon any liquid (other than any product taxable under section 3412)—

(1) Sold by any person to an owner, lessee, or other operator of a diesel-powered highway vehicle, for use as a fuel in such vehicle, or

(2) Used by any person as a fuel in a diesel-powered highway vehicle unless there was a taxable sale of such liquid under clause (1). On and after April 1, 1954, the tax imposed by this section shall be 1½ cents a gallon in lieu of 2 cents a gallon.

SEC. 441 (B) OF THE REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951

(b) *Effective date.* The amendment made by subsection (a) shall take effect on the first day of the first month which begins more than ten days after the date of the enactment of this act.

§ 324.20 *Effective period.* The tax imposed by section 2450 is effective with respect to the sale or use of any taxable liquid as a fuel in a diesel-powered highway vehicle on and after November 1, 1951.

§ 324.21 *Application of the tax on sale of taxable liquid.* (a) The tax imposed by clause (1) of section 2450 of the Code applies to the sale of any taxable liquid to an owner, lessee, or other operator of a diesel-powered highway vehicle for use as a fuel in such a vehicle, regardless of whether the vehicle is actually employed in highway or off-highway use.

(b) For purposes of the tax, the sale of a taxable liquid to an owner, lessee, or other operator of a diesel-powered highway vehicle shall be considered a taxable sale of such liquid (1) where the liquid is delivered by the vendor into the fuel supply tank of the vehicle, or (2) where not so delivered, the vendee indicates in writing at the time of the sale that the entire quantity of the liquid covered by the sale is for use by him as a fuel in a diesel-powered highway vehicle. See § 324.44 for provisions relating to credit or refund where any liquid purchased tax-paid is used by the vendee otherwise than as a fuel in a diesel-powered highway vehicle.

(c) The tax is payable by the person who makes the taxable sale. Where a taxable liquid is consigned to a person for sale and the consignor maintains control over the terms and prices for which the liquid may be sold by the consignee, the consignor is the person liable for the tax when a taxable sale of the liquid is made by the consignee. In the event the consignor maintains no control over the terms and prices for which the liquid may be sold by the consignee, such consignee is the person liable for the tax upon the taxable sale of such liquid.

(d) In the case of a taxable sale on credit, the tax applies whether or not the purchase price of the liquid is actually collected from the vendee.

§ 324.22 *Application of the tax on use of taxable liquid.* (a) If a person acquires a taxable liquid by any means other than through a transaction subject to tax under clause (1) of section 2450 and uses it as a fuel in a diesel-powered highway vehicle, he shall be liable for tax under clause (2) of section 2450 on the quantity of such liquid so used. The tax is applicable regardless of whether the vehicle is actually employed in highway or off-highway use.

(b) The quantity of such taxable liquid placed by the taxpayer-user in the fuel supply tank of a diesel-powered highway vehicle shall be presumed to be used as a fuel in such vehicle, and therefore subject to tax, unless the taxpayer establishes by competent evidence that a portion of the quantity placed in such fuel supply tank was used otherwise than as a fuel in such vehicle. If such fact is established the tax shall apply only to the quantity of the taxable liquid actually used as a fuel in diesel-powered highway vehicle.

§ 324.23 *Rate of tax.* For the period November 1, 1951 through March 31, 1954, the rate of tax is 2 cents a gallon. For the period beginning April 1, 1954, the rate of tax is 1½ cents a gallon.

SUBPART D—GENERAL EXEMPTIONS

SEC. 2453. TAX-FREE SALES AND USES (AS ADDED BY SECTION 441 (A) OF THE REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Under regulations prescribed by the Secretary, no tax under this chapter shall be imposed with respect to the sale of any liquid for the exclusive use of any State, Territory of the United States, or any political subdivision of the foregoing, or the District of Columbia, or with respect to the use by any of the foregoing of any liquid as fuel in a diesel-powered highway vehicle.

§ 324.30 *Sales to States or political subdivisions thereof, etc.* (a) The tax imposed by section 2450 does not apply in the case of a sale of any taxable liquid by any person to a State, Territory of the United States or any political subdivision thereof, or the District of Columbia, for its exclusive use, or in the case of the use of any taxable liquid by any State, Territory of the United States, or any political subdivision thereof, or the District of Columbia, as a fuel in a diesel-powered highway vehicle.

(b) Any vendor claiming exemption under this section shall be prepared to produce evidence which will establish the right to exemption from the tax imposed by section 2450. Generally, clearly identified orders or contracts of a State, Territory of the United States, or a political subdivision thereof, or the District of Columbia, when signed by an authorized officer thereof will be accepted in support of the exemption. However, in the absence of such orders or contracts, a statement signed by such an authorized officer that the liquid sold was purchased for the exclusive use of a State, Territory of the United States, or political subdivision thereof, or the District of Columbia, will be acceptable.

EXPORTS, AND SHIPMENTS TO POSSESSIONS OF THE UNITED STATES

SEC. 2454. APPLICABILITY OF ADMINISTRATIVE PROVISIONS (AS ADDED BY SECTION 441 (A) OF THE REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

All provisions of law (including penalties) applicable in respect of the taxes imposed by section 2700 shall, insofar as applicable and not inconsistent with this chapter, be applicable in respect of the taxes imposed by this chapter.

SEC. 2705. EXPORTATION.

Under such rules and regulations as the Commissioner with the approval of the Secretary may prescribe, the tax imposed under section 2700 (a) shall not apply in respect of articles sold or leased for export or for shipment to a possession of the United States and in due course so exported or shipped. • • •.

§ 324.31 *Sales for export.* (a) The tax imposed by section 2450 does not apply in the case of a sale of any taxable liquid for export. To be exempt from tax on such a sale for export, it is necessary that the vendor establish (1) the liquid was sold by him for export, and (2) that the liquid was exported in due course.

(b) A sale for export means a sale with the intent of severing the article from the mass of things belonging within the United States and the landing thereof in a foreign country for the purpose of uniting it with the mass of things belonging within such foreign country.

(c) A taxable liquid will be regarded as having been sold by the vendor for export if the vendor has in his possession at the time title to the liquid passes to the vendee, or at the time of shipment to the vendee (whichever is prior), a written order or contract of sale indicating that the liquid is to be exported to a foreign destination prior to use in the United States.

(d) The written order or contract of sale suspends liability for the payment of the tax by the vendor on such sales for export for a period of six months from the date when title passes or the date of shipment to the vendee, whichever is prior. If within such period the vendor has not received proper "proof of exportation" (see § 324.32), then the temporary suspension of the liability for the payment of the tax ceases and the vendor shall include the tax on the sale of such liquid in his return for the month in which such 6-month period expires.

§ 324.32 *Proof of exportation.* (a) Exportation may be evidenced by (1) a copy of the export bill of lading issued by the delivering carrier, or (2) a certificate by the agent or representative of the export carrier showing actual exportation of the liquid, or (3) a certificate of landing signed by a customs officer of the foreign country to which the article is exported, or (4) where such foreign country has no customs administration, a statement of the foreign consignee showing receipt of the liquid.

(b) In any case where the vendor does not have in his possession within the 6-month period, proof of exportation as outlined herein, the vendor must pay the tax involved. If proof of exportation later becomes available, a claim for refund of any tax paid may be filed on Form 843, or a credit may be taken upon any subsequent monthly return, but such action must be taken within the 4-year period of limitations prescribed by section 3313.

(c) In all cases the sales records, together with the evidence of exportation, must be preserved by the vendor for a period of at least four years from the last day of the month following the sale, and must be readily accessible for inspection by internal-revenue officers.

§ 324.33 *Shipments to possessions of the United States.* (a) The same provisions as relate to sales for export and proof of exportation will apply to sales for shipment to a possession of the United States. (See §§ 324.31 and 324.32).

(b) The term "possession of the United States" includes the Panama Canal Zone, the Virgin Islands, Guam, Puerto Rico, American Samoa, Wake, and the Midway Islands.

(c) This exemption does not apply with respect to sales of any taxable liquid for shipment to the Territories of Alaska and Hawaii for the reason that these Territories are by definition included in the term "United States". (See section 3797 (a) (9).)

SUBPART E—ADMINISTRATIVE PROVISIONS

SEC. 2451. RETURNS AND PAYMENT (AS ADDED BY SECTION 441 (A) OF THE REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Requirement.* Every person liable for tax under this chapter shall make returns and pay the taxes due to the collector for the district in which is located his principal place of business, or if he has no principal place of business in the United States, then to the collector at Baltimore, Maryland. Such returns shall contain such information and be made at such times and in such manner as the Secretary may by regulations prescribe.

(b) *Interest.* The tax shall, without assessment or notice, be due and payable to the collector at the time prescribed for filing the return. If the tax is not paid when due, there shall be added as part of the tax interest at the rate of 6 per centum per annum from the time when the tax became due until paid.

SEC. 2454. APPLICABILITY OF ADMINISTRATIVE PROVISIONS (AS ADDED BY SECTION 441 (A) OF THE REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

All provisions of law (including penalties) applicable in respect of the taxes imposed by section 2700 shall, insofar as applicable and not inconsistent with this chapter, be applicable in respect of the taxes imposed by this chapter.

SEC. 2711. OTHER LAWS APPLICABLE.

All administrative, special, or stamp provisions of law, including the law relating to the assessment of taxes, so far as applicable, shall be extended to and made a part of this subchapter.

SEC. 2709. RECORDS, STATEMENTS, AND RETURNS.

Every person liable to any tax imposed by this subchapter, or for the collection thereof, shall keep such records, render under oath such statements, make such returns, and comply with such rules and regulations, as the Commissioner, with the approval of the Secretary, may from time to time prescribe.

SEC. 3603. NOTICE REQUIRING RECORDS, STATEMENTS, AND SPECIAL RETURNS.

Whenever in the judgment of the Commissioner necessary he may require any person, by notice served upon him, to make a return, render under oath such statements, or keep such records as the Commissioner deems sufficient to show whether or not such person is liable to tax.

SEC. 3632. AUTHORITY TO ADMINISTER OATHS, TAKE TESTIMONY, AND CERTIFY.

(a) *Internal Revenue Personnel—(1) Persons in charge of administration of internal revenue laws generally.* Every collector, deputy collector, internal revenue agent, and internal revenue officer assigned to duty under an internal revenue agent, is authorized to administer oaths and to take evidence touching any part of the administration of the internal revenue laws with which he is charged, or where such oaths and evidence are authorized by law or regulation authorized by law to be taken.

(2) *Persons in charge of exports and drawbacks.* Every collector of internal revenue and every superintendent of exports and drawbacks is authorized to administer such oaths and to certify to such papers as may be necessary under any regulation prescribed under the authority of the internal revenue laws.

(b) *Others.* Any oath or affirmation required or authorized by any internal revenue law or by any regulations made under authority thereof may be administered by any person authorized to administer oaths for general purposes by the law of the United States, or of any State, Territory or possession of the United States, or of the District of Columbia, wherein such oath or affirmation is administered, or by any consular

officer of the United States. This subsection shall not be construed as exclusive enumeration of the persons who may administer such oaths or affirmations.

SEC. 3614. EXAMINATION OF BOOKS AND WITNESSES.

(a) *To determine liability of the taxpayer.* The Commissioner, for the purpose of ascertaining the correctness of any return or for the purpose of making a return where none has been made, is authorized, by any officer or employee of the Bureau of Internal Revenue, including the field service, designated by him for that purpose, to examine any books, papers, records, or memoranda bearing upon the matters required to be included in the return, and may require the attendance of the person rendering the return or of any officer or employee of such person, or the attendance of any other person having knowledge in the premises, and may take his testimony with reference to the matter required by law to be included in such return, with power to administer oaths to such person or persons.

• • • • •

SEC. 3612. RETURNS EXECUTED BY COMMISSIONER OR COLLECTOR.

(a) *Authority of collector.* If any person fails to make and file a return or list at the time prescribed by law or by regulation made under authority of law, or makes, wilfully or otherwise, a false or fraudulent return or list, the collector or deputy collector shall make the return or list from his own knowledge and from such information as he can obtain through testimony or otherwise.

(b) *Authority of commissioner.* In any such case the Commissioner may, from his own knowledge and from such information as he can obtain through testimony or otherwise—

(1) *To make return.* Make a return, or

(2) *To amend collector's return.* Amend any return made by a collector or deputy collector.

(c) *Legal status of returns.* Any return or list so made and subscribed by the Commissioner, or by a collector or deputy collector and approved by the Commissioner, shall be prima facie good and sufficient for all legal purposes.

• • • • •

SEC. 3658. FRACTIONAL PARTS OF A CENT.

In the payment of any tax under this title not payable by stamp a fractional part of a cent shall be disregarded unless it amounts to one-half cent or more, in which case it shall be increased to 1 cent.

§ 324.40 *Returns.* (a) Every person liable for the payment of the tax imposed by section 2450 of the Code shall file on or before the last day of each month a return showing the tax due for the preceding month on Form 725 in accordance with the instructions thereon. The return shall be filed with the collector of internal revenue for the district in which is located the principal place of business of the person required to make the return. If such person has no principal place of business in the United States, the return shall be filed with the Collector of Internal Revenue, Baltimore, Maryland.

(b) When the last day of the month in which a return and payment are due falls on Sunday or a legal holiday, the return may be filed and payment made on the next secular or business day. A return shall be filed with the collector for each month whether or not any liability has been incurred for that month. If a person ceases the operation of a business for which a return must be filed, the last return shall be marked "Final return".

§ 324.41 *Payment of taxes.* All taxes are due and payable to the collector of internal revenue, without assessment by the Commissioner or notice from the collector, at the time fixed for filing the return. If the tax is not paid when due there shall be added as part of the tax interest at the rate of 6 per cent per annum from the time the tax became due to the actual date of payment or assessment, whichever is prior. For provisions with respect to interest generally, including interest on assessments, see § 324.45.

§ 324.42 *Records.* (a) Every person required to file a return and pay tax on the sale or use of any taxable liquid as a fuel in a diesel-powered highway vehicle, shall keep on file at his principal place of business, or some other convenient or safe location, accurate records and accounts of all taxable transactions. Evidence with respect to sales on which no tax is due, such as sales for export, or shipment to a possession of the United States, or sales to States and Territories of the United States or political subdivisions thereof, must be maintained.

(b) The records shall contain sufficient information to enable the Commissioner to determine whether the correct amount of tax has been paid. Such records shall at all times be open for inspection by internal-revenue officers, and shall be maintained for a period of at least four years from the date the tax became due or, in the case of tax-free sales, for a period of at least four years from the last day of the month following the month in which the sale was made.

SEC. 3660. JEOPARDY ASSESSMENT.

(a) If the Commissioner believes that the collection of any tax (other than income tax, estate tax, and gift tax) under any provision of the internal-revenue laws will be jeopardized by delay, he shall, whether or not the time otherwise prescribed by law for making return and paying such tax has expired, immediately assess such tax (together with all interest and penalties the assessment of which is provided for by law). Such tax, penalties, and interest shall thereupon become immediately due and payable, and immediate notice and demand shall be made by the collector for the payment thereof. Upon failure or refusal to pay such tax, penalty, and interest, collection thereof by distraint shall be lawful without regard to the period prescribed in section 3690.

(b) The collection of the whole or any part of the amount of such assessment may be stayed by filing with the collector a bond in such amount, not exceeding double the amount as to which the stay is desired, and with such sureties, as the collector deems necessary, conditioned upon the payment of the amount collection of which is stayed, at the time at which, but for this section, such amount would be due.

§ 324.43 *Jeopardy assessment.* (a) Whenever, in the opinion of the collector, it becomes necessary to protect the interests of the Government by effecting immediate collection of the tax, the Commissioner can immediately assess the tax, together with all penalties and interest due. Such tax, penalties, and interest will, upon assessment, become immediately due and payable, and the collector shall, without delay, issue a notice and demand for payment thereof in full.

(b) The collection of the whole or any part of the amount of the jeopardy assessment may be stayed by filing with the collector a bond in such amount, not exceeding double the amount with respect to which the stay is desired, and with such sureties as the collector deems necessary, conditioned upon the payment of the amount, collection of which is stayed, at the time at which such amount would normally be due.

(c) Upon refusal to pay, or failure to pay or give bond, the collector shall proceed immediately to collect by distraint the tax, penalty, and interest, without regard to the 10-day period after notice and demand prescribed in section 3690.

SEC. 2452. CREDITS AND REFUNDS (AS ADDED BY SECTION 441 (a) OF THE REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

(a) *Non-taxable use or sale by vendee.* A credit against tax under this chapter, or a refund, may be allowed or made to a person in the amount of tax paid by him under this chapter with respect to his sale of any liquid to a vendee for use as fuel in a diesel-powered highway vehicle, if such person establishes, in accordance with regulations prescribed by the Secretary, that—

(1) The vendee used such liquid otherwise than as fuel in such a vehicle or resold such liquid, and

(2) Such person has repaid or agreed to repay the amount of such tax to such vendee, or has obtained the consent of the vendee to the allowance of the credit or refund.

No interest shall be allowed with respect to any amount of tax credited or refunded under the provisions of this subsection.

(b) *Proof required in case of certain overpayments.* No overpayment of tax under this chapter shall be credited or refunded (otherwise than under subsection (a) in pursuance of a court decision or otherwise, unless the person who paid the tax establishes, in accordance with regulations prescribed by the Secretary, (1) that he has not included the tax in the price of the article with respect to which it was imposed, or collected the amount of tax from the vendee, or (2) that he has repaid the amount of the tax to the ultimate purchaser of the article, or files with the Secretary written consent of such ultimate purchaser to the allowance of the credit or refund.

SEC. 3770. AUTHORITY TO MAKE ABATEMENTS, CREDITS, AND REFUNDS.

(a) *To taxpayers*—(1) *Assessments and collections generally.* Except as otherwise provided by law in the case of income, war-profits, excess-profits, estate, and gift taxes, the Commissioner, subject to regulations prescribed by the Secretary, is authorized to remit, refund, and pay back all taxes erroneously or illegally assessed or collected, all penalties collected without authority, and all taxes that appear to be unjustly assessed or excessive in amount, or in any manner wrongfully collected.

(2) *Assessments and collections after limitation period.* Any tax (or any interest, penalty, additional amount, or addition to such tax) assessed or paid after the expiration of the period of limitation properly applicable thereto shall be considered an overpayment and shall be credited or refunded to the taxpayer if claim therefor is filed within the period of limitation for filing such claim.

(3) *Date of allowance.* Where the Commissioner has signed a schedule of overassessments in respect of any internal revenue tax imposed by this title, the Revenue Act of 1932, or any prior revenue Act, the date on which he first signed such schedule (if after May 28, 1928) shall be considered as the date of allowance of refund or credit in respect of such tax.

(4) *Credit of overpayment of one class of tax against another class of tax due.* Notwithstanding any provision of law to the contrary, the Commissioner may, in his discretion, in lieu of refunding an overpayment of tax imposed by any provision of this title, credit such overpayment against any tax due from the taxpayer under any other provision of this title.

(5) *Delegation of authority to collectors to make refunds.* The Commissioner, with the approval of the Secretary, is authorized to delegate to collectors any authority, duty, or function which the Commissioner is authorized or required to exercise or perform under paragraph (1), (2), • • • or (4) of this subsection, • • • where the amount involved (exclusive of interest, penalties, additions to the tax, and additional amounts) does not exceed $10,000.

• • • • •

SEC. 3313. PERIOD OF LIMITATION UPON REFUNDS AND CREDITS.

All claims for the refunding or crediting of any internal revenue tax alleged to have been erroneously or illegally assessed or collected, or of any penalty alleged to have been collected without authority, or of any sum alleged to have been excessive or in any manner wrongfully collected must, except as otherwise provided by law in the case of income, war-profits, excess-profits, estate, and gift taxes, and except as otherwise provided by law in the case of employment taxes under subchapters A and D of chapter 9, be presented to the Commissioner within four years next after the payment of such tax, penalty, or sum. The amount of the refund (in the case of taxes other than income, war-profits, excess-profits, estate, and gift taxes, and other than such employment taxes) shall not exceed the portion of the tax, penalty, or sum paid during the four years immediately preceding the filing of the claim, or if no claim was filed, then during the four years immediately preceding the allowance of the refund.

SEC. 3771. INTEREST ON OVERPAYMENTS.

(a) *Rate.* Interest shall be allowed and paid upon any overpayment in respect of any internal revenue tax at the rate of 6 per centum per annum.

(b) *Period.* Such interest shall be allowed and paid as follows:

(1) *Credits.* In the case of a credit, from the date of the overpayment to the due date of the amount against which the credit is taken, but if the amount against which the credit is taken is an additional assessment of a tax imposed by the Revenue Act of 1921, 42 Stat. 227, or any subsequent Revenue Act, then to the date of the assessment of that amount.

(2) *Refunds.* In the case of a refund, from the date of the overpayment to a date preceding the date of the refund check by not more than thirty days, such date to be determined by the Commissioner, whether or not such refund check is accepted by the taxpayer after tender of such check to the taxpayer. The acceptance of such check shall be without prejudice to any right of the taxpayer to claim any additional overpayment and interest thereon.

(c) *Additional assessment defined.* As used in this section the term "additional assessment" means a further assessment for a tax of the same character previously paid in part, and includes the assessment of a deficiency of any income or estate tax imposed by the Revenue Act of 1924, 43 Stat. 253, or by any subsequent Revenue Act.

• • • • •

SEC. 3772. SUITS FOR REFUND.

(a) *Limitations*—(1) *Claim.* No suit or proceeding shall be maintained in any court for the recovery of any internal revenue tax alleged to have been erroneously or illegally assessed or collected, or of any penalty claimed to have been collected without authority, or of any sum alleged to have been excessive or in any manner wrongfully collected until a claim for refund or credit has been duly filed with the Commissioner, according to the provisions of law in that regard, and the regulations of the Secretary established in pursuance thereof.

(2) *Time.* No such suit or proceeding shall be begun before the expiration of six months from the date of filing such claim unless the Commissioner renders a decision thereon within that time, nor after the expiration of two years from the date of mailing by registered mail by the Commissioner to the taxpayer of a notice of the disallowance of the part of the claim to which such suit or proceeding relates.

(3) *Reconsideration after mailing of notice.* Any consideration, reconsideration, or action by the Commissioner with respect to such claim following the mailing of a notice by registered mail of disallowance shall not operate to extend the period within which suit may be begun. This paragraph shall not operate (A) to bar a suit or proceeding in respect of a claim reopened prior to June 22, 1936, if such suit or proceeding was not barred under the law in effect prior to that date, or (B) to prevent the suspension of the statute of limitations for filing suit under section 3774 (b) (2).

(b) *Protest or duress.* Such suit or proceeding may be maintained, whether or not such tax, penalty, or sum has been paid under protest or duress.

• • • • •

SEC. 3774. REFUNDS AFTER PERIODS OF LIMITATION.

A refund of any portion of an internal revenue tax (or any interest, penalty, additional amount, or addition to such tax) shall be considered erroneous—

(a) *Expiration of period for filing claim.* If made after the expiration of the period of limitation for filing claim therefor, unless within such period claim was filed; or

(b) *Disallowance of claim and expiration of period for filing suit.* In the case of a claim filed within the proper time and disallowed by the Commissioner if the refund was made after the expiration of the period of limitation for filing suit, unless—

(1) Within such period suit was begun by the taxpayer, or

(2) Within such period, the taxpayer and the Commissioner agreed in writing to suspend the running of the statute of limitations for filing suit from the date of the agreement to the date of final decision in one or more named cases then pending before the Board of Tax Appeals or the courts. If such agreement has been entered into, the running of such statute of limitations shall be suspended in accordance with the terms of the agreement.

• • • • •

SEC. 3775. CREDITS AFTER PERIODS OF LIMITATION.

(a) *Period against United States.* Any credit against a liability in respect of any taxable year shall be void if any payment in respect of such liability would be considered an overpayment under section 3770 (a) (2).

(b) *Period against taxpayer.* A credit of an overpayment in respect of any tax shall be void if a refund of such overpayment would be considered erroneous under section 3774.

§ 324.44 *Nontaxable use or sale by vendee.* Where a vendor who has paid tax upon the sale of a taxable liquid for use as a fuel in a diesel-powered highway vehicle establishes that his vendee used such liquid otherwise than as a fuel in a diesel-powered highway vehicle or resold such liquid, he may under the provisions of section 2452 (a) of the Internal Revenue Code take a credit for such tax paid by him against the tax shown to be due on any subsequent monthly return or he may file a claim for refund of such tax on Form 843. If a refund is claimed, Form 843 shall be completed in accordance with the instructions thereon and, in addition, there shall be attached to such form evidence showing (a) the name and address of the vendee, (b) that the taxable liquid was used otherwise than as a fuel in a diesel-powered highway vehicle or was resold by the vendee, (c) the date the tax on the sale of the liquid was paid to the United States, (d) the amount of such tax, (e) that the person claiming the refund has repaid or agreed to repay the amount of such tax to such vendee or has secured the written consent of the vendee to the allowance of the refund. A credit taken on a return shall be supported by the same evidence. No interest shall be allowed on any tax credited or refunded under the provisions of section 2452 (a).

§ 324.45 *Credit or refund generally.* (a) Where a person (vendor or user) has made an overpayment of the tax due, he may under the provisions of section 3770 of the Internal Revenue Code, either file a claim for refund on Form 843 or take credit for such overpayment against the tax due on a subsequent monthly return. A complete statement of the facts involving the overpayment shall be attached either to the claim or to the return on which the credit is claimed. Every claim for refund shall be supported by evidence showing the name and address of the taxpayer, the date of payment of the tax, and the amount of such tax. A credit taken on a return shall be supported by evidence of the same character.

(b) Where the overpayment of tax is made by a vendor with respect to his taxable sales of a taxable liquid no credit or refund shall be allowed whether in pursuance of a court decision or otherwise, unless the taxpayer files a statement explaining satisfactorily the reason for claiming the credit or refund and establishing (1) that he has not included the tax in the price of the liquid with respect to which it was imposed, or collected the amount of the tax from the purchaser, or (2) that he has either repaid the amount of the tax to the ultimate purchaser of the liquid, or has secured the written consent of such purchaser to the allowance of the credit or refund. In the latter case, the written consent of the purchaser shall accompany the statement filed with the credit or refund claim. For the purpose of the credit or refund claimed under section 3770 the "ultimate purchaser" is the person who acquired the liquid for consumption and not for resale. The statement supporting the credit or refund claim shall also show whether any previous claim for credit or refund covering the amount involved, or any part thereof, has been filed with the collector or the Commissioner.

(c) A complete and detailed record of each overpayment must be kept by the taxpayer for a period of at least four years from the date any credit is taken or refund is claimed.

SEC. 3760. CLOSING AGREEMENTS.

(a) *Authorization.* The Commissioner (or any officer or employee of the Bureau of Internal Revenue, including the field service, authorized in writing by the Commissioner) is authorized to enter into an agreement in writing with any person relating to the liability of such person (or of the person or estate for whom he acts) in respect of any internal revenue tax for any taxable period.

(b) *Finality.* If such agreement is approved by the Secretary, the Under Secretary, or an Assistant Secretary, within such time as may be stated in such agreement, or later agreed to, such agreement shall be final and conclusive, and, except upon a showing of fraud or malfeasance, or misrepresentation of a material fact—

(1) The case shall not be reopened as to the matters agreed upon or the agreement modified, by any officer, employee, or agent of the United States, and

(2) In any suit, action, or proceeding, such agreement, or any determination, assessment, collection, payment, abatement, refund, or credit made in accordance therewith, shall not be annulled, modified, set aside, or disregarded.

SEC. 2451. RETURNS AND PAYMENT (AS ADDED BY SECTION 441 (a) OF THE REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

* * * * *

(b) *Interest.* The tax shall, without assessment or notice, be due and payable to the collector at the time prescribed for filing the return. If the tax is not paid when due, there shall be added as part of the tax interest at the rate of 6 per centum per annum from the time when the tax became due until paid.

SEC. 3612. RETURNS EXECUTED BY COMMISSIONER OR COLLECTOR.

* * * * *

(d) *Additions to tax*—(1) *Failure to file return.* In case of any failure to make and file a return or list within the time prescribed by law, or prescribed by the Commissioner or the collector in pursuance of law, the Commissioner shall add to the tax 25 per centum of its amount, except that when a return is filed after such time and it is shown that the failure to file it was due to a reasonable cause and not to willful neglect, no such addition shall be made to the tax: *Provided*, That in the case of a failure to make and file a return required by law, within the time prescribed by law or prescribed by the Commissioner in pursuance of law, if the last date so prescribed for filing the return is after August 30, 1935, then there shall be added to the tax, in lieu of such 25 per centum: 5 per centum if the failure is for not more than 30 days, with an additional 5 per centum for each additional 30 days or fraction thereof during which failure continues, not to exceed 25 per centum in the aggregate.

(2) *Fraud.* In case a false or fraudulent return or list is willfully made, the Commissioner shall add to the tax 50 per centum of its amount.

* * * * *

(e) *Collection of additions to tax.* The amount added to any tax under paragraphs (1) and (2) of subsection (d) shall be collected at the same time and in the same manner and as a part of the tax unless the tax has been paid before the discovery of the neglect, falsity, or fraud, in which case the amount so added shall be collected in the same manner as the tax.

SEC. 3655. NOTICE AND DEMAND FOR TAX.

(a) *Delivery.* Where it is not otherwise provided, the collector shall in person or by deputy, within ten days after receiving any list of taxes from the Commissioner, give notice to each person liable to pay any taxes stated therein, to be left at his dwelling or usual place of business, or to be sent by mail, stating the amount of such taxes and demanding payment thereof.

(b) *Addition to tax for nonpayment.* If such person does not pay the taxes, within ten days after the service or the sending by mail of such notice, it shall be the duty of the collector or his deputy to collect the said taxes with a penalty of 5 per centum additional upon the amount of taxes, and interest at the rate of 6 per centum per annum from the date of such notice to the date of payment; except that in the case of income, estate or gift taxes, such penalties shall not apply and the interest for nonpayment of tax shall be such as is specifically provided by law with respect to such taxes.

* * * * *

SEC. 2707. PENALTIES.

(a) Any person who willfully fails to pay, collect, or truthfully account for and pay over the tax imposed by section 2700 (a), or willfully attempts in any manner to evade or defeat any such tax or the payment thereof, shall, in addition to other penalties provided by law, be liable to a penalty of the amount of the tax evaded, or not paid, collected, or accounted for and paid over, to be assessed and collected in the same manner as taxes are assessed and collected. No penalty shall be assessed under this subsection for any offense for which a penalty may be assessed under authority of section 3612.

(b) Any person required under this subchapter to pay any tax, or required by law or regulations made under authority thereof to make a return, keep any records, or supply any information, for the purposes of the computation, assessment, or collection of any tax imposed by this subchapter who willfully fails to pay such tax, make such returns, keep such records, or supply such information, at the time or times required by law or regulations, shall, in addition to other penalties provided by law, be guilty of a misdemeanor and, upon conviction thereof, be fined not more than $10,000, or imprisoned for not more than one year, or both, together with the costs of prosecution.

(c) Any person required under this subchapter to collect, account for and pay over any tax imposed by this subchapter, who willfully fails to collect or truthfully account for and pay over such tax, and any person who willfully attempts in any manner to evade or defeat any tax imposed by this subchapter or the payment thereof, shall, in addition to other penalties provided by law, be guilty of a felony and, upon conviction thereof, be fined not more than $10,000, or imprisoned for not more than five years, or both, together with the costs of prosecution.

(d) The term "person" as used in this section includes an officer or employee of a corporation, or a member or employee of a partnership, who as such officer, employee, or member is under a duty to perform the act in respect of which the violation occurs.

SEC. 3710. SURRENDER OF PROPERTY SUBJECT TO DISTRAINT.

(a) *Requirement.* Any person in possession of property, or rights to property, subject to distraint, upon which a levy has been made, shall, upon demand by the collector or deputy collector making such levy, surrender such property or rights to such collector or deputy, unless such property or right is, at the time of such demand, subject to an attachment or execution under any judicial process.

(b) *Penalty for violation.* Any person who fails or refuses to so surrender any of such property or rights shall be liable in his own person and estate to the United States in a sum equal to the value of the property or rights not so surrendered, but not exceeding the amount of the taxes (including penalties and interest) for the collection of which such levy has been made, together with costs and interest from the date of such levy.

(c) *Person defined.* The term "person" as used in this section includes an officer or employee of a corporation, or a member or employee of a partnership, who as such officer, employee, or member is under a duty to perform the act in respect of which the violation occurs.

SEC. 3793. PENALTIES AND FORFEITURES.

* * * * *

(b) *Fraudulent returns, affidavits, and claims*—(1) *Assistance in preparation or presentation.* Any person who willfully aids or assists in, or procures, counsels, or advises the preparation or presentation under, or in connection with any matter arising under, the internal revenue laws, of a false or fraudulent return, affidavit, claim, or document, shall (whether or not such falsity or fraud is with the knowledge or consent of the person authorized or required to present such return, affidavit, claim, or document) be guilty of a felony, and, upon conviction thereof, be fined not more than $10,000, or imprisoned for not more than five years, or both, together with the costs of prosecution.

(2) *Person defined.* The term "person" as used in this subsection includes an officer or employee of a corporation or a member or employee of a partnership, who as such officer, employee, or member is under a duty to perform the act in respect of which the violation occurs.

SEC. 286 OF TITLE 18 OF THE UNITED STATES CODE

CONSPIRACY TO DEFRAUD THE GOVERNMENT WITH RESPECT TO CLAIMS

Whoever enters into any agreement, combination, or conspiracy to defraud the United States, or any department or agency thereof, by obtaining or aiding to obtain the payment or allowance of any false, fictitious or fraudulent claim, shall be fined not more than $10,000 or imprisoned not more than ten years, or both.

SEC. 287 OF TITLE 18 THE UNITED STATES CODE

FALSE, FICTITIOUS OR FRAUDULENT CLAIMS

Whoever makes or presents to any person or officer in the civil, military, or naval service of the United States, or to any department or agency thereof, any claim upon or against the United States, or any department or agency thereof, knowing such claim to be false, fictitious, or fraudulent, shall be fined not more than $10,000 or imprisoned not more than five years, or both.

SEC. 1001 OF TITLE 18 OF THE UNITED STATES CODE

STATEMENTS OR ENTRIES GENERALLY

Whoever, in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals or covers up by any trick, scheme, or device a material fact, or makes any false, fictitious or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry, shall be fined not more than $10,000 or imprisoned not more than five years, or both.

SEC. 3325. PENALTIES FOR FALSE STATEMENTS TO PURCHASERS REGARDING TAX.

Whoever in connection with the sale or lease, or offer for sale or lease, of any article, or for the purpose of making such sale or lease, makes any statement, written or oral, (1) intended or calculated to lead any person to believe that any part of the price at which such article is sold or leased, or offered for sale or lease, consists of a tax imposed under the authority of the United States, or (2) ascribing a particular part of such price to a tax imposed under the authority of the United States, knowing that such statement is false or that the tax is not so great as the portion of such price ascribed to such tax, shall be guilty of a misdemeanor and upon conviction thereof shall be punished by a fine of not more than $1,000 or by imprisonment not exceeding one year, or both.

§ 324.46 *Penalties and interest.* (a) In the case of failure to file a return within the prescribed time, a certain percentage of the amount of the tax is added to the tax unless the return is later filed and failure to file the return within the prescribed time is shown to the satisfaction of the Commissioner to be due to reasonable cause and not to willful neglect. Where reasonable cause is not shown the amount to be added to the tax is 5 per cent if the failure is for not more than 30 days, with an additional 5 per cent for each additional 30 days or fraction thereof during which failure continues, not to exceed 25 per cent in the aggregate.

(b) Failure to pay tax within the time fixed for filing returns causes interest to accrue automatically, without assessment of the tax by the Commissioner or notice to the taxpayer, from the due date of the return to the actual date of payment or assessment, whichever is prior.

(c) Where assessment is made, and payment is not made within 10 days after the issuance of the first notice and demand (Form 17), there will accrue, under section 3655, a 5 percent penalty, and interest at the rate of 6 per cent per annum computed upon the entire assessment from the date of issuance of Form 17 until date of payment. Where assessment is settled by partial payments, interest is computed at the above-prescribed rate from the date of the first 10-day notice through the date of first payment and on the balance from the next succeeding day to the date of the next payment until the assessment is paid in full.

(d) If a claim for abatement is filed with the collector within 10 days after the date of the issuance of the first notice and demand, the 5 per cent penalty does not attach. If the assessment is not paid within 10 days after receipt of notice of rejection of the claim, the 5 per cent penalty applies. The filing of the claim does not stay the collection of interest, which continues to run for the full period that intervenes between the date of the first notice and demand and the date of payment.

(e) If a false or fraudulent return is willfully made, the penalty, under section 3612 (d) and (e), is 50 per cent of the total tax due for the entire period involved, including any tax previously paid.

(f) Any person who willfully fails to pay any tax due, file return, keep records, or supply information, or who willfully attempts in any manner to evade or defeat the tax, or who fraudulently makes a return or affidavit required by these regulations, is subject to a fine of $10,000, or imprisonment, or both, with costs of prosecution; and may also be liable to a penalty equal to the amount of the tax not paid. These penalties apply to an officer or employee who, as such officer or employee, is under a duty to perform the act in respect of which the violation occurs, as well as to a person who fails or refuses to perform any of the duties imposed by the Code, i. e., pay the tax, file returns, keep records, supply information, etc.

SEC. 2455. RULES AND REGULATIONS (AS ADDED BY SECTION 441 (a) OF THE REVENUE ACT OF 1951 APPROVED OCTOBER 20, 1951).

The Secretary shall prescribe and publish all needful rules and regulations for the enforcement of this chapter.

§ 324.47 *Promulgation of regulations.* In pursuance of the provisions of the law the foregoing regulations are made and promulgated.
